On the morning of the 19th ultimo, (Saturday,) Edward Thomson's failure was first known at the custom-house. In the course of that morning, Mr. William Lippincott presented three several entries of teas, per ships William Savery, Benjamin Rush, and Thomas Scattergood, requesting permission to enter into bonds, with surety, for the duties thereon, and to obtain permits for the delivery of those teas from store. The entries presented by him contained a specific quantity of teas by those several vessels, and an endorsement was on the back of each entry, purporting to be an assignment of the teas, as therein specified, from Edward Thomson (the original importer of the cargoes of those vessels) to J. and W. Lippincott & Co., dated November 19, 1825. Acceptance of those entries was refused on the ground that Thomson's failure being on that day notorious no assignments from him could be admitted; at any rate, some time ought to be allowed us for reflection. Mr. William Lippincott then exhibited, *and for the first time to our knowledge*, papers to show that an assignment of a larger portion of teas, I believe by the ship Benjamin Rush, had been made to them on the 12th of July last. Permission to enter and bond those teas was still refused. Two bonds for duties, given by Thomson, were due at bank, and returned at 3 o'clock of that day as unpaid. On Lippincott & Co. proposing to give a check for the amount of Thomson's bond, then unpaid, the entries were admitted, and also one additional entry per Benjamin Rush; and, as Messrs. Lippincott & Co. were very pressing to give the bonds and obtain permits, they were suffered to sign bonds, (which bonds I had afterwards directed to be cancelled.) This was done about 5 o'clock on the evening of Saturday, and being long after office hours, the signature of the Naval Officer could not be obtained, had permits been prepared; the permits were promised them for Monday following. It must here be observed that no suspicion of improper conduct on the part of Thomson was entertained, or suspected to exist in any degree at this time. Lippincotts & Co. can, no doubt, explain the reasons which induced the very pressing demands for permits on Saturday; it was stated to Mr. William Lippincott,

that no bonds of Thomson's would fall due until the 25th following. On comparing the entries presented by them, and that at a late hour on the same evening, with the balances of teas which ought to have been in store, and taking Thomson's written admission, produced after the bonds had been signed, which stated that those entries were intended to embrace the balance of teas belonging to him which remained unbonded by those ships; taking all these circumstances into consideration, there were indications which induced a belief that all was not right. With the information received next day, (Sunday,) and the measures taken thereon, you are acquainted, as mentioned by me in my letter of the 22d ultimo to the Secretary of the Treasury. On Monday the permit was refused, and had it been granted on Saturday the delivery from store would have been refused, until the fraud, as intimated the day preceding, could be investigated; another ground of refusal was, that I believed that when teas were deposited in store as a pledge or security to the Government, for the duties accruing thereon, and though part might be destroyed or unlawfully taken away, the remainder was justly answerable for the whole; in like manner I considered the teas in store responsible for the duties on the whole that had not been permitted, though part of them had been unlawfully removed.

The assignments made by Thomson to Lippincotts & Co. were not known at the custom-house until on the morning of the 19th ultimo, as before stated. Had they made us acquainted with the assignments, at the time they were made to them, and that they held the keys of Thomson's stores, this latter circumstance, in particular, would have excited suspicions of Thomson's affairs, which we did not entertain, and would necessarily have led to investigations, which might have prevented, in a considerable degree, the loss to which the United States are now exposed.

As respects the *cassia*, I did not know that any of that article remained in store, until I saw it so stated in the petition; they must know that a demand for cassia, or any other article than teas, was never made, and consequently no refusal to deliver could ever have been given; they may, however, take it for granted that, in the present state of things, all Thomson's property in our possession will be retained for the present. So totally unacquainted were we, at the custom-house, of the assignments referred to being in existence that Thomson, a few days before his failure, contended at the office that "he owed the United States *nothing*, so long as property of *his* remained in charge of the custom-house officers, greater in value than the amount of his liability to the United States;" these assertions were not contradicted, as we believed he had stated what was matter of fact. Had it been known that Lippincotts & Co. had conveyances of this property, and that they held the keys of his stores, from the date of the conveyances, as since stated by themselves, such expressions from Thomson would never have been made in a public office.

I rather suppose he was aware that this circumstance was confined to a particular circle. We knew not that the Lippincotts had the keys until on Monday morning, 21st ultimo, when a demand was made from Thompson of those keys, for the purpose of examining the state of those stores; nor were we allowed access to the stores with the view of ascertaining the amount of teas therein for near a week after the first intimation of frauds, Lippincotts & Co. refusing to deliver up the keys of Thomson, which they had in their possession. From the latter circumstance the exclusive possession in the custom-house officers of all goods stored for drawback or long credit must be very obvious.

The teas mentioned in the petition are those on account of which suit was brought against me by Lippincotts & Co., as stated in my letter to the Secretary of the Treasury, which you now have in your possession. The District Attorney was consulted, and he was of opinion that Lippincotts & Co. could not be allowed to enter and bond the teas in question.

I am, very respectfully, sir, your obedient servant,

JNO. STEELE.

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

P. S. As the claim of Lippincotts & Co. on Thomson's teas, the assignment of which was kept by them in mysterious silence until after his failure, I have thought it proper to lay before you extracts of two letters from them to me in relation to this subject.

From theirs of the 21st November: "We have reason to believe from what we have heard that there are 100 chests of teas now on board the schooner Enterprise, at Chestnut street wharf, which have been shipped by E. Thomson to Messrs. Smith & Nicolle and Francis H. Nicolle of New York."

Of the 100 chests mentioned by them, only 50 were found and seized by the surveyor, and put into custom-house store. These appear to be a part of 400 chests which were designed to be sent, but could not all be taken on board the brig Waterloo, which cleared for New York on the 19th ultimo, and which, after a tedious passage, arrived, and 350 chests seized and put into public store as per advice from an officer at New York on the 17th instant.

On the 26th ultimo, 650 or 669 chests were seized in the stores of Smith & Nicolle, by whom shipped we were not informed. In reference to those 650 or 669 chests, as also the 50 chests above mentioned, (the 350 chests on board the Waterloo being seized a considerable time after,) the Lippincotts addressed a note to me, dated 23d ultimo, of which the following are extracts:

"We hereby offer to enter and bond the tea comprehended in the bill of lading, transferred to us, and were yesterday found by the custom-house officers." "Those seized at New York by your officers being under similar circumstances, we likewise claim the same right, and that we may be allowed to enter and bond them also."

I cannot easily comprehend how Thomson had the opportunity of shipping teas claimed by them on his assignment, they having in their custody Thomson's keys from the period of the first assignment. The 650 or 669 chests of skin teas per Benjamin Rush, as stated above, the 350 chests of the same per Waterloo, and 50 chests per Enterprise, same kind, in all 1,050 or 1,069 chests, appear to have been fraudulently shipped by Thomson and consigned to Smith & Nicolle, as since informed, and which are now claimed by Lippincotts & Co., who have the certificates, and, as they say, were in possession of said certificates at the time they were thus fraudulently taken from store by Thomson.

On the epithets applied in their petition to myself and other officers of the customs I forbear comment.

JOHN STEELE.

C.

Edward Thomson, of the city of Philadelphia, being duly affirmed, declares: That for several years last past he has had large transactions with Joshua and William Lippincott & Co., of this city, auctioneers. These transactions consisted generally of sales for him or of advances of money or notes made by them to him in the way of their business upon the deposit of goods or transfer of bills of lading and invoices, with power to sell for their reimbursement, charging a commission and interest.

That in all these transactions the conduct of Messrs. Lippincott & Co. has been fair and *bona fide*, without any design to injure others, or to aid this deponent in injuring them, and without any knowledge on their part of the state of his affairs. That it was in the usual course of their business, and what he verily believes they would have done for any other man of character and standing. And he further says, that last spring, when he had a large cargo of teas just arrived, his account with Messrs. Lippincott & Co. was small in comparison with what it had been; he then told them he wanted no advances upon the teas he had arrived or were arriving, but that they might go on and sell them, and as sales were made hand him the notes of the purchasers. Mr. James Schott was present at this conversation. That they did so from that time towards the month of July, when, the sales becoming dull, he asked them for an advance, and they advanced him on the 12th to 19th July two hundred and forty thousand dollars, also from 4th to 18th August, sixty thousand dollars, (in notes,) besides other advances upon the remainder of the teas. And he further says, that the teas now claimed by Messrs. Lippincott & Co. are the teas upon which these advances were made, and were transferred to them as security for those advances; and he expressly says, that what he now has stated is the true account of the transaction; that there was no reserved or secret interest for this deponent, nor no understanding whatever contrary to the appearances, and that Messrs. Lippincott & Co. have really and *bona fide* made him advances to a greater amount than the teas remaining will pay.

And he further says that Messrs. Lippincott & Co. had no knowledge whatever of teas being improperly obtained from the custom-house, nor any participation in obtaining them, nor any benefit from their being obtained. On the contrary, he is well satisfied, and in justice to them thinks it right to state that they were entirely ignorant that anything wrong was done, and could have had no suspicion of it. When they made sales the greatest publicity was given to them, and one paper in Philadelphia at least gave the number of packages sold at each sale.

EDWARD THOMSON.

Duly affirmed and subscribed the 31st December, 1825, before me.

RICHARD RENSHAW,
Justice of Peace, County of Philadelphia.

I, Peter Lohra, of Philadelphia, notary public, by lawful authority duly commissioned and sworn, do hereby certify and declare unto all whom it doth or may concern, that Richard Renshaw, esq., before whom the annexed affidavit has been taken and subscribed by Edward Thomson, therein named, is a justice of the peace in and for the county of Philadelphia, in the State of Pennsylvania, duly commissioned and qualified, and by law authorized to administer oaths or affirmations, and that the name or signature "Richard Renshaw," subscribed to the jurat at the foot of the said affidavit, is of the proper handwriting of the said Richard Renshaw, and is entitled to full faith and credit accordingly in courts of justice and elsewhere.

In testimony whereof I have hereunto set my hand and affixed my notarial seal, the thirty-first day of December, 1825.

PETER LOHRA, *N. P.*

Lippincott & Co., is correct, according to their books, which have been principally kept by myself. That I am well acquainted with the transactions between Edward Thomson and J. & W. Lippincott & Co.; and that the charges of notes, &c., and credits, are bona fide transactions; and that the notes, &c., therein charged, were given to Edward Thomson on account of teas, &c.

JOS. BISPHAM, JR.

PHILADELPHIA, *December* 31, 1825.

D.

JANUARY, 1826.

SIR: Upon reflection, as the affidavits of the two Mr. Mackies and the letters of Messrs. Binney & Sergeant are explanatory of the report of General Steele, I enclose them to you, in order that they may be transmitted with the report if you should deem it proper. They were, indeed, intended to afford information to the Department on the subject in question, and should have been left this morning had I not have supposed it was then too late. The transmission of them with the report, while we shall consider it just, will confer a favor on the house which I represent here.

With great respect, your obedient servant,

B. W. RICHARDS.

Hon. RICHARD RUSH.

E.

PHILADELPHIA, *January* 2, 1826.

GENTLEMEN: Having understood that a notice given by you to the custom-house in Philadelphia, in regard to certain teas on board the schooner Enterprise, has been considered as implicating you in some connexion with their improper removal from the public store, I state, with great pleasure, my knowledge of the circumstances relating to that notice.

On the morning of the 19th November last Mr. W. Lippincott, on your behalf, applied to me for counsel in relation to certain teas which E. Thomson had shipped or was shipping to Smith & Nicolle, or Francis H. Nicolle, at New York. The statement made to me was that Mr. Thomson had some days before received your consent to his sending *two chops* of teas out of a larger parcel assigned to you as security for advances to Smith & Nicolle, under the condition that they should give you their notes for the teas at a certain rate per pound; and that you had given him the key of the store that he might obtain a delivery from the custom-house; that, in the course of the morning, you had ascertained that a larger quantity had been sent, or was in a course of transmission, than you had intended to comprehend under the description of *two chops;* that some you believed had already been shipped to New York, others were then on board one or two coasters in the Delaware; and that the sheriff had levied on them an execution at the suit of Smith & Nicolle, or Francis H. Nicolle, or both.

Upon this statement I gave the advice which I deemed expedient.

On the succeeding morning, Sunday, I saw Mr. W. Lippincott and Mr. Richards, who informed me that it was the intention of the latter to proceed immediately to New York in pursuit of that part of the teas which had sailed; and that, by the statement they had received, there were 100 chests on board the schooner Enterprise at the wharf, and not expected to sail before the middle of the week. I gave no advice at that time in regard to the course to be pursued with these 100 chests; but I am entirely satisfied that neither in this nor in the previons interview was any circumstance stated that could justify a suspicion that these teas had been removed from the custom-house stores without bonding and the official permit.

On the following Monday or Tuesday I was informed by Mr. W. Lippincott that a search-warrant had been issued by an alderman of the city to search the stores of Messrs. J. & W. Lippincott & Co. for teas alleged to have been fraudulently removed from the custom-house; and that, although the officer to whom it was delivered had shown some reluctance to execute it, he had finally, by the invitation of Mr. Lippincott, examined the stores.

At a consultation to which this event gave rise Mr. Sergeant was present, and it was the suggestion of Mr. Lippincott himself that possibly the teas in the Enterprise were in the predicament stated or referred to in the warrant, and he asked our advice upon the course which that circumstance called upon you to pursue. Mr. Sergeant and myself unhesitatingly advised that you should communicate to General Steele the information you had received of the 100 chests in the Enterprise, leaving the custom-house to take the course it thought proper. The existence of the search-warrant, and the examination of your stores, independent of all other considerations, made it expedient to state the fact, whatever might be the inference drawn from it, and we expressly alluded to that inference, which I find has been drawn, but the danger of which did not, in our opinion, make the course we advised any the less expedient.

If this statement can be of any service to you in removing that which I believe to be an entirely unfounded suspicion it will give great satisfaction to yours, very respectfully,

H. BINNEY.

Messrs. J. & W. LIPPINCOTT & Co.

F.

SOUTH FOURTH STREET, *January* 3, 1826.

DEAR SIRS: I have read with attention Mr. Binney's letter of this date addressed to you. My personal acquaintance with the matters which are the subject of it began with the consultation mentioned by Mr. Binney. In the history of that consultation, and of the notice to the custom-house which grew out of it, my recollection agrees precisely with his. I remember distinctly the first suggestion by Mr. Lippincott that the 100 chests of teas might possibly have been taken from the stores without a permit, and that it was suggested merely as a possibility and not as a fact. We considered carefully what was right to be done, having regard not only to the interests, but also to the character of your house, and we came to the conclusion that it was proper to give the notice. It was given accordingly under our advice, cautiously abstaining from an averment of the fact that the teas had been so taken, because you did not know the fact and were unwilling to assert it, or to be in any manner responsible for the consequences of the communication. I should regret extremely that what we thus advised from the best motives should be misconstrued to your prejudice.

Very truly yours,

JOHN SERGEANT.

Messrs. JOSHUA & WILLIAM LIPPINCOTT & Co.

G.

Personally appeared before me Peter Mackie, of the city of Philadelphia, who, being duly sworn, declares and says, that he has been in the employ of Edward Thomson, as principal clerk, for upwards of ten years; that he has been intimately acquainted with most of his concerns, and knows that teas have been taken by him from store without being regularly bonded, but that this deponent has ever refused to be concerned in these transactions.

That Joshua and William Lippincott & Co., each and all of them, were, as far as he knows and verily believes, entirely ignorant of the fact that any teas whatsoever imported by the said Edward Thomson were taken from the custom-house stores, or any other stores under the custom-house locks, without having the duties secured thereon according to law. And from his having settled and adjusted all accounts that have existed between the said parties for many years past, he knows, and verily believes, that all the transactions of said J. and W. Lippincott & Co. with Edward Thomson have been fair and *bona fide*, and have been conducted, on their part, in the most honorable and upright manner.

PETER MACKIE.

PHILADELPHIA, *January* 5, 1826.

Sworn and subscribed, the 5th January, 1826, before me,

AB'M. SHOEMAKER, *Alderman.*

H.

Personally appeared before me Charles Mackie, of the city of Philadelphia, who, being duly affirmed, doth declare and say, that he has been in the employ of Edward Thomson, of the said city, merchant, for four years and upwards, and has been intimately acquainted with most of his concerns, and knows that teas have been removed from stores by the said E. Thomson without being regularly bonded. And he does verily believe, and is perfectly confident, that Joshua and William Lippincott & Co., each and all of them, were entirely ignorant of the fact that any teas whatever imported by Edward Thomson were taken from the custom-house stores, or any other stores, without having the duties secured thereon according to law. And he does further know, and verily believes, that all the transactions of said J. and W. Lippincott & Co. with Edward Thomson have been fair and *bona fide*, and conducted, on their part, in the most honorable and upright manner.

CHARLES MACKIE.

PHILADELPHIA, *January* 5, 1826.

Affirmed and subscribed before me,

AB'M. SHOEMAKER, *Alderman.*

WASHINGTON, *January* 30, 1826.

SIR: I have the honor herewith to present a report of my proceedings, under the instructions of the Executive of the United States, respecting the recent transactions of the custom-house at Philadelphia, growing out of the failure of Edward Thomson, as well as respecting the general administration of that Department.

I am, with great respect, your obedient servant,

SAMUEL H. SMITH.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

[For the report see ante page 375.]

No. 1.

PHILADELPHIA, *January* 21, 1826.

SIR: Enclosed I send you my letter, in substitution of that which you received under date of the 11th instant. An apology is necessary for its being so long delayed; not being able to get out, I have waited the convenience of the alderman, who came to my house to administer the oath you required.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE.

Hon. S. H. SMITH, Esq.

COLLECTOR'S OFFICE, *Philadelphia, January* 11, 1826.

SIR: Agreeably to your request, I submit the following statement relative to Mr. E. Thomson's failure—the unlawful removal of teas from his stores, together with such circumstances as appeared in any measure connected with the subject that have come within my knowledge.

The failure of Mr. Thomson was announced on Saturday, the 19th of November last. On the same day Messrs. Lippincott applied at the custom-house for permission to enter and receive from store certain teas, mentioned in several entries, endorsed with E. Thomson's assignment to them, bearing date the day

of his failure; this circumstance appearing to present a legal objection, requiring some time for reflection, their demand was not then complied with. No suspicion being entertained of any thing amiss in Thomson's stores, the main ground of objection to the delivery of the teas claimed by Messrs. Lippincott & Co. was, that bonds of E. Thomson's being that day due and unsatisfied, they could not be permitted to enter the goods without paying a cash duty; whilst they insisted on being allowed the usual credit, in consequence of having assignments given by E. Thomson previously to his insolvency, which were then for the first time exhibited. Thomson's bonds being returned from bank, the Lippincotts proposed giving their check for the amount, and were permitted, in the evening, to sign bonds for the entries presented by them in the morning.

After these transactions, a suggestion by Mr. Thompson that his assignments to Messrs. Lippincott & Co. were intended to include the balance of his teas in store, a slight examination of the documents in the office, showing that there should be a much greater quantity, excited strong suspicion that something was materially wrong; but the information derived the next day (20th) from C. Mackie, a young man in Thomson's employ, that a large quantity of teas had been taken from store without permit, and transmitted to New York and Boston, removed all doubt on the subject. The Deputy Collector was instructed on Monday morning to have the bonds given by Messrs. Lippincott & Co. cancelled, and return their check, when, after consulting the District Attorney, a refusal to deliver the goods claimed by them became absolute, in consequence of which suit was instituted against me.

With the view of ascertaining the amount of teas unlawfully removed, application was made to Mr. Thomson on Monday (21st) for the keys of his stores, which he had previously promised to furnish, when we were informed that they were in the hands of Messrs. Lippincott & Co., and were withheld by them till near the last of the week, before we were permitted to take an inventory of the teas remaining in store, without which we had no means of ascertaining the actual amount of those unlawfully taken away. The measures taken for the recovery of those teas it may not be of importance to mention. The whole number of chests seized at New York, Boston, and Baltimore, and at this place, amount to 6,196.

The surveyor was requested to have examinations made of the other stores in the city wherein spirits, wines, and teas were deposited in charge of the customs, who reported them in safe condition.

For information respecting the delivery to the importer of the certificates, directed by the 41st section of the collection law, to accompany spirits, wines, and teas, and also the manner of storing these articles, and delivering the same from store, I give the following extracts from my correspondence with the surveyor on these subjects.

Collector's letter: "The particular point of inquiry was in reference to those articles which have been put into store; whether such certificate applicable to those goods in store have been given by you to the proprietor, importer, or consignee, before such goods have been delivered from store to the proper person, on permit granted by the Collector and Naval Officer for that purpose."

Surveyor's letter: "They (the certificates) were always delivered to the persons authorized to receive the same, as soon after the landing of the cargo as they could be prepared, whether in store or not."

Collector's letter: "What has been the usual course pursued by the officers of the customs in storing spirits, wines, and teas, as also in delivering the same from store?"

2d. "Do you know of any course pursued in the premises other than that prescribed by law, or any indulgence granted which the law does not authorize; and if such has been the case, say by whom?"

Answer by surveyor: "The usual course has been, that when the vessel is discharging, the spirits, wines, and teas have been taken from the wharf to the stores of the merchants, and when all have been delivered from the vessel, some days have been allowed by the inspectors to the merchants to assort the different chops of teas, and store properly the spirits and wines. In delivering the same from store, the inspectors have unlocked their stores and superintended the delivery; but in some cases, when very busily employed, the inspectors have intrusted the keys to the merchants, it being deemed necessary for the furtherance of business, which otherwise would have caused ruinous and unnecessary delays to the merchants. This has always been the practice and custom allowed by the different surveyors, and, in storing, it would be impossible to do otherwise, unless the inspectors were to follow the loads of every dray, when, in many instances, twenty or more stores have been taken to receive the goods in various parts of the city."

"The course pursued in the premises, in allowing the merchants possession of the keys, was not according to law, but as described in *answer first*. Indulgence was specially granted, in one instance, by me to Messrs. Smiths for removing the locks, for the purpose of sooner making sales, and arranging them for the inspection of the purchasers, and was without any loss to the Government. This was two years, or more, past."

Any more particular information, which you may deem requisite on these points, you will, no doubt, receive from the surveyor and inspectors.

The information which we received respecting the removal of teas that were not put into store from the pavement at the store door, where they were laid down by the porters as they brought them from the vessels; the means employed by Mr. Thomson to procure the keys from the officer when otherwise so engaged as not to be able to attend at the stores, and the use made of those keys in opening the custom-house locks on other stores than that in which the teas mentioned in the permit were deposited, has been derived from Charles Mackie, before mentioned, who might be able to give some further light on the subject. Should you wish to examine him the Deputy Collector will endeavor to procure his attendance on you when you may require it. The amount of teas taken without permit, and transmitted to New York, Boston, and Baltimore, we had from Mr. Thomson's statements, subscribed with his own hand.

If I have fallen short, in the brief narrative I have given, of affording you the view of the subject you desire, anything further within my knowledge, or that of the Deputy Collector, will promptly be furnished. I enclose a list of the inspectors, &c., &c., employed at this port in the collection of the revenue.

I am, very respectfully, sir, your obedient servant,

JOHN STEELE, *Collector.*

SAMUEL H. SMITH, Esq.

Personally appeared before me, one of the aldermen of the city of Philadelphia, John Steele, Collector

of this district, who, being duly sworn according to law, doth depose and say, that the foregoing statement of facts is true to the best of his knowledge and belief.

JOHN STEELE.

Sworn and subscribed before me, the 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

Inspectors.—Charles Anderson, Benjamin Ashmead, John Brown, John Boyd, Thomas Cash, William Dalzell, James R. Dickson, John Davis, John W. Durant, J. H. Fisler, Andrew Geyer, Chambers Gaw, William P. Gaw, Robert Hopkins, Henry Huber, Andrew Jackson, John Reed, Joseph Robinson, John P. Schott, Rowland Smith, Jacob Zebley; David Rose, at Lazaretto; Frederick Shull, Marcus' Hook; Job Whipple, master of the barge; four boatmen.

John Steele, jr., weigher; Samuel Ross, George Dannacker, Robert A. Patten, deputy weighers; Joseph Abbott, John Scott, James B. Scott, Samuel L. Palmer, measurers; Robert Milnor, gauger; Charles S. Jackson, deputy inspector and marker.

Collector's Office.—John Kern, deputy collector; Richard L. Howell, Thomas F. Valette, Robert Steele, Charles G. Treichel, Charles Treichel, David Gibson, John C. Pechin, Thomas Latimer, Thomas Ashmead, Abraham Martin, Richard George, Julien Henry, clerks; Thomas Stewart, Samuel Ross, public appraisers; William Jones, naval officer; John D. George, deputy naval officer; Robert Heysham, clerk; James Glentworth, surveyor; James Glentworth, jr., deputy surveyor.

No. 2.

CUSTOM-HOUSE, NAVAL OFFICE, *Philadelphia, January* 11, 1826.

SIR: Agreeably to your intimation, I proceed to narrate the facts and circumstances which have come to my knowledge touching the fraudulent removal of sundry large parcels of teas, by Edward Thomson, from the storehouses in which they had been deposited, in conformity to the sixty-second section of the act of Congress of March 2, 1799; and, as the duties of the Naval Officer have no connexion with, or agency in, the transactions of any other than the office of the Collector, the information I possess is derived from that source alone.

It appears that, on Saturday, the 19th of November last, Messrs. Joshua & William Lippincott & Co. presented to the Deputy Collector four several entries of teas, including, in the aggregate, 3,457 packages in store, as aforesaid, transferred to them by the said Edward Thomson, whose failure having just then been announced, and two of his bonds, due that day, being unpaid, the Deputy Collector refused to receive the entries. But in the evening of that day, after office hours, they again presented their entries, and agreed to pay the two bonds which lay over; upon which condition they were permitted to bond the duties, and were promised a permit to remove the said teas from store on the Monday following, in office hours.

In the meantime, however, the Collector received information from an authentic source that large parcels of teas had from time to time been illicitly removed from the stores by Edward Thomson, and shipped to New York, Boston, and Baltimore; in consequence of which, when Messrs. Lippincott applied for the permit it was refused and the bonds which they had executed were cancelled.

The Collector had promptly despatched on the day preceding two confidential officers to New York, with instructions to seize the said teas wherever they could be found; in which they in part succeeded, and to a considerable extent. He had also written to the Collector of Boston, with information which enabled that officer to seize a considerable quantity there; and in like manner to the Collector of Baltimore, where a partial seizure was also made.

Measures were also immediately taken by the Collector to ascertain the actual extent of the fraud, by a strict examination of the stores; the completion of which was, however, retarded by the refusal of Messrs. Lippincott to permit the officers to enter the stores, of which they held the keys under the transfer made to them by Thomson.

The Collector and his deputy have conferred with me freely on the measures which have been pursued to elicit the necessary information, and repair the injury as far as may be practicable, and they have appeared to me as judicious and efficient as could have been devised.

Of the means employed to effect the fraudulent removal of the teas I have no knowledge. The artifices which appear to have been employed by the perpetrator to elude the inspection evince an indifference in the choice of means; and various means have, in all probability, been employed to effect the end. No doubt the occasional possession of the public keys, as admitted by some of the officers of inspection, whom, it appears, have been induced from time to time, by the pressure of the duties of inspection on the wharves when many vessels were discharging at the same time, to yield to the importunity of individuals who held permits to remove goods from the storehouses, may have enabled him, in part, to effect his object.

The root of the evil appears to me to be in the warehousing system as now by law established. The numerous arrivals nearly at the same time, particularly of large cargoes from China, perhaps to thirty or forty different consignees, scattered over the surface of this large city, each desirous to store his goods contiguous to his seat of business, together with the rapid transportation of all these in every direction at the same time, creates such a diversity of calls upon the officers of inspection as must at such times render it extremely difficult, if not impracticable, to answer to those calls and at the same time to inspect the landing of the cargoes. Add to this, the wines and liquors thus stored require frequent examination and coopering, during which time the presence of an inspector is required.

These difficulties have, no doubt, led to the irregular practice of occasionally confiding the public key to the importers for the purpose of removing permitted goods, or of examining and coopering wines and liquors. Another evil in the system is that, although the importer may at pleasure require the presence of an officer, he may refuse to permit an officer to enter his store when the public interest alone may require it.

Were the storehouses exclusively those of the United States, and concentrated, as in that case they would be, the inspection could be conducted with convenience, regularity and security, and the Govern-

ment would be remunerated for the cost by a moderate charge for storage, and effectually protected from the perpetration of similar frauds.

I remain, very respectfully, sir, your obedient servant,

W. JONES, *Naval Officer.*

SAMUEL H. SMITH, Esq.

I, William Jones, Naval Officer of the district of Philadelphia, do solemnly affirm that the facts stated in the foregoing representation are just and true to the best of my knowledge and belief.

W. JONES.

Affirmed before me this 19th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 3.

SURVEYOR'S OFFICE, *District of Philadelphia, January* 12, 1826.

SIR: Agreeably to your request I submit the following statement: The course pursued in storing spirits, wines, and teas, have been as follows: When the vessels are discharging the spirits, wines, and teas are taken from the wharves to the stores of the merchants, and when all have been delivered from the vessel time has been allowed by the inspectors to the merchants to assort the different chops of teas and the different packages and qualities and to stow properly the spirits and wines. In delivering the same from store the inspectors have unlocked the stores and superintended the delivery; but in some cases, when very busily employed, the inspectors have intrusted the keys to the merchants, it being deemed necessary for the furtherance of business which would have caused vexatious and unnecessary delays to the merchants and would result in the loss of a sale of their spirits, wines, and teas; this has always been the practice and custom allowed by the different surveyors; in short, it would be impossible to do otherwise with the very limited number of inspectors, and unless they followed every load to insure their being safely deposited in the stores. In many instances twenty or more stores are taken by the different merchants for one vessel, and their porters hauling to all of them at the same time in various parts of the city. In the month of April last there were six Canton vessels with teas, sixteen vessels with spirits and wines, and twenty-eight other vessels from foreign ports; the number of inspectors at that time was twenty-five, (one has since died,) disposed of in the following manner: one at Marcus Hook, one at the Lazaretto, one in charge of the revenue barge, two in the public stores at the custom-house, three attending coasting vessels, leaving seventeen to attend to the delivery of cargoes from foreign ports, re-shipping goods for drawback, storing and delivering spirits, wines, and teas from store. It frequently happens that, while teas are discharging from the vessel, permits are received by the inspector to deliver part of the same which have been landed; and in this way Mr. Thomson hauled more away than were actually entered and bonded. After teas have been put in store it is impossible to count them, and must frequently take for granted that all is correct. After the stores are locked up the inspector has one lock and key, the merchants another; and should the inspector wish to visit the stores he cannot, without obtaining the consent of the merchant who holds the other key, so that the inspector has no opportunity of frequently examining the stores for the purpose of seeing whether any frauds have been committed. As respects the fraud committed by E. Thomson, I will observe that the key of one store would unlock several others, and when in possession of the key he had easy access to the other stores. The frequent calls on the inspectors to attend at stores containing spirits, wines, and teas, for the purpose of showing samples, coopering, &c., through the various and detached parts of the city, cannot be attended to properly, unless the warehousing system is placed on a different principle from the present. There are now seventy-one stores in charge of the inspectors, and in the spring they will far exceed one hundred. The William Savery entered on the 28th of February, 1824; also, on the 28th of February, 1825; and the dates and marks being similar, it afforded greater facilities to Mr. Thomson for furthering his designs in defrauding the revenue; the former cargo being entered out of store; the latter discharging; and, instead of going into store, a great number were taken direct from the vessel and shipped to New York, as has been discovered since Mr. Thomson's failure.

With great respect, your most obedient servant,

J. GLENTWORTH, *Surveyor and Inspector of the Revenue.*

SAMUEL H. SMITH, Esq., *Philadelphia.*

N. B. Should any further information be required it will be promptly given.

No. 4.

Interrogatories to John Steele, Esq., Collector of the port of Philadelphia.

Question 1. Were all the provisions of law faithfully complied with in regard to the importations in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which arrived in the year 1825, so far as the same embraced a part of your duty directly or so far as they involved a superintendence by you over others?

Answer. The provisions of the law, as far as it relates to the duties of my office, have, I believe, been faithfully complied with in regard to the importations in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which arrived in the year 1825.

Question 2. Have any, and to what extent, permits been granted for the withdrawal from the stores of the teas of Edward Thomson, without the duties being previously legally secured? It is presumed not; but the question is put to supersede all doubt.

Answer. No such permit has been granted.

Question 3. State the amounts of the several bonds, with the sureties in each, given by Edward Thomson, which, whether due or not, remain unpaid, and whether the sureties were, at the time the bonds were given, in good credit, and considered as competent to pay them?

Answer. The several bonds, with the sureties, given by Edward Thomson, as mentioned in the interrogatory, cannot conveniently be stated in my answer, but an abstract of the whole shall be furnished. The sureties at the time the bonds were given were deemed in good credit, the sureties to some of them considered competent to pay them, but the sureties to others of his bonds were not considered as competent to pay them, in the event of the entire insolvency of the principal, and which, I believe, sureties will seldom be found to be in large transactions, unless where merchants of good standing, doing an equal business, become sureties for one another. In forming an opinion of the sufficiency of security to the United States, it may, perhaps, have happened in too many instances that the sureties and principal were not viewed distinctly, but jointly, in making the estimate; whatever blame may attach to me in this particular, yet candor will not permit me to withhold the concession. To obtain sureties in cases of large amount competent to pay the same, I think, will seldom be found practicable; I have, nevertheless, in respect to all Mr. Thomson's bonds, hitherto believed the interest of the United States to be perfectly secure; this was induced by the extent of Mr. Thomson's business, which indicated extensive capital or credit, (I supposed the former,) as I apprehend that in the last ten years he has paid more revenue to the United States than any other importer, and with a punctuality that could not be exceeded—his bonds, however large the amount, being always paid at bank on the day they became due. The payments made here, besides the considerable amount paid at New York, where he imported several valuable cargoes within the period mentioned, I imagined could not be accomplished without a substantial capital. I was not alone in this opinion.

Question 4. Have there been any recent instances, and particularly in reference to the bonds given previously by Edward Thomson, of persons signing them as sureties, and out of office hours? State the instances, if any, including the dates of the bonds, the principals and previous sureties, the amounts, the sureties recently added, and whether by power of attorney, and, in that case, stating the attorney, with the times when the names of the recent sureties were added.

Answer. By information from the Deputy Collector, some of E. Thomson's bonds, which, through oversight, were incomplete at the time they were given, had a surety, by his attorney, added on the evening of the 19th of November past. The dates of the bonds, &c., &c., &c., will be particularly noted in the abstract promised in my answer to the third interrogatory.

Question 5. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of, or cause to suspect the existence of any collusion between any of the officers of the custom-house and E. Thomson, or any other person.

Question 6. Are the books required by the 53d section of the collection law to be kept by the inspectors duly transmitted to you by the surveyor, and do they appear to be faithfully kept?

Answer. The books kept by the inspectors, as directed by the 53d section of the collection law, have not been transmitted to me by the surveyor, nor required so to be, unless when reference thereto occasionally rendered it necessary. The surveyor's return to my office of the discharge of the cargo of each vessel exhibit, substantially, everything noted in those books.

Question 7. Are the permits for unlading goods from vessels, or taking them from the stores in which they are deposited, invariably signed by you and countersigned by the naval officer, and is this always done after they are filled up?

Answer. Permits for the delivery of goods from vessels or from store are invariably signed by the Collector and naval officer, or their deputies, but in no instance till after they are filled up.

Question 8. Have all the officers and persons appointed pursuant to the act of March 2, 1799, taken the oath or affirmation required by the 20th section thereof?

Answer. All the officers appointed since I have been Collector have taken the oath or affirmation required by the 20th section of the act of March 2, 1799. I presume the same was done in the time of my predecessors.

Question 9. Are the official papers of the respective offices in the custom-house properly arranged and carefully preserved, and the books and records brought up to the present time?

Answer. The official papers of the custom-house are, in my judgment, properly arranged and carefully preserved, and the books and records brought up to the present time as far as practicable; would be pleased if Mr. Smith would examine, for his own satisfaction, as far as his leisure will permit.

Question 10. How are the certificates directed to be given by the 41st section of the collection law issued, and in what way are they accounted for?

Answer. The certificates directed by the 41st section of the collection law are prepared by the surveyor, are signed and sealed in my office, and returned to the surveyor, who can explain the manner they are issued. We have no further concern with those certificates but for the identification of goods to which they apply when entered and inspected for exportation, after which they are brought to my office and cancelled.

Question 11. What has been the usage as to the delivery of certificates to the owners of goods, and has that usage been invariable?

Answer. Of this I have no knowledge, except as informed by the surveyor, which information is particularly mentioned in my communication to you of the 11th instant.

Question 12. Have you ever given the surveyor any instructions respecting the delivery of certificates, and what are they?

Answer. I do not recollect that I have.

Question 13. Is a weekly report made to you by the surveyor of the names of such inspectors, weighers, measurers, and gaugers as may be absent from or neglect to do their duty?

Answer. Such report has not been made to me by the surveyor, whence I always inferred that there was no absence from or neglect of duty to be reported.

Question 14. Have you any knowledge of the usage in storing spirits, wines, and teas deposited under a general bond given by the owner, without surety; of the mode of securing the stores and of taking goods from them, and whether the usage has been recently in any way changed? If so, state it.

Answer. I have no other knowledge than by information, as stated in my answer to the 11th interrogatory.

Question 15. How long have you been in office?

Answer. I have been in office since the 28th of August, 1808.

Question 16. Have you in any cases granted any indulgence which the law does not sanction? If so, state it, and the grounds on which it was granted.

Answer. Though I have endeavored to afford the merchants every facility and accommodation in transacting their business in the custom-house as far as consistent with my duty, I do not recollect to have granted any indulgence that the law does not sanction.

Question 17. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of any frauds, collusions, &c., &c., &c., practiced by any officer or person connected with the custom-house, or of any neglect or omission of duty but that referred to in my answer to the 11th interrogatory.

Question 18. What has been the usage at the custom-house in respect to assignments of goods deposited in stores? Do you know of any instances in which any other person than the original owner has been permitted to *enter them out* of the stores on paying or securing the duties? If so, state them, with the nature of the assignment, and whether it embraced the whole goods of the original owner in store, or only a part of them.

Answer. There has not, within my recollection, been an assignment made of goods in store, except those by Mr. Thomson to Messrs. Lippincott & Co. Goods have always been entered by the owner, or, as the case may be, by such other person as the 36th section of the collection law authorizes to make entry thereof. The goods of insolvents have been delivered to their assignees, as they would have been to the original owner had he not become insolvent.

Question 19. It is represented that from a period commencing with the last spring, and continuing until the close of autumn, Mr. Thomson was in the habit of selling here, at public auctions, boxes or parcels of the very teas which he fraudulently withdrew from store, or which had not been, as they should have been, stored, which sales were matter of common notoriety, advertisements and other notices of them constantly appearing in the newspapers. Are such facts? If so, through what causes did it happen that the officers of the customs were not excited into wakefulness by these publications? Do you know, or can you learn, and if so, state, whether these advertisements carried on their face any evidence of the teas offered for sale being those of Mr. Thomson's, so fraudulently removed?

Answer. The advertisements of auctioneers, as far as I have noticed, do not give the names of the owners of teas or other goods offered for sale; but had the name of Mr. Thomson or any other importer of teas been particularly mentioned, it would not have excited attention, unless there was some previous ground of suspicion of fraud, which was not entertained of Mr. Thomson until he became insolvent; beside, it is not to be inferred that teas advertised for sale by auctioneers are in their store or custody, as the article, I understand, is generally sold in any considerable quantity by samples, whilst the goods are yet in the store where deposited. If sale is made, they are entered and bonded by the importer, and permit given for their delivery from store. If sale is not made, they remain in store as before. The importers of teas can give you more particular and satisfactory information on this subject.

Question 20. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed, or generally respecting the administration of the custom-house.

Answer. I do not recollect any other facts or useful information that I could furnish respecting the frauds committed, or the administration of the custom-house, but what is expressed in my answers to the foregoing interrogatories.

Question 21. Should your deputy be able to furnish any information called for by the above interrogatories besides that given by you, or any other information material to the inquiry into the transactions arising out of the failure of Edward Thomson, or into the general administration of the custom-house, be pleased to obtain a statement thereof, to be made by him as a supplement to your deposition, or in a distinct document.

Answer. The interrogatories and answers have been communicated to the Deputy Collector, who has not intimated to me that he could add any other material information to that given in my answers.

Personally appeared before me, one of the aldermen of the city of Philadelphia, John Steele, Collector of this district, who, being duly sworn according to law, doth depose and say that the answers to the foregoing interrogatories are just and true, to the best of his knowledge and belief.

JOHN STEELE, *Collector.*

Sworn and subscribed before me, the 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 5.

Interrogatories to William Jones, Esq., Naval Officer of the port of Philadelphia.

Question 1. How long have you been in office?

Answer. That I entered upon the duties of my office on the 8th day of December, 1824.

Question 2. Were all the provisions of law faithfully complied with in regard to the importations in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which arrived in the year 1825, so far as the same embraced part of your duty directly, or so far as they involved a superintendence by you over others?

Answer. This question I answer in the affirmative.

Question 3. Have any, and to what extent, permits been granted for the withdrawal from the stores of the teas of Edward Thomson, without the duties being previously legally secured? It is presumed not, but the question is put to supersede all doubt.

Answer. That no permits have been granted for removing the teas, mentioned in the third question, without the duties being previously legally secured.

Question 4. Are the permits for unlading goods from vessels, or taking them from stores in which they are deposited, invariably signed by the Collector and countersigned by you, and is this always done after they are filled up?

Answer. That the permits for unlading goods from vessels, or removing them from the stores in which they are deposited, are invariably signed by the Collector or his deputy, and countersigned by myself or my deputy after they are filled up.

Question 5. Are all the papers connected with your office properly arranged and carefully preserved, and the books and records brought up to the present time?

Answer. That all the papers connected with my office are properly arranged and carefully preserved, and the books and records are brought up as near the present time as the nature of the business will admit, or the laws and the regulations of the Treasury Department require.

Question 6. Have you any knowledge of the usage in storing spirits, wines, and teas, deposited under a general bond, given by the owner without surety, of the mode of securing the stores, and of taking goods from them, and whether that usage has been recently in any way changed? If so, state it.

Answer. That having no connexion with or participation in the duties involved in the sixth question, I have no knowledge of the manner in which they are discharged.

Question 7. Have you in any cases granted any indulgence which the law does not sanction? If so, state it, and the grounds on which it was granted.

Answer. That I have granted no indulgence in any case which the law does not sanction.

Question 8. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. That I have no knowledge of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any other facts, indications, or appearances pointing to just suspicions on this head.

Question 9. Is it within your knowledge that any frauds, collusions, or connivances, in violation of the law or duty, or any flagrant neglect have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. That I have no knowledge of any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect having been committed or practiced by any officer or person connected with the custom-house, except it be the neglect implied in the practice of occasionally intrusting the public keys with the importers to remove permitted goods in the absence of an inspector, with which practice I have only become acquainted, by the admission of some of the officers of inspection, since the failure of Edward Thomson.

Question 10. It is represented that, from a period commencing with the last spring and continuing until the close of the autumn, Mr. Thomson was in the habit of selling here, at public auctions, boxes or parcels of the very teas which he fraudulently withdrew from store, or which had not been, as they should have been, stored, which sales were matters of common notoriety, advertisements and other notices of them constantly appearing in the newspapers. Are such the facts? If so, through what causes did it happpen that the officers of the custom-house were not excited into wakefulness by these publications? Do you know, or can you learn, and if so, state, whether these advertisements carried on their face any evidence of the teas offered for sale being those of Mr. Thomson's, so fraudulently removed?

Answer. In regard to the alleged "public advertisements and sales at public auction of boxes and parcels of the very teas which Edward Thomson fraudulently withdrew from store, or which had not been, as they should have been, stored," I have no knowledge. I occasionally glance over the advertisements in the public papers, but I had no cause for suspicion nor any motive for a particular investigation of the advertisements alluded to, nor am I now aware that they would have afforded any indication of fraud, as I believe it to be the practice of auctioneers to sell by a few sample chests from each chop, and when sold, the proprietor may secure the payment of the duties the following day, and legally withdraw them from store. The advertisements and exposure to public sale, therefore, furnish no evidence of the quantity advertised being in possession of the auctioneer, or of the extent of the sales, which is only known to the parties interested.

Question 11. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed, or, generally, respecting the administration of the custom-house.

Answer. That I have no knowledge of any further facts, not embraced within the scope of the annexed interrogatories, which would furnish useful information respecting the recent frauds committed upon the revenue, except those which are contained in the statement which, at your request, I addressed to you on the 11th instant.

In regard to the general administration of the custom-house, I have to answer that, in the Collector's department, which alone comes within my view, the business, as far as my knowledge extends, is conducted with order, diligence, and fidelity; and I am at all times prepared to demonstrate the correctness with which the business of the naval office is conducted.

I, William Jones, naval officer of the district of Philadelphia, do solemnly affirm that the answers to the foregoing interrogatories are just and true, to the best of my knowledge and belief.

WM. JONES.

Affirmed and subscribed before me, this 19th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 6.

Interrogatories put to James Glentworth, Surveyor of the port of Philadelphia.

First. In regard principally to the teas imported by Edward Thomson:

Question 1. In what vessels were these importations made, and when did the vessels arrive?

Answer. The importations were made in the ship William Savery, arrived and entered on the 28th of

February, 1825, *via* New York; the ship Addison, arrived on the 4th April and entered on the 5th April, 1825; the ship Woodrop Sims, arrived on the 12th April and entered on the 13th April, 1825; the ship Benjamin Rush, arrived on the 30th June and entered on the 1st July, 1825; the ship Thomas Scattergood, arrived June 30 and entered on the 2d July, 1825.

Question 2. Did you or your deputy (state which) visit or inspect these vessels, make the return to the Collector, and discharge the other duties required by the twenty-first section of the act of Congress of 2d of March, 1799?

Answer. The vessels were visited or inspected by Job Whipple, captain of the revenue barge, who makes a return to this office, and then reports to the Collector; the other duties have been discharged according to the best of my knowledge and ability, as refers to the twenty-first section of the act of Congress of March 2, 1799.

Question 3. Who were the inspectors that first went on board these vessels, and those that superintended the unlading of the teas? state distinctly the name of each vessel, and the name of the inspector or inspectors so engaged in respect to her. Did the inspectors who first went on board do so as a thing of course; did they report having done so; having locked up the cargo, did they forthwith leave the vessel, or remain till the inspectors for unlading the vessel came on board; is any record kept of their names?

Answer. The inspectors who first went on board these vessels when they hauled to the wharves were as follows: John Brown first went on board the ship William Savery, and superintended the unlading of the teas; Robert Hopkins first went on board the ship Addison, and superintended the unlading of the teas; Robert Hopkins first went on board the ship Woodrop Sims, and superintended the unlading of the teas; Robert Hopkins first went on board the ship Benjamin Rush, and superintended the unlading of the teas; John Boyd first went on board the ship Thomas Scattergood, and superintended the unlading of the teas. The inspectors who first went on board did so as a thing of course; but with these vessels they remained on board and discharged their cargoes. The inspectors reported to the office having taken charge of these vessels, or were detailed by me or my deputy for that purpose. Having locked up the cargo, they remain on board until sunset, except the hours necessary for their meals. A record of their names are kept, and how employed.

Question 4. Were the inspectors who unladed the cargo designated by you?

Answer. They either reported to the office or were designated by me or my deputy.

Question 5. How many boxes or chests of tea were unladen from each vessel, and how many days were the inspectors, as to each vessel, employed in superintending the unlading?

Answer. The number of packages of tea, agreeably to the returns on file in this office, unladen from the ship William Savery, were 8,550; from the ship Addison, 8,120; from the ship Woodrop Sims, 8,400; from the ship Benjamin Rush, 7,207; from the ship Thomas Scattergood, 6,934. The inspector superintending the unlading of the ship William Savery was employed fifteen days; the inspector of the Addison, eight days; the inspector of the Woodrop Sims, twelve days; the inspector of the Benjamin Rush, nineteen days; the inspector of the Thomas Scattergood, thirteen days.

Question 6. Were the quantity and kind of all the teas ascertained and marked; and how were they ascertained and marked; and by whom?

Answer. The quantity of teas were ascertained from the report made to this office, and the quality ascertained by the different marks and chops on the chests and packages, or by the packages being broken, or being bored, when any doubt existed. They were all marked, according to the quality and kind of teas, by Charles S. Jackson, the marking officer.

Question 7. Had, previous to the unlading of the teas, a permit, signed by the Collector and naval officer, been received; and did the examination by and report to you of the inspectors exactly correspond with the permits; and were the provisions contained in the 30th and 37th sections of the collection law strictly complied with?

Answer. A permit had been received, previous to unlading the teas, signed by the Collector and naval officer, and the report of the inspectors exactly corresponded with the permits; and the provisions contained in the 30th and 37th sections of the collection law were strictly complied with, with the exception of the endorsement of permits for spirits, wines, and teas, which, from the records of the office, do not appear to have been continued or performed after 1802. The sections referred to are now strictly complied with.

Question 8. Did you grant the certificates required to be given by the 41st section of the said law, and to whom were they delivered; were they signed by the Collector and countersigned by the surveyor?

Answer. I did grant the certificates required to be given by the 41st section of said law, and delivered the same to persons employed by Edward Thomson, taking therefor the necessary receipts. They were signed by the Collector, or persons deputed by him, and countersigned by me or my deputy.

Question 9. Were these certificates countersigned after the inspectors' examination of the teas, or were they previously countersigned in blank, and the blanks filled up, and by whom?

Answer. The certificates were countersigned when the quality and kinds of teas were known, and not in blank; the blanks being previously filled up, unless an error was discovered, and was done by me or my deputy.

Question 10. Were these certificates delivered by you or by an inspector, and what inspector, to the importer of the teas?

Answer. The certificates were delivered by me or my deputy to the importer or his clerks.

Question 11. When were these certificates delivered? State the times, distinguishing the different vessels, and particularly whether before the removal of the teas from the wharves on which they were landed, or after such removal and previous to their known admission into the stores allotted to them, or after their admission into said stores.

Answer. The certificates of the ship William Savery were delivered on the 15th and 22d March, 1825; the certificates of the ship Addison, on the 27th April and 23d May, 1825; the certificates of the ship Woodrop Sims, on the 6th June, 15th June, and 19th July, 1825; the certificates of the ship Benjamin Rush, on the 6th August, 10th August, and 13th September, 1825; the certificates of the ship Thomas Scattergood, on the 19th July, 30th July, 6th August, and 26th August, 1825. The certificates were delivered after the teas were landed and stored.

Question 12. The 42d section of the collection law, in connexion with the 7th section of the act of April 6, 1802, to repeal the internal taxes, requires the inspectors of the ports to make regular and exact

entries of all certificates that shall be granted; are these entries duly made by you; and a return made by you to the Collector; if so, at what time was it made in this case?

Answer. Entries are made of all certificates granted, and a receipt taken by me or my deputy. No return was ever made to the Collector, to my knowledge, by any surveyor.

Question 13. Does not the collection law contemplate, in cases where goods are deposited in stores, that these certificates should be only filled up at the time when any portion of the goods are, on permits, withdrawn, and then, and then only, after the duties have been secured, be delivered to the proprietor with the goods so withdrawn from the store; were they so delivered in this case? if they were otherwise delivered, state the circumstances incident to each delivery, so far as they are not embraced in the preceding interrogatories, including the names of any persons who had an agency in their delivery.

Answer. The law has not been so construed, and I never thought that power was given me by the collection law to withhold such certificates from the importers, and the practice has been always to deliver them as soon as they could be completed. Since Mr. Thomson's fraud the certificates are withheld until a delivery from the store takes place; but the law does not contemplate such a procedure; the delivery of the certificates was made by myself or my deputy.

Question 14. Were any inspectors designated by you to superintend the conveyance of the teas from the wharves on which they were landed to the stores? if so, name them, and say whether they were the same inspectors that were charged with superintending the unlading of the teas, distinguishing the inspectors engaged on each cargo.

Answer. No inspector was designated to superintend the conveyance of the teas from the wharves on which they were landed to the stores; neither would it be possible for them to do so, unless every load was followed, put into store, and locked up, and then the inspector would have to return with the dray for another load; this would require too much time in a Canton cargo, full double the number of days required by law, and a great increase of inspectors. Andrew Jackson was employed on the wharf, while all of Thomson's vessels were discharging, in having the teas properly arranged for marking, in delivering those permit from store, that is, those permitted before going into store and bonded with sureties. The inspectors engaged in unlading the cargo are expressed in answer to question three.

Question 15. Did the inspector receive instructions from you, verbal or written, and which, in what stores to deposit the teas; and having deposited them, did they report to you the having made such deposit, specifying the teas and the store in which deposited? state the names of the inspectors and the cargoes they superintended, with the dates of the transactions.

Answer. The inspectors received no instructions in what stores to deposit the teas; the law puts it in the power of the merchant to employ whatever store or stores he may think proper, provided they are considered safe for the storage of goods, and are not likely to be embezzled; neither did the inspectors report in what stores the teas were deposited.

Question 16. Have you any record of the stores in which those teas were deposited; does it merely contain an enumeration of the stores without their contents, or does it specify the contents of each store, and with what particularity? if you have not, is such a record kept by any other officer? if by the inspectors, state the manner in which it is kept by them; state also the name of each inspector, with the stores in his charge in which those teas were or should have been deposited.

Answer. I have at present a record of the stores in which those teas were deposited; it merely states the stores, without their particular contents. Such records are kept by the inspector having charge of the stores, and I do not know in what form they are kept by them. The name of the inspector is Andrew Jackson, and the stores situate as follows: No. 78, South Wharves; Nos. 163, 165, 157, 143, and 145, Water street. Mr. Jackson was assisted by Robert Hopkins in storing and taking them from store.

Question 17. In what manner and by whose directions were the teas carried to the stores, and were they accompanied or not by an inspector? Specify the particulars as to each cargo.

Answer. The teas were carried to the stores on drays, and under the direction of Edward Thomson, or persons employed by him; no inspector accompanied them.

Question 18. Is there any evidence of these teas all being stored; have you any reason, and what reason, to think that parcels of them were never lodged in the stores? State minutely your knowledge in this respect.

Answer. There is no evidence of those teas being all stored. Mr. Jackson and Mr. Hopkins state that they were told by Thomson's clerk, since his failure, that part of the teas, instead of going to the stores, were carried elsewhere. Watching their opportunity, the drays passed the stores instead of depositing their loads. I have no further knowledge on this head.

Question 19. Was there any watch of the stores in which the teas were deposited; were they inspected, and by whom, from time to time; did you give any instructions to the inspectors respecting them? If so, say what they were.

Answer. There was no watch to the stores in which the teas were deposited until after Thomson's failure, which is still continued. They were inspected from time to time by Andrew Jackson. I do not recollect that any instructions were given to the inspector respecting them.

Question 20. From what stores and under what circumstances do the teas appear to be surreptitiously taken? State the owner of each store, the inspector who kept the key, the quantity of tea that was or should have been stored, and that surreptitiously removed, and to what extent, if any, certificates have been delivered embracing the teas so removed.

Answer. I do not know from what stores, or under what circumstances, teas appear to have been surreptitiously taken, nor the owners of the stores. The inspector who kept the keys was Andrew Jackson, who can inform fully on this question. The certificates were all delivered as per answer to question 11, at the time therein stated.

Question 21. Who affixed the locks on the stores, or examined them previous to the storage of the goods; who had the key kept on behalf of the Government? Specify, in these respects, the several stores, and inspectors under whose care they were placed.

Answer. The locks were affixed on the stores by Andrew Jackson and Robert Hopkins. The stores had been long used by Thomson, and were known to the inspectors who had possession of the keys on the part of the Government. The stores are specified in answer to question 16.

Question 22. Have merchants ever refused to produce, on request, their keys? If so, state the instances.

Answer. I do not know that any merchants refused to produce their keys, on request, with the

exception of Lippincotts, after Thomson's failure, but they have it in their power so to do, if they think proper.

Question 23. Have the keys of the stores in which these teas were deposited, in any cases, and by whom, and when, been granted to the importer, without an inspector accompanying him, under the authority of a permit to remove a part of them; and does it appear that from this step more teas, and to what amount, have been removed than the permit allowed?

Answer. The keys of these stores have been granted to the importers by Andrew Jackson and Robert Hopkins at different times, they accompanying the importer and taking off the locks. At other times the importers have had the keys. Whether, from this step, more teas were taken or removed than the permit allowed, I do not know.

Question 24. When did you first learn that the teas of Thomson were not in the stores; and what steps did you take on being so informed?

Answer. At the time of Thomson's failure I was confined to the house by sickness.

Question 25. Did you examine, or cause to be examined, and when, the stores in which these teas were or should have been deposited, and what was the result of the examination? Specify the amount of teas missing in each store; whether any violence appears to have been offered to the locks or other fastenings; whether there were any doors or windows unsecured, so as to exhibit a distinct idea of the security of the stores.

Answer. I was sick at the time the stores were examined by A. Jackson, who reported to the Collector; from what I understood, the stores were secure in every respect.

Question 26. Have you ever received any instructions, and what, from the Collector respecting the delivery of certificates?

Answer. Not to my knowledge.

Question 27. Have you any knowledge of the porters engaged in carrying the teas, either from the wharf to the stores, or from the pavement in front of the stores; or whether they can give any useful information as to their incorrect transportation? If you can, specify their names.

Answer. I do not know.

Question 28. Have the inspectors and weighers, in all cases incident to these teas, discharged their duty agreeably to law? If they have not, specify particularly the cases in which omission, neglect, or connivance may have occurred, including names and dates, with any extenuating circumstances that may have existed, such as long usage, pressure of business, &c.

Answer. I have no knowledge of the inspectors or weighers neglecting their duty in regard to these teas.

Question 29. Have you, in any of the cases incident to these teas, granted any indulgence which the law does not sanction? If so, state it, and the grounds on which it was granted.

Answer. Not to my knowledge.

Question 30. You say, in your letter of the 12th of January, that "it frequently happened that while teas are discharging from the vessels permits are received by the inspector to deliver part of the same, which have been landed, and in this way Mr. Thomson hauled more away than were actually entered or bonded." Could this have been done if the inspector had examined the marks of the chests; and was it not his duty to do so? Be pleased to state the extent to which this was effected, the times when done, and the inspector or inspectors to whom the permit or permits were delivered, as well as when, how, and by whom this fact was discovered, to whom it was communicated; and if to you, whether you apprised the Collector or naval officer of it, and when.

Answer. I suppose this furthered his designs in hauling more away, as hauling to the store and to another vessel, many teas might have passed the stores without being noticed. The inspector did examine the marks of the chests, and delivered them agreeably to permit. I do not know the extent to which this was effected, nor the time when done, as this information was given to Mr. Jackson by Thomson's people, after his failure, who reported the same to the Collector.

Question 31. You say, in the same communication, "after teas have been put in store it is impossible to count them, and must frequently take for granted that all are correct." Is it a fact they never are counted, or that, generally, they are not counted? And whence arises the impossibility of counting them?

Answer. The teas are always counted where practicable; the impossibility arises from the manner of storage—a space being left in the centre, and many breaks, by partitions, happening in large stores where four or five thousand packages of teas of different sizes are stored.

Question 32. You state, further, "that a great number of chests of tea were taken direct from the vessel of Mr. Thomson and shipped to New York, as has been discovered since Mr. Thomson's failure." State the exact knowledge you have on this head, giving the time, number of chests, through whose hands they passed, by what means they were conveyed, to whom they went, and any other circumstances, with the means by which the discovery was made.

Answer. All the knowledge I have is from Mr. Jackson, who was told by Mr. Thomson's clerks, who can explain to you fully on this subject.

Question 33. Did the stores in which Mr. Thomson's teas were deposited contain any other articles?

Answer. I have understood, since Mr. Thomson's failure, they contained hides.

Question 34. Have the stores in which spirits, wine, and teas have been deposited been exclusively devoted to this purpose, or otherwise; and have there been any cases in which the same store has contained articles bonded with sureties and articles only generally bonded by the importer?

Answer. In many cases the stores are not exclusively devoted to this purpose; bonded goods, with sureties, being in the same store.

Question 35. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not.

Question 36. State any further facts, not embraced within the scope of these inquiries, which relate to these teas, and which may, in your opinion, throw any light on the subject.

Answer. I do not recollect, at present, anything further.

Secondly. In regard to the manner in which the surveyor has usually discharged his official duties:

Question 37. Do you or your deputy visit every vessel that arrives, and make, every morning to the Collector, the return, in writing, required by the collection laws?

Answer. Every vessel that arrives is visited by Job Whipple, boarding officer, who is deputized by me for that purpose, and for receiving manifests and crew-lists, mustering the crew, &c., who reports every morning to me and to the Collector.

Question 38. Do you make a weekly report to the Collector of the names of such inspectors, weighers, measurers, and gaugers, as may be absent from or neglect their duty?

Answer. When they occur.

Question 39. What officer first goes on board a vessel previous to her arrival, (in the port,) endorses the original manifest, and receives a copy?

Answer. Job Whipple, the boarding officer.

Question 40. Do the inspectors who first go on board a vessel after her arrival do so as a thing of course? Do they report their having done so? Having locked up the cargo, do they forthwith leave the vessel, or remain till the inspector for unlading the vessel comes on board? Is any record kept of their names?

Answer. See answer to question 3.

Question 41. Are all the inspectors, weighers, measurers, and gaugers, qualified to discharge their duties?

Answer. I know nothing to the contrary.

Question 42. Do you, in all cases, put on board every vessel that arrives here from a foreign port one or more inspectors? If there be any exceptions, state them. Are the inspectors designated by you for a particular vessel, or do they act under general instructions?

Answer. In all cases an inspector is put on board every vessel that arrives here from a foreign port. When a great number of foreign vessels arrive, one inspector has frequently charge of two and sometimes three vessels at the same wharf. The inspectors are generally designated by me or my deputy. It frequently occurs they go on board, report to me, and discharge the vessel.

Question 43. Do you invariably ascertain the proofs, quantity, and kinds of distilled spirits; the quality, and kind, and quantity of wines imported; the kind and quality of teas and sugars?

Answer. I do, myself, or by persons deputed by me for that purpose.

Question 44. Do you in all cases examine whether the goods imported in any vessel, and the deliveries thereof, agreeably to the inspectors' returns thereof, correspond with the permits for landing the same; and if any error or disagreement appear, do you report the same to the Collector and to the naval officer? If there be exceptions, state them.

Answer. I or my deputy examine the returns, and report the same to the Collector.

Question 45. Do you cause the provisions of the thirtieth and thirty-seventh sections of the collection law, in respect to spirits, wines and teas, to be strictly complied with?

Answer. I do.

Question 46. Do you ever permit goods to be unladen or removed from the stores without a permit, signed by the Collector and naval officer? Do you know any inspector or other person who has suffered this to be done?

Answer. I do not.

Question 47. Do you invariably superintend the lading for exportation of all goods entered for the benefit of any drawback, bounty, or allowance, as required by law?

Answer. The inspectors superintend the lading for exportation of all goods for drawback, bounty, or allowance, under my direction.

Question 48. Do you from time to time, and particularly on the first Mondays of January and July in each year, examine and try the weights, measures, and other instruments used in ascertaining the duties on imports, and make the returns required by law to the Collector?

Answer. In consequence of the frost in January, the weights are examined and tried in the spring and autumn; the measures and other instruments are more frequently examined and tried, and the returns required by law are made to the Collector.

Question 49. Are the weights, measures, and other instruments, at present in a good state?

Answer. They are, to the best of my knowledge.

Question 50. Are fair and true accounts and records of all your official transactions kept agreeably to law?

Answer. I do not know to the contrary.

Question 51. Are all goods which the law requires weighed, measured, and gauged?

Answer. They are.

Question 52. State, in regard to the certificates required to be given by the forty-second section of the collection law, the course which has been practiced, in the same detail and with the same minuteness as called for in respect to Mr. Thomson's teas; and whether they have been invariably granted to the importer of all goods immediately after landing them; whether those goods were bonded with sureties, or warehoused with the general bond of the importer. If otherwise granted, say how and when granted. State also the quantities of spirits, wines, and teas that are now warehoused, for which certificates have been delivered, as well as the quantities of the like articles warehoused, for which certificates have not been delivered.

Answer. The course practiced has been to deliver the certificates to the importers, as soon as they can be finished, after the delivery of the spirits, wines, and teas from the respective vessels, and this has been invariably the practice, even when in store and not bonded with sureties. I do not know the quantity issued for spirits, wines, and teas now warehoused, or those not warehoused.

Question 53. State the manner in which, the times at which, the said certificates have been delivered to you by the Collector, with the number from time to time so delivered, and in whose custody they are kept.

Answer. The certificates are ordered by me from the printer, when returns are made by the marker of the weights of teas, gauges and proofs of spirits and wines, and the qualities and kinds thereof; the certificates are then filled up, signed, numbered, and sent to the Collector for his number, signature, and seal of office, and then returned to my office for issuing; no particular number is given at a time, and they are kept in my custody.

Question 54. State the course which is generally practiced in the conveyance of spirits, wines, and teas to the stores, and whether the designation is made by you or intrusted to an inspector.

Answer. The spirits, wines, and teas are taken from the wharf to the stores by the importer, who designates his own stores; and when all the cargo is landed from the vessel and hauled to the stores, they are examined by the inspector and locked up.

Question 55. Enumerate the stores now used, annexing to each the owners' names, and the inspector in whose charge it is, and stating where the owner is the same person with the person whose goods are stored therein; state, also, the precautions taken for their security.

Answer. The stores returned by the inspectors are as follows:

1 with wine, in Front, below Walnut street, J. Sperry,	Joseph R Dickson, inspector.
1 with wine, in Gray's alley, J. Moss,	
1 with gin, in Water, below Walnut, J. Welsh,	
1 with tea, in Waln & Morris' stores, Waln & Morris,	
4 with wine, in Water street, Perit & Cabot,	Henry Huber, inspector.
1 with wine, in Front street, Perit & Cabot,	
1 with wine, in Prune street, Perit & Cabot,	
1 with wine, in Front street, D. Lewis & Co.,	
1 with tea, in Front street, J. Gratz,	
2 with tea, in Front street, B. Etting,	
2 with wine, in Dock street, J. B. M'Ilvaine,	
2 with tea, in Dock street, C. Price & Morgan,	
1 with wine, in Dock street, C. Price & Morgan,	
2 with wine, in Dock street, J. L. Hodge,	
1 with wine, in Spruce and Sixth streets, J. L. Hodge,	
1 with brandy, in 247 High street, Thouron & Co.,	John W. Durant, inspector.
1 with wine, in 52 Chestnut street, P. O. Sorbe,	
1 with wine, in Mariners church, E. M'Dermott & Co.,	
1 with wine, in S. Wharves, Corlies & Co.,	
1 with wine, in S. Wharves, Waln & Morris,	
1 with gin, in Water street, J. & R. Phillips,	
1 with tea, on South Street wharf, L. Clapier,	Andrew Jackson, inspector, assisted by Robert Hopkins, inspector.
1 with tea, in 30 Walnut street, W. Brown,	
1 with tea, in 78 S. Wharves, E. Thomson,	
1 with tea, in 163 Water street, E. Thomson,	
1 with tea, in 165 Water street, E. Thomson,	
1 with tea, in 157 Water street, E. Thomson,	
1 with wine, wharf above South, J. S. Smith,	
1 with wine, in Keith's stores, Penn st., Perit & Cabot,	
1 with wine, in Keith's stores, Penn st., Perit & Cabot,	
1 with wine, in Penn street, below South, J. Latour,	
1 with spirits, in Penn street, (Keith's,) P. Bousquet,	
1 with spirits, in Penn street, No. 20, J. H. Jacobs,	
1 with spirits, in Penn street, No. 24, J. H. Jacobs,	
1 with spirits, in Penn street, No. 26, J. H. Jacobs,	
1 with spirits, in Thomson's store, J. H. Jacobs,	
1 with wine, in South Water street, J. M'Cauley,	
1 with wine, in Penn street, S. Moss,	
1 with spirits, in Lombard Street church, J. Latour,	
1 with wine, in Lombard street, above 5th st., M. Bujac,	
1 with wine, in Spruce, above Front, J. Diamond,	
1 with wine, in Front street, (M'Phail's,) J. H. Jacobs,	
1 with brandy, in Library street, G. Garesche,	B. Ashmead, inspector.
1 with brandy, in Minor street, G. Garesche,	
1 with brandy in Minor street, J. Beyelle & Co.,	
1 with wine, in Perot's stores, T. B. Wales & Co.,	C. Anderson, inspector.
1 with wine, in Perot's stores, T. B. Wales & Co.,	
1 with wine, in Perot's stores, T. B. Wales & Co.,	
1 with wine, in Perot's stores, T. B. Wales & Co.,	
1 with wine, in Perot's stores, T. B. Wales & Co.,	
1 with tea, in Church alley, S. Spackman,	John Reed, inspector.
1 with wine, in Neff's store, Chever & Fales,	
1 with rum, in Water, near Chestnut, J. Goddard,	J. Zebly, inspector.
1 with tea, in High and Seventh streets, R. Tolland,	John Davis, inspector.
1 with tea, in Water, below Chestnut, Emlen & Ralston,	
1 with wine, in Water, above Walnut, J. Diamond,	
1 with wine, wharf below Walnut, J. Diamond,	
1 with wine, in Bank alley, J. Diamond,	
1 with wine, in Water, below Walnut, Peret & Cabot,	
1 with wine, in Front, above Bridge, Peret & Cabot,	
1 with wine, in Water, above Walnut, R. Ralston,	
1 with brandy, in Dock street, G. Garesche,	
1 with wine, on wharf below Chestnut, Bevan & Porter,	

I do not know who are the owners of the stores; they are all under lock.

Question 56. Are the articles usually counted after their admission into the store? If so, are there any exceptions?

Answer. The articles are always counted after their admission into store, and no exceptions, except those already mentioned concerning teas, where different sized boxes, breaks of upright posts, stacks of chimneys, &c., preclude the possibility of counting them.

Question 57. Describe the way in which access is had to the stores by the owners of the goods, whether with or without the presence of an inspector.

Answer. By producing a permit to deliver any of the goods; when cooperage is necessary; to examine their goods for samples to sell by; and various other necessary reasons; an inspector generally attends,

but when he is pressed with business, opens the stores and leaves them for the length of time he thinks necessary to accomplish their visit, and then locks them up, or the key is returned to him.

Question 58. Have any of the inspectors now in service disobeyed your instructions or violated the law? If so, name them, and specify the circumstances.

Answer. They have not disobeyed my instructions, to my knowledge, nor violated the law, except it be so construed in the foregoing answers to the questions.

Question 59. Is it a fact that the keys belonging to the inspectors have generally or frequently been entrusted to the owners of the goods? By what inspectors has this been done, and has it been done with your approbation and knowledge?

Answer. They have, as before stated, and it was known to the officers generally.

Question 60. Has the same key opened the locks of various stores? How has this occurred, and by whom have the locks and keys been provided?

Answer. The locks are in sets of eight and four, each key opens the eight or four locks, and the inspectors each have such sets for vessels and stores; they are imported in this way, and cannot be obtained of good quality but seldom. They have been provided by me or my deputy.

Question 61. Is each store allotted exclusively to the goods of one person?

Answer. Not always.

Question 62. Have there been any illegal removals of goods from the stores, or a neglect to introduce them into store, other than those of Edward Thomson? If so, state the cases and circumstances.

Answer. Not to my knowledge.

Question 63. What has been the usage on the above points, since you have been in office? State the date of your appointment? Has the usage been invariable? If it has undergone any change, state the change.

Answer. I do not know to what you allude. The date of my appointment is October 24, 1814.

Question 64. Have you recently had all the stores accurately examined, and from that examination does there appear to be any goods missing other than Thomson's?

Answer. The stores have all been recently and accurately examined, and the inspectors report them to be correct, and no goods missing.

Question 65. Are all the returns and reports required to be made to you by the inspectors, weighers, measurers, and gaugers, regularly made by them? If there are omissions, specify them.

Answer. I do not know to the contrary.

Question 66. Are the provisions of the 53d section of the collection law strictly complied with by the inspectors? Do they constantly remain on board the vessels, from the rising to the setting of the sun, and on their leaving the vessels do they secure them as directed? Are the prescribed books kept by them, delivered by them to you, examined by you, and transmitted to the Collector?

Answer. I know nothing to the contrary. The inspectors keep their own books, copies of them are delivered by them to me, (called reports,) examined by me or my deputy, and transmitted by me to the Collector, who files them with the manifests.

Question 67. Have you in any cases granted any indulgence which the law does not sanction? If so, state it, and the grounds on which it was granted.

Answer. Not to my knowledge.

Question 68. Is it within your knowledge that any frauds, collusions, or connivances, in violation of the law or duty, have been committed by any officer or person connected with the custom-house? If so, state them.

Answer. It is not within my knowledge.

Question 69. Since the surreptitious removal of teas, has any change taken place in securing the stores and in gaining access to them, or in granting certificates? If so, state it.

Answer. A change has taken place in securing the stores, and no access can be gained without the presence of an inspector. Certificates are now only granted when goods are bonded with sureties.

Question 70. Is the number of officers under your superintendence sufficient to insure a strict compliance with the provisions of the law?

Answer. The number is not sufficient.

Question 71. State any other facts not embraced within the scope of these inquiries which, may in your opinion, furnish useful information, in regard to the administration of the custom-house.

Answer. I believe I have stated all.

Question 72. It is represented that from a period commencing with the last spring, and continuing until the close of autumn, Mr. Thomson was in the habit of selling here at public auctions boxes or parcels of the very teas which he fraudulently withdrew from store, or which had not been, as they should have been, stored; which sales were matter of common notoriety, advertisements and other notices of them constantly appearing in the newspapers. Are such the facts? If so, through what causes did it happen that the officers of the customs were not excited into watchfulness by these publications? Do you know, or can you learn, and if so, state whether these advertisements carried on their face any evidence of the teas offered for sale being those of Mr. Thomson's, so fraudulently removed?

Answer. Mr. Thomson was in the habit of selling teas by auction, but none, to my knowledge, that were fraudulently withdrawn from store, or which should have been stored; advertisements appear in the papers to sell cargoes, very frequently before the vessel enters; these publications being customary, it could excite no suspicion. I do not know nor think that any of these advertisements carried on their face any evidence of teas being fraudulently removed. If such could have been the fact, it would not, I apprehend, remained concealed from the officers, nor does it afford any evidence that teas advertised by auctioneers are in the store of such auctioneers. The teas are generally sold by sample, and according to the quantity sold are taken from store, the balance being again advertised, if thought necessary.

J. GLENTWORTH,
Surveyor and Inspector.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 7.

Interrogatories to Charles Anderson, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. I was appointed on the 29th day of April, 1806.

Question 2. Did you, on the arrival of the William Savary, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading the vessel; was everything in regard to the cargo, falling under your notice, correct, and according to law?

Answer. I neither went on board of either of the above named vessels, being placed in the upper district by the direction of the surveyor, and of course know nothing of any transaction that might take place in the lower district.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. When either spirits, wines, or teas, are laden on board of any vessel bound to a foreign port, for the benefit of drawback, in such case I receive the certificates corresponding with the number on the cask or box then laden, and return the certificates in the Collector's office, stating the date of the shipment.

Question 4. Are you conversant, from your own knowledge, or otherwise, of the course usually pursued in relation to wines, spirits, and teas, taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored and their removal from the store; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. When the whole or a part of a cargo, ordered to be stored for the security of the duties, or for the benefit of drawback, and to prevent adulteration, whether wines, spirits, and teas, after being gauged, marked, and weighed, the articles are then taken to the store or stores, pointed out by the owner or consignee of the merchandise, (the store or stores meeting my approbation;) the merchandise is then removed thereto by my direction, and by such persons as I have confidence in, and put in such order by my direction as the articles, whether wines, spirits, teas, and other articles of merchandise, (teas I never had under my charge,) so that I can count them correctly; I then lock the store or stores with locks furnished from the *custom-house*, keeping the keys in my charge, and securing every entry that may lead to the merchandise so stored, and make a return of the same to the custom-house or Collector's office, date of storage, and where stored; and when such articles as I have under my charge are legally called for by a permit from the Collector's office I deliver such articles as are permitted, detaining the residue till further orders from the Collector's office; this is the practice I have always been in the habit of pursuing during the time that I have been attached to the custom-house.

Question 5. Do you know anything fraudulently or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I never knew anything in respect to teas imported by Edward Thomson, either by officers of the custom-house or others, except when permits from the Collector, in favor of Edward Thomson and others, were put into my hands for exportation, for the benefit of drawback, said to be imported by Edward Thomson. Any further transaction never came under my knowledge.

Question 6. Have you any knowledge of any collusion between any of the officers of the custom-house and Mr. Thomson; or of any connexion or close intimacy with him; or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not even a shadow of any knowledge respecting the officers and Mr. Thomson having any collusion or intimacy; nor have I ever heard of anything that might lead to the least suspicion.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I have no knowledge of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or even in relation to any other business connected with the custom-house, that might lead to the smallest suspicion of fraud by any of the officers.

Question 8. State any further facts not embraced within the scope of these inquiries which you may consider material.

Answer. I have not any further facts to state, within the scope of these inquiries.

CHARLES ANDERSON, *Inspector.*

Affirmed and subscribed before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 8.

Deposition of B. Ashmead, Inspector.

Question 1. What is the date of your appointment?

Answer. On or about the 26th May, 1796.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unloading of the

vessel; was everything in regard to the cargo, and falling under your notice, correct, and according to law?

Answer. I did not attend to either of the vessels mentioned in this interrogatory.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I had nothing further to do with the certificates than to receive and compare such as accompanied merchandise that was laden under my inspection for benefit of drawback; after comparing them they were returned to the custom-house.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas, taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. In the part of the district in which I am stationed the goods are stored in charge of the officer who attends to their delivery from the vessels in which they are imported. They are taken to such stores as are designated by the importers, by their own porters, unaccompanied by an officer, as he cannot leave the vessel while discharging; when the ship is unloaded we visit the stores, to ascertain if the whole has been stored; we then put our locks on them for safe-keeping, until we receive permits for their delivery. It has been customary, when all the inspectors have been actually engaged on board of some ship or vessel, for the inspectors, when they receive a permit to deliver goods from store, to let the merchant have the key a sufficient length of time to take them out. When we can leave our vessels, we visit the stores to ascertain whether any more has been taken out than we had received permits for; and there has not a single instance occurred, in the part of the district in which I am stationed, that there has been more taken out than was permitted. Since Mr. Thomson's fraud we do not, in any case, allow the keys to go out of our own charge.

Question 5. Do you know anything fraudulently or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I do not.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs, in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I must also answer in the negative to this interrogatory, as I firmly believe that since I have been in office, which is nearly thirty years, there has not been an inspector of the customs in this district whose official integrity could justly be doubted.

B. ASHMEAD, *Inspector.*

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 9.

Deposition of John Brown, Inspector.

Question 1. How long have you acted as an inspector?

Answer. I have acted as an inspector since July 1, 1815.

Question 2. Were you employed on any of the vessels, and which vessels, in which teas were imported by Edward Thomson, to wit: the ships William Savary, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which have arrived at the port of Philadelphia since the 27th of February, 1825?

Answer. I was employed on board the ship William Savary.

Question 3. Were you specially detailed by the surveyor for this service?

Answer. I was detailed by the surveyor for this service, but do not remember if before I first went on board or after.

Question 4. When and at what place did you go on board?

Answer. I went on board about 12, or between 12 and 1 o'clock, the 28th February, 1825, at the wharf near Pine street, usually called Sims' wharf.

Question 5. Was there at the time of your entering the vessel any, and what, inspector on board; had there been one, and what was his name?

Answer. There was an inspector on board when I entered the vessel; his name, Rowland Smith.

Question 6. Did everything appear fair and regular when you went on board? Was the cargo locked up and carefully secured?

Answer. When I went on board everything appeared as they usually do on board vessels just arrived, and people employed securing them to the wharf, which occasions much confusion, with cables, spars, rigging, and laborers on the decks; the hatches appeared to be secured, though not locked up.

Question 7. Were all the provisions of law strictly complied with, previous to the unloading of the goods?

Answer. I have no knowledge of any omission or neglect to strictly comply with the provisions of law, previous to the unlading of the goods.

Question 8. Was a permit, endorsed as required by the 37th section of the collection law, received by you previously to your proceeding to unlade, and before any part of the cargo was removed?

Answer. I have no knowledge of any endorsement, nor did I know, until now, that there was a law requiring permits to be endorsed. I received permits, signed as usual by the Collector or his deputy, and

countersigned by the Naval Officer or his deputy, granting permission to Edward Thompson and others to unlade teas and other merchandise, previously to proceeding to unlade, and before any part of the cargo was removed.

Question 9. Was there any disagreement between the permits and the goods inspected and delivered by you?

Answer. Wherever the permits disagreed with marks or numbers of the packages, they were detained on board until the owners of such goods had the permits altered at the custom-house, so as to accord with the marks and numbers in the manifest and entry, or with those on the packages.

Question 10. Were the teas all weighed by the weighers?

Answer. They were.

Question 11. Were the teas inspected by you and weighed before they were delivered or removed?

Answer. The teas unladen under my inspection were weighed before they were delivered from the wharf.

Question 12. Was the unloading at no other times than between the rising and setting of the sun? Did you remain on board constantly during this time? Did you enter the teas in a book, as required by the collection law, and deliver the same to the surveyor?

Answer. The unloading was at no other times than between the rising and setting of the sun. I did remain on board during this time, excepting at times for breakfast and dinner, at which times the unloading ceased. I entered the teas in a book, a copy of which I delivered to the surveyor.

Question 13. Do you know whether the teas were removed by porters in the employ of Mr. Thomson? Name, if you can, the porters.

Answer. The teas were removed by porters who appeared to be under the superintendence of John Hallowell, who was in the employ of Mr. Thompson.

Question 14. Did an inspector attend the removal of the teas to the stores? If so, name the inspector.

Answer. Andrew Jackson, an inspector, attended to assort and count the teas on the wharf, and to the removal of the teas therefrom.

Question 15. Do you know anything fraudulently, or illegally, or unusually done in respect to these teas, either by the officers of the customs or others? State what you know.

Answer. I knew not of any fraud, or illegality, or anything unusually done in respect to these teas, at the time of unlading, nor until the 21st of November last, when I was informed that Mr. Thomson had been taking teas from stores on which the duties had not been secured.

Question 16. Have you any knowledge of the existence of any collusion between the officers of the custom-house and Mr. Thompson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of the existence of any collusion between the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head.

Question 17. Do you know of any omission, or neglect, or connivance of any officers of the customs, in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I know not of any omission, neglect, or connivance of any officers of the customs, in relation to the teas of Mr. Thompson, or in relation to any other business connected with the custom-house. A few days after the unlading of the ship William Savery's cargo, I was specially detailed by the Collector to attend to the admeasurement of cotton goods subject to a duty of thirty cents per square yard, which business has occupied my time and attention in places quite remote from where the teas were stored.

Question 18. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas, taken from wharf to be deposited in stores, as to the persons carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in these respects, and when? State what you know on these points.

Answer. The course usually pursued in relation to spirits, wines, and teas, was, that they were taken from the wharf (after they were gauged, if spirits and wines, and weighed, if teas,) by the porters usually in the employ of the respective owners of the spirits, wines, and teas. I have no knowledge of the superintendence of an inspector on the way, or present when every package was put into stores; the inspector that was to take charge of the goods went to the stores where the goods were storing when his other duties as inspector would allow; and when all stored, placed locks on the store doors for the safe-keeping of the goods, which were not removed from store without a permit for that purpose was had from the custom-house and given to the inspector. Formerly there were inspectors specially detailed by the surveyor for marking spirits, wines, and teas, and they attended to the safe-keeping of goods when they were unladen and put into stores. After June, 1822, they ceased marking spirits, wines, and teas. I believe all those inspectors continued as before, and some other inspectors commenced to take charge of spirits, wines, and teas. I have no knowledge of any other change, in these respects, within the last ten months past, as it is nearly that time since I commenced attending to the admeasurement of cotton goods, and I have not superintended the unlading of any spirits, wines, or teas, since the unlading of the ship William Savery.

Question 19. Had you anything to do with the delivery of the certificates issued under the 41st section of the collection law, and what?

Answer. I have not had anything to do with the delivery of certificates, except once, I delivered for the surveyor certificates for teas imported by Captain Graham in the ship Pacific.

Question 20. State any further facts not embraced within the scope of these inquiries which you may consider material.

Answer. I do not at this time remember any material facts further than the preceding inquiries embrace.

JOHN BROWN, *Inspector.*

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 10.

Deposition of John Boyd, inspector.

Question 1. How long have you acted as an inspector?

Answer. I had the satisfaction of being apprized of my appointment on the 15th of March, 1825.

Question 2. Were you employed on any of the vessels, and which vessel, in which teas were imported by Edward Thomson, to wit: the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which have arrived at the port of Philadelphia since the 27th of February, 1825?

Answer. Of the above five ships which have been enumerated that arrived to Edward Thomson, which brought teas in, I was detailed to the ship Thomas Scattergood, that arrived at the port of Philadelphia on the 30th of June, 1825.

Question 3. Were you specially detailed by the surveyor for this service?

Answer. I was specially detailed by the surveyor as an inspector for the ship Thomas Scattergood, as my name was put in the book which is kept by the surveyor for the express purpose of registering the day of the vessel's arrival, the captain's name, where from, what her cargo consisted of, to whom belonging, and where lying at the time, &c.

Question 4. When and at what place did you go on board?

Answer. The afternoon of the arrival of the ship Thomas Scattergood, after she was made fast, I went on board, at Mr. Willing's wharf, in the port of Philadelphia.

Question 5. Was there, at the time of your entering the vessel, any, and what, inspector on board? Had there been one, and what his name?

Answer. When I went on board the ship Scattergood there was no inspector, nor had there been, to the best of my observation, (with the exception of Captain Whipple, who is boarding officer of the port of Philadelphia.)

Question 6. Did everything appear fair and regular when you went on board? Was the cargo locked up and carefully secured?

Answer. Everything did appear fair and regular when I went on board; and, previous to my leaving the vessel, I put my locks on the cabin and forecastle; the fore and after hatches were fastened down, and the long boat over them.

Question 7. Were all the provisions of the law strictly complied with previous to the unloading of the goods?

Answer. As far as my knowledge extended, all and every provision of the law was complied with; that is to say, the permits were regularly signed, which were sent to me by the Collector, and countersigned by the Naval Officer, before any goods were landed.

Question 8. Was a permit, endorsed as required by the 37th section of the collection law, received by you previously to your proceeding to unload, and before any part of the cargo was removed?

Answer. The permits were not endorsed as these are now previous to unloading of wines, spirits, and teas; but I observed it was the usual practice to commence discharging of goods when the permits came to the inspector signed by the Collector and Naval Officer.

Question 9. Was there any disagreement between the permits and the goods inspected and delivered by you?

Answer. There was no disagreement between the permits and the goods inspected and delivered by me, with the exception of a few mats of cassia.

Question 10. Were the teas all weighed by the weighers?

Answer. I have every reason to believe that the teas were all weighed by the weighers, as the number of chests weighed corresponded with the number which the permits called for, and unloaded under my inspection.

Question 11. Were the teas inspected by you and weighed before they were delivered or removed?

Answer. The teas were inspected by me, marked by the marker, and weighed by the weighers, before they were delivered or removed from the wharf, to the best of my knowledge.

Question 12. Was the unloading at no other time than between the rising and setting of the sun? Did you remain on board constantly during the time? Did you enter the teas in a book, as required by the collection law, and deliver the same to the surveyor?

Answer. There was no goods delivered but between the rising and setting of the sun. I always remained on board during the time of unloading the vessel, only when I went on the wharf for the purpose of arranging the different quality of teas; and previous to my leaving the ship I had the hatches put down and my locks put on, to prevent any goods being taken out but when I was present. I entered all the teas, agreeably to all the permits given to me, in a book, and returned a copy of the same to the surveyor.

Question 13. Do you know whether the teas were removed by the porters in the employ of Mr. Thomson? Name, if you can, the porters.

Answer. The teas were removed by the porters in the employ of Mr. Thomson, as the clerk of Mr. Thomson (Mackie) superintended the delivery of all the goods that were discharged from the ship Thomas Scattergood; the porters' names I have no knowledge of

Question 14. Did any inspector attend the removal of the teas to the stores; if so, name the inspector?

Answer. I do not know whether any inspector in particular did attend the whole of the teas to the stores, as the stores were immediately in the neighborhood where the ship was discharging; there were several that saw the teas to the store; their names are Mr. Hopkins, Mr. Jackson, and myself.

Question 15. Do you know anything fraudulently, or illegally, or unusually done in respect to the teas, either by officers of the customs or others? State what you know.

Answer. I do not know anything fraudulently, illegally, or unusually done in respect to the teas, either by the officers of the customs or any other person or persons, of my own knowledge.

Question 16. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy, with any other indication or appearances pointing to just suspicions on this head; if you have, state minutely the extent of your knowledge?

Answer. I have none, nor never had any knowledge of the existence of any collusion between any of

the officers of the custom-house and Mr. Thomson, or any connexion or close intimacy with him, (as I only saw him but once after the arrival of the ship during the whole season,) or any other fact, indication, or appearance, that would lead to suspicion of any illegal transaction.

Question 17. Do you know of any omission, neglect, or connivance of any of the officers of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I have no knowledge of any omissions, or any connivance of any officer of the customs, either in the custom-house or any officer belonging to the same, in connexion with the tea of Mr. Thomson.

Question 18. Are you conversant, from your own knowledge or otherwise, with the course pursued in relation to wines, spirits, or teas taken from wharf to be deposited in stores, as to the persons carrying them to the stores, the superintendence of an inspector on their way, his presence when the articles are stored, the safe keeping of the goods stored, and their removal from the stores, and whether there has been any changes in these respects, and when? State what you know on these points.

Answer. I cannot say that I am perfectly acquainted with the whole duty that belongs to taking away wines, spirits, and teas; the usual practice of taking away the articles specified which has come under my notice is, the wines and spirits are gauged and marked before they are delivered to the porters; teas are marked and weighed before they are taken from the wharf. This duty devolves upon the officer that is attending to the discharging of a cargo; he sees that no article is taken away before permission is given by the inspector, who has authority from the custom-house so to do. The officer discharging of such articles as is enumerated in the above questions gives notice to the person that keeps the keys where the stores are and the goods stored; he puts his locks on for safe-keeping, as it would be impossible for the officer that is delivering the goods from on board to attend at the same time to see the goods stored; further, the importer often has, at the same time, several stores. Goods that are entered for the benefit of drawback are put under the custom-house locks. When the importer wishes to get the goods out, he obtains a permit for that purpose, and presents the same to the person that holds the keys; by that means has access to the goods. I believe there has been every precaution used to prevent any unlawful means of obtaining goods from the stores, and that has been for a considerable time past; the exact time I am not able to state at present.

Question 19. Had you anything to do with the delivery of the certificates issued under the forty-first section of the collection law, and what?

Answer. I have had nothing to do with delivering of the certificates under the forty-first section of the collection law.

Question 20. State any further facts not embraced within the scope of these inquiries which you may consider material.

Answer. The above is all the information that I am able to give you at the present time.

JOHN BOYD.

Sworn and subscribed before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 11.

Interrogatories to Thomas Cash, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. My appointment is dated April 19, 1802.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825, of the Addison, on the 5th April, 1825, of the Woodrop Sims, on the 13th of April, 1825, of the Benjamin Rush, on the 1st July, 1825, and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo; if so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel? Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I was not on board of either of the above mentioned vessels at any time while discharging or after being unladen; my duties required my attention in the upper district of the port; the above named ships were all discharged in the lower part of the city.

Question 3. Had you anything to do with the certificates issued under the forty-first section of the collection law, and what?

Answer. I have nothing to do with the issuing of the certificates. My duties are confined to the wharf; teas, wines, or liquors entered for the benefit of debenture are permitted, and the permits delivered to the officer on the wharf for shipping; the officer takes off the number on the chests or casks, the certificates are delivered to the officer by shipper, and by officer compared with the numbers, and, if agree, then endorsed by him and delivered to the Collector.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, tea, taken from the wharf to be deposited in stores; as to the person carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. On the arrival of any vessel from Canton with teas, or any port of Europe, containing wines or liquors, she is reported at the surveyor's office, when an officer is appointed to take charge and attend to the delivery of the cargo; if any goods are permitted for long credit, the officer discharging permits the porter of the owners to take the same to their store; the discharging officer's presence is always required at the vessel; there is no other officer appointed to attend the conveyance to the store, or any to receive the same at the store. On the discharge of a vessel, the stores are examined by the discharging officer, and secured by locking up the same, and there remain until permitted for removal. Since I have had the honor of being an inspector the above mode has been usual, and, I believe, since the passage of the law of 1799.

Question 5. Do you know anything fraudulent or illegally, or unusually done in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not know of anything fraudulent or illegally, or unusually done in respect to teas imported by Edward Thomson, either by officers of the custom-house or others.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge whatever of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexions or close intimacy with him.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I do not know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house.

THOMAS CASH, *Inspector.*

PORT OF PHILADELPHIA, *January* 24, 1825.

Affirmed to before me, this 25th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 12.

Interrogatories to Wm. Dalzell, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. September 1, 1818.

Question 2. Did you, on the arrival of the William Savary, on the 28th February, 1825, of the Addison, on the 5th April, 1825, of the Woodrop Sims, on the 13th April, 1825, of the Benjamin Rush, on the 1st July, 1825, and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo; if so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel? Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. Being otherwise engaged at the time of the arrival of the above vessels, I did not go on board of either.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. All certificates accompanying debenture goods were returned to the custom-house.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wine, spirits, and tea, taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; and the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and what? State what you know on those points.

Answer. I believe that it has always been usual for the merchant to employ his own porters to store the above goods; that an inspector attended and secured the stores, and keep the keys; that when called for, the same inspector attends and delivers the goods under his care; if there is any other course pursued I know it not, as I never attend any of the stores.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to tea imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I have no knowledge of anything of the above.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of any of the above facts.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs, in relation to the teas of Mr. Thomson; or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I have no personal knowledge of any of the above facts.

Question 8. State any further facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. I know of none.

WILLIAM DALZELL, *Inspector.*

Sworn to before me; this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 13.

Deposition of Joseph R. Dickson, Inspector.

Question 1. What is the date of your appointment?

Answer. On or about the 15th of February, 1815.

Question 2. Did you, on the arrival of the William Savary, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin

Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them, and place the necessary locks, so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo, falling under your notice, correct, and according to law?

Answer. That part of this district in which I am stationed extends from Market Street wharf to the drawbridge, and is denominated the middle district. All the vessels above mentioned were unladened in the lower district; consequently, I did not go on board any of them on their arrival, nor had I anything to do with the unlading of any of their cargoes.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. No further than in relation to spirits, wines, or teas being reshipped, under my inspection, for a foreign port. I received certificates from the merchant for the same, compared them with the packages reshipped, and then returned them, endorsed, to the custom-house.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas, taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. The inspectors charged with the delivery of the cargo from on board, according to permits for that purpose, are unable to accompany articles to be stored to the places of storage, respectively. They are carried by the merchants' porters and stored. They are sometimes distributed in several stores by the different shippers, so that it is altogether impracticable for an inspector, while attending to his duty on board, according to section 53 of the revenue laws, to see the articles stored at different places and at the same time.

When a permit is handed to me for the removal of goods from store, if engaged on board of a vessel, I have loaned the key to the merchant, and allowed him to take out the amount of his permit; and on being able to visit the stores and lock them up, I have uniformly found them correct, and in no case has the removal exceeded the permit. This practice, however, has been discontinued a few weeks since, and we now refuse to give the key to any person. If we are engaged, the merchant must wait until we can go, and remain at the stores until the delivery is completed.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the customs or others?

Answer. I do not.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the customs and Mr. Thomson, or of any connexion, or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not.

Question 7. Do you know of any omission, neglect, or connivance, of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. My observation and knowledge of the business connected with the custom-house have been pretty much circumscribed by the limits of the district where I am stationed; and as Mr. Thomson's teas did not come under my notice, either with respect to unlading, storing, or removing from stores, I know of none.

I have nothing further material to state.

JOS. R. DICKSON, *Inspector*

Affirmed to before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 14.

Deposition of John Davis, Inspector.

Question 1. What is the date of your appointment?

Answer. The exact date I do not recollect, but I came into office in 1815, perhaps in September or October.

Question 2. Did you, on the arrival of the William Savary, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825; go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. For the sake of accommodation, both to shippers and ourselves, the surveyor has agreed that the wharves on the eastern boundary of the city be divided into three divisons, called the upper, middle, and lower districts, in each of which the officers officiating have rented a room, and pay their own expenses. I being stationed in the middle district and those ships discharging in the lower, I did not go on board, and have no knowledge of any transaction attending the delivery of their cargoes.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. Certificates accompanying spirits, wines, and teas never come into our hands, except when goods are exported to a foreign country, when they are carefully examined by us, and, after finding them to agree with the packages shipped, are returned to the Collector's office.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, or teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe keeping of the goods stored, and the removal from the stores; and whether there has been any change in these respects, and when? State what you know on these points.

Answer. The course usually pursued in removing from the wharf any merchandise unladen from vessels is, the merchants or owners of goods sends an order for them by their porters to the person appointed by the ship's husband, who attends for that purpose, and who delivers them; they are not accompanied by the inspector by the way; he cannot leave the vessel, but it is our uniform practice to satisfy ourselves of the correctness of the goods being in store, after which we put on our locks. In *our* district each officer attends to the stores containing the goods he has landed. With respect to delivering from store, we have often been under the necessity of giving the key, but would at another time examine to see if the goods remaining were in accordance with our storing book, in which an account is kept of all goods stored, and have never found in our district any deception attempted to be practiced. Since the fraudulent conduct of Mr. Thomson no keys are delivered to the merchant, not even to show his goods, but are accompanied by an officer. But this cannot be done at all times on the day they wish it, owing to the officer being engaged elsewhere.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicion on this head? If you have, state minutely the extent of your knowledge.

Answer. I have none.

Question 7. Do you know of any omission, neglect, or connivance of any officers of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely. State any other facts not embraced within the scope of these inquiries which you may consider material.

Answer. With respect to the disposal of Mr. Thomson's teas I am entirely unacquainted, as the transaction took place out of our customary limits; but I do not believe there is an officer in this port that would connive at an illegal transaction to defraud the revenue With respect to omissions, or neglect in business generally, connected with the custom-house, if suffering the keys at all to pass out of our hands be such, we are all more or less censurable. I believe it was a custom when I came into office, but it is not from a want of integrity, but from inability often to attend near one hundred stores, scattered in every direction through the city, some of which may be more than a mile apart, and require our attention two or three times a day, or the merchant be deprived of the sale of his goods. The inconvenience attending merchants having the privilege of putting goods in their own stores is, to persons not actually attending them, inconceivably great; it frequently happens that they have other goods, with those stored for debenture, and we must attend to let them deliver them. This, and their stores being located to suit their own convenience, often imposes on us double duty.

Respectfully, yours,

JNO. DAVIS, *Inspector.*

Affirmed to before me, this 25th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 15.

Interrogatories to John W. Durant, Inspector of Customs.

Question 1. What is the date of your appointment?

Answer. May, 1818.

Question 2. Did you, on the arrival of the William Savery, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. I had no official duty to discharge in reference to any of the vessels named in this interrogatory; they were discharged below the drawbridge, whereas I am now, and have been always, stationed in the middle district, lying between Market street and the drawbridge.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. In the course of my duty I have attended to the shipment of goods which required certificates, such as spirits, wines, teas, &c., and it has been my uniform practice to demand the certificate for each package, and when this was incorrect I have rejected it; when the shipments were completed I have made the return to the proper officer, No. 7, in the Collector's office, and in every instance I have waited until they have been examined and approved.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. Ever since I have been in office it has been the uniform practice for the officer appointed to

inspect the landing or unlading of vessels to be present during the whole time of landing or unloading, either on board or on the adjacent wharf, and he is punishable by law for any omission of his attendance on these occasions. It follows, of necessity, that, as the attending officer cannot accompany to the place of deposit the various carts and drays by which the goods are removed to such deposit, and there being no special officer for that purpose, it has been the uniform practice to permit the transport without guard to the warehouses assigned for the reception of the goods; but it is a part of the duty of the inspecting officer to examine the places of deposit, and to see that the whole of the goods intended to be warehoused be there placed and secured by locks, of which the keys are lodged in the custom-house. By this mode of proceeding the officer discharges the double duty of inspector and storekeeper, and is frequently called on at the same moment to perform two offices which are incompatible with each other. Thus an officer, when inspecting the unloading of one vessel, is called on with permits to deliver goods, warehoused under his charge, to be shipped, with benefit of drawback, on board of vessels lying at a great distance from the place of his actual duty, which he cannot legally abandon; he has, therefore, no alternative but the delivery of the keys in his charge or a refusal to deliver the goods, which is contrary to the usage practiced since I have been in office; but his duty imposes on him the subsequent examination of the warehouse wherein the goods were taken, and of the permits and returns thereof at the custom-house, in order to be satisfied that the proper quantity only has been removed, and that the remainder be secured as before. In the discharge of this very delicate and responsible portion of the deponent's duty, in the great variety of cases in which he was employed, not a single instance has occurred in which there was the smallest breach of confidence on the part of the merchant. The practice, as detailed, has been uniform since the time of my being employed until within the last five weeks.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I know of nothing of a fraudulent, illegal, or unusual character on the part of any one in respect to the teas imported by E. Thomson.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the customs and Mr. Thomson, or any concern or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge whatever of anything of the nature suggested by this interrogatory, nor do I conscientiously believe that such has ever existed.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of E. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I know of no omission, neglect, or connivance of any officer of the customs in relation to this particular case of Mr. Thomson, nor, indeed, to any other business connected with the custom-house.

I offer the testimony of an humble individual to the high responsibility of all the officers of that institution, as far as my means of information have enabled me to form an estimation of their worth.

I know of no facts in addition to those already stated which I consider material; if I were apprised of any, I should consider myself bound in duty to communicate them to my superior. If, however, I may be permitted to offer an opinion in general terms as to the present mode of proceeding in this point, in respect to bonded goods, I would most respectfully suggest a division of the duties of inspector and warehouse keeper. In the present state of things the public Treasury must be exposed to losses, whatever may be the zeal and integrity of the officer. If the places of deposit were concentrated, and a few officers permanently attached to them, no apprehension need be entertained of future fraud.

Respectfully,

J. W. DURANT, *Inspector.*

JANUARY 24, 1826.

Sworn to before me, this 25th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 16.

Interrogatories to Andrew Geyer, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. The date of my appointment is the 4th of September, 1805.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and the Thomas Scattergood, on the 2d July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. On the 5th of June, 1818, I was appointed by the Collector of the port of Philadelphia to take charge of the stores for the reception of all merchandise sent for examination or valuation by the appraisers, agreeably to the act of Congress of the 20th of April, 1818, and have continued in that appointment up to the present time. Consequently, it not being within the scope of my duties, I did not at the times mentioned in this interrogatory, or at any other time, go on board the vessels enumerated, or either of them, nor place any locks so as to secure the cargo, and of course cannot specify any of the instances of doing so, or answer any of the remaining part of this second inquiry.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. Since my appointment, as stated in answer to query two, I had nothing to do with the certificates issued under the 41st section of the collection law, except in cases of merchandise coming to this port from another port of the United States and sent to the custom-house stores under my charge for the want of the proper certificates accompanying them at the time of their arrival here. Whenever the certificates

for such goods are presented, I compare them with the marks, &c., of the custom-house on the packages to ascertain if they correspond.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. The knowledge I have of the points required in this interrogatory is this: Prior to my appointment, as before mentioned, that is, as storekeeper, I acted as inspector of the customs, and it was then customary for the inspector to attend on the wharf to see that teas were taken to the stores designated, and occasionally to visit the stores while the porters were engaged in taking them there. The persons who carried them were usually the regular porters of the importers. To my knowledge no inspectors superintended them whilst on the way from the wharf to the stores. Locks were placed on the doors, and the keys were left at the surveyor's office. When I had charge of any of the stores, and a permit was presented, I went to his office for the keys and delivered according to permit, then locked the stores again, and returned the keys to the surveyor's office, from whence I had taken them. This was my practice, and I understood the practice pursued before my appointment. What the usage now is I know not.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to the teas imported by Edward Thomson, either by the officers of the custom-house or others? State what you know.

Answer. I have no such knowledge.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I do not know of the existence of any collusion between the custom-house officers and Mr. Thompson, nor of any connexion or close intimacy with him, nor any other facts, indications, or appearances pointing to just suspicion on this head, nor, from opportunities I have had of judging, do I believe that any such exist between the officers of the customs and Mr. Thomson.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I know of no connivance of any officer of the customs in relation to any business connected with the custom-house. As to neglect or omission in respect to the teas of E. Thomson, my knowledge is only what has been reported, which, being hearsay, it would not be proper to state. I was sent on to New York by the Collector for the purpose of discovering the teas that had been sent there, and which were imported in the vessels enumerated in the second question.

CITY OF PHILADELPHIA, *ss.*

On the 23d day of January, 1826, personally appeared Andrew Geyer, who, being sworn according to law, did depose and say that the answers given to the interrogatories as above stated are true, to the best of his knowledge and belief.

ANDREW GEYER.

Sworn and subscribed before me.

G. BARTRAM, *Alderman.*

No. 17.

Interrogatories to Chambers Gaw, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. I entered on the duties of my office June 10, 1818.

Question 2. Did you, on the arrival of the William Savery, on 28th of February, 1825; of the Addison, on 5th of April, 1825; of the Woodrop Sims, on 13th of April, 1825; of the Benjamin Rush, on 1st of July, 1825; and of the Thomas Scattergood, on 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. I have no knowledge of any of the above transactions alluded to.

Question 3. Had you anything to do with the certificates issued under the 4th section of the collection law, and what?

Answer. I have frequently reshipped teas for benefit of drawback, and on such occasions returned the certificates, with the permit, to the custom-house, if furnished in time.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. I never had charge of a tea ship or cargo of tea when stored, none having been landed in the district to which I belong during the time I have been in office; therefore, cannot say what the practice is or has been. I have often landed wine and spirits, but never knew any person appointed to superintend the conveyance from the wharf. When gauged and marked, the owner, or those under his direction, removed them to the stores, and not till then did the officer take charge of the keys. Removing from the stores was always done by permits for that purpose. If a change of usage has taken place, I am totally ignorant of it.

Question 5. Do you know anything fraudulent, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I am entirely unacquainted with Edward Thomson, his agents, or concerns, as well as any intercourse he may have had with custom-house officers, or others, injurious to the public.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicion on this head? If you have, state minutely the extent of your knowledge.

Answer. My last answer comprehends so much of this question, I can only repeat that I am uninformed of any collusion, connexion, or intimacy, directly or indirectly, between Edward Thomson and the custom-house officers, or others, whereby the public revenue might be impaired.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. My business confining me to the upper part of the city, in a great measure precludes me from all knowledge of Mr. Thomson's affairs, and have no suspicion of any person or persons aiding or assisting him in defrauding the public.

Question 8. State any further facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. Nothing has occurred to me on this head not embraced in my former answers.

CHAMBERS GAW.

Sworn and subscribed before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman*

No. 18.

Deposition of William P. Gaw, Inspector.

Question 1. What is the date of your appointment?

Answer. I was sworn into office on the 10th day of April, 1824.

Question 2. Did you, on the arrival of the William Savery, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st of July, 1825; of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. I was not on board either of those vessels; they were all unladen at the lower extremity of the port, and I stationed at the upper. Consequently, I know nothing about said vessels or their cargoes.

Question 3. Had you anything to do with the certificates issued under the forty-first section of the collection law, and what?

Answer. I have several times attended to the lading of liquors, and received certificates for them, and (after examining and finding them to agree with the marks and numbers on the casks and cases) duly returned them. Teas I have had nothing to do with.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector by the way; his presence when the articles are stored; the safe keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. The course pursued in relation to wines and spirits, as coming under my notice, is as follows: The inspector on board of the vessel attends to the unlading, (wines and spirits,) which, having passed through the hands of the gauger and marker, is conveyed to the store of the owner or owners by porters in his or their employ, and there (according to the direction of the inspector) stored in such a manner as to admit of their being seen and counted. When the inspector is released from his duty on board of the vessel, he goes to the store and examines them, and finding them correct, he places his lock upon them, and keeps the key in his possession until he receives a permit from the custom-house to deliver the same. I know of no inspector attending on the way to or at the store while storing. I know of no change of the above course since my appointment. Teas (not having come under my notice) I can say nothing about.

Question 5. Do you know anything fraudulently, illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I know nothing in relation to Edward Thompson, his teas, or the inspectors as being connected with them.

Question 6. Have you any knowledge of the existence of any collusion between any of the custom-house officers and Mr. Thomson; or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of any collusion between any inspector and Edward Thomson, or any intimacy with him whatever, nor have I seen or heard anything calculated to raise suspicions in my mind, on that or any other subject.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely. State any further facts, not embraced with the scope of these inquiries, which you may consider material.

Answer. I have no knowledge of any omission, neglect, or connivance of any inspector in relation to Edward Thomson or his teas, or any other business connected with him and the custom-house; nor am I

in possession of any material information whatever, concerning this or any other business connected with the custom-house.

I subscribe myself, dear sir, your very humble servant,

WILLIAM P. GAW, *Inspector.*

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

PORT OF PHILADELPHIA, *January* 23, 1826.

No. 19.

Deposition of Robert Hopkins.

Question 1. How long have you acted as inspector?

Answer. Since April, 1793.

Question 2 Did you, on the arrival of the William Savery, on the 28th of February, 1825; of the Addison, on the 3d of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargoes? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel? Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. I was the inspector detailed by the surveyor to superintend the unlading of the ships Addison, Woodrop Sims, and Benjamin Rush, and placed the necessary locks on said ships. I noticed nothing incorrect in the discharge of these cargoes.

Question 3. Were you on board these vessels, or either of them, or on the wharves at which they lay when their teas were unloaded; if so, did you remark anything irregular or illegal previously to their removal towards the stores in which they were to be deposited? If so, state it.

Answer. I was on board and on the wharves at which the ships Addison, Woodrop Sims, and Benjamin Rush discharged, and remarked nothing irregular or illegal in the discharge of their several cargoes.

Question 4. Were the teas removed by porters in the employ of Mr. Thomson? Name, if you can, the porters.

Answer. The teas were removed by persons in the employ of Mr. Thomson; their names I do not know.

Question 5. Did you or any other inspector attend the removal of the teas to the stores? Name the inspector.

Answer. No inspector attended the removal of the teas.

Question 6. Did you see the teas introduced into the stores and examine them in the stores? In what stores were they deposited?

Answer. I did not see them introduced into the stores, but examined them after the vessels' discharge. The teas were put into stores selected by Mr. Thomson, situated between Water street and the wharves, and Pine and Spruce streets.

Question 7. Were any of the stores in which these teas were deposited, and which, placed under your charge? If so, state particularly the circumstances under which the charge was conferred upon you, and especially under whose direction you acted, and whether the direction was general, or only applicable to the particular case.

Answer. The stores were not particularly placed under my charge; but all spirits, wines, and teas, stored in the lower district, were understood to be under the charge of Mr. Jackson and myself.

Question 8. If you examined the teas after they were stored, did you in the examination compare them with the permit, or other document or book, and which; and did you make any report, and was it written or verbal, to the surveyor or other officer, of the result of this examination?

Answer. I saw the teas of all Mr. Thomson's ships after they were stored; but counting them was impossible after they were stowed away in the stores.

Question 9. By whom was the store used designated; or did the owner of the teas take them to any store he pleased, and was it a store previously used for a like purpose, or otherwise?

Answer. The stores were selected by Mr. Thomson, and had been previously used for storing teas by him. The stores were rented by Mr. Thomson.

Question 10. Were the two locks previously fixed on the doors of the stores, and was this done under public or private direction?

Answer. There were two locks on the doors, one belonging to the door, the key of which was kept by the owner of the teas, and a padlock belonging to the custom-house, the key kept by the inspectors, and was the general practice.

Question 11. Did you lock up the stores, or was this done by the owner of the teas?

Answer. I locked the custom-house padlocks on the doors, and Mr. Thomson put his own locks on besides.

Question 12. If you were not present at the storage of the teas, how long was your key out of your possession, and to whom was it confided previously to its being restored to you; or how long were the stores open in your absence?

Answer. The key was left with the owner sufficient time to assort, stow, or take samples; sometimes a day or more, especially previous to a sale or shipping a parcel.

Question 13. Did you thereafter, and at what times, examine the state of the stores, and was this a casual examination, or one founded on actual enumeration?

Answer. An examination as to quantity, after the teas were stored, was not possible.

Question 14. Could the teas taken from the wharf have been removed to other places than the stores without your knowledge?

Answer. Since E. Thomson's failure I have understood that some of the teas were taken from the wharf and not stored.

Question 15. Had you, at the time, any knowledge or suspicion of such removal?

Answer. I never had any knowledge or suspicion of any fraudulent removal of teas by E. Thomson, or others.

Question 16. Have you since heard of such removal? If so, state particularly the circumstances.

Answer. I have heard reported that Mr. Thomson has acknowledged taking teas from the wharf to the pavement before the stores, and from the pavement to the coasting packets, without ever having been put in store.

Question 17. Do you know of any removals of teas from the stores without a permit; or of the removal of a large quantity under a permit for a smaller quantity?

Answer. I have been told Mr. Thomson has acknowledged, since his failure, that he had been in the practice of taking out of store much larger quantities of teas than he had permits for, generally presenting them when the officers were engaged on the wharf.

Question 18. When a permit was given, did you always accompany the owner to the store, and carefully see the teas taken out? If a different course was pursued, state it, mentioning all the instances.

Answer. I did not always accompany the permit, having vessels to attend to at the wharf, both unlading and reshipping.

Question 19. Had you anything to do with the delivery of the certificates issued under the 41st section of the collection law, and what?

Answer. I had nothing to do with the delivery of the certificates.

Question 20. What has heretofore been the usage as to wines, spirits, and teas taken from the wharves to the stores? Have they been carried by porters employed by the owners, attended or not by an inspector? Has the inspector seen them stored, and immediately examined them to ascertain whether they were all stored, or has this been intrusted to the owner? Has the inspector invariably locked the stores, and has he from time to time examined the stores? Has he, on a permit being granted, attended in person the taking them out? State the usage, particularly and accurately, and whether it has varied since you have been in office; when, and in what respects.

Answer. Spirits, wines, and teas have always been carried by porters, employed by the owners of the goods, to the stores, not attended by an inspector. After the goods were stored, then an inspector examined them and locked them up, and occasionally looked at the stores. A permit was often presented when the officers were so engaged on the wharves as to render it impossible to attend the delivery of such goods. Most generally the permit was not accompanied by an officer, and this has been customary ever since I was appointed an inspector.

Question 21. Is it a fact that the same key has opened the locks of different stores? Was this known to you, and how has it occurred?

Answer. The fact was known to me; the locks furnished for locking up stores had two keys to eight locks, for convenience of carriage, and one key fitted all the locks on any one person's stores.

Question 22. Do you know of any removals from stores of teas that were not bonded with surety, under a permit to move a smaller quantity? If so, state them particularly.

Answer. Previous to Mr. Thomson's failure I knew nothing of the kind; since, I have been told it was the case.

Question 23. Do you know of any instances in which the owners of wines, spirits, and teas have been suffered to enter the stores in which they were deposited without an inspector being present? If you do, state them.

Answer. Spirits and wines require the examination of the cooper once a week, at least, to ascertain if there is leakage; in such cases the key has been given them, and the stores opened without an inspector being present.

Question 24. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no such knowledge, nor do I believe any ever existed.

Question 25. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state circumstances minutely, including names, times, and places.

Answer. I know of no neglect, and believe every officer does his duty.

Question 26. State any further facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. I know nothing that I can state that I think will be of service. I have had no intimation, suspicion, or belief, that any officer, or other person, connected with the custom-house, has had any connivance or intimacy with Mr. Thomson, other than was necessary in doing their several duties.

Question 27. Do you know of any other teas surreptitiously taken from the stores previously to the year 1825? If you do, state particularly all you know.

Answer. I do not know of any.

Question 28. Were you employed on any of the vessels, and which vessels, in which teas were imported by Edward Thomson, to wit: the ships William Savary, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which have arrived at the port of Philadelphia since the 27th of February, 1825?

Answer. I was on board, employed, at the ships Addison, Woodrop Sims, and Benjamin Rush.

Question 29. Were you specially detailed by the surveyor for this service?

Answer. I was.

Question 30. When and at what place did you go on board?

Answer. After the vessels had hauled to the wharves.

Question 31. Was there, at the time of your entering the vessel, any, and what, inspector on board? Had there been one, and what was his name?

Answer. There was none, nor had been, that I know of.

Question 32. Did everything appear fair and regular when you went on board? Was the cargo locked up and carefully secured?

Answer. Everything appeared correct when I went on board, and I carefully locked the cargo up.

Question 33. Were all the provisions of the law strictly complied with previous to the unloading of the goods?

Answer. I know nothing to the contrary.

Question 34. Was a permit, endorsed as required by the thirty-seventh section of the collection law, received by you previously to your proceeding to unload, and before any part of the cargo was removed?

Answer. It was not endorsed.

Question 35. Was there any disagreement between the permits and the goods inspected and delivered by you?

Answer. There was no disagreement.

Question 36. Were the teas all weighed by the weighers?

Answer. They were all weighed.

Question 37. Were the teas inspected by you and weighed before they were delivered or removed?

Answer. The teas were all weighed by the weighers before they were removed from the wharf, and examined by myself.

Question 38. Was the unloading at no other times than between the rising and setting of the sun? Did you remain on board constantly during that time? Did you enter the teas in a book, as required by the collection law, and deliver the same to the surveyor?

Answer. The unloading was done only between the rising and setting of the sun. I was on board (excepting when at dinner) all the time. A report was made to the surveyor of all the cargo, and the teas entered in a book at the surveyor's office.

ROBERT HOPKINS, *Inspector.*

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 20.

Interrogatories to Henry Huber, Inspector of Customs.

Question 1. What is the date of your appointment?

Answer. I was appointed an inspector of customs in the year 1808.

Question 2. Did you, on the arrival of the William Savary, on the 28th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel; was everything in regard to the cargo falling under your notice correct and according to law?

Answer. I did not go on board either of the vessels mentioned in the second question, and do not know anything "in regard to their cargoes;" the unlading of the same did not fall under my notice, being stationed in the middle district, which extends from Market street southward to the drawbridge.

Question 3. Had you anything to do with the certificates issued under the forty-first section of the collection law, and what?

Answer. When spirits, wines, and teas are exported to a foreign port for the benefit of drawback, the certificates issued under the forty-first section of the collection law are delivered to the inspector, who reships the articles called for by the certificates, having first ascertained their correspondence with the same. The certificates, together with the permit for reshipping, are returned, under the written attestation of the inspector, to the Collector's office. *So far only* as relates to the above operations have I had "anything to do" with the certificates issued under the forty-first section of the collection law.

Question 4. Are you conversant, from your own knowledge, or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. When wines, spirits, and teas are taken from the wharves to be deposited in stores under the charge of the custom-house, they are taken by the draymen employed by the owner or consignee, no officer of the customs accompanying them on their way to the stores; when stored, an inspector of the customs, having charge of them, makes his examination as to the articles being *all in* store, which can readily be done, from the packages of one size being all stored together for the purpose of ascertaining the number, for the satisfaction of the officer as well as of the importer. When thus stored, the inspector places his locks upon the doors of the storehouses; the owners generally, but not always, also have locks upon the same, and upon the receipt of a permit from the Collector's office, ordering the delivery of all or any part of the articles thus stored, the officer unlocks the stores and delivers the same; but at times the officers have been *compelled to confide* the keys for a few hours to the owners, as they could not leave the deck of a ship on which they were closely engaged in delivering and landing a valuable cargo of merchandise; but, in all such instances within my knowledge, upon examining the stores, all has uniformly been found correct and secure. There has not "been any change in the usage in these respects" until within a short time.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know on these points.

Answer. I do not know of anything, either fraudulent, illegal, or unusual, that has been done in respect to teas imported by Edward Thomson, or any other person.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I know of no collusion, connexion, or close intimacy, nor of any appearances pointing to just suspicions, between Edward Thomson and any officer of the custom-house; being in the discharge of my duty confined to the bounds of the middle district, commencing at Market street on the north, and terminating at the drawbridge on the south.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in

relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely. State any further facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. I do not know of any omission, neglect, or connivance of any officer of the customs, either in relation to the teas of Edward Thomson, or in relation to any other business connected with the custom-house.

Under the collection law of 1799 the inspectors of customs were eligible, and for many years SIX of them, appointed by the chief officer of inspection, (the surveyor of the port of Philadelphia,) marked, according to law, all the spirits, wines, and teas landed in the port of Philadelphia. A subsequent law of a few years' standing rendered the inspectors of customs no longer eligible; upon which ONE PERSON was appointed to perform the service before performed by SIX, and, under the law, received the compensation therefor. I state this FACT from the belief that the alteration of the law has not been of any *advantage* to the revenue nor to the DESPATCH of the business of the port.

HENRY HUBER, *Inspector.*

PHILADELPHIA, *January* 24, 1826.

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 21.

Deposition of Andrew Jackson, Inspector.

In answer to interrogatories put by S. H. Smith, Esq., I respectfully submit the following:

Question 1. How long have you acted as inspector?

Answer. Since the month of July, 1799.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 3d of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargoes? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo falling under your notice correct and according to law?

Answer. On the arrival of the above named vessels I did not go on board either of them.

Question 3. Were you on board these vessels, or either of them, or on the wharves at which they lay, when the teas were unloaded? If so, did you remark anything irregular or illegal previously to their removal towards the stores in which they were to be deposited? If so, state it.

Answer. I was on the wharves during the discharge of those vessels; I saw nothing illegal or irregular.

Question 4. Were the teas removed by porters in the employ of Mr. Thomson? Name, if you can, the porters.

Answer. The teas were removed by porters in the employ of Mr. Thomson; I am ignorant of their names.

Question 5. Did you, or any other inspector, attend the removal of the teas to the stores? Name the inspector.

Answer. No inspector attended their removal.

Question 6. Did you see the teas introduced into the stores, and examine them in the stores, to guard against abuses? In what store were they deposited?

Answer. I did not see the teas introduced into the stores; no examination took place until the ship was unloaded; they were deposited in stores rented by Mr. Thomson.

Question 7. Were any of the stores in which these teas were deposited, and which, placed under your charge? If so, state particularly the circumstances under which the charge was conferred upon you, and especially under whose directions you acted, and whether the direction was general, or only applicable to the particular case.

Answer. The stores were not given into the charge of any officer particularly. Mr. Robert Hopkins and myself had a general charge of all stores containing spirits, wines, and teas. We acted under general directions from the surveyor.

Question 8. If you examined the teas after they were stored, did you, in the examination, compare them with the permits or other documents or books, and which? And did you make any report, and was it written or verbal, to the surveyor or other officer, of the result of this examination?

Answer. An examination of the teas took place immediately before their removal from the wharf, when they were compared with the permits; a written report was made to the surveyor of the result; an enumeration of teas in store is impracticable.

Question 9. By whom was the store used designated, or did the owner of the teas take them to any store he pleased, and was it a store previously used for a like purpose, or otherwise?

Answer. It has always been the custom for the owners to choose their stores; those in question had been for a considerable time used as tea stores.

Question 10. Were the two locks previously fixed on the doors of the stores, and was this done under public or private direction?

Answer. One lock was permanently fixed, the key of which was kept by the owner; a padlock was added by the inspector, who kept the key.

Question 11. Did you lock up the stores, or was this done by the owner of the teas?

Answer. When the teas were properly arranged in store the officer placed his lock on.

Question 12. If you were not present at the storage of the teas, how long was your key out of your possession, and to whom was it confided previously to its being restored to you, or how long were the stores open in your absence?

Answer. I placed no lock on the stores till the owner had arranged them properly. This was the work of many days; I cannot say precisely how many.

Question 13. Did you thereafter, and at what times, examine the state of the stores, and was this a casual examination or one founded on actual enumeration?

Answer. A casual examination took place, and that only, when called on to deliver teas from store; we could only enter the stores by permission of the owners; an actual enumeration is impracticable.

Question 14. Could the teas taken from wharf have been removed to other places than the stores without your knowledge?

Answer. It has been ascertained that such has been the fact.

Question 15. Had you at the time any knowledge or suspicion of such removal?

Answer. I had no such knowledge or suspicion.

Question 16. Have you since learned of such removal? If so, state the circumstances particularly.

Answer. I have been informed by Charles Mackie, who was in the employ of E. Thomson, that while the ship was discharging a permit was taken to deliver a portion of the teas from the wharf, and that under cover of that permit a large quantity was removed to other places than the stores.

Question 17. Do you know of any removal of teas from the stores without a permit, or of the removal of a large quantity under a permit for a smaller quantity.

Answer. Mr. Mackie has stated that it was the practice of Mr. Thomson to take a permit for teas and present it to the officer when busily engaged on the wharf; at such times the key was entrusted to themselves to deliver the teas, when the opportunity was taken of removing teas other than those permitted. It is also stated that at such times a person was employed by E. Thomson to watch the officer and see that he was so much engaged as to render them secure from detection.

Question 18. When a permit was given did you always accompany the owner to the stores and carefully see the teas taken out? If a different course was pursued state it, mentioning all the instances.

Answer. When engaged in other duties it was always the custom to entrust the key to the owners.

Question 19. Had you anything to do with the delivery of the certificates issued under the 41st section of the collection law, and what?

Answer. I had nothing to do with the delivery of certificates.

Question 20. What has heretofore been the usage as to wines, spirits, and teas taken from the wharves to the stores? Have they been carried by porters, employed by the owners, attended or not by an inspector? Has the inspector seen them stored, and immediately examined them to ascertain whether they were all stored, or has this been entrusted to the owner? Has the inspector invariably locked the stores, and has he from time to time examined the stores? Has he, on a permit being granted, attended in person the taking them out? State the usage, particularly and accurately, and whether it has varied since you have been in office; when and in what respect.

Answer. In removing spirits, wines, and teas to the stores it has invariabiy been done by porters employed by the owners, unattended by an officer; when the whole of the cargo is landed and removed from the wharf, the officer examines the stores and places his lock on them. I state what I believe to be the general practice; I do not undertake to say that there are no exceptions. When a permit was delivered to the officer while engaged in other duties it has been customary to entrust the keys to the owner, as I have stated in answer 18. If any variation has taken place in the manner of storing and delivering wines, spirits, and teas, I have no knowledge of it.

Question 21. Is it a fact that the same key has opened the locks of different stores? Was this known to you, and how has it occurred?

Answer. It was known to me that the same key opened different locks; they were furnished by the surveyor, and I presume they were designedly so constructed.

Question 22. Do you know of any removals from stores of teas that were not bonded with surety, under a permit to remove a smaller quantity? If so, state them particularly.

Answer. The answer to question 17 will apply to this.

Question 23. Do you know of any instances in which the owners of wines, spirits, or teas, have been suffered to enter the stores in which they were deposited without an inspector being present? If you do, state them.

Answer. It has always been the practice to permit the owners to take the keys, in order to make an examination of the state of the casks or other packages; if this was not done, great loss must ensue. An officer could not always attend without neglecting his duties on the wharf, as the officers who had charge of the stores had the like duties to perform as other inspectors, independent of their attendance on the stores.

Question 24. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge or belief of any collusion between Mr. Thomson and any person attached to the custom-house. I know of no intimacy existing between any person attached to the custom-house and Mr. Thomson; and I know of no facts leading to any suspicion on the subject.

Question 25. Do you know of any omission, neglect, or connivance, of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances minutely, including names, times, and places.

Answer. I know nothing in relation to the teas of Mr. Thomson but what I have already stated.

Question 26. State any further facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. I am acquainted with no facts having any bearing on the subject.

Question 27. Do you know of any other teas surreptitiously taken from the stores previously to the year 1825? If you do, state particularly all you know.

Answer. It has been stated by the before named Charles Mackie that teas have been taken by E. Thomson prior to 1825, and under similar circumstances; I have no other knowledge on the subject.

ANDREW JACKSON.

Sworn and subscribed before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 22.

Interrogatories to John Reed, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. My appointment was the 4th June, 1818.

Question 2. Did you, on the arrival of the William Savery, on the 28th of February, 1825, of the Addison, on the 5th of April, 1825, of the Woodrop Sims, on the 13th of April, 1825, of the Benjamin Rush, on the 1st of July, 1825, of the Thomas Scattergood, on the 2d of July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel; was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I did not go on board of either of these vessels.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I have nothing to do with certificates for teas and liquors, except shipped for drawback; the certificates are produced for them, and returned to the Collector by me with the permits.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas, taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored, and their removal from the stores? And whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. I believe it has been usual, in sending goods from the wharf to be stored, that the owners employed persons to take them, without the presence of an inspector, he, having charge of the vessel and delivering them, could not leave the vessel at the time, but, as soon as the vessel was discharged, he would proceed to the stores and see that the goods were stored, and have them locked up.

Question 5. Do you know anything fraudulently or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I know nothing respecting the above.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicion on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of anything respecting the above.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? if you do, state the circumstances, including names, times, and places minutely.

Answer. I do not know of any.

Question 8. State any other facts embraced within the scope of these inquiries which you may consider material?

Answer. I know of no other facts in respect to these inquiries.

JOHN REED, *Inspector.*

PORT OF PHILADELPHIA, *January* 23, 1826.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 23.

Interrogatories to Joseph Robinson, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. August the 3d, 1818.

Question 2. Did you, on the arrival of the William Savery, on the 28th of February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo; if so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel; was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I was coasting officer at the time the above vessels arrived, and had no charge of any of them.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. When I had any certificates for wine or tea I returned them with the permit to the custom-house.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and tea, taken from the wharf to be deposited in stores; as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored; and their removal from the stores; and whether there has been any change in the usage in these respects, and what? State what you know on these points.

Answer. Being always otherwise employed, I never have attended to the storing of any of the above goods.

Question 5. Do you know anything fraudulently, illegally, or unusually done in respect to tea imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not know.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you have, state the circumstances, including names, times, and places, minutely.

Answer. I do not know of any.

Question 8. State any other facts, not embraced within the scope of these inquiries, which you may consider material.

Answer. I know of none.

JOSEPH ROBINSON, *Inspector.*

Sworn and subscribed before me, this 20th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 24.

Deposition of John P. Schott, Inspector.

Question 1. What is the date of your appointment?

Answer. October, 1805.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo; if so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel; was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I had no charge of either of the above named vessels; neither was I on board of either of them.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I had nothing to do with the certificates.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores; as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored; and their removal from the stores? And whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. I have always understood that teas, &c., were stored under the care of an inspector, locked up, and the keys put in the surveyor's office, and afterwards delivered according to permits, under the inspection of an officer; this has been my practice; but it has been a long time since I have had charge of teas, my business lying in the upper district, and the vessels from China are generally discharged in the lower district; I believe they are always sent from the vessels to the stores by the importers; and it is not usual for an inspector to superintend them on the way. I used to go to the stores towards evening, and satisfy myself that all were in store that were landed when I had charge of them, and then lock the stores and keep the key, and so on till all were stored.

Question 5. Do you know anything fraudulently or illegally, or unusually done in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I have no knowledge whatever of anything of the kind.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge whatever of anything relating to this question. I have no acquaintance with Mr. Thomson.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely. State any further facts not embraced within the scope of these inquiries which you may consider material.

Answer. I have no knowledge whatever of anything embraced in this question, my business lying in the upper district altogether; neither do I know of anything concerning this business, not embraced within the scope of these inquiries, that I consider material.

JOHN P. SCHOTT, *Inspector.*

PHILADELPHIA, *January* 20, 1826.

Sworn and subscribed to before me, this 20th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 25.

Interrogatories to Rowland Smith, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. Appointed May 1, 1824.

Question 2. Did you, on the arrival of the William Savery, on the 28th of February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unloading of the vessel. Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. The above vessels, in every instance, were attended to by other officers; therefore none of the queries in question two ever came under my notice.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I never had anything to do with the above named certificates, except when reshipping.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in store; as to the persons carrying the same to the stores; the superintendence of an inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored; and their removal from the stores? And whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. The course usually pursued in wines, spirits, and teas is for the merchant importing to send his porters for the goods, who take them to the stores without any inspector accompanying them. In relation to the safe-keeping of the goods when stored the custom-house has the key of one lock, and the man who has charge of the store the key of another lock. There has been no change in the usage in these respects.

Question 5. Do you know of anything fraudulently or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not know of anything fraudulently or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion, or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicion on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head.

Question 7. Do you know of any omission, neglect, or connivance, of any officers of the customs, in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely. State any further facts not embraced within the scope of these inquiries, which you may consider material.

Answer. No neglect or omission, or connivance, of any officer of the customs, has ever come under my knowledge, either in regard to teas imported by Mr. Thomson, or in business of any kind done at the custom-house.

ROWLAND SMITH, *Inspector.*

Affirmed to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 26.

Deposition of Jacob Zebley, Inspector.

Question 1. What is the date of your appointment?

Answer. May, 1815.

Question 2. Did you, on the arrival of the William Savery, on the 20th of February, 1825; of the Addison, on the 5th of April, 1825; of the Woodrop Sims, on the 13th of April, 1825; of the Benjamin Rush, on the 1st of July, 1825; and of the Thomas Scattergood, 2d of July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. Being stationed in the middle district of the port of Philadelphia, in 1820, to attend and examine coasting vessels, and having continued in that station ever since the said year, I therefore have had no charge whatever of the above mentioned vessels or their cargoes.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection laws?

Answer. I had not.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas, taken from the wharf to be deposited in store; as to the person carrying the same to the stores; the superintendence of any inspector on the way; his presence when the articles are stored; the safe-keeping of the goods stored; and the removal from the stores? And whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. To the best of my knowledge, it is usual for merchants' porters to remove from the wharf, not only wines, spirits, and teas, but other articles, either to the public stores or to the merchant stores, when permitted, and those articles entitled to drawback are locked up in store by the officers.

Question 5. Do you know anything fraudulently, or illegally, or unusually done, in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I know nothing in relation to that question.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of any circumstances comprised in the 6th question.

Question 7. Do you know of any omission, neglect, or connivance of any of the officers of the customs, in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including the names, times, and places, minutely. State further facts not embraced within the scope of these inquiries.

Answer. To the 7th and last question I can answer only in the negative.

JACOB ZEBLEY, *Inspector.*

Sworn to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 27.

Interrogatories to David Rose, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. August 28, 1789.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I did not.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I had not.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharf to be deposited in stores, as to the persons carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored, and their removal from the stores; and whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. I am not.

Question 5. Do you know anything fraudulently, or illegally, or unusually done in respect to teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I do not.

Question 6. Have you any knowledge of the existence of any collusion between any of the custom-house officers and Mr. Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the customs, in relation to the teas of Mr. Thomson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I do not.

Question 8. State any further facts not embraced within the scope of these inquiries which you may consider material.

Answer. I think it proper to state that I have been stationed, in charge of the United States stores and in aid of the customs, at the Lazaretto, since the beginning of 1802; hence, I am not conversant with the detail of business in respect of wines, spirits, and teas, as none of these articles have ever been stored there.

DAVID ROSE, *Inspector.*

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 28.

Interrogatories to Frederick Shull, Inspector of the Customs.

Question 1. What is the date of your appointment?

Answer. In the year 1799.

Question 2. Did you, on the arrival of the William Savery, on the 28th February, 1825; of the Addison, on the 5th April, 1825; of the Woodrop Sims, on the 13th April, 1825; of the Benjamin Rush, on the 1st July, 1825; and of the Thomas Scattergood, on the 2d July, 1825, go on board either of them, and place the necessary locks so as to secure the cargo? If so, specify the instances, and say whether you remained on board until the arrival of the inspector detailed by the surveyor to superintend the unlading of the vessel. Was everything in regard to the cargo, falling under your notice, correct and according to law?

Answer. I had no charge of the above mentioned vessels; neither was I on board of them.

Question 3. Had you anything to do with the certificates issued under the 41st section of the collection law, and what?

Answer. I have not any knowledge of them.

Question 4. Are you conversant, from your own knowledge or otherwise, with the course usually pursued in relation to wines, spirits, and teas taken from the wharves to be deposited in stores, as to the person carrying the same to the stores, the superintendence of an inspector on the way, his presence when the articles are stored, the safe-keeping of the goods stored, and their removal from the stores; whether there has been any change in the usage in these respects, and when? State what you know on these points.

Answer. I have had teas under my charge in stores taken from the wharf by the owners' porters, ordered them to be stored so that I could count them. After so stored and counted, I then put the locks on, agreeably to law. When permitted, I attended to the delivery, and marked them, corresponding with date of permits. Wines and spirits I never have stored. The teas were small quantities. I have no knowledge of any change from the usual way pursued. I have been stationed at Marcus Hook since the year 1810, some time in August, and have had no charge of any vessel in Philadelphia since the above date.

Question 5. Do you know anything fraudulently, or illegally, or unusually done in respect to the teas imported by Edward Thomson, either by officers of the custom-house or others? State what you know.

Answer. I have no knowledge of the fifth question.

Question 6. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have no knowledge of the sixth question.

Question 7. Do you know of any omission, neglect, or connivance of any officer of the custom-house in relation to the teas of Mr. Thomson, or in relation to any of the business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I know of no facts in relation to the teas of Mr. Thomson, or to the custom-house, or officers.

DELAWARE COUNTY, *ss.*

Personally appeared the within named Frederick Shull, esq., and, upon his solemn affirmation, declares that the answers to the foregoing interrogatories are true to the best of his knowledge.

BENJ'N F. THOMPSON,
Justice of the Peace for said county, Penn.

No. 29.

Interrogatories to Mr. Job Whipple, master of the barge.

Question 1. Did you go on board, and where, and at what time, of the ships William Savary, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, which arrived in the year 1825?

Answer. I did go on board of these respective vessels on the days of their arrival, all of which were boarded between Gloucester Point and this city.

Question 2. When you so went on board, was any revenue officer on board of them, or either, specifying which?

Answer. No revenue officer was on board of either when I boarded them. In explanation, I would state to this inquiry that it is my practice to board all vessels when coming up the river, below the city, and consequently am the first officer on board.

Question 3. Was everything in regard to the security of the cargo correct and according to law?

Answer. After obtaining the necessary papers, it is my practice to leave them for the purpose of boarding such other vessels that may be coming up the river at the same time, and consequently never remain so long on board as to be present at the arrival of the inspectors, who may have placed their locks on either of these specified vessels.

Question 4. When and where did you leave those vessels? and were the cargoes secured when you left them?

Answer. I repeat, in answer to this question, my answer to question 3.

Question 5. Did an inspector of the customs come on board before you left them, or either of them? and what was his or their names?

Answer. No inspector of the customs came on board of either of these vessels before I left them.

Question 6. Do you know anything fraudulently, or illegally, or unusually done in respect to the teas imported by Edward Thomson, either by the officers of the custom-house or others? State what you know.

Answer. I do not.

Question 7. Have you any knowledge of the existence of any collusion between any of the officers of the custom-house and Mr. Edward Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you have, state minutely the extent of your knowledge.

Answer. I have not.

Question 8. Do you know of any omission, neglect, or connivance of any officer of the customs in relation to the teas of Mr. Thompson, or in relation to any other business connected with the custom-house? If you do, state the circumstances, including names, times, and places, minutely.

Answer. I do not.

I know of no facts not embraced within the scope of these inquiries that, in my opinion, are material.

JOB WHIPPLE,
Inspector in command of the revenue barge.

Sworn to before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 30.

PHILADELPHIA, *January* 20, 1826.

SIR: Your note of the 18th instant, with certain interrogatories, was duly received, and I have the pleasure to submit to you such answers as I have been able to make to them respectively.

Question 1. Were you engaged in weighing certain teas imported by Edward Thomson in the year 1825, in the ships William Savary, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood? and in which of these vessels were you so engaged?

Answer. The teas (as also cassia) imported by Edward Thomson and others in the ships above named were weighed in part by myself, and in part by Messrs. Samuel Ross and George Dannacker, deputy weighers. The cargoes of the ships Benjamin Rush and Thomas Scattergood were exclusively weighed by myself, and a general superintendence to the weighing of the previous cargoes.

Question 2. How long were you engaged on each cargo?

Answer. To the best of my recollection, from five to eight days.

Question 3. Were all the teas duly weighed?

Answer. They were to the best of our ability.

Question 4. Was each chest or box weighed, or were several weighed together, and an average weight taken as that of each chest or box?

Answer. If I am to understand the 1st clause of this interrogation to mean "weighed" singly, I answer no. A number of packages, being of the same size and quality of teas, were weighed together, and the actual gross weight of each particular quality and different size package returned to the Collector's office, from a memorandum book of the weights of each cargo, as taken on the wharf; a copy of one of which is herewith submitted for your information.

Question 5. Is this the invariable mode practiced at this port?

Answer. It is, and was the practice of all my predecessors. The office has always considered that we were fully justified in pursuing this mode by the provisions contained in the 39th and 58th sections of the collection law of March 2, 1799; and more particularly by the 2d section of an act of the same date, establishing the compensation of officers employed in the collection of duties, &c., without any regard being had to the great loss which the revenue would sustain by pursuing the plan of weighing each package singly.

Question 6. Were the chests and boxes all marked, and by whom were they marked? Were the marks made under your direction? If not, under whose direction were they made?

Answer. The chests and boxes were all marked previous to weighing; and, to the best of my knowledge and belief, agreeably to law, by Charles S. Jackson, esq., deputy inspector or marking officer, for the district and port of Philadelphia. With regard to the latter clause of this interrogation, I must answer, as weigher of the port of Philadelphia, I have no control over, or directions to give, with regard to the marking of teas, there being a particular officer designated by law to perform that duty.

Question 7. Were any of the chests or boxes removed from the wharf before they were weighed and marked?

Answer. Not to my knowledge.

Question 8. How and by whom is the quality of teas ascertained? Were the returns required by the 72d section of the collection law duly made?

Answer. The surveyor of the port is the officer designated by law to ascertain and determine the quality of teas, &c. Where any doubt exists, it is the usual practice to take the quality as marked on the package. With regard to the cargoes of those vessels named in the first interrogation, to the best of my recollection and belief, the returns were made agreeably to the 72d section of the collection law.

Question 9. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of these stores, and of the surreptitious removal of the teas from them?

Answer. To the first part of this interrogation I have no knowledge. The stores are considered safe and good, being fire-proof. The first intimation which I had of the surreptitious removal of teas by Edward Thomson was on the 20th day of November last, on which day I was, in conjunction with another officer in the revenue department, detailed to proceed to New York in pursuit of said teas.

Question 10. I do you know, and if you do, state them, the names of the porters that took these teas from the wharves?

Answer. I do not know, but believe them to be the same employed by Edward Thomson for several years.

Question 11. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge on this subject, nor have I ever had even a shadow of suspicion of any collusion between any of the officers of the custom-house and Edward Thompson.

Question 12. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. Same as given to No. 11; and would further add that, of my own knowledge, I know of no flagrant neglect having been committed or practiced by any officer or person connected with the custom-house.

Question 13. State any further facts, not embraced within the scope of the inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am not aware that I possess any other facts than what are contained in my answers to interrogatories Nos. 9, 10, 11, and 12. As the interrogatories Nos. 1 and 8 relate particularly to the discharge of my official duties, I have endeavored to be somewhat full and explicit.

J. STEELE, JR., *Weigher.*

SAMUEL H. SMITH, Esq.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

Inward, July 1, 1825—*Benjamin Rush, Barden, from Canton.*

EDWARD THOMSON.

E. T.—3,420 quarter chests Hyson Skin.

No. 31.

Deposition of Samuel Ross, Deputy Weigher, January 24, 1826.

Question 1. Were you engaged in weighing certain teas imported by Edward Thomson, in the year 1825, in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, and in which of these vessels were you engaged?

Answer. In the ship Woodrop Sims.

Question 2. How long were you engaged on each cargo?

Answer. From six to eight days at the ship Woodrop Sims, and the others occasionally.

Question 3. Were all the teas duly weighed?

Answer. They were.

Question 4. Was each chest or box weighed, or were several weighed together, and an average weight taken as that of each chest or box?

Answer. To the first clause of the question I answer no. A number of packages of the same size and quality of teas were weighed together, and the gross weight and sized packages returned to the Collector's office.

Question 5. Is this the invariable mode practiced at this port?

Answer. Yes.

Question 6. Were the chests and boxes all marked, and by whom were they marked; were the marks made under your direction; if not, under whose direction were they made?

Answer. They were all marked, previous to their being weighed, by Charles S. Jackson, appointed for that purpose for the district and port of Philadelphia.

Question 7. Were any of the chests or boxes removed from the wharf before they were weighed and marked?

Answer. Not to my knowledge.

Question 8. How and by whom is the quality of the tea ascertained? Were the returns required by the 72d section of the collection law duly made?

Answer. The surveyor of the port is the officer to ascertain the quality of teas where any doubt

exists, but it is usual to take the quality that is marked on the packages in China. The returns of weights and quality are made according to law.

Question 9. Have you any knowledge, if so, state it, of the illegal removal of teas from wharves to other than the stores in which they ought to have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of anything that relates to illegal removal of teas from the wharves, or of being taken to other stores not appointed for their reception, or any surreptitious removal from stores.

Question 10. Do you know, and if you do, state, the names of the porters that took the teas from the wharves?

Answer. I do not know.

Question 11. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state the extent of your knowledge.

Answer. I have not any knowledge of anything contained in the 11th question.

Question 12. Is it within your knowledge that any frauds, collusions, or connivances in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

My answers for the 12th and 13th interrogatories are, I do not know.

I am, sir, with great respect, your humble servant,

SAMUEL ROSS, *Deputy Weigher.*

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 32.

Deposition of Robert A. Patton, Deputy Weigher, January 23, 1826.

Question 1. Were you engaged in weighing certain teas imported by Edward Thomson, in the year 1825, in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, and in which of these vessels were you so engaged?

Answer. My appointment to the office of deputy weigher having been several months subsequent to the arrival of all of those vessels, I was, of course, not engaged weighing the teas imported by Edward Thomson in any of them.

Question 2. How long were you engaged on each cargo?

Answer. I was not at all engaged with them, or either of them.

Question 3. Were all the teas duly weighed?

Answer. I do not know, for the reason assigned in my answer to question 1st.

Question 4. Was each chest or box weighed, or were several weighed together, and an average weight taken as that of each chest or box?

Answer. I do not know, for the reason assigned in my answer to question 1st.

Question 5. Is this the invariable mode practiced at this port?

Answer. So far as my limited observation enables me to state, the mode practiced at this port is, to *actually* weigh the whole number of packages, weighing several together at each draft, and to *return* the aggregate weight of the whole number thus weighed at a draft.

Question 6. Were the chests and boxes all marked, and by whom were they marked; were the marks made under your direction; if not, under whose direction were they made?

Answer. I do not know whether the chests and boxes were marked or not, nor by whom, if marked, they were marked. The marks were not made under my direction. I do not know under whose direction they were made.

Question 7. Were any of the chests or boxes removed from the wharf before they were weighed and marked?

Answer. I do not know whether any of the chests or boxes were so removed, for the reason assigned in my answer to question 1st.

Question 8. How and by whom is the quality of teas ascertained; were the returns required by the 72d section of the collection law duly made?

Answer. To both of these queries I answer I do not know, for the reason assigned in my answer to question 1st; together with there having but one cargo of teas arrived since my appointment, and with which I was not engaged.

Question 9. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of any such illegal removal of teas from the wharves; of the state of the stores, nor of the surreptitious removal of teas from them.

Question 10. Do you know, and if you do, state them, the names of the porters that took those teas from the wharves?

Answer. I do not know.

Question 11. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I know of no such collusion, connexion, or intimacy, nor of any facts, indications, or appearances pointing to just suspicions on this head.

Question 12. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of any such frauds, collusions, connivances, or neglect.

Question 13. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. No such facts are within my knowledge as can furnish useful information respecting the recent frauds committed on the revenue.

ROBERT A. PATTON.

Affirmed to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 33.

Deposition of George Dannacker, Deputy Weigher.

Question 1. Were you engaged in weighing certain teas imported by Edward Thomson, in the year 1825, in the ships William Savary, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood; and in which of these vessels were you so engaged?

Answer. The teas and cassia imported by Edward Thomson and others in the ships William Savary, Addison, and Woodrop Sims, were weighed, in part, by myself, and in part by Messrs. Samuel Ross and John Steele, junior.

Question 2. How long were you engaged on each cargo?

Answer. From six to eight days.

Question 3. Were all the teas duly weighed?

Answer. They were.

Question 4. Was each chest or box weighed, or were several weighed together, and an average weight taken as that of each chest or box?

Answer. To the first clause of the interrogation I answer no. A number of packages of the same size and same quality of teas were weighed together, and the gross weight of each particular quality and different sized package returned to the Collector's office.

Question 5. Is this the invariable mode practiced at this port?

Answer. It is.

Question 6. Were the chests and boxes all marked, and by whom were they marked; were the marks made under your direction; if not, under whose direction were they made?

Answer. They were all marked, previous to weighing, by Charles S. Jackson, marking officer for the district and port of Philadelphia. To the latter clause of the interrogation I answer, I have no control over, nor have I any direction to give to the marking of teas.

Question 7. Were any of the chests or boxes removed from the wharf before they were weighed and marked?

Answer. To my knowledge, not any.

Question 8. How and by whom is the quality of teas ascertained; were the returns required by the 72d section of the collection law duly made?

Answer. The surveyor of the port is the officer to ascertain the quality of teas when any doubt exists. It is usual to take the quality as marked on the package; the returns of weights and quality were made according to law.

Question 9. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of the teas from them?

Answer. I have no knowledge of any illegal removal of teas from the wharves, nor of any surreptitious removal of the teas from the stores. The stores appear to be in good order and fire-proof.

Question 10. Do you know, and if you do, state them, the names of the porters that took the teas from the wharves?

Answer. I do not know, but I believe them to be the same ones that have been employed for several years.

Question 11. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge of any collusion, close intimacy, or connexion between Edward Thomson and any of the officers of the custom-house, nor have I any suspicions of any.

Question 12. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. To this interrogation I give the same answer as to No. 11. And as to my knowledge, I know of no flagrant neglect having been practiced by any officer or person belonging to the custom-house.

Question 13. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue?

Answer. I am not aware that I possess any facts in relation to the recent frauds committed than are contained in my answers to the interrogations.

GEORGE DANNACKER, *Deputy Weigher.*

PHILADELPHIA, *January* 21, 1826.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 34.

Deposition of Joseph Abbot, Measurer.

PHILADELPHIA, *January* 20, 1826.

SIR: The following are my answers to your interrogatories as you requested:

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no such knowledge.

Question 2. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I know of none.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state it.

Answer. I have no knowledge of any such thing. I am not acquainted with any facts which might furnish useful information on the subject of the recent frauds committed on the revenue.

Yours, respectfully,

JOSEPH ABBOT, *Measurer.*

Mr. S. H. SMITH.

PHILADELPHIA COUNTY, *ss.*

On the 20th January, 1826, before me, one of the justices of the peace in and for the county aforesaid, came Joseph Abbot, who, being duly sworn according to law, did depose and say that the answers made by him to the foregoing interrogatories are true, to the best of his knowledge and belief.

JOSEPH ABBOT.

Sworn before me.

WILLIAM MOULDER, *Justice of the Peace.*

No. 35.

Deposition of John Scott, Measurer.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the above.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge of the above.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of the above.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have no knowledge that would lead to any discovery as tending to the above interrogatories.

JOHN SCOTT.

Sworn and subscribed before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 36.

Interrogations to James B. Scott, Measurer.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the above.

Question. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge of the above.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of the above.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have no knowledge of any of the above questions.

JAS. B. SCOTT.

Sworn and subscribed before me, one of the aldermen of the city.

WILLIAM MILNOR, *Alderman.*

PHILADELPHIA, *January* 20, 1826.

No. 37.

Interrogatories to Samuel L. Palmer, Measurer.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the stores, neither have I any knowledge of the removal of the teas.

Question. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. Nothing has come to my knowledge in relation to these inquiries.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. None of these things are within my knowledge.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I know of no further facts in relation to the foregoing inquiries.

CITY OF PHILADELPHIA, *ss.*

Personally appeared before me, the subscriber, one of the aldermen of said city, Samuel L. Palmer, who, being duly sworn according to law, doth depose and say that the answers given by him to the foregoing questions are true, to the best of his knowledge and belief.

SAML. L. PALMER.

Sworn and subscribed before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 38.

Interrogatories addressed to Robert Milnor, Gauger, by Samuel H. Smith, Esq., with his answers thereto.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. My answer to the questions comprehended in the preceding interrogatory is in the negative, except from hearsay.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of any collusion, connexion, or intimacy between any of the officers of the custom-house and Edward Thomson existing at any time, nor had I ever cause of suspicion in this respect.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge whatever on this head, or my obligation and sense of duty would have impelled me to give information to the Collector.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have no personal knowledge of any facts concerning the recent frauds upon the revenue except those derived from general undenied report and belief.

ROBERT MILNOR.

Affirmed to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 39.

Deposition of Charles S. Jackson, Marker.

Question 1. Were you engaged in marking certain teas imported by Edward Thomson, in the year 1825, in the ships William Savery, Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood; and in which of these vessels were you so engaged?

Answer. I marked all the teas imported in the year 1825 in the above mentioned ships.

Question 2. Were all the boxes and chests of teas duly marked?

Answer. All the teas were marked.

Question 3. Were any of the chests or boxes removed from the wharf before they were marked?

Answer. None.

Question 4. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of the teas from them?

Answer. I have no such knowledge.

Question 5. Do you know, and if you do, state them, the names of the porters that took those teas from the wharves?

Answer. I do not know their names.

Question 6. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge or suspicion of any collusion or close intimacy between any officer or officers or any other person belonging to the custom-house and Edward Thomson.

Question 7. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. It is not within my knowledge.

Question 8. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent fraud committed on the revenue.

Answer. I have no information of facts not embraced within the preceding inquiries; nor have I any knowledge or suspicion of anything relating thereto but what I have already made answer to.

CHARLES S. JACKSON, *Deputy Inspector and Marker.*

Sworn to before me, this 20th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

Samuel H. Smith, Esq.

No. 40.

Deposition of John Kern, Deputy Collector.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from store?

Answer. All the knowledge I possess of the illegal removal of teas from the wharves to places other than the stores into which they should have been deposited, and their surreptitious removal from store, was unknown to and unsuspected by me until after Edward Thomson's failure. Of the state of the stores in question I am ignorant, never having been in the inside of them.

Question. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not; if I did, it would be my duty to state the same to the Collector.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or persons connected with the custom-house? If so, state them.

Answer. That the requisites of the law providing for the storing of wines, spirits, and teas, have not been fully complied with on the part of the inspectors is admitted by the inspectors, and also by the surveyor; but, as represented by them, the omission has arisen from the defects of the law, and, so far as I can form an opinion, I believe that may be the fact. I have no knowledge that any frauds, collusions, or connivances, in violation of law or duty, have been committed or practiced by any officer or person connected with the custom-house. Had any such occurrences come to my knowledge it would have been communicated to the Collector. I am uninformed of any flagrant neglect having been committed or practiced by any officer or person connected with the custom-house, unless the admission, as stated in the first part of this answer, should be considered as such neglect.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue?

Answer. All the information respecting the recent frauds committed on the revenue I have reported to the Collector as the same came to my knowledge. To obtain information that might be useful, I had occasion to call frequently at Edward Thomson's counting-house; several times at the request of the Collector; once accompanied by Thomas Stewart, on his return from New York, where he had been despatched as an agent for the recovery of some of the teas; once accompanied by Thomas Ashmead, clerk in the office; several times in company with Andrew Jackson, inspector; and on several occasions alone. I have also been at Mr. Ingersoll's office, where Edward Thomson and some of his clerks were; and this at Mr. Ingersoll's request, accompanied by the aforesaid Thomas Stewart; on all these occasions more or less useful information was obtained, especially so in regard to the missing teas. And the result has proved of importance, in enabling the officers and others employed on the occasion to trace them to such places where they had been sent to, and the circumstances under which they were held; as also to remove all doubts of the surreptitious removal of some, Edward Thomson having furnished me with a list, subscribed to by himself, of such as had been shipped to other ports of the United States, which had not been entered and bonded. A letter addressed to Andrew Jackson, by C. Mackie, was also obtained, which explained particularly the mode practiced to obtain possession of those teas, &c.; and two letters from persons at New York, in which they acknowledged holding possession of certain teas imported by

E. Thomson, and on which they had made advances. The list and letters mentioned have been shown to Samuel H. Smith, Esq., and the letter to Andrew Jackson was put into his possession; cancelled bills of sales for E. Thomson's different ships. The interrogatories put to the Collector, and his answers thereto, I have read. The answers correspond with what I believe to be true. I do not recollect any other circumstances which might furnish useful information respecting the recent frauds committed on the revenue. My knowledge of the circumstance communicated to the Collector in respect to E. Thomson's bonds, as noted in the fourth answer of the Collector, was obtained on the day of E. Thomson's failure, (and immediately made known to the Collector,) from the clerk at the bonding desk, Mr. David Gibson.

JOHN KERN, *Deputy Collector.*

Sworn and subscribed, this 24th day of January, 1826, before me.

WILLIAM MILNOR, *Alderman.*

No. 41.

Deposition of Richard L. Howell, Clerk.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no personal knowledge of the illegal removal of any teas from the wharves to places other than the stores; neither of the state of the stores, nor of the surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I know of nothing that would in the least criminate any individual of the custom-house by the slightest suspicion of any collusion or connexion with Edward Thomson in his late illegal transactions.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I refer you to my answer to the second interrogatory, so far as it relates to collusion on the part of any officers of the custom-house with Edward Thomson. The late exposure of frauds committed on the revenue by Edward Thomson induces a belief that there must have been an omission of duty somewhere, or a great deficiency in the law. I have no personal knowledge of the former, whereby I could give any information on that head.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue?

Answer. I can add nothing from personal knowledge that would, in the least, elucidate to you the singular success of Edward Thomson's late fraud practiced upon the revenue. My duties are altogether confined within doors; and as his operations have been directed to illegally removing from the public stores the teas in question, which the law places under the particular charge of another department, I have no knowledge of particulars in the way of my business, and am, therefore, utterly ignorant of circumstances, further than what is in common with the community at large, and can give no information that should be the result of personal knowledge on the subject.

I am, respectfully, your obedient servant,

RICHARD H. HOWELL.

COLLECTOR'S OFFICE, *Philadelphia, January* 23, 1826.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

SAMUEL H. SMITH, Esq., *Mansion House.*

No. 42.

PHILADELPHIA, *January* 20, 1826.

SIR: I received your letter of the 18th instant, and, in compliance therewith, transmit a copy of the "interrogatories," with an answer to each question.

I am, respectfully, your obedient servant,

THOMAS F. VALLETTE.

Interrogatories to Thomas F. Vallette, Clerk.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I am not in possession of any knowledge relating to the illegal removal of teas from the wharves to any place or places whatever, neither do I know anything of the state of the said stores, nor of any surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusion between any officer of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I am totally ignorant of any collusion whatever existing between any officer of the customs, or of any connexion or intimacy with Edward Thomson, or of any facts, indications, or appearances, which would justify any suspicions of such connexion or intimacy.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of any frauds, collusions, or connivances, in violation of law, duty, or any neglect having been committed or practiced, by any person or persons connected with the customs.

Question 4. State any further facts not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. In conclusion, I would state distinctly that *I know of no facts which would furnish any information* respecting the frauds committed on the revenue.

The 23d day of January, A. D. 1826, before me the subscriber, one of the justices of the peace in and for the county of Philadelphia, personally came and appeared Thomas F. Vallette, of the city of Philadelphia, one of the clerks in the custom-house of the said city, and on oath did depose and say, that the answers to the above interrogatories are true to the best of his knowledge and belief, and further saith not.

THOMAS F. VALLETTE.

Sworn and subscribed before me, the day and year above written.
Witness my hand and seal.

WILLIAM MOULDER.

No. 43.

Interrogatories to Robert Steele, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. As to the illegal or surreptitious removal of teas from the wharves or stores in which they should have been deposited, or as to the state, or situation of those stores, I have no personal knowledge.

Question. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion, or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge as to the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion, or close intimacy with him, or any facts, indications, or appearances, pointing to just suspicions on this head.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. Of the matter contained in this interrogatory I have no knowledge.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue?

Answer. I know of no facts that, in my opinion, can furnish any useful information respecting the recent frauds committed on the revenue.

ROBERT STEELE.

Sworn to before me, this 26th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 44.

Interrogatories to Charles G. Triechel, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no personal knowledge of anything appertaining to the above question.

Question. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or of any facts, indications, or appearances pointing to just suspicions on this head.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I do not know of any frauds, collusions, or connivances, in violation of law or duty, or of any flagrant neglect having been committed or practiced by any officer or person connected with the custom-house.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have no knowledge of any facts which, in my opinion, would furnish useful information respecting the recent frauds committed on the revenue.

C. G. TREICHEL.

Sworn to before me, this 25th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 45.

Interrogatories to Charles Treichel, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the illegal or surreptitious removal of teas from the wharves or stores, or of the state of the stores. A proper attention to my duties as clerk would preclude such knowledge.

Question. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of any collusion between the officers of the custom-house and Edward Thomson, or of any circumstances which would lead to suspicions on this head.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I do not know of any frauds, collusions, connivances, or flagrant neglect having been committed or practiced by any person connected with the custom-house.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am not acquainted with any facts which would furnish useful information respecting the frauds alluded to in the above request.

CHARLES TREICHEL.

Sworn to before me, this 25th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 46.

Interrogatories to David Gibson, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited; neither have I any knowledge of the state of the stores in which Edward Thomson's teas were deposited, nor of the surreptitious removal of teas from them.

Question. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexions or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head. If you do, state minutely the extent of your knowledge.

Answer. I do not know of the existence of any collusion between the officers of the custom-house and Edward Thomson, nor of any connexions or close intimacy with him, nor of any other facts, indications, or appearances pointing to just suspicions on this head.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. It is not within my knowledge that any frauds, collusions, or connivances, in violation of law or duty, nor that any flagrant neglects have been committed or practiced by any officer or person connected with the custom-house.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have no facts to state which would, in my opinion, furnish useful information respecting the recent frauds committed on the revenue.

DAVID GIBSON.

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 47.

PHILADELPHIA, *January* 23, 1826.

SIR: Agreeably to your request, I respectfully return the following answers to questions proposed in your letter of January 18.

I have the honor to be your obedient servant,

JOHN C. PECHIN.

SAMUEL H. SMITH, Esq.

Interrogatories to John C. Pechin, Clerk.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the illegal removal of teas from the wharves to any other places than the stores in which they should have been deposited. I possess no knowledge of the state of those stores, neither have I any personal knowledge of the surreptitious removal of teas from the stores.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or of any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state distinctly the extent of your knowledge.

Answer. I do not know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him. I do not know of any facts, indications, or appearances, which would lead to the slightest cause for suspicion that any such collusion existed.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge that any frauds, collusions, or connivances, in violation of law or duty, or of any flagrant neglect that has been committed or practiced by any officer or person connected with the custom-house.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. My occupation limiting my duties entirely within the custom-house, I have little opportunity of observing what is passing in the public stores or upon the wharves; and I am not in possession of a single fact which would, in my opinion, furnish useful information respecting the recent frauds committed on the revenue.

JOHN C. PECHIN.

Affirmed to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 48.

Interrogatories to Thomas Latimer, Clerk.

Question. 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no knowledge of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, nor of the state of those stores, nor of any surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I know of no collusion between the officers of the custom-house and Edward Thomson, nor of any connexion or close intimacy with him, nor of any facts, indications, or appearances, pointing to any suspicions on this head.

Question 3. Is it within your knowledge that any frauds, collusion, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I know of no frauds, collusions, or connivances, in violation of law or duty, nor of any neglects having been committed or practiced by any person attached to the custom-house.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. There are no facts, within my knowledge, that will furnish any information respecting the recents frauds committed on the revenue.

THOMAS LATIMER.

Affirmed to before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman*

No. 49.

PHILADELPHIA, *January*, 1826.

SIR: Your note of the 18th instant is received, containing the following interrogatories, to each of which you request an answer in writing. Agreeably thereto, I have the pleasure to hand you the same, duly qualified to.

Very respectfully, I am your obedient servant,

T. ASHMEAD.

SAMUEL H. SMITH, Esq.

Interrogatories to Thomas Ashmead, Clerk.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no personal knowledge of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, or of the state of those stores, and of the surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of any collusion or close intimacy between Edward Thomson and any of the officers of the custom-house, or facts, indications, or appearances, which would justify just suspicions on this head.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. It is not within my knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am in possession of no facts, which, in my opinion, would furnish useful information respecting the recent frauds committed on the revenue.

T. ASHMEAD.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 50.

Interrogatories to Abraham Martin, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. My duties confining me closely to my desk, I have no opportunity of knowing anything which may transpire in other Departments.

Question. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have not the least ground to suspect any collusion between the officers of the custom-house and Edward Thomson.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. The practice of the officers of the custom-house does not come under my observation in any respect, nor do I know that any frauds, collusions, or connivances, in violation of law and duty, or any flagrant neglects, have been committed or practiced by any person connected with the custom-house.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. It is not in my power to communicate any useful information concerning the frauds recently committed on the revenue.

The above is respectfully submitted.

I am your obedient servant,

ABRAHAM MARTIN.

Affirmed to before me, this 24th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 51.

Interrogatories to Richard George, Clerk.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no personal knowledge of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, or of the state of those stores, and of the surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusions between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of the existence of any collusions between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or of any other facts, indications, or appearances, which would justify just suspicions on this head.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? if so, state them.

Answer. It is not within my knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I can state no facts which, in my opinion, would furnish useful information respecting the recent frauds committed on the revenue.

RICHARD S. H. GEORGE.

Sworn to before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 52.

Interrogatories to Julien Henry, Clerk.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I have no personal knowledge of the illegal removal of teas from the wharves; as for the stores, I have never been inside of any of them, except those in rear of the custom-house; and I do not know, from my own knowledge, of any surreptitious removal of teas from them.

Question 2. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of any collusion between the officers of the custom-house and Edward Thomson, nor do I know of any close intimacy or connexion existing between any of the officers of the custom-house and Edward Thomson.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. It is not within my knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house.

Question 4. State any further facts not embraced within the scope of these inquiries which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am not acquainted with any facts which would furnish information respecting the recent frauds committed on the revenue.

JULIEN HENRY.

Sworn and subscribed before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 53.

Interrogatories to Thomas Stewart, Appraiser.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. Previous to the 20th of November last I was unacquainted with the part of the collection laws of 1799 which refers to the storage and credits on teas; on which day I went to New York, (with John Steele, jr., esq.,) as an agent from the Collector of this port, to recover part of the teas illegally taken

from store by E. Thomson; I reported to the Collector the seizures, &c., made by me in New York, and I understand the Collector has stated the same to the Treasury Department.

Question 2. Do you know of the existence of any collusion between the officers of the custom-house and Edward Thomson, or of any connexions or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. No facts or indications of collusion, or close intimacy, or of connexions between E. Thomson and any officer of the custom-house, or appearances pointing to just suspicion, have come under my knowledge, nor do I believe any exists.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have no knowledge of any frauds, collusions, or connivances, in violation of law or duty, having been committed or practiced by any officer or person connected with the custom-house. Of neglect in regard to the stores, whatever has come to my knowledge was subsequent to the failure of E. Thomson, and what was admitted to be the case by several officers, owing, as they represent, to the impracticability of paying that attention which the law required.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. The line of my official duty is so distinct from the storing and securing of merchandise that it is impossible I should be able to furnish useful information regarding the recent frauds; my knowledge has been subsequent to the 20th of November last, and has arisen from my agency; I returned on the 29th of November; after my return I waited on Mr. E. Thomson, by direction of the Collector, Mr. Kern, the Deputy Collector, accompanying me, and we obtained from his assignee the account of teas hypothecated to Messrs. Hagerty & Austin and Messrs. Hone; since when I have been confined to my official duty as an appraiser. The above information, relative to the teas held by Hagerty & Austin and Messrs. Hone, was communicated immediately by the Collector to Colonel Andrew Geyer, inspector of the customs, who relieved me, at New York, on the 28th of November.

I have further to observe that the last act of my agency in New York was my arranging with Colonel Geyer (which he executed the same day) the placing of the United States' locks on the stores where the 3,631 chests of teas held by Hagerty & Austin were; the keys were furnished, at my instance, by Mr. Thompson, the Collector, which has resulted in the seizures of the same.

CITY OF PHILADELPHIA, *ss.*

Before me personally appeared Thomas Stewart, who, being duly sworn according to law, did depose and say, that the answers given to the foregoing interrogatories are true, to the best of his knowledge and belief.

THOMAS STEWART.

Sworn and subscribed before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 54.

Interrogatories to Samuel Ross, Public Appraiser.

Question. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. I know nothing in regard to the manner in which teas have been removed from the wharves, or the manner in which they have been stored, or the condition of the stores in which teas are or have been deposited, other than by report.

Question. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I have no knowledge of any collusion or close connexion between Edward Thomson and any officer of the customs, any facts, indication, or appearance, pointing to just suspicion on that head, nor do I believe there has been any.

Question. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglects, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. No frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have come under my knowledge, in relation to the recent frauds on the revenue, except by hearsay.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. Of the frauds recently committed on the revenue I have no personal knowledge; all that I have is hearsay.

CITY OF PHILADELPHIA, *ss.*

On the 23d day of January, 1826, personally appeared Samuel Ross, who, being duly affirmed, did declare and say that the answers to the interrogatories are true, to the best of his knowledge and belief.

SAMUEL ROSS.

Affirmed to and subscribed before me,

G. BARTRAM, *Alderman.*

No. 55.

Interrogatories to John D. George, Deputy Naval Officer.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. That Mr. Thomson has surreptitiously removed a quantity of teas from the wharf or stores is evident, but from which or at what time I know not; neither am I acquainted with the state of the stores where the teas of Mr. Thomson or others have been deposited.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I know of none; I have never discovered any indications or appearances that should, for a moment, lead me to suppose that such collusion, close intimacy, or connexion, has or does exist between any of the officers of the customs and Edward Thomson, and am firmly pursuaded that the contrary is the fact.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances, in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I know of no fraud, collusion, or connivance, in violation of law or duty, by any officer or person connected with the custom-house; and whether the surreptitious removal of the teas by Mr. Thomson was owing to neglect of duty on the part of the officers having them in charge, or engaged in the delivery of their cargoes, or whether from inability on account of other duties, which they may have been required to perform on the wharf, I am unable to say, but am inclined to think it from the latter circumstance.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I have the knowledge of no other facts respecting the recent frauds committed on the revenue.

I do solemnly, sincerely, and truly affirm that the answers attached to the foregoing interrogatories are just and true, according to the best of my knowledge and belief.

JNO. D. GEORGE, *Deputy Naval Officer.*

Affirmed and subscribed before me, this 19th day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 56.

Interrogatories to Robert Heysham, and his answers.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of those stores, and of the surreptitious removal of teas from them?

Answer. My station, as clerk of the Naval Officer, confines my attention exclusively to the custom-house; I have no opportunity of knowing of the removal of merchandise from the wharves, nor of the state or condition of the stores in which the same may be intended to be deposited. Of the surreptitious removal of teas I know nothing.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances, pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not know of any collusion, close intimacy, or connexion between Edward Thomson and any of the officers of the customs, nor am I acquainted with any facts, indications, or appearances which could in any way lead to just suspicions of improper and illicit connexion.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I am unacquainted with any frauds, collusions, or connivances in violation of either law or duty; nor do I know of any flagrant neglect committed or practiced by any officer or person connected with the custom-house, my duties confining me to the official building. I have no opportunity of becoming personally acquainted with the transactions of the officers upon the wharves.

Question. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am possessed of no information which would be useful respecting the recent frauds committed on the revenue.

ROBERT HEYSHAM.

Personally appeared before me, the subscriber, one of the aldermen of the city of Philadelphia, on this 19th day of January, 1826, Robert Heysham, who, being duly sworn on the Holy Evangelists, doth declare and say that all matters contained in the preceding answers are just and true, so help him God.

ROBERT HEYSHAM.

Sworn and subscribed before me the day and year above written.

WILLIAM MILNOR, *Alderman.*

Interrogations to James Glentworth, Jr., Deputy Surveyor.

Question 1. Have you any knowledge, if so, state it, of the illegal removal of teas from the wharves to places other than the stores in which they should have been deposited, of the state of these stores, and of the surreptitious removal of teas from them?

Answer. I have not any personal knowledge of the above.

Question 2. Do you know of the existence of any collusion between any of the officers of the custom-house and Edward Thomson, or of any connexion or close intimacy with him, or any other facts, indications, or appearances pointing to just suspicions on this head? If you do, state minutely the extent of your knowledge.

Answer. I do not.

Question 3. Is it within your knowledge that any frauds, collusions, or connivances in violation of law or duty, or any flagrant neglect, have been committed or practiced by any officer or person connected with the custom-house? If so, state them.

Answer. I have not.

Question 4. State any further facts, not embraced within the scope of these inquiries, which may, in your opinion, furnish useful information respecting the recent frauds committed on the revenue.

Answer. I am not personally acquainted with any facts respecting the recent frauds committed on the revenue.

SURVEYOR'S OFFICE, *Philadelphia, January* 23, 1826.

SIR: I herewith transmit you my answers, on oath, to the above inquiries, and am, very respectfully, your most obedient servant,

JAMES GLENTWORTH, JR., *Deputy Surveyor.*

SAMUEL H. SMITH, Esq.

Sworn to before me, this 23d day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 58.

JANUARY 21, 1826.

John Hallowell, head porter, has been personally employed by Edward Thomson to haul his teas from the wharves to the stores. He, or porters under him, so hauled the teas of the William Savery, Addison, Benjamin Rush, Woodrop Sims, and Thomas Scattergood, which arrived in the last year. Nearly all the teas landed from these vessels were so carried to the stores provided for their storage by the officers of the Government and Mr. Thomson. There may have been, and probably were, a very few small boxes of teas taken to Mr. Thomson's stores, with silks which may have been his son's. The porters that hauled the teas under his direction are Michael Christopher, Joseph Camminger, Archibald Atkinson, Jacob Fox, who hauled all, or nearly all, of the teas. All the teas were hauled and put on the pavements in front of the stores; sometimes the whole cargo was at once deposited in the stores; sometimes a part of the cargo so deposited and other parts of it immediately taken to the New York, Boston, or Baltimore packets. The portion so taken to the packets does not, he thinks, exceed an eighth of the whole. The teas were received immediately from the scales and taken away, unattended by any custom-house officer. The locks at the stores generally opened by Mr. Thomson's clerk and himself. Charles Mackie was the clerk. He (the porter) had them deposited in the stores and then locked up the stores and gave Mr. Thomson's key to his clerk, who secured the custom-house lock and took the key. The storage of a cargo generally took about five or six days.

After the storage of the teas the deponent was frequently employed to remove parcels of the teas, in which case Charles Mackie opened the stores, having got the custom-house key from the inspector's office. These were taken either to the packets, or sample chests to Messrs. Lippincotts' auction stores. The deponent knows nothing further that he considers material.

JOHN HALLOWELL.

Affirmed and subscribed before me, this 21st day of January, 1826.

WILLIAM MILNOR, *Alderman.*

No. 59.

PHILADELPHIA, *January* 19, 1826.

SIR: I understand from you that the Messrs. Lippincott are not only willing but anxious to state, in the widest extent, their transactions with Mr. Edward Thomson. If this be so, I think it advisable to avail ourselves of the opportunity to obtain precise information, to get which I suggest the enclosed interrogatories to them, to be answered in the form of a deposition; and, as this branch of the business is very much under your cognizance, I request you to modify or extend the questions, so as most effectually to extract all the material circumstances that it may be useful to the Government to be acquainted with.

I am, very respectfully,

S. H. SMITH.

C. J. INGERSOLL, Esq., *Attorney of the District.*

Interrogatories.

1. What sales have been made by you of teas imported by Edward Thomson in the ships William Savary, Addison, Benjamin Rush, Thomas Scattergood, and Woodrop Sims, which arrived in the year 1825? State the qualities and quantities belonging to each cargo, and time of sale.

2. How did you become possessed of these teas? State the persons from whom you received them, the places, and the times.

3. What assignments or other transfers have been made to you of teas since the 27th of February, 1825, by Edward Thomson? State the nature, if practicable the words, of the original assignments or transfers, their dates, the qualities and quantities, distinguishing each cargo of teas embraced by each assignment, and whether attested by witnesses.

4. Was any intimation of these assignments given to the custom-house before the 19th of November, 1825?

5. Was Mr. Thomson indebted to you at the time of each of these assignments, and to what amount?

6. Are the assignments you have specified all that were made to you by Mr. Thomson?

7. At what time or times did Mr. Thomson give you his key of the stores in which his teas were deposited? Did you, and at what time or times, return the key to Mr. Thomson, or any of his clerks, or persons in his employ? How long were you possessed of the key, and how long was Mr. Thomson or his agents possessed of it? Did you or your agents examine the stores, and when? and did you at any times discover that teas not finally bonded had been withdrawn from them?

8. Were you at any time, and what times, possessed of the custom-house key; how long did you possess it; from whom did you receive it; and did you at anytime, and for what times, put it into the hands of Mr. Thomson, or any persons in his employ?

9. Did the first three entries offered at the custom-house on the 19th of November, 1825, correspond with the original assignments? and did the fourth entry, of like date, afterwards offered, likewise correspond with the original assignments? and whence happened it that this last entry, though dated the 19th of November, was not signed until the 26th of that month? Is it a fact that the signature was made posterior to the date? Do these four entries cover all the teas originally assigned to you?

10. Do your claims embrace any of the teas out of store, and what? Specify their qualities, quantities, and cargo, where they now are, and in whose custody. Do you know, or have you heard, how these teas got out of store?

11. State in what manner, and at what times, and in what newspapers, these teas were advertised for sale by you?

12. Were any of the teas so advertised deposited in stores, under the custom-house lock, at the time of the sales?

13. When you presented the entries at the custom-house on the 19th of November, were you apprised of the failure of Edward Thomson?

14. State your general account with Mr. Edward Thomson since the 27th of February, 1825.

15. Be pleased to state any further facts within your knowledge that you may consider material.

No. 60.

PHILADELPHIA, *January* 13, 1826.

GENTLEMEN: Having been charged by the President of the United States with an investigation of the recent transactions of the custom-house arising from the failure of Mr. E. Thomson, as well as with an examination of the general administration of that department, I have considered it proper to advise you of the circumstance, that you may communicate to me any information pertinent to the inquiry that you may see fit.

It is desirable that the information imparted should assume the form of a deposition.

I am, respectfully,

SAMUEL H. SMITH.

LEWIS CLAPIER, WILLIAM BROWN, ROBERT RALSTON, SAMUEL ARCHER, WHITTON EVANS, J. C. & W. SMITH; HENRY PRATT, *January* 17.

No. 61.

PHILADELPHIA, *January* 15, 1826.

R. Ralston, with very respectful regards to Mr. Smith, begs leave to present the enclosed, in reply to the communication of the 13th instant. The general nature of the statement, and having no knowledge of Mr. Thomson's transactions with the custom-house, has induced R. Ralston to present the information given without the form of a deposition.

PHILADELPHIA, *January* 15, 1826.

SIR: Having been transacting business with the custom-house of this district during all the administration of General Steele, until very recently, I can, from personal observation, state that the arrangements of the office for system, facility in the despatch of business, impartiality, civility, and the most unbending integrity, I believe could not have been surpassed.

The circumspection in making appointments, and the respectability of the incumbents in office, were such, also, as to inspire the utmost confidence. Whilst there was the greatest satisfaction afforded to the trading part of the community, there never was a liberty granted through the department of the Collector (which has come to my knowledge) by which the interests of the Government were impaired.

With the highest respect, I am, sir, your very obedient servant,

ROBERT RALSTON.

SAMUEL H. SMITH, Esq.

No. 62.

PHILADELPHIA, *January* 20, 1826.

SIR: In answer to your letter of the 17th instant, asking for any information it may be in my power to communicate regarding the recent transactions of the custom-house arising from the failure of Mr. E. Thomson, as well as the general administration of that department, I reply that, with respect to the first head of inquiry, I have not that particular acquaintance with the circumstances of that event which would enable or justify me in making any communication on the subject. In relation to your question touching the general administration of the custom-house, it is in my power, from an experience of upwards of forty years, to speak of it with precision and a great degree of certainty. I have seen three different administrations of that department, and having been actively engaged in business throughout the whole of them, I have necessarily had occasion to observe the manner of conducting business there, as well as the general capacity and faithfulness of the officers. Having presumed this much, I do not hesitate to say, in relation to the present administration of our custom-house, that I believe its officers are capable and faithful, and that the late events are, in my mind, no proof of the unfitness of the officers or any indifference on their part to secure the rights and property of the United States.

I am, very respectfully, your obedient servant,

HENRY PRATT.

S. H. SMITH, Esq.

No. 63.

PHILADELPHIA, *January* 19, 1826.

SIR: In attending to the contents of your note of the 13th instant, I am much at a loss to know what communication I can make which will be to the purpose, according to your views or expectations of the matter, as no particular inquiries are made by you.

So far, however, as I think your inquiries go, I will answer them.

Until after the failure of Mr. Thomson I knew not of the improper removal of certain teas; and that knowledge I had from public rumor. What I have since learned is from the same source. Of such conduct in any man, particularly so in an individual of high standing, there can be but one opinion. For myself, before the fact was fully established, I could not give it credit.

If your inquiries require me to state what I know of the general conduct of the persons employed in the custom-house department, I can say that, so far as the same has come within my own observation, the duties of the respective parties have been discharged with satisfaction to the merchant, with impartiality and strict integrity.

I will add that, having been engaged in the China trade for the last twenty-five years, it has been an invariable practice to permit me to arrange my teas in store according to the different kinds and chops. After this was done, the officers placed locks on the stores. When I bonded part, and obtained a permit, and the officers were engaged in the discharge of other duties, I found no difficulty in obtaining the keys from them. This I believe to have been the general practice at this port.

To the above statement of facts my deposition will be added if necessary.

Respectfully, your obedient servant,

L. CLAPIER.

SAMUEL H. SMITH, Esq.

No. 64.

PHILADELPHIA, *January* 24, 1826.

SIR: In answer to your letter dated the 13th instant, we can only reply that, touching the transactions of Mr. Edward Thomson with the custom-house, we have no information to communicate. We have, along with our fellow-citizens generally, been much surprised at the stupendous fraud that has been committed, but at the same time we are glad of the opportunity to declare our opinion that the affairs of the custom-house are conducted by men of the most spotless integrity. That we have been in the Canton trade fifteen years; that the practice has been in obtaining a permit to land the goods from the ship; that after they had been put from the ship to the stores, the officers counted the same, locked the stores and kept one of the keys, and that they generally attended the delivery of the same from the store; and when they did not, they furnished us the keys, alleging that their other occupations relative to the customs would prevent their attendance, which we always believed to be the fact.

We remain your most obedient servants,

JOHN C. & W. SMITH.

SAMUEL H. SMITH, Esq.

X.

To Messrs. Peter Mackie, Charles Mackie, and —— Arney.

Supposing, from the intimations which have been made to me from various quarters, that a voluntary deposition of the recent occurrences, in respect to the affairs of Mr. Thomson with the custom-house, would be agreeable to me, I have to state my readiness to receive it, and, without undertaking in any

wise to limit the extent of the information you may see fit to furnish, to invite an answer to the following inquiries:

At what time, and at whose direction, did the practice commence of taking teas from the stores without a permit; and at what time, and to what extent, and at whose direction, has it been since continued?

In what manner was the operation effected?

With whose aid and co-operation was it effected?

Had Mr. Thomson, or others, the custom-house keys?

How, and whence, and by whom, were the teas sold by Messrs. Lippincott, and delivered to them?

Were some, and what quantities of the teas never stored? What porters took them from the stores, and where were they deposited?

Did the Messrs. Lippincott, after receiving Mr. Thomson's key, return it to him or to others in his employ? Name them, and add when and how long it was in his or their hands?

Have you any knowledge, and what, of a like practice elsewhere? If so, state names, times, and other circumstances.

SAMUEL H. SMITH.

JANUARY 20, 1826.

No. 65.

Deposition of Peter Mackie, clerk of E. Thomson.

Personally appeared before me, Abm. Shoemaker, alderman for the city of Philadelphia, Peter Mackie, of the city of Philadelphia, who, being duly sworn, deposeth and saith: That he has been in the employ of Edward Thomson, of said city, as principal clerk, for upwards of ten years, and that he is now one of his assignees.

That, according to the best of his recollection and belief, Edward Thomson first commenced taking teas from custom-house stores, or rather from stores under the locks and keys of the custom-house, without a permit, after the arrival of the ship Addison, from Canton, on or about the months of July, August, or September, 1822; that his recollection and knowledge does not extend to the quantity so taken then and since, it not being in his department to deliver any part of said teas. He is, however, of opinion that the quantities were small in comparison with the teas so taken in 1825. Previous to 1822 Edward Thomson took no teas from store without a permit.

That the plan of taking teas from store without permits was first laid down by Floyd S. Bailey, then connected in business and viewed as a partner of the firm of Smith & Nicoll, of New York. This house had a lien on the cargo of the ship Addison in 1822, and have held liens on many other cargoes and parts of cargoes of teas imported by the said Edward Thomson since, in consequence of debts owing or advances made. That on the arrival of the Addison they insisted on a part of her cargo being sold in Philadelphia, and the greatest part of what remained being sent to New York; that Edward Thomson made strong objections to this, as it would make his bonds too heavy, and the payments too near each other; that the said Floyd S. Bailey said they must have the teas, and that Mr. Thomson must do as they did in New York, that is, to bond one or two hundred packages from store, and take therefrom a larger quantity. Mr. Thomson still objected to this mode of transacting business, but being pressed and threatened, he was compelled, and did acquiesce. For a proof of this, and of the directions from time to time given by the said Floyd S. Bailey, this deponent begs leave to refer to the copies of letters and extracts from the said person to Edward Thomson, (at this time delivered to Samuel H. Smith, Esq.,) and which he requests may be considered as part of his evidence. In particular, he refers to a letter from the said Floyd S. Bailey to Edward Thomson, dated 22d March, 1823. And further, this deponent saith that all the teas so taken from store without permit were ordered so to be taken by Edward Thomson himself; that he has understood that Floyd S. Bailey has ordered Mr. Fisher (who is now in Canton) to take larger quantities from store than ordered, and that on some occasions, by order of Mr. Thomson, the stores have been locked up in consequence; but that this deponent has no actual knowledge of this himself; nor has he been concerned in these transactions, of which he has always disapproved, further than preserving the secrets of his employer, on the same principle of an indenture between master and apprentice.

This deponent understands that these teas were taken from store by Mr. Thomson first directing one of his young men to deliver to the officer a permit for a part, and sometimes permits for teas of former importations, on which he received the key, and took from the store the quantity ordered by Edward Thomson. In some instances he understands the permits have been delivered by one of Mr. Thomson's young men, and the teas delivered by another, by which means the person so delivering was ignorant of the quantity entered out or permitted. He understands the officer never attended at such deliveries, but was occasionally in the stores, and, from the knowledge he has in this business, he believes it would require from one to five officers to attend to the delivery of teas in such an extensive concern, and that their whole time would be occupied for nine months of the year. This deponent is clearly of opinion that the execution of the laws in regard to teas, and in regard to the owners and purchasers, cannot be fufilled with the present limited number of officers.

No teas, to his knowledge, (without permits,) were ever taken from store with the aid or co-operation of any person or persons knowing them to be without permits, unless the directions of Floyd S. Bailey can be called a co-operation. The teas, when taken from store, were delivered to actual purchasers in Philadelphia, or immediately shipped to New York, Boston, Baltimore, and in some instances to other parts of the continent. The porters who hauled these teas were sometimes those employed by Edward Thomson, and sometimes porters employed by purchasers and shippers. In no case does he believe that said porters were privy to any part of these teas not being permitted.

Mr. Thomson never had possession of the custom-house key himself, but his young men were constantly in the habit of receiving it from the officers by his directions when teas were to be delivered. In most cases this deponent believes the keys were delivered back to the officer when the delivery was completed. When a ship was discharging it has been customary for the key to remain in possession of the young men until the cargo was out, because the teas would frequently be brought to the store so late

as to render it impossible to store them away and assort them until early next morning. During the discharging of a cargo the officer was engaged the whole day on the wharf. This he understands to have always been the custom in Philadelphia.

When the Messrs. Lippincott made advances on teas they at all times took possession of the keys belonging to Edward Thomson, and generally examined that these teas were in store. In no case does this deponent believe they ever had possession of the custom-house key, unless for the delivery of teas sold when Mr. Thomson's young men were absent, and this could not have been often. From the knowledge this deponent has of the accounts with Messrs. Lippincott & Co., he can say they have at all times been truly honorable, and that they were entirely ignorant of any teas being taken from store without permits. When teas were sold by Lippincott & Co. they generally sent one of their own young men to deliver them, and Mr. Thomson had also a young man there to assist. In some cases this deponent understands both were present, and in other cases only one. The keys of Mr. Thomson, when delivered to Lippincott & Co., was considered as giving them complete possession of the property; and when delivered to their own or Mr. Thomson's young men, for the delivery of teas sold or to be shipped, they were to be returned, and he understands they generally were so. The Messrs. Lippincott, after receiving Mr. Thomson's keys, did not return them to him, or to others in his employ. But when teas were sold, and to be delivered or shipped, they have intrusted them sometimes to one of his young men. These keys they considered as their own when advances were made; when they sold goods to the amount of advance the keys were returned. In some cases the keys have been obtained by Mr. Thomson's young men to deliver teas contained in the same store on which no advance had been made by them. The keys, when received from Lippincott & Co. by Mr. Thomson's young men, were in their possession until the object was accomplished. In case of public sale this was sometimes for several days, one of their own young men being generally present; at other times they were retained only a few hours. Having never attended to the delivery of teas, he cannot state more particularly.

This deponent has been acquainted with the Canton trade about nine years, but has no knowledge of what the practice of others is in that trade, in regard to taking teas from store, further than what Floyd S. Bailey has told him, that his house in New York pursued the practice pointed out by him to Edward Thomson. This deponent cannot say what teas have been shipped without being stored, but understands that in such cases the teas were first hauled to the pavement opposite the stores.

PETER MACKIE.

PHILADELPHIA, *January* 25, 1826.

Sworn and subscribed before me. ABM. SHOEMAKER, *Alderman.*

United States of America:

Be it known, that on the day of the date hereof, before me, Peter Lohra, of Philadelphia, notary public, by lawful authority duly commissioned and sworn, personally appeared Peter Mackie, one of the assignees of Edward Thomson, of Philadelphia, merchant, who, being by me duly sworn according to law, did depose and say that he is well acquainted with Floyd S. Bailey and with Edward F. Nicoll, of the city of New York, merchants, and with their respective handwritings and signatures, having frequently seen them write and sign their names, and that therefore he verily believes the names or signatures "B.," "E. H. Nicoll," "F. Bailey," "F. S. Bailey," "F. S. Bailey," "Edward H. Nicoll," and "Edward H. Nicoll," subscribed to original letters and extracts of original letters from them to the said Edward Thomson, are of the proper handwritings and signatures of the said Floyd S. Bailey and of the said Edward H. Nicoll, respectively, and that a memorandum marked with the letter D is a loose paper in the handwriting of the said Floyd S. Bailey.

PETER MACKIE.

And I do hereby certify and declare that the annexed are true and faithful copies of the said several original letters and extracts, by me carefully compared and found to agree therewith.

In testimony whereof, I have hereunto set my hand and affixed my notarial seal, on the twenty-third day of January, 1826.

PETER LOHRA, *N. P.*

A.

Copy of a letter from Floyd S. Bailey to Edward Thomson, post-marked March 23.

NEW YORK, *March* 22, 1823.

DEAR SIR: Yesterday the grocers were running to the store constantly for the teas, saying they must have them this morning, a part at any rate; and this morning they made such a clamor about getting them we dare not put off a commencement of delivery until Monday, and I went with an entry of 200 chests and 100 half, of various descriptions, so as to send each purchaser a few, and appear to be delivering as fast as possible, thereby save appearances for a day or two—say to-day and Monday—as *I shall deliver three times the quantity entered of each article.* The best and only arrangement I could make with the Collector was to deposit the amount of the duty on the 200 chests in cash ($6,500) with him, and to be settled in six days by bonding with approved securities, or the entry considered as cash. This he has before refused positively, but he said he was disposed to accommodate you every way as far as he could. I told him you would undoubtedly have been here this morning but for the impassable state of the roads. He replied, I know they are very bad, and was remarkably pleasant for him. Your succeeding in entering this cargo here will bother Astor and Tom beyond measure, because they will consider it completely opening this port for your ships, which is the real fact. You cannot conceive in what good spirits the change you have wrought in Jonathan has put Mr. N.; he really seems like a different man. If you and I

should succeed at the custom-house, I do not know what we cannot do hereafter. The sale of the William and Jane's cargo is cracked off and considered here the greatest that has been made since the peace; the idea is, that there is at least $100,000 profit to the importer. I write you this letter for fear something possibly might have prevented your leaving this day, and to let you know the indispensable importance of your leaving to-morrow afternoon, so as to be here on Monday evening, as that will be the very latest hour we can put off, as another large entry must be put in on Tuesday; indeed, it ought by all means to go in on Monday, as we shall have a large quantity out, more than is entered; after we have put in three or four entries, then I calculate to take out largely in anticipation of an entry.

Yours, B.

B.

Copy of a letter from Edward H. Nicoll, to Edward Thomson.

[Extract.]

NEW YORK, *May* 19, 1823.

SIR: I have reflected much on the proposal that you have made me, as regards the advance required on the Woodrop Sims.

In answer to which, I have to say that I will issue my paper for fifty-two or fifty-three thousand dollars, for the purpose of getting off this vessel, provided you will gratify me by making out in my name at once the following bills of sale: say three for the ships Addison, Wm. Savery, and Woodrop Sims. This alteration cannot make the least difference either to you or Mr. Bailey. But should anything happen to Mr. Thomson or Mr. Bailey, it might make a great difference to E. H. Nicoll. I am playing a desperate game, and it is a duty that I owe myself, my creditors, and those friends that are involved with me, that I make use of all precaution that is possible, in order that their interest may be preserved. As regards my own, it is a secondary consideration, but my creditors and friends shall never have it to say of me that I have acted in a manner that deserves censure. Mr. Bailey, I understand, objects to your making out the bills of sale to me individually. What his objections are I know not. If either Mr. Thomson or Mr. Bailey have an idea that I wish this alteration with the view of lodging them in the custom-house, and closing up the business altogether, they are entirely mistaken on this head, you may rest perfectly satisefid. I give you my word of honor that I have no such thought. On the contrary, I never should think of resorting to this extremity, unless there was not any chance whatever of reducing my demand to a moderate amount; therefore, on this head, rest satisfied, Mr. [illegible]son, that I shall continue along with you, so long as there is the least chance of my debt being reduced. God knows that nothing would gratify me so much as to hand these bills of sale either to you or Mr. Bailey, and I might have it in my power to say that the object that they were lodged in my hands for has been satisfied. Therefore, let the alteration take place, send them to me, and then they shall rest as the others have done, until you can redeem them, unless our circumstances should become more desperate than they are at present.

Mr. Bailey most certainly has a wrong view of this business, if he thinks it is correct that these securities should be made out in our joint names together. Mr. Bailey certainly has not any interest in them to any extent further than the interest he has in the concerns of S. & N. What this interest is, Mr. Bailey must be as well acquainted with as I am.

At the present moment I am fully aware that it is a matter of little consequence how they are made out; but if any accident by death or otherwise should occur to either of us, it might make to me and my creditors a very great difference. Therefore, let the bills of sale be made out agreeably to my wishes, and sent on to me, or let Mr. Bailey bring them on, and I will, under this promise, render any assistance to you that I may be enabled to do, provided you constantly keep in view the reduction of our demand, and the assistance and aid that you may require is not of such a nature as to break me entirely down both in credit and health.

[N. B.—Remainder of letter on other subjects.]

Yours, respectfully,

E. H. NICOLL.

C.

Copy of a letter from Floyd S. Bailey to Edward Thomson, post-marked June 27.

NEW YORK, *June* 27, 1823.

DEAR SIR: I shall accept the draft, and shall have to provide for it myself. S. & N. have more to pay for themselves than they can get on with; and I now state to Mr. Thomson that unless he sends me a sufficient amount in Hyson Skin tea to cover the draft it will be impossible for me to pay it. Therefore, I have to request you will, without fail, ship to-morrow the balance of the Telegraph, and 200 chests of Rush's Skins. Ship any chops of the Rush's that is landing; *it will only require two small* entries; and if you have any regard for me, do for God's sake ship it, and let the bill of lading come by Sunday's mail. Do, Mr. Thomson, try to settle with Nevins in some other way for the bill of lading of 20,000. Give it to them for 60 days, and allow them one per cent. on it. I shall be out of town on Sunday, but be back on Monday morning.

Yours,

F. BAILEY.

D.

Copy of a loose paper in the handwriting of Floyd S. Bailey, found in E. Thomson's drawer, and now attached to the back of a letter of the 27th of June, 1823, from F. S. B.

13th. 300 chests Skin—deliver 500
22d. 300 chests Rush Skin—deliver 400
144 chests Telegraph—deliver 144
Have them weighed, and get the paper at once.
N. B.—Above teas sold Grants & Stone, and Telegraph's delivered September 25, 1823.

E.

Copy of a letter from Floyd S. Bailey to E. Thomson, post-marked June 30.

NEW YORK, *June* 30, 1823.

DEAR SIR: From your letter this morning I presume you will enter all out from the store, corner of Pine street; the amount, however, is not large, as the Addison's Young Hysons were not put in that store, and it is them that you are deficient in, and I should suppose there was no necessity of your entering them immediately. There is more sure policy in letting them remain, and enter more of the Rush's Young Hyson; that is a fresh transaction and more likely to be looked after. Get all entered out from the Pine street store, and a pretty good lot of the Rush's Young Hysons, and you may rest perfectly easy—leaving the balance of the Addison's Young Hysons which were stored on the wharf to be entered the last of this month. Between now and the 10th of July we have upwards of $120,000 to provide for, and we must ship a pretty considerable amount of the Rush's Souchongs and Skins to Boston and Providence, so that we can draw on them, get the drafts discounted in Philadelphia; the money must be had in this way. It will not do to issue any more paper to come in this market; it will not negotiate better than eight or nine now, which is an evidence that those who have confidence in it have enough of it, and therefore please bear in mind you must help us in the way I have suggested. Please not let Mr. Mackie go to the custom-house to sign the Addison's permits for some time, as they may get to asking him questions which no good can grow out of, and much harm may. Please bear in mind that in case they call for my name, not to use the power you have, as it is dated early in May, and would show them at once that you use my name as you please.

With respect,

F. S. BAILEY.

EDWARD THOMSON, Esq., *Philadelphia.*

F.

Extract of a letter from Floyd S. Bailey to Edward Thomson, post-marked February 29.

NEW YORK, *February* 29, 1824.

DEAR SIR: I view it as a matter of the greatest importance that you should get around here as soon as possible a part of the Skins and Young Hysons of the Savery's: first, because you will get ten cents more for them now than three weeks later; and, secondly, because you prevent his having the market to himself; and besides, you know well that nothing lifts up a man like his selling his goods at a great price. In order to ship as many as you want to, you need only put in a couple of little entries, say *about two hundred chests each;* but as you are taking out the Savery's, put in pretty smart entries of the Rush's Skins and Young Hysons, all of which you must enter soon. If you are of my opinion, I recommend your sending a variety of chops, &c.

[N. B.—Remainder of letter on other subjects.]

With respect,

F. S. BAILEY.

EDWARD THOMSON, *Philadelphia.*

G.

Edward H. Nicoll to Edward Thomson.

NEW YORK, *April* 28, 1823.

SIR: This will be handed to you by my friend and relation, Mr. F. H. Nicoll, who is identified with me in all my concerns, and is well acquainted with all my business with you; therefore, any questions that he may ask you touching our affairs you may answer with freedom.

Yours, respectfully,

EDWARD H. NICOLL.

EDWARD THOMSON, Esq.

H.

NEW YORK, *April* 13, 1824.

SIR: Your letter of yesterday I have received. Any arrangements that you enter into with Mr. Francis H. Nicoll will be the same as if made with me. Mr. Nicoll is now in Philadelphia for the purpose

of endeavoring to make some negotiation with you whereby he may be released from the obligations he is under for me. He has investigated my affairs, and finds that he is soon to be sacrificed by me, and by me only, if he is not soon relieved.

The great object that I have had in view since my return from Europe has been to get the debt you owed me so much reduced that I might be able to pay my debts, and I have more than fifty letters from you wherein you state that in less than eighteen months from the time of my arrival this should be done. It is now two years since my arrival, though you have paid much, and I believe all that you have had the ability to do, yet I find myself far from reaching this desired object. The time, however, is had when you have the ability to do it if you please, and the only easy way that you can do it is to put the property on board of your vessels, and a part of the funds to be raised on respondentia, and the remainder to be held until you see a convenient time to redeem them.

The property that I have been obliged to throw away in consequence of the immense sum that you have been indebted to me exceeds $150,000 within the last three years. This sacrifice has been made in extra interest, bad debts, and loss on goods. After Mr. T. has compelled me to make all this sacrifice, and when I ask him only to place me in a situation that I may be able to pay my debts, when he has the ability to do it, and in a way perfectly easy, he refuses. How different are the style of your letters now to what they were at the time you wished to get out your vessels the last season; then nothing was said about giving up. Has your situation grown worse? I answer no; it is vastly better. Is (it) now any worse than it was three years ago, and at a time, too, when you stated to me, on the 18th March, 1821, in your letter, that you were as good as the bank? I say that your situation is far preferable now to what it was then. Why is your situation better? I answer, because you can now, with proper management, keep on for several years; then you could not have seen any reasonable prospect of getting on for three months. Through Mr. B., Smith and Nicoll were thrown in your way, and you made use of their services, their property, and their credit in any way you pleased. You now have it in your (power) to relieve me, and in no way can it be done so easy as to put the property on board of your vessels. The freights, Mr. Thomson, of your four ships cannot produce less than $150,000. The *Savery and Sims* will produce $90,000, at the least, and if well managed, $100,000. Let a rule be fixed on for the amount to be paid, and should you send us any property to be sold, the proceeds shall be returned to you at once. Anything I can do I will do to assist you, but relief I must have.

Yours, respectfully,

EDWARD H. NICOLL.

EDWARD THOMSON, Esq.

PHILADELPHIA, *January* 23, 1826.

SIR: As assignees of Edward Thomson, we now enclose you affidavits in answer to your queries; they are drawn up by the different persons from the facts within their knowledge, without the aid or advice of any professional gentleman; this, we trust, may account for any deficiency in form—the object has been plainly to put the Government in possession of facts.

We propose furnishing you with our views of the necessity of all the ships coming into Philadelphia in place of New York; great exertions will be made to get them into the latter port.

We intend, also, to furnish you with the copy of a respondentia bond, by which you will be able to comprehend how the property stands.

These communications we shall not be able to furnish before to-morrow evening. If, in the meantime, you go to Washington, they shall be sent after you by mail.

With great respect,

RICH. RENSHAW,
PETER MACKIE,
Assignees of E. Thomson.

SAMUEL HARRISON SMITH, Esq.

No. 66.

Deposition of Charles Mackie, clerk of E. Thomson.

Charles Mackie, of the city of Philadelphia, being duly affirmed according to law, says that he has been in the employ of Edward Thomson, of said city, upwards of four years; that he does not know the precise time when teas were first taken from store without permit, but believes it was about the summer of 1822, at which time the ship Addison arrived from Canton, and thinks it was on said ship's cargo that some teas were taken from store without bonding. He does not know who gave orders to take teas from store without permit at this time, it not being his department. When teas were taken from store, a permit for a part was generally delivered to the custom-house officer. Deponent was unacquainted with the amount of teas taken from store, not bonded in the years 1822 and 1823, and says that it was in the years 1824 and 1825 that he first became aware of the deficiencies of teas not bonded, and has no doubt that three-fifths of the teas imported by Edward Thomson were taken from store without permits, but kept no account thereof: and it was some time after he delivered teas before he discovered this. This deponent knows that teas were taken without permit, by directions of Edward Thomson, during the two last years, and none were delivered without his directions. No teas were taken from store with the aid or co-operation of any persons during the two last years. Mr. Thomson himself gave the orders.

On the arrival of a ship from Canton the custom-house key was got and kept while the ship was discharging, and returned when she was discharged. Whenever a sale of teas of E. Thomson's was made at auction, by J. & W. Lippincott & Co., the custom-house key was got by one of his young men, who delivered permits for part of the teas sold, and kept the key until they were all delivered, at which time it was returned to the custom-house officer. It was usual to get the custom-house key when teas were

to be shipped to New York or Boston, at which time permits for part were always handed to the officer, and who received the key back when such teas were shipped; deponent thinks that the teas shipped from the pavement without being stored, in 1824 and 1825, would amount to about 7,000 chests, three-fourths of which were not bonded at the time sent away. The porters employed by Edward Thomson always went by the direction of his young men; they were entirely ignorant of teas being taken from store without permit. Other porters were sometimes employed by purchasers; and the teas not stored were nearly always shipped to New York, and sometimes to Boston.

Whenever Messrs. J. & W. Lippincott & Co. made an advance on teas to Mr. Thomson, he always gave them the keys of the stores in which the teas were stored, and which they returned to him after having made a public or private sale of said teas to liquidate said advance. Deponent cannot say how long the keys were in Lippincott & Co.'s possession. Advances were received very often by Mr. Thomson from them, and the occurrence of such transactions were so frequent that it would be impossible for him to state the periods when the keys were handed to them and received back by Mr. Thomson; no account of this kind has ever been kept, but they were not received back until the advances were liquidated. He has no knowledge in regard to the mode in which others in the Canton trade do their business, either in Philadelphia or New York.

CHARLES MACKIE.

PHILADELPHIA, *January* 23, 1826.

Sworn and subscribed before me.

ABRAHAM SHOEMAKER, *Alderman.*

No. 67.

Deposition of Barclay Arney, clerk of E. Thomson.

Personally appeared before me Barclay Arney, of the city of Philadelphia, who, being duly affirmed, doth say that he has been in the employ of Edward Thomson, of said city, upwards of seven years as clerk; that he cannot say exactly at what period the practice of taking teas from store commenced, not having been in the practice of delivering teas; but he knows it has been the practice for some years past, but at no time has it been so extensive as in 1825. Affirmant believes the teas taken from store were done so by direction of Mr. Thomson. Mr. Thomson's young men received the key from the custom-house officer whenever he applied for it, which was generally retained until the delivery of the teas was completed. The teas sold by Messrs. Lippincott at public auction were delivered by one of their young men, assisted by one of Mr. Thomson's. Messrs. Lippincott were generally in advance to Mr. Thomson on teas in store, and of course were entitled to the keys themselves. Whenever it was otherwise the keys were returned as soon as done with; Messrs. Lippincott knew nothing of teas being taken from store without being duly bonded. This affirmant has several times carried Mr. Thomson's directions to the young man delivering tea for New York (in consequence of F. S. Bailey and Francis H. Nicoll ordering teas not permitted to be shipped) to lock up the stores, as that was the only method he could adopt to prevent them from getting the same. I have no certain knowledge of a like practice elsewhere except in New York, by the house of Smith & Nicoll, but cannot say to what extent. Edward H. Nicoll did acknowledge to me that he had taken teas from store to a small amount without permits. As to the operation of taking teas from store, it was customary to get a permit, which on being handed to the officer, the key of the stores was given up, when Mr. Thomson had taken therefrom any teas that he might wish to deliver. In many instances I have delivered the permit to the officer without the young man engaged in delivering ever seeing the same; he had directions what quantity to deliver from Mr. Thomson.

BARCLAY ARNEY.

Affirmed and subscribed, this 23d January, 1826, before

ABRAHAM SHOEMKAER, *Alderman.*

No. 68.

PHILADELPHIA, *January* 18, 1826.

SIR: In our conversation this morning you expressed a wish I could furnish a statement, in the form of an affirmation, respecting the transactions of Joshua and Wm. Lippincott & Co. with Edward Thomson. They are of considerable magnitude and long standing; therefore the minutia must be gone into for explanations, and would swell an account already very large, and embrace much matter of no importance to your inquiry; the pressure of business excludes us from giving, at this moment, such a statement.

I therefore suggest your proposing to the firm the points on which you desire information, and our earliest attention shall be given.

As respects the transactions between the firm of J. & W. Lippincott & Co. and Thomson, our books shall be open for your inspection.

I am, sir, your obedient servant,

WM. LIPPINCOTT.

SAM. H. SMITH, Esq.

No. 69.

Advertisement by auction of E. Thomson's teas.

In National Gazette of February 28, 1825, and daily to March 11, 1825, by J. & W. Lippincott & Co.:
"The cargo of the William Savery, consisting of—
2,041 chests, 645 half chests, 1,000 ten-catty boxes, 1,000 five-catty boxes young hyson.
434 chests and 437 half chests hyson.
2,930 chests hyson skin.
90 chests pouchong.
4,317 packages cassia."

In National Gazette of April 9, 1825, and daily to November 13, 1825, by J. & W. Lippincott & Co.:
"The cargo of the ship Addison, consisting of—
Young hyson teas in chests, half chests, ten and five-catty boxes.
Gunpowder teas in chests, fifteen-catty boxes, ten and five-catty boxes.
Imperial teas in chests, half chests and catty boxes.
Company and cargo hyson in chests.
Company and cargo hyson skin in chests and half chests.
Tonkay teas in chests.
Bohea souchong teas in chests.
Cassia, in chests.
Catalogues the morning of sale."

In National Gazette of April 27, 1825, and daily to May 11, 1825, by J. & W. Lippincott & Co.:
"The cargo of the ship Woodrop Sims, from Canton, consisting of—
Young hyson tea, in chests, half chests, and five-catty boxes.
Hyson tea, in chests, and five-catty boxes.
Imperial tea, in chests, and ten-catty boxes.
Hyson skin tea, in chests.
Company tea, in chests.
And cassia, in mats."

In National Gazette of July 13, 1825, and daily to August 3, 1825:
"The cargo of the ship Thomas Scattergood, consisting of—
Young hyson tea, in chests and half chests.
Gunpowder tea, in half chests, ten and five-catty boxes.
Imperial tea, in half chests, and ten-catty boxes.
Hyson tea, in chests.
Tonkay tea, in chests, and cassia, in boxes and mats."

In National Gazette of August 9, 1825, and daily to August 31, 1825.
"The cargo of the ship Benjamin Rush, consisting of teas and cassia, &c.
And young hyson tea, in chests and half chests.
Gunpowder tea, in five-catty boxes.
Hyson tea, in chests.
Hyson skin tea, in chests.
Tonkay skin tea, in chests, and cassia, in boxes and mats."
Above sales all made at Lippincotts' auction store on the day after that last specified.

In National Gazette of September 10, 1825, continued to September 21, 1825, sold by J. & W. Lippincott at their auction store:
"145 15-catty boxes gunpowder tea.
500 10-catty boxes gunpowder tea.
500 5-catty boxes gunpowder tea.
20 quarter chests imperial tea.
20 half chests imperial tea.
300 10-catty boxes imperial tea.
255 20-catty boxes imperial tea.
Of the Woodrop Sims and Addison's cargo."

No. 71.

PHILADELPHIA, *December* 8, 1825.

Charles Mackie presents his respects to Mr. Jackson, and, previous to giving him the details required, begs leave to state that he came into the counting-house of Mr. Thomson in or about the spring of 1821. His object was only to remain a few months, so as to complete his mercantile education under the eye of his father, and afterwards to pursue the business to which he had been brought up, say, that of a grocer. Mr. Thomson would not, however, part with him, and he has been in his employ ever since, though without any fixed salary; he has from time to time received what was merely sufficient to pay for his clothing, and no more.

From what he now understands, teas must have been taken from store without permit as early as 1822, and have been taken in same manner from that period till now; but he was ignorant of the fact or consequences for a long time.

In 1822, 1823, and a great part of 1824, Mr. Fisher superintended the delivery of teas. When he left Philadelphia for Canton, in the latter end of 1824, the writer was directed from time to time to deliver and ship teas as Mr. Thomson ordered; and in no instance has he taken from the stores a single chest beyond the quantity so ordered. At first, as before noted, he was ignorant of the impropriety, because the permits were then generally sent to Mr. Jackson by Mr. Arney, without his seeing them, and the writer had directions from Mr. T. what to take from the store. He cannot say that he has been ignorant lately; but would never have had the knowledge he now possesses but from having been present at the numerous remonstrances of his father to Mr. Thomson on the impropriety of taking teas from store in the manner he did. The writer frequently received notes from Francis H. Nicoll to Mr. Thomson, pointing out the quantity and kind of teas to be shipped, which he generally destroyed, and only one of these notes now remains in his possession.

During this year he thinks that Mr. T. has taken greater liberties than in former years. The time has been selected when Mr. Jackson has been engaged on the wharf, not only at the ships belonging to Mr. T. but other Canton ships At such periods large quantities of teas have been sent away, and often from the pavement, without putting them in store. Mr. Jackson could not see this, as his engagements were constant on the wharf; and Mr. Thomson usually sent to see when Mr. Jackson was thus engaged, and on such occasions took large quantities of teas from store, the greater part not bonded. The writer thinks that he could not have counted the teas in the stores owing to the darkness and mode of stowing. An advantage was also taken of one custom-house key opening all the stores, and when obtained for a particular description of teas bonded it was frequently used for opening the stores containing teas not bonded, and which were sent away without the knowledge of Mr. Jackson.

It was customary for Mr. Jackson to leave the custom-house keys in the hands of Mr. Thomson, or of those persons whom he directed to receive them, from the time a ship began to discharge until she was finished, when the custom-house locks were put on.

Yours, with great respect,

CHARLES MACKIE.

Mr. ANDREW JACKSON.

No. 72.

JANUARY 17, 1826.

DEAR SIR: The letters I lent Messrs. Lippincott have been returned from New York. I shall have certified copies made out without delay, so that I shall not be the cause of delaying you but a few days. Those letters will go to show that all the irregularity is to be attributed to New York.

With great regard,

EDWARD THOMSON.

I hope you will remember to ask Mr. Jackson (at custom-house) whether any other teas than mine have been irregularly taken from store. And before you go I should hope you would ask Henry Pratt, esq., as to the mode of doing business in our city. I have understood he has had a particular knowledge arising from experience.

E. T.

S. H. SMITH, Esq.

JANUARY 20, 1826.

DEAR SIR: I do not wish to injure any man on earth; but, as you mentioned your having come on to have a general view of the business, I would mention that Mr. W. Brown, late partner of Clapier, can throw light on the business, I think, as much as any one I know.

With great respect,

EDWARD THOMSON.

S. H. SMITH, Esq.

No. 74.

JANUARY 20, 1826.

DEAR SIR: In my note this morning I ought to have been a little more precise. I ought to have suggested asking the question whether any lock and key was put by the custom-house on Mr. Brown's stores containing teas?

With great respect,

EDWARD THOMSON.

S. H. SMITH, Esq.

No. 75.

PHILADELPHIA, *January* 21, 1826.

DEAR SIR: The questions you put yesterday, in addition to what was before not completed, compels me to ask of you to delay your departure till Tuesday next. Then I shall be ready.

With great respect,

EDWARD THOMSON.

S. H. SMITH, Esq.

No. 76.

Letter from Edward Thomson to Samuel H. Smith, Esq.

PHILADELPHIA, *January* 23, 1826.

DEAR SIR: I have sent you this day sundry letters from New York, to show that it has been a general practice pursued, to gain some time, during the year allowed for storing the teas; and I have little doubt, but, if any merchant had been suddenly destroyed in the Canton trade, he would have been found in a proportionably degree similarly situated; there certainly was no intention of defrauding the revenue, but of dividing the bonds so that too large an amount should not be payable in one day; as I explained in conversation, a bond is given on the arrival of the vessel for every chest on board, therefore, it is impossible to defraud the revenue.

I must acknowledge I was desirous to make the deficiency as small as possible, in order to which, I wrote the New York houses letters calculated to make them withhold their heavy demands for teas and money; indeed, every intention of mine was founded in good intention, and the most sincere hope to pay the Government every dollar I owed them, and since my failure, I have done everything possible to aid that cause; and you will please assure the President and Secretary of the Treasury that my exertions shall not abate till every dollar is paid; I feel very confident there will be little or no loss by me.

With great respect,

EDW. THOMSON.

SAMUEL HARRISON SMITH, Esq.

In reply to a debate in Congress, I must remark our custom-house officers, I fully believe, are entirely above being bribed—it is out of the question.

E. T.

No. 77.

PHILADELPHIA, *January* 23, 1826.

DEAR SIR: Shall I suggest to you to put the question to those in my counting-house, whether some of the stores have not been without any custom-house locks during this year?

With great respect,

EDW. THOMSON.

I shall complete this day for you.

E. T.

S. HARRISON SMITH, Esq.

No. 78.

Anonymous.—Respecting general certificates being issued in blank.

The custom-house in Philadelphia is in the practice of issuing what are called general certificates in blank, which merchants fill up with what quantity they please; this is amongst the greatest deficiencies of our custom-house; this is done a few days after the ship arrives, and before the usual certificates are ready; they are signed by the surveyor of the port, and blanks left, which may be filled up with one hundred chests or five thousand. Those general certificates would be well enough, provided the proper officer was to attend to the shipment of the goods and then fill up the blanks himself; but to leave all to the merchants is about as bad as can be—in short, it is too great a temptation for a merchant.

Understanding you are here concerning the custom-house business, I have thought it not untimely to drop you a line. You can improve on this.

SAMUEL HARRISON SMITH, *at the Mansion House, Philadelphia.*

No. 79.

Deposition of Edward Thomson.

As my books are so far behindhand, I cannot state with certainty the annexed items, but believe I am not far from being correct. The cause of my owing so much to the United States for duties is owing to their having gone into the hands of Smith & Nicoll and Bailey, who promised to aid in the payment of them. I have been much misled, indeed, by their assurances.

I commenced the India and China trade with a capital of near $800,000, and after various reverses have at length failed.

As to the teas taken out of store and not entered fully, there was no intention of defrauding the revenue, but with the intention of entering them along, so that all would be entered during the year, as was the practice in New York, and I had heard of some also in Philadelphia; for particulars I refer to the letters from New York handed to C. J. Ingersoll, esq. I gave the duties with reluctance out of my hands; but being in debt to Smith & Nicoll, they were forced out of my hands. Since my failure I have confessed a judgment to the United States, so as to cover all the property coming in in my ships, and I will render every aid and assistance to the Government, in order that they may lose, I hope, but a small sum by me.

Floyd S. Bailey informed me that (his partner) Edward H. Nicoll, a director of the Branch Bank at New York, had an opportunity, by being a director, of knowing the amount of the different bonds paid by the importers of teas in that city, and he found that one *great importer* in that place entered about one-half, at the time of sale and taking out of store, and completed the remainder in the course of the year. This was the course pursued in Philadelphia. The principal, or, indeed, only reason was to divide the bonds so that too heavy a sum might not fall due in one day. At the same time I must acknowledge there would not have been so many teas taken out of store, but they were forced out by those who had the power over me, which I could not control. I became in debt to them by the misfortune of business. I often endeavored to alarm them—I mean the New Yorkers—both by letters and in conversation, so as to prevent the heavy pressure on me for teas, but they were immoveable; they would have them.

I have been between thirty-two and thirty-three years in business, and have paid into the public Treasury, as near as I can at present ascertain, upwards of fourteen millions of dollars, and never let a bond lay over one day unpaid, except the present moment of embarrassment. I have always been told that no other man or house in trade has paid as much to the Government; and as to the advantage which might result from taking teas out of store as they did in New York, that went immediately into the pockets of the New Yorkers, not a cent in mine; they have the whole, I derived no benefit from it.

EDW. THOMSON.

PHILADELPHIA, *January* 23, 1826.

Duly affirmed and subscribed, the 23d of January, 1826, before me,

No. 80.

PHILADELPHIA, *January* 25, 1826.

SIR: We, as the assignees of Edward Thomson, do conceive it our duty to point out through you to the Government of the United States the great importance of the ships owned and chartered by him arriving at Philadelphia, according to the original plans of the voyages, and the invoices and the bills of lading that will be on board of them.

We are fully aware, and one of us, (P. Mackie,) from circumstances within his knowledge, firmly believes, that great exertions will be made by Francis H. Nicoll, of New York, and his friends to get them in there, the greatest part of the cargoes of these ships being hypothecated or on *respondentia* in that city, and the bills of sale of the ships being in the name of F. H. Nicoll will be the ground on which they will act, and may be the plea by which they may expect to prevail on the commanders to deviate from their voyage and comply with their wishes.

The ships are the Addison, Woodrop Sims, Benjamin Rush, and Thomas Scattergood, all of them owned by Edward Thomson, but bills of sale, previous to sailing and since, in the name of Francis H. Nicoll, and ship Superior, of New York, chartered by said Edward Thomson. When we say that bills of sale for the four ships named have been, before sailing and since their departure on the last voyage, in the name of F. H. Nicoll, let it be perfectly understood that these ships have been ostensibly owned by Edward H. Nicoll and Floyd S. Bailey, then by Edward H. Nicoll, and finally by Francis H. Nicoll, for these several years past, though the registers have at all times been in the name of Edward Thomson. This has been managed by bills of sale being returned by these persons on the arrival of a ship, and new ones having been given them by Edward Thomson when the ship had been entered by him at the termination of each voyage. In the case of the ships Benjamin Rush and Thomas Scattergood, Francis H. Nicoll received bills of sale after the ships sailed, he holding at the same time bills of sale previous to sailing, which he promised to deliver back, which, as far as our knowledge extends, he has not done.

When you fully view the situation of all these ships and their cargoes, which will be the subject of another communication from us, we think you will be aware of the necessity of their coming here and nowhere else, as the only means by which the interest of the United States can be fully guarded—more particularly as it is considered the property conveyed to Francis H. Nicoll can be claimed back and obtained by the laws of the United States.

We would respectfully recommend that the Government should consider the propriety of stationing revenue cutters or cruisers at or off the Capes of Delaware, and at the entrance of the harbors of New York and Boston, with directions to force these vessels into the port of Philadelphia, should force be necessary, and also to give directions to all the Collectors on the sea-board to refuse entry of such ships

should they succeed to get into any other port than this. We shall only add that every assistance in our power, as assignees, shall at all times be rendered.

With great respect,

RICHARD RENSHAW,
PETER MACKIE,
Assignees of Edward Thomson.

SAMUEL HARRISON SMITH, Esq.

PHILADELPHIA, *January* 25, 1286.

SIR: As you requested, we now furnish you with a particular account of the property shipped by Edward Thomson on board the ships Addison, Woodrop Sims, Superior, (of New York,) Thomas Scattergood, and Benjamin Rush, all at the present time performing voyages from hence to Canton and back, and all expected to arrive in Philadelphia from the 1st of March to 15th July next. You have also the form and a copy of a respondentia bond, which will enable you fully to comprehend how this property, amounting to $803,718 59, is situated.

It will at once be observed that the whole of this property is apparently, and perhaps actually, out of the hands of Edward Thomson and beyond the control of his assignees. That part on actual respondentia and on which the money has *bona fide* been advanced by the insurance companies and by Messrs. Schott & Lippincott, we consider as beyond the power of the Government and assignees, further than the return cargoes arriving to a favorable market; circumstances which we do not calculate upon might put it in our power to relieve and pay the respondentia and premium, and enable us to do something more towards liquidating Mr. Thomson's debt to the United States; this would be a very desirable object if we saw our way clear, being anxious to do all we can in the line of our duty.

In regard to the $51,000 invoice of specie per ship Superior you are desirous of having the particulars, and we shall give them as they have come to our knowledge, and as we believe they actually stand. When the ship Superior sailed, S. &. J. Nevins & Co. furnished Mr. Thomson with the whole of the specie, and in his payments to them he fell short about $51,000; to secure them he had a bill of lading made out for this sum, which he endorsed over and transferred to them; at the same time he ordered the invoice and bill of lading of the return cargo for this amount to be filled up to order of the shippers in Canton, regularly endorsed by them, and the same to be enclosed to Messrs. Nevins & Co., in Philadelphia, which is tantamount to consigning the said goods to them. About six weeks after this period, Mr. Thomson borrowed this bill of lading from Messrs. Nevins on a promise of returning it; but he says his intention was to get it placed on respondentia in New York, and that he forwarded it to Francis H. Nicoll there, on a promise from the last named that he would return to Mr. Thomson an equal amount in bills of lading of the Woodrop Sims and Addison. That Francis H. Nicoll did obtain the money on respondentia on the bill of lading and retained the same, or paid the amount to Floyd S. Bailey, so that no part ever came into the possession of Edward Thomson, and afterwards refused to give up the bills of lading promised; by this means there will be two claimants for this bill of lading, and it is not in our power to say who is the rightful owner.

In regard to the bills of lading assigned to Francis H. Nicoll in the form of respondentia bonds, amounting to $209,380 14, and on which he had at the time of assignment made no payments, the assignment of the four ships and their freights, valued at $185,000, and the bonds and judgments on which he has seized all Edward Thomson's personal property here, these, according to the opinion of Charles J. Ingersoll, esq., attorney for the United States, stands on another and separate footing from the actual *bona fide* respondentia; these assignments having been received by him as collateral securities, and under the perfect knowledge that Edward Thomson was insolvent, and had been so for years, and that by parting with these securities he was depriving himself of the only means he possessed of paying any part of the immense sum owing by him (E. Thomson) to the United States for duties; and by granting these conveyances Mr. Ingersoll appears to view the same as an act of insolvency, and to claim for the Government the preference which the laws give. We are not, however, sufficiently acquainted with the points of law that may be argued in this case to give our opinion.

With great respect,

RICHARD RENSHAW,
PETER MACKIE,
Assignees of Edward Thomson.

SAMUEL HARRISON SMITH, Esq.

P. S. It may be proper for us to mention that all the real estate of Mr. Thomson, worth about $40,000, is under mortgage to S. & J. Nevins & Co., to whom he is indebted about $100,000.

Received from Assignees of Edward Thomson, January 25, 1826.

Account of the cargoes on board the ships owned and chartered by Edward Thomson:
Ship Addison, expected to arrive in Philadelphia from 1st to 15th March, 1826.

Invoice specie on respondentia to Pacific Insurance Company, New York	$30,000 00
Invoice specie on respondentia to Ocean Insurance Company, New York	30,000 00
Invoice specie on respondentia to Atlantic Insurance Company, New York	21,000 00
Invoice specie on respondentia to National Insurance Company, New York	21,000 00
Invoice specie in respondentia to Francis H. Nicoll, but no money received from him, thereon he views it as a collateral security	30,000 00
Two invoices ginsing and cochineal, not on respondentia, most of which will be used for disbursements in Canton	9,340 78
Total amount of Addison's outward cargo	141,340 78

Ship Woodrop Sims, expected to arrive in Philadelphia about the 1st April, 1826:

Invoice specie on respondentia to American Insurance Company, New York	$30,000 00
Invoice specie on respondentia to Neptune Insurance Company, New York	21,000 00
Four invoices specie, $79,000, two invoices cochineal, $50,168 78, in respondentia form to F. H. Nicoll, as explained above per Addison	129,168 78
Invoice scrap iron and pig lead, not on respondentia, but will be used for disbursements	7,037 67
Total amount of Woodrop Sims' outward cargo	187,206 45

Ship Superior, of New York, chartered by Edward Thomson, and expected to arrive in Philadelphia about April 30:

Invoice specie on respondentia to Merchants' Fire Insurance Company, New York	$30,000 00
Invoice specie on respondentia to National Fire Insurance Company, New York	30,000 00
Invoice specie on respondentia to Niagara Fire Insurance Company, New York	25,000 00
Invoice specie on respondentia to Ocean Fire Insurance Company, New York	30,000 00
Invoice specie on respondentia to Pacific Fire Insurance Company, New York	30,000 00
Invoice specie on respondentia to Atlantic Fire Insurance Company, New York	13,960 00
Invoice specie for $51,000; this was money borrowed from S. J. Nevins & Co., and the outward bill of lading placed in their hands as security. Mr. Thomson afterwards got it from them, and through Francis H. Nicoll got respondentia from Atlantic and Merchants' Insurance Companies	51,000 00
Total amount	209,960 00

Ship Thomas Scattergood, expected to arrive in Philadelphia about July 1, 1826:

Invoice specie on respondentia to James Schott and Joshua Lippincott, from whom the cash was borrowed	$100,000 00
Invoice specie, bill of lading endorsed over to Smith & Nicoll, of New York, as collateral security	15,000 00
Invoice of ginseng and cochineal in respondentia to Francis H. Nicoll, of New York, but no money received from him thereon; he views it as a collateral security	19,609 99
Total amount of Scattergood's outward cargo	134,609 99

Ship Benjamin Rush, expected to arrive in Philadelphia about July 15, 1826:

Invoice specie on respondentia to James Schott & Joshua Lippincott, from whom the cash was borrowed		$100,000 00
Invoice specie	$15,000 00	
Invoice ginseng	14,814 92	
Scrap iron	786 45	
In respondentia form to Francis H. Nicoll, of New York, as explained above under head of Scattergood		30,601 37
Total amount of Rush's outward cargo		130,601 37

RECAPITULATION.

Ship Addison's cargo	$141,340 78
Ship Woodrop Sims' cargo	187,206 45
Ship Superior's cargo	209,960 00
Ship Thomas Scattergood's cargo	134,609 99
Ship Benjamin Rush's cargo	130,601 37
Amount of all the cargoes	803,718 59

Copy of respondentia bond.

Know all men by these presents, that we, Edward Thomson, of Philadelphia, Francis H. Nicoll, Edward H. Nicoll, and Henry W. Nicoll, of New York, are held and firmly bound unto the Ocean Insurance Company, in the sum of forty-two thousand dollars, lawful money of the United States of America, to be paid to the said Ocean Insurance Company, their certain attorney, successors, or assigns, to which payment, well and truly to be made, we do bind ourselves and each of us, our and each of our heirs, executors, and administrators, jointly and severally, firmly by these presents. Sealed with our seals, and dated this twenty-ninth day of September, in the year of our Lord one thousand eight hundred and twenty-four.

Whereas the said Ocean Insurance Company have this day lent and advanced, to the above named Edward Thomson, the sum of twenty-one thousand dollars, lawful money of the United States of America, upon the goods, wares, merchandise, and specie, to that amount laden or to be laden on board the American ship called the Thomas Scattergood, of Philadelphia, whereof G. McCall is master, or which may be laden on account of the said Edward Thomson, on board the said vessel, at any time during her intended voyage hereinafter mentioned.

And whereas the said vessel is now bound on a voyage at and from Philadelphia to Canton; and at and from thence back to Philadelphia or New York.

And whereas the said Ocean Insurance Company are content to stand and bear the hazard and adventure of the said sum so lent and advanced on the said goods, wares, merchandise, and specie, laden or to be laden on board of the said vessel as aforesaid, during the said voyage, so as the same do not exceed the term of eleven calendar months, to be computed from the day of the date hereof:

Now the condition of this obligation is such, that if the said ship, Thomas Scattergood, laden with the said goods, wares, and specie, do and shall, with all convenient speed, proceed and sail on the said voyage, at and from Philadelphia, and return and come to Philadelphia or New York, having on board the above stipulated amount in value, in specie or merchandise, as the case may be, on the respective passages, both outward and homeward, to end her voyage there, by or before the end or expiration of eleven calendar months, to be computed from the date hereof, and that without deviation, (the dangers and casualties of the seas excepted;) and if the above bounden Edward Thomson, Francis H. Nicoll, Edward H. Nicoll, and Henry W. Nicoll, or either of them, or either of their heirs, executors, or administrators, shall and do well and truly pay, or cause to be paid, at the city of New York, to the above named Ocean Insurance Company, their attorney, successors, or assigns, the full sum of twenty-one thousand dollars, lawful money as aforesaid, immediately upon the first and next return and arrival of the said ship at the port of Philadelphia, or at and upon the end and expiration of eleven calendar months, to be computed as aforesaid, whichever shall happen, together with the sum of two thousand five hundred and twenty dollars, lawful money as aforesaid, that being the stipulated marine interest and premium on the said loan; or if the said Edward Thomson, Francis H. Nicoll, Edward H. Nicoll, and Henry W. Nicoll, or either of them, their or either of their heirs, executors, or administrators, shall, and do immediately, upon the first and next return and arrival of the said vessel at the port of Philadelphia, as aforesaid, provided such return and arrival happen within the space of eleven calendar months, to be computed as aforesaid, give security satisfactory to the said Ocean Insurance Company, to pay at the city of New York, to the said Ocean Insurance Company, their successors, or assigns, the said sum of twenty-one thousand dollars, together with the sum of two thousand five hundred and twenty dollars, within three months from the time of such return and arrival, with lawful interest thereupon, from the time of such return and arrival, and shall and do well and truly pay the same accordingly at the expiration of the said three months; or if, in the said voyage and before the end of the said eleven months, to be computed as aforesaid, a total loss of the said goods, wares, merchandise, and specie, by fire, enemies, men-of-war, or any other inevitable casualty shall unavoidably happen; and the said Edward Thomson, Francis H. Nicoll, Edward H. Nicoll, and Henry W. Nicoll, their heirs, executors, or administrators, shall and do well and sufficiently abandon, transfer, and assign to the said Ocean Insurance Company, their successors or assigns, all the said goods, wares, and merchandise, of the said Edward Thomson, so laden and to be carried from the said port of Philadelphia, on board the said ship Thomas Scattergood, and all other goods, wares, merchandise, and specie, which shall be acquired during the said voyage, by reason of or from the proceeds of the said last mentioned goods, wares, and merchandises, and the net proceeds thereof, and well and truly do account for and pay, upon oath or affirmation, within four calendar months, to be computed from the time of such loss, to the said Ocean Insurance Company, or their successors, a just and proportionable average on all the said specie, goods, wares, and merchandise, and proceeds, if any salvage, average, or allowance, shall be obtained by reason of or upon the same, notwithstanding such loss; or so much thereof as shall be equal to the amount that would have been due and payable if the said ship had returned in safety, on her said voyage, at the said port of Philadelphia, then this obligation to be void; otherwise to remain in full force and virtue. It being first declared to be the mutual understanding and agreement of the parties to this contract, that the lenders shall not be liable for any charge, damage, or loss, that may arise in consequence of a seizure or detention, for or on account of any illicit or prohibited trade, or any trade in articles contraband of war; but that the lenders shall be liable to losses and averages, and entitled to the benefit of salvage, in the same manner, to all intents and purposes, as underwriters on a policy of insurance, according to the usages and practices in the city of New York; and that in like manner the borrowers shall be subject to all the duties imposed on the assured by the usual policies of insurance, and the customs and practices of the said city.

It is understood that if the voyage of the said ship should not have terminated at the expiration of the eleven calendar months, allowed by this respondentia bond, that the Ocean Insurance Company will prolong the time, charging interest at the rate of six per cent. per annum upon the amount of the loan, after the end of the said eleven months, until it so terminates.

EDWARD THOMSON,
FRANCIS H. NICOLL,
EDWARD H. NICOLL,
HENRY W. NICOLL.

Sealed and delivered in presence of us:

PETER MACKIE,
BARCLAY ARNEY.
To the signature of E. Thomson.
J. H. CLINCH,
JAS. CLINCH.
To the signatures of F. H., E. H., & H. W. Nicoll.

Memorandum.

Whereas, it hath been agreed that the bills of lading for the goods, specie, wares, and merchandise, mentioned in the within obligation. shall be endorsed to the Ocean Insurance Company, as a collateral security for the loan within mentioned:

And whereas, it has been further agreed that the property to be shipped homeward as aforesaid, being the proceeds of the said loan, shall be for the account and risk of the said Edward Thomson, but consigned to order, and the bill of lading forwarded to the said Ocean Insurance Company, to the performance of which we bind ourselves:

Now, by this instrument, it is expressly declared, that such endorsement, or consignment, shall not be held to exonerate the persons of the borrowers, nor compel the said Ocean Insurance Company to accept the goods and merchandise which may arrive under such bill of lading and consignment in discharge of such debt; but it shall be lawful for the said Ocean Insurance Company to receive and hold the said goods, specie, wares, and merchandise, for the space of ninety days after their arrival at the port of Philadelphia.

And in case the principal, interest, and premium, in the within obligation mentioned, shall not be paid or satisfied within the said time, to dispose of the same at public auction, and to charge the borrowers with the balance that may remain due, after deducting from the amount of said sales the freight, duties, commissions, and all other just and proper charges.

EDWARD THOMSON,
FRANCIS H. NICOLL,
EDWARD H. NICOLL,
HENRY W. NICOLL.

Sealed and delivered in presence of us:

No. 81.

PHILADELPHIA, *January* 25, 1826.

SIR: Understanding that you have been deputed by the Government to investigate the affairs of Mr. Thomson, and to make report, I have thought it proper, to prevent any future misunderstanding, to state that I have, for several years past, been in the habit of consigning goods and specie by his ships to his sons, who were established at Canton, and that I have two adventures at present in that situation. The first was sent per the ship Addison, Captain Hidelius, and is ordered to be returned in her. The amount is expected to be, per invoice, about eleven thousand dollars. This ship is expected to arrive in all the month of March next. The second adventure was per the ship Benjamin Rush, Captain Bardin, consisting also of specie and goods to the value of about eight thousand dollars, and are ordered to be returned, one part per ship Benjamin Rush, and the other part per ship Thomas Scattergood; which ships are expected to arrive in August or September next. For these transactions I have the usual vouchers; and I may add, that all I have, or have had to do with Mr. Edward Thomson is merely to pay him his freight. I should not, therefore, have troubled you with this statement had there not been reason to suspect that vigorous measures will be taken by another party to alter the destination of these ships to New York, instead of Philadelphia; thus interfering with property about which there can be no contention as to the ownership, and placing others who may be in the same innocent situation in a state of jeopardy.

I hope the Government will think proper, under existing circumstances, to endeavor to prevent, by means of its cruisers, a deviation for which the bankrupt movers in New York can offer no security. And I beg, sir, you will do me the favor to represent this case to the proper Department at Washington.

I am, sir, your obedient servant,

JOHN COOK.

SAMUEL H. SMITH, Esq.

No. 82, *Blank Certificate.*

Philadelphia,
Isabella, Leeds.

No. ——.

DISTRICT OF PHILADELPHIA,
Port of Philadelphia.

No. — Tea.
[47 pounds.]

I certify that there was imported into this district on the 29th day of August, 1825, by Samuel Archer, in the American ship Isabella, Leeds master, from Canton, one half chest of black tea, marked and numbered as per margin, containing forty-seven pounds.

J. GLENTWORTH, *Deputy Inspector.*

Countersigned by—

For the Collector.

AUGUST 29, 1825.

No. 83.

PHILADELPHIA, *January* 18, 1826.

SIR: I find that the examination of the teas of Edward Thomson in store does not embrace the numbers, or other marks, on each box or parcel, so as to decide in what degree they are the same with those said to have been assigned to the Messrs. Lippincott, or to distinguish therefrom other teas. Of opinion that this is an important link in the chain of facts, I have to request that this examination, including a specification of the numbers, in relation to each cargo, may be forthwith officially made, and a certified statement thereof rendered to me.

I am, respectfully, your obedient servant,

S. H. SMITH.

JOHN STEELE, Esq., *Collector of the Port of Philadelphia.*

No. 84.

CUSTOM-HOUSE, *January* 14, 1826.

SIR: The information requested in your note of this morning, addressed to the Collector, is respectfully submitted:

1. Ship W. Savery entered at the custom-house February 28, 1825, John Brown, inspector, superintending unlading, &c.

2. Ship Addison entered at the custom-house April 5, 1825, Robert Hopkins, inspector, superintending unlading, &c.

3. Ship Woodrop Sims entered at the custom-house April 13, 1825, Robert Hopkins, inspector, superintending unlading, &c.

4. Ship Benjamin Rush entered at the custom-house July 1, 1825, Robert Hopkins, inspector, superintending unlading, &c.

5. Ship Thomas Scattergood, entered at the custom-house July 2, 1825, John Boyd, inspector, superintending unlading, &c.

The officer who first went on board the above vessels was, of course, the master of the revenue barge, Captain Job Whipple, who would meet them in the Delaware, below the city.

On the arrival of vessels, the inspectors, indiscriminately, go on board and place the necessary locks for safety. The surveyor then details to each vessel an inspector to superintend the landing of the cargo.

The inspector having charge of the stores in which E. Thomson's teas were deposited was Andrew Jackson. The stores are situated as follows:

South Wharves, No. 78.

Water street, Nos. 163, 165, 157, 143, and 145.

Robert Hopkins, inspector, assisted Andrew Jackson in taking charge of E. Thompson's stores; as also all other stores in which spirits, wines, and teas were deposited, in the lower district; and this district extends from Spruce street to the Navy Yard.

The above information is principally derived from the surveyor of the port.

I regret that, from press of business, it was not in my power to have addressed you at an earlier hour.

I am, respectfully, your obedient servant,

JOHN KERN, *Deputy Collector.*

SAMUEL H. SMITH, Esq.

A.

CUSTOM-HOUSE, *Philadelphia, January* 24, 1826.

SIR: I annex a statement of bonds given by Edward Thomson remaining unpaid:

Bonded on importations for the year 1824		$311,951 13
Do.....do.....1825		245,379 72
Amount bonded on teas, silks, &c		557,330 85
Balance of duties on teas which should have been in store, remaining unbonded, viz:		
Per William Savary	$74,859 64	
Addison	89,299 48	
Woodrop Sims	90,755 05	
Benjamin Rush	94,820 54	
Thomas Scattergood	88,182 04	
	437,916 75	
Actually in store, the duties thereon estimated at	85,000 00	
		352,916 75
		910,247 60

Debentures on the above estimated at $53,000.

I believe the above to be as near the truth as I have the means of ascertaining.

I am, repectfully, your obedient servant,

JOHN KERN, *Deputy Collector.*

19TH CONGRESS.] No. 753. [1ST SESSION.

COMPLETION OF ENTRIES FOR THE BENEFIT OF DRAWBACK, UNDER ACT MARCH 3, 1825.

COMMUNICATED TO THE SENATE MARCH 24, 1826.

TREASURY DEPARTMENT, *March* 22, 1826.

SIR: In obedience to a resolution of the Senate of the 14th ultimo, directing "the Secretary of the Treasury to cause to be laid before the Senate a statement showing the number of cases, and the amount

and circumstances thereof, in which certificates or debentures have been issued under the provisions of 'An act authorizing the Secretary of the Treasury to direct the completion of entries for the benefit of drawback after the period of twenty days,' passed March 3, 1825, and the construction which has been given by the Department to the act aforesaid," I have the honor to transmit herewith a statement, marked A, exhibiting the number, amount, and circumstances attending the cases for the benefit of drawback, which have been completed by direction of this Department under the authority of the act recited in the resolution.

The correspondence, also transmitted, numbered from 1 to 4, inclusive, will show the construction which has been given to the said act.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

The Honorable the PRESIDENT *of the Senate.*

A.

TREASURY DEPARTMENT, *March* 16, 1825.

SIR: I have the honor to enclose to you a copy of a law passed on the 3d of March, 1825, entitled "An act authorizing the Secretary of the Treasury to direct the completion of entries for the benefit of drawback after the period of twenty days," and to request the favor of an official opinion on the construction of the said law; whether it applies to omissions previous to its passage, or only to such as shall occur subsequently. Has the Secretary of the Treasury the power "to direct the entry to be completed, and the certificates, or debentures, (as the case may be,) to issue," &c., in cases existing before the passage of the law, as well as those occurring subsequently to it?

I have the honor to be, &c.,

S. L. S.

The ATTORNEY GENERAL *of the United States.*

OFFICE OF THE ATTORNEY GENERAL OF THE UNITED STATES, *March* 23, 1825.

SIR: I have, according to your request, examined the act of the 3d March, instant, relative to the completion of entries for the benefit of drawback.

The law is one of a public and permanent nature, and is therefore to be construed by its language only, and not by reference to the particular occasion which may have produced it. Construed in this way the law is, in my opinion, prospective only. The language "Be it enacted, that *whenever* the exporter

entering any goods for the benefit of drawback, *shall not have completed* such entry, &c., it shall be lawful for the Secretary of the Treasury to direct the entry to be completed," naturally leads the mind forward to future cases. One would certainly not be apt, of his own accord, to apply it to past cases, and that, too, with an unlimited extent in the retrospection. The most that can be said in favor of the opinion that the law is retrospective is, that the language is ambiguous; and, in such a case, as the natural action of every law of a public and permanent nature is prospective, this consideration alone ought to cast the balance in favor of the prospective construction. The *ex post facto* operation of a law of a general and permanent nature, being an unusual operation, it is reasonable to suppose that where the purpose to produce such an operation existed, that purpose would be marked by the most unambiguous and explicit language. This has not been done in the present instance; and, acting upon those established rules of interpretation which are the only safe rules, I hold it better to advise that the law be executed in its prospective sense only, leaving it to Congress to express their purpose in a future law, if this construction shall be in conflict with that purpose.

On the ground of expediency, if the law is to be considered as retrospective, there being no limit fixed to its action in this direction, it must look back to the foundation of the Government; and is there no danger that such a construction would overwhelm the Department with a flood of obsolete claims? Is it not reasonable to suppose that Congress would have thought it better to apply the relief to particular cases than to expose the Department to an inundation from all past claims, by a law of general and unlimited retroaction?

In every respect it seems to me that the only correct construction of the law is that which shall confine its operations to future cases.

I have the honor to be, &c.,

WM. WIRT.

The Hon. SAM. L. SOUTHARD.

TREASURY DEPARTMENT, *April* 28, 1825.

SIR: I have examined the law passed at the last session, respecting drawback, with the assistance afforded by your views and information, and those of the Attorney General; and I have satisfied myself that it will permit me to consider all cases as pending and present cases, and in which relief may be afforded, where the time has not expired within which proof of the landing of the goods abroad is required to be furnished.

Under this construction, I have examined the cases mentioned by yourself, and which were referred to me by a resolution of Congress of the 2d March last, and I now take the liberty of communicating the result to you as the best mode of informing the persons interested.

Henry Barbey.—The law requires the application to be "under oath," and to be accompanied by "a statement of the Collector of all the circumstances attending the transaction within the knowledge of such Collectors." This statement is wanting. In other respects the case is made out. I return to you the papers that the statement may be annexed to them.

John B. Murray & Son.—Neither the oath of the applicant nor the statement of the Collector accompanies the petition.

Cæsar Gateran.—Wants the statement of the Collector.

Agosteno Trumento.—Wants both the oath and statement.

When these several papers are added, I shall be glad to receive them again.

Respectfully, &c.,

S. L. SOUTHARD.

P. S. I was not here when your letter respecting Mrs. Eckin arrived. Mr. Hay informed me that he had written you on the subject.

TREASURY DEPARTMENT, *June* 4, 1824.

SIR: I have had the honor to receive your letter of the 27th ultimo, enclosing the application of Mr. H. G. Rice, for the benefit of drawback on the exportation of certain cotton goods in the year 1819. The act of Congress of 3d March, 1825, authorizing the Secretary of the Treasury to direct the completion of entries for the benefit of drawback, has not been construed by this Department to have a retrospective operation; it accordingly does not embrace the case of Mr. Rice, and his petition is returned to you herewith.

This construction of the act, however, does not exclude from its provisions those cases in which, although the exportation was made prior to the passage of the act, the period had not elapsed for the production of the evidence of landing.

I am, &c.,

S. L. SOUTHARD.

H. A. S. DEARBORN, Esq., *Collector of Boston.*

19TH CONGRESS.] **No. 754.** [1ST SESSION.

NET REVENUE AND EXPENDITURES AT CERTAIN PORTS IN THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 25, 1826.

To the House of Representatives of the United States:

In compliance with a resolution of the House of the 16th ultimo, requesting statements of the net amount of revenue derived from imposts and tonnage received by the Treasury, from the ports within the bay of Delaware, the bay of Chesapeake, the harbor of New York, and at Boston, from the 1st of January, 1790, to the last of December, 1825, and of the amount of expenditures paid from the Treasury for forts, light-houses, beacons, and other public works, erected to aid commerce, or for purposes of defence, within the said bays and harbors during the said time, I transmit herewith a report from the Secretary of the Treasury, with several documents containing the information desired by the resolution.

JOHN QUINCY ADAMS.

WASHINGTON, *March* 24, 1826.

TREASURY DEPARTMENT, *March* 22, 1826.

The Secretary of the Treasury, to whom was referred a resolution of the House of Representatives of the 16th of February, 1826, "requesting the President of the United States to cause to be laid before the House a statement showing the net amount of revenue derived from imposts and tonnage received by the Treasury from the ports within the bay of Delaware from the 1st of January, 1790, to the last of December, 1825, and the amount of expenditures paid from the Treasury for forts, light houses, beacons, and other public works, erected to aid commerce, or for the purposes of defence, within the said bay, during the said time; to give the like information of the receipts and expenditures within the bay of Chesapeake; to give the like information of the receipts and expenditures within and appurtenant to the harbor of New York; and to give the like information of the receipts and expenditures at Boston and the harbor thereof;" has the honor to transmit herewith to the President a letter of the Register of the Treasury, accompanied by statements marked A, B, C, D, which contain the information required by the said resolution.

Respectfully submitted.

RICHARD RUSH.

The PRESIDENT *of the United States.*

TREASURY DEPARTMENT, *Register's Office, March* 21, 1826.

SIR: In compliance with your instructions predicated on the resolution of the House of Representatives, requesting the President of the United States to cause to be laid before that House statements in relation to the commerce of certain ports and bays of the United States, I have the honor to transmit the following statements, viz:

A statement, marked A, showing the net amount of revenue derived from imposts and tonnage, received by the Treasury from the ports within the bay of Delaware from the 1st of January, 1790, to the last of December, 1825, and the amount of expenditures paid from the Treasury for forts, light-houses, beacons, and other public works, erected to aid commerce, or for the purposes of defence, within the said bay, during the said time.

A similar statement, marked B, "of the receipts and expenditures within the bay of Chesapeake."

A statement, marked C, "of the receipts and expenditures within, and appurtenant to, the harbor of New York;" and a similar statement, marked D, "of the receipts and expenditures at Boston, and the harbor thereof."

I have the honor to be, sir, your most obedient servant,

JOSEPH NOURSE, *Register.*

An abstract of the foregoing, marked E.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, March* 20, 1826.

19TH CONGRESS.] No. 755. [1ST SESSION.

UNCLAIMED DIVIDENDS ON THE PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MARCH 25, 1826.

Mr. M'LANE, of Delaware, from the Committee of Ways and Means, to whom the subject had been referred, made the following report:

The Committee of Ways and Means, to whom was referred, on the 19th of December last, a resolution submitted by Mr. Livingston on the 14th of the same month, proposing to direct the Secretary of the Treasury "to lay before this House a detailed account, containing the names of the several persons to whom the unclaimed dividends of the funded debt of the United States appear to be due; the species of stock on which they have grown due, and the period since which the dividend has not been claimed; and that he also give a like detailed account of all such dividends as, having been unclaimed for three years or more, have afterwards been paid to any one appearing to represent the stockholder or his representatives, as attorney in fact, together with the name and residence of such attorney," with instructions to report their opinion of the expediency of adopting such resolution, or any other measures in relation to the subject of it, report:

That they have made the necessary inquiry at the Department of the Treasury as to the state of these unclaimed dividends, and the policy by which the Government has been guided in relation to them. The letter from the Secretary of the Treasury, and the documents from the office of the Register herewith submitted, contain all the information which the committee have been able to obtain.

It is apparent from these documents that the amount of unclaimed dividends has been liable to considerable fluctuations in different years; that the causes of the accumulation are various and conjectural, and that the policy of the Government in refraining from publishing the names of the respective proprietors has been dictated by a regard to their interests.

In the opinion of the committee this is a just and sound policy, not to be departed from without some cogent reason. It is never the duty of a Government to publish the names of its creditors, unless it be essential to their interest; and of this there ought to be very satisfactory evidence to warrant a departure from the uniform policy of all Governments.

There is great reason to believe that the accumulation of these dividends is, in a considerable measure, attributable to the fact of their being payable only at Washington, according to the provision of the act of the 4th of August, 1790; and to give publicity to the names of the proprietors without changing the place of payment would not materially increase the facilities of demanding it, and might at once prejudice the rights of the individual owner, and open a door to numerous frauds very difficult to be guarded against.

The committee believe that the transmission of the names to the Bank of the United States and its various branches, acting as Loan Offices in the different parts of the Union in which proprietors reside, with authority to give notice to the respective owners or their agents when known, and to pay to them their dividends when properly claimed, much of the evil now complained of would be obviated; and, as a greater or less knowledge of each individual claimant would be had by the officers of the Bank of the United States, or the branch thereof in each district, there would be fewer opportunities of fraudulent applications.

This course, however, may well be adopted for the purpose of experiment, rather than rashly to risk a violation of individual right; and, in case such experiment prove inadequate, a different remedy may hereafter be applied, in the discretion of Congress, for the correction of the evil, if any be found really to exist.

In consequence of the provision of the act of the 4th of August, 1790, making the interest on the public debt not demanded before the expiration of a third quarter demandable only at the Treasury, some further provision will be necessary to authorize the expedient proposed by the committee. To such provision no sound objection is perceived. The object of the act of 1790 was to prevent too great an accumulation of funds in the hands of the Commissioners of Loans, who were without the facilities now afforded by the banks for the deposit of the public money. But, under the present system, the President of the Bank of the United States and the President of the several branches of that bank act as Commissioners of Loans, and the bank is liable for all sums advanced to the Presidents, respectively, for the payment of interest on the public debt.

The committee therefore beg leave to report a bill conformably to the suggestions herein contained.

TREASURY DEPARTMENT, *February* 15, 1826.

SIR: Your letter of the 21st of December last was duly received, accompanied by a resolution proposed in the House of Representatives, and requesting information in regard to unclaimed dividends on the funded debt of the United States; which, having been referred to the Register of the Treasury, I have the honor to transmit his report herewith, which embraces the information desired by the committee.

In regard to the 6th and 7th queries contained in your letter, as to the propriety of making the list of claimants public, and the provisions which, in such an event, ought to be adopted for the prevention of frauds, I beg leave to add, that I entirely concur in the views expressed by the Register in answer to the said queries.

I have the honor to be, with great respect, your most obedient servant,

RICHARD RUSH.

Hon. LOUIS M'LANE, *Chairman of Committee of Ways and Means.*

TREASURY DEPARTMENT, *Register's Office, February* 13, 1826.

SIR: I had the honor to receive, in your communication to this office, the resolution of the House of Representatives of the United States, accompanied by a letter from the Chairman of the Committee of Ways and Means of that House, on the subject of unclaimed dividends on the funded debt of the United States, and, agreeably to your instructions, "to give all the information, and to make as full a report as practicable."

I beg leave to make the following statement, premising that, by the act of Congress of the 4th of August, 1790, (vol. 2, page 126,) it is enacted, "if the interest of one quarter shall not be demanded before the expiration of a third quarter, the same shall afterwards be demandable only at the Treasury."

In reply to the first question of the committee, "What is the amount of the unclaimed dividends at the present time?" the following answer is submitted:

The unclaimed dividends or lists of creditors who did not apply at the Loan Offices for their interest due for one quarter before the expiration of a third quarter, and who have not, up to the present time, received their interest at the Treasury, exhibit an aggregate due to them of.....	$223,107 79

To meet the payment of such sums as may be demanded, advances are made by the Treasury to the Branch Bank of the United States in this city; the Cashier, who is the sole agent for paying the unclaimed dividends, settles his accounts as often as called on for that purpose; the sum now in his hands to meet demands on these dividends is..... $13,146 74

Leaving to be advanced from the Treasury, to meet the whole amount now demandable at the said bank, the sum of*..... 209,961 05

223,107 79

The second question is: "How long have they been standing, and what fluctuations have they been liable to?"

With respect to the time the unclaimed dividends have been standing, it may be stated that they commenced with 1791, and are continued up to the present time. With respect to the fluctuations to which they have been liable, the aggregate amount has varied at different periods, corresponding in some measure with the increase or decrease of the public debt. The following statement exhibits the aggregate of unclaimed dividends on the 1st of January, in the years 1806 to 1825, inclusive:

Years.	Aggregate unclaimed.	Whereof there was advanced to the bank.	Retained in the Treasury.	Dividends returned unclaimed from the Loan Offices annually, from 1816 to 1825, inclusive.
January 1, 1806	$193,495 65	$185,703 99	$7,791 66	.....
1807	195,367 15	174,252 32	21,114 83	.....
1808	195,229 31	181,427 78	13,801 53	.....
1809	203,293 00	186,824 28	16,468 72	.....
1810	202,999 04	154,619 24	48,379 80	.....
1811	208,145 48	138,095 04	70,050 44	.....
1812	245,152 14	47,170 66	197,981 48	.....
1813	248,214 22	13,440 04	234,774 18	.....
1814	253,598 11	52,243 00	201,355 11	.....
1815	202,621 08	.....	202,621 08	.....
1816	293,562 69	.....	293,562 69	$50,440 77
1817	242,552 64	17,482 58	225,070 06	52,633 59
1818	235,281 60	57,577 95	177,703 65	45,780 56
1819	241,271 61	17,787 40	223,484 21	28,283 51
1820	231,648 37	79,880 65	151,767 72	23,632 21
1821	229,232 82	53,832 89	175,399 93	26,436 09
1822	224,834 10	22,998 08	201,836 02	31,681 91
1823	230,411 86	21,893 93	208,517 93	24,104 08
1824	232,747 84	125 83	232,622 01	22,346 62
1825	231,791 64	26,823 01	204,968 63	22,360 12

The payments to claimants for unclaimed dividends during the last ten years have averaged about $38,000 annually.

Under this head it may be observed that the unclaimed dividends are contained in twenty folio books deposited at the Branch Bank of the United States at the city of Washington, and are paid as called for, either to the proprietors personally, or to their legal attorneys.

The books exhibit the following particulars:

1. The name of each person entitled to the dividend, in number exceeding four thousand.
2. The species of stock, and the amount of principal upon which the said dividends are predicated.
3. The quarter-yearly periods at which they become payable; and
4. The amount of each quarter-yearly dividend, arranged in such manner that the aggregate due to each individual is easily ascertained.

In reply to the third question: "Whether the aggregate be composed of large or small balances?"

The aggregate before stated..... $223,107 79

May be distributed into the following classes, viz:

1. Amount supposed to be due to foreigners..... $45,000 00
2. Amount due to citizens..... 178,107 79

223,107 79

Caveats have been entered against the payment of certain sums, viz:

Of the amount due to foreigners..... $14,160
To citizens..... 600

3. Of the amount due to foreigners, the largest sum is about..... $14,000 00
The smallest..... 4 00
Of the amount due to citizens, the largest sum is about..... 2,200 00
The smallest..... 25

In reply to the fourth question: "What have been the causes of these dividends having remained unclaimed for such a length of time?"

They may be stated:

1. With respect to foreigners: From the facility with which the certificates expressing the amount of debt due to the holders were, in the foreign market, transferred by power of attorney, whereby the debt

* Statement B, which accompanied the report of the Commissioners of the Sinking Fund of the 4th instant, exhibits as short provided on account of unclaimed dividends, on January 1, 1825, the sum of..... $204,968 63
Add estimated amount unpaid on dividends subsequently returned..... 4,992 42

Short advanced to the bank, as above stated..... 209,961 05

passed from one holder to another, until the last holder made a transfer at the Treasury, or at any one of the Loan Offices, in the books whereon the credit existed—from the nature of such transactions the dividends of interest were lost sight of—and from this circumstance, it is presumed, a proportion of the amount due to foreigners may be attributed.

2. With respect to citizens: From the unclaimed dividends being demandable only at the seat of Government; from the death of the proprietors; from the smallness of the claim, (in many cases amounting to less than one dollar;) and from the ignorance of the parties.

In reply to the fifth question: "What have been the reasons which have heretofore forbid the disclosure of these unclaimed dividends?"

The usage of the Treasury Department has invariably been not to withhold information from the parties themselves, or their attorneys, with respect to their own dividends, but it has been withheld from others not immediately interested, because their disclosure might affect the credit of the individual proprietors.

In reply to the sixth question: "Would it now be improper or inexpedient to make them public?"

Should any weight be attached to the answer to the foregoing question, whatever that may be, it is presumed, applies in regard to the present impropriety or inexpediency to make them public at this time.

In reply to the seventh question: "What provisions or guards would be useful to prevent fraud upon the Government or individuals?"

Should it be deemed expedient to give publicity in the case, it may be useful, when the parties applying are not known at the Treasury, to require of them the presentation of the certificate of stock, if in their possession, or, if the certificate has been transferred or reimbursed, satisfactory evidence of their identity.

I have the honor to be, sir, with great respect, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

19TH CONGRESS.] **No. 756.** [1ST SESSION.

REMISSION OF FORFEITURE FOR SMUGGLING BY AN AGENT OF THE OWNERS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES APRIL 27, 1826.

Mr. NEWTON, from the Committee on Commerce, to whom was referred the petition of John Peters and Sabin Pond, made the following report:

That the petitioners, citizens of Boston, in the State of Massachusetts, were merchants and joint owners of a brig called the Anna. In the spring of the year 1813, during the war between the United States and Great Britain, the petitioners were desirous of employing the said vessel; to effect that object, and elude British cruisers, they procured for her Swedish papers. A certain Reuben Newcombe, a citizen of Boston, sailed in the said vessel as master and agent for the petitioners, and with full and complete powers from the nominal Swedish owner. It further appears, that on the arrival of the said vessel at the port of Lisbon, in the Kingdom of Portugal, the said Newcombe changed the Swedish for the Portuguese flag, and took on board said vessel about forty packages of valuable merchandise, and cleared out for Amelia island, but was, when on the American coast, by stress of weather, compelled to steer for the port of Savannah, in Georgia, at which she arrived some time in the month of February, 1814. The cargo, under the laws then in operation, could not be entered. The coast was blockaded by British cruisers. Under such circumstances, the day after the arrival of the said vessel the said Newcombe, as it is stated, without any privity or understanding with the petitioners, who knew nothing of his arrival in the United States, they being in Boston, attempted to smuggle, in violation of law, the cargo of the said vessel.

The officers of the customs, being apprised of the violation of law on the part of the said Newcombe, seized the vessel and cargo. The said vessel and cargo were libelled, and the competent authority decreed the condemnation of the vessel and cargo.

The amount of the sales of vessel and cargo were distributed according to law; one moiety the informers received, the other was paid into the Treasury of the United States.

The vessel and cargo sold for the sum of.....	$37,685 80
The moiety paid into the Treasury of the United States for their benefit, after deducting all expense, amounted to.....	17,822 45

It further appears by document (D,) certified by the Register of the Treasury Department, that the said Newcombe received $502 25 as one of the informers. Since the seizure and condemnation of the said brig and cargo, the said Newcombe, although his family was in Boston, did not return there, but has since that time removed them from that place. The fair and moral character of the petitioners is sustained by the testimony of some of the most respectable citizens of Boston. The petitioners disclaim all participation with the said Newcombe in his attempt to violate the laws of the United States, and state that by his conduct they have been subjected to heavy losses. During the embargo and restrictive systems many violations of the laws were committed by the masters and agents of vessels in direct disobedience of orders; in all such cases, on satisfactory proof being made of disobedience of orders or instructions, the Secretary of the Treasury unhesitatingly granted relief, by the restoration of the property seized; and the same principle has been applied to cases under the revenue laws since that period, when there appeared no intention of committing a violation of law by the persons whose property had been seized.

From an examination of the whole case, it appears to the committee that the petitioners are innocent

sufferers. That the said Newcombe, the master and agent of the petitioners, when he arrived at Savannah, acted without instructions from them, and, by so doing, subjected them to great losses. Had he acted otherwise, their property, both in the vessel and her cargo, might have been preserved to them. Had the said Newcombe, under the circumstances in which he was placed, made known his situation, as he ought to have done, to the Collector of the Customs, and given up the vessel and cargo to him, and at the same time informed the petitioners of the fact, they would have been enabled to petition the Secretary of the Treasury for the restoration of their property. No doubt is entertained that the Secretary of the Treasury, if he possessed the power, would have restored both to them, as such conduct on the part of the said Newcombe would have prevented any suspicion of fraudulent intentions. If the Secretary could not have relieved the petitioners, Congress would, on application, have authorized the entry of the cargo, and the restoration of the latter, together with the vessel, to the petitioners.

From the document (D,) certified by the Register of the Treasury Department, the said Newcombe is therein named as one of the informers against the brig and cargo. It is also stated in the same that he received, as such, $502 25 out of the portion of the forfeitures which accrued to the officers of the customs for the seizure of the brig and her cargo, and prosecuting both to condemnation in the District Court of the United States for the district of Georgia.

With this last mentioned fact before them, and other circumstances which the statement of the case reveals, and which the documents strengthen, the committee hesitate not to report a bill for the relief of the petitioners.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The memorial and petition of John Peters and Sabin Pond, citizens of Boston, in the State of Massachusetts, and formerly carrying on business as copartners, under the firm of Peters & Pond, respectfully represent:

That, during the late war between the United States and Great Britain, your petitioners were deeply interested in, and sole agents for, a brig called the Anna, originally a vessel of the United States, but documented and appearing as a Portuguese vessel, to elude the cruisers of the enemy, having previously been documented as Swedish for the same purpose; that said brig, on her voyage from Lisbon for Amelia island, having about forty packages of valuable merchandise on board, was forced, by bad weather, to make a harbor in Savannah, and arrived there in February, 1814; that, on the next day after her arrival, one Reuben Newcomb, who had the charge and command of said vessel, without any authority so to do from your petitioners, and without consulting or advising them of his intentions, and contrary to the instructions they had uniformly given their masters, attempted to unlade said goods without a permit, in a secret and unlawful manner, in consequence of which the said brig and her whole cargo were seized, libelled, and decreed forfeited for a violation of the revenue laws, and the proceeds thereof were distributed according to law, and the amount paid into the Treasury of the United States was seventeen thousand eight hundred and twenty-two dollars and forty-five cents. Since the seizure and condemnation of the brig and cargo, said Newcomb has never communicated with your petitioners, or given them any account of his conduct in any way whatever, and, at this late period, your petitioners have despaired of ever being able to call him to account for his conduct; they believe his feeling conscious of having, by his misconduct and unauthorized act, involved your petitioners in this immense loss, he has avoided them, and does not intend to come within their reach; and from his conduct in receiving a share of the money as complainant, your petitioners have strong reasons to believe that the seizure was caused at his instance.

Nothing could be further from the views of the petitioners than jeopardizing their property by the violation of any of the laws of the United States; for the truth of this assertion, they appeal with confidence to the whole course of their dealings as merchants; and they beg leave to add, as a further reason for a compassionate consideration of their case, that they have sustained, within a few years past, by British, Spanish, and piratical captures, and other commercial misfortunes, losses amounting to not less than seventy-five thousand dollars, exclusive of the forfeiture above stated.

Your petitioners therefore pray that, by authority of your honorable body, the sum paid into the Treasury, arising from said brig and cargo, may be restored and repaid to them, or that such other relief may be extended as the justice and equity of their case may seem to require.

And, as in duty bound, they will ever pray.

JOHN PETERS.
SABIN POND.

BOSTON, *December* 26, 1825.

A.

Petition of Peters & Pond, to William H. Crawford, Secretary of the Treasury.

BOSTON, *August* 26, 1817.

SIR: Your petitioners beg leave most respectfully to represent to you, for your consideration, the following case, the severity of which has nearly ruined your petitioners: In the month of February, 1814, the brig Anna arrived at Savannah, from Lisbon, bound to Amelia, with about forty packages of goods on board. The brig was compelled, by bad weather, to make a harbor at Savannah. The captain or agent went to town; there made an arrangement to smuggle his goods on shore, which he attempted to do; the goods were many of them landed; the officers of the customs seized them, also the brig; all of which were condemned and sold by order of the Government. The brig and goods amounted to about forty-seven thousand dollars, all of which was a total loss to the owners. Had we ever expected the captain would have attempted to smuggle his cargo, or any part of it, we should never have given him employment. The whole transaction was done without the least knowledge of your petitioners. And your petitioners most earnestly pray that they may be so far indemnified as to have restored to them the moiety paid into

the Treasury of the United States, which was not less, in our opinion, than twenty-three thousand dollars. This sum, divided among the citizens of the United States, is a paltry sum; but, sir, when this sum is taken from one which is his all, it makes him ever poor and miserable, and does not benefit the public only in a comparative degree.

We most earnestly request that you would give our case a mature reflection. We submit this case, under a full conviction that we are in the hands of the benevolent, who takes a pride in building up and making happy his citizens, when founded upon the strictest principles of justice.

We have not seen, nor scarcely heard from the captain of the brig since the seizure; and we have been waiting for him for a statement of facts and a self-justification of his conduct for three years, and are now without hope of ever seeing him.

We are strongly inclined to believe that he was the complainant, and received his share of the amount of property seized and condemned.

We remain, dear sir, your most obedient and very humble servants,

PETERS & POND.

Hon. WILLIAM H. CRAWFORD.

B.

TREASURY DEPARTMENT, *October* 4, 1817.

GENTLEMEN: Your communication of the 26th August has been received, and would have been sooner answered but for my absence from Washington.

The restoration to the owners of that part of the brig Anna and cargo which has been paid into the public treasury can be effected only by an act of Congress. To that body the petitioners must apply, if they conceive that, upon principles of justice or equity, restoration ought to be made. I am, &c.,

WM. H. CRAWFORD.

Messrs. PETERS & POND.

C.

TREASURY DEPARTMENT, *December* 31, 1817.

SIR: In obedience to a resolution of the Senate of the 22d instant, referring to this Department the petition of John Peters and Sabin Pond, I have the honor to enclose a statement of the proceeds of the brig Anna and cargo, exhibiting the amount paid into the Treasury, to the custom-house officers, and to the informers.

From this statement it appears that Reuben Newcomb, master of the said brig, received, of the proceeds of the said sale, the sum of $502 25, and that there was paid into the Treasury $17,822 45.

There is no other evidence in this Department which has any relation to the case of the petitioner.

I have the honor to be, with great respect, your obedient servant,

WM. H. CRAWFORD.

The Hon. the PRESIDENT *of the Senate.*

TREASURY DEPARTMENT, *Register's Office, February* 15, 1825.

I certify that the within is a true copy from the original on file in this office.

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *January* 14, 1818.

SIR: I have the honor to return the petition of John Peters and Sabin Pond.

In corroboration of the facts stated by the petitioners, I beg leave to refer you to the report which I had the honor to make on this subject to the Senate on the 31st ultimo.

The act giving authority to the Secretary of the Treasury to mitigate or remit the forfeitures, penalties, and disabilities accruing in several cases therein mentioned requires that it should be proven to the satisfaction of that officer that the forfeiture, penalty, or disability "shall have been incurred without wilful negligence or any intention of fraud in the person or persons incurring the same." The laws in many cases direct the forfeiture of the vessel and cargo for acts done by the master of the vessel, who frequently has no interest in either. In most cases of this kind the owner can safely allege that the penalties incurred by him "have been incurred without wilful negligence or any intention of fraud."

If the employment of agents who prove to be unfaithful, not only to the laws but to their employer, does not amount to a presumption of fraud or of wilful negligence, from everything that appears in this case, the petitioners have been innocent sufferers, unless the changing of their flag in time of war should strip them of that character.

The distinction taken between the acts of the owner and of the agent, by which forfeitures and penalties have been incurred, it is believed was first introduced during the embargo and restrictive systems. In many of those cases it was satisfactorily proven that the violation of the laws was committed in direct violation of the instructions of the owners. Relief, in several cases, was granted by this department, and the principle has since that period been applied to other cases under the revenue laws.

I have the honor to be, with great respect, your obedient servant,

WILLIAM H. CRAWFORD

Hon. JONATHAN ROBERTS,
Chairman of the Committee of Claims, Senate.

TREASURY DEPARTMENT, *February* 15, 1826.

SIR: In compliance with the request contained in your letter of the 6th instant, referring to this Department the petition of Messrs. John Peters and Sabin Pond, I have the honor to transmit the enclosed papers, marked A, B, C, D, and E, which contain all the information in this Department relating to the case of the petitioners.

It may be necessary to state that the original letter of Messrs. Peters & Pond to the Secretary of the Treasury is not on file in this office. It is presumed that it accompanied the Secretary's report to the Senate. The copy, however, is believed to be correct, having been taken from the printed documents.

I have the honor to be, with great respect, your obedient servant,

RICHARD RUSH.

Hon. THOS. NEWTON,
Of the Committee of Claims, House of Representatives.

BOSTON, *December* 19, 1825.

We, the subscribers, citizens of Boston, were acquainted with Captain Reuben Newcomb in the year 1813, and were knowing to his leaving Boston in that year in charge of a Swedish brig, which Peters & Pond appeared to exercise all the right of ownership over; she was under their direction above a year after his leaving Boston. We understood from Peters & Pond that, by the conduct of said Newcomb in violating the revenue laws of the United States, the brig and cargo were forfeited to the United States. We never have seen said Newcomb since he sailed in the brig; and we are confident that he never has been at Boston since he left the brig. His family were withdrawn from Boston in the year 1814, and we presume by the order of said Newcomb. We are confident that Peters & Pond have not seen said Newcomb since his sailing in the said brig.

Whatever might have been the conduct of said Newcomb at Savannah we are confident was done without the order or knowledge of Peters & Pond.

ROBERT WILLIAMS,
SAMUEL DORR.

CUSTOM-HOUSE, *Surveyor's Office, Boston, December* 24, 1825.

SIR: In compliance with your request, it gives me pleasure to state that as far as I have any knowledge of your transactions with the custom-house in this district they have always been those of an honorable man who was desirous of complying with the revenue laws in every particular.

Respectfully, your most obedient servant,

E. GERRY, *Surveyor.*

Mr. JOHN PETERS.

CUSTOM-HOUSE, *Boston, December* 19, 1825.

SIR: In conformity to your request, I can say with propriety that, so far as my knowledge extends, you have not violated any of the revenue laws, and that your transactions with the custom-house, as a merchant of long standing in this city, have been correct.

Respectfully, your obedient servant,

H. S. DEARBORN, *Collector.*

JOHN PETERS, Esq.

I have been acquainted with Mr. Peters for many years, and I concur entirely in the opinion expressed by General Dearborn, the Collector of Boston, respecting his standing and character.

GEORGE BLAKE.

JANUARY 8, 1826.

The undersigned, his Swedish and Norwegian Majesty's vice-consul for the States of Massachusetts and New Hampshire, certifies, that John Peters and Sabin Pond, copartners under the firm of Peters & Pond, dwelling and transacting business in Boston, are well known to me to have the entire, sole, and exclusive management and control of a certain brig called the Anna, and her cargo, formerly documented as a Swedish vessel, but subsequently, as I have understood, as a Portuguese vessel; and that I have ever understood the said Peters & Pond to possess full power and authority to direct and dispose of the said brig and cargo, and the proceeds thereof, as they should think proper.

In testimony whereof I have hereunto set my hand and affixed my seal of office, at Boston, this eighth day of December, 1817.

SAMUEL BLAGGE, *Swedish and Norwegian Consul.*

19TH CONGRESS.] No. 757. [1ST SESSION.

DRAWBACK ALLOWED AFTER EXPIRATION OF LIMITED TIME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 2, 1826.

Mr. McLANE, from the Committee of Ways and Means, to which was referred the petition of John Abraham Willink, made the following report:

That the petitioner, in the month of June, 1823, exported from the city of New York, in the brig Pilgrim, to Antwerp, one hundred and eighty-two boxes of brown Havana sugar, for the benefit of drawback, for which he made the usual export entry, and that the said sugar has been regularly imported and the duties paid according to law.

The petitioner also states that he attended at the custom-house at least six times within the period of twenty days, as prescribed by law, for the purpose of executing the export bond, but that on no occasion did he find Mr. Platt, the clerk, ready or at leisure to attend to that duty, and afford him an opportunity of signing the bond; that, after these repeated calls, and before the expiration of the twenty days, the petitioner was called to Philadelphia, where he was detained by pressing business and the sickness of the person with whom his business lay, until after the twenty days had expired. In consequence of this delay the export bond was not executed within the time allowed by law, and the petitioner was, consequently, denied the benefit of drawback upon his exportation.

It does not appear that the petitioner ever made any application to the Collector, or any complaint of the neglect of the clerk.

Though his case was deemed entitled to relief by the Treasury Department, to which he made application, it was not considered as embraced by the provisions of the act of the last session of Congress.

The committee think it would have been the duty of the petitioner in this case, when the clerk disregarded his repeated applications to complete his entry, to have complained to the Collector and demanded his interference, and have thus avoided an expensive application to Congress. His failure to do so is attributable to his own fault. But as the committee suppose that Congress, in passing the act of the last session, declared the expediency of granting relief, in all cases of recent occurrence, in which there appeared no intention to commit a fraud upon the revenue, and the failure to complete the entry was not owing to the neglect of the party, are of opinion that the present petitioner is entitled to relief, and for that purpose report a bill.

But the committee deem this a fit occasion to bring the attention of the House, and of the Department of the Treasury, to the serious inconveniences arising from the negligence of the officers of the customs in the discharge of their ordinary duties. In the present instance, as in a majority of the cases presented to Congress for relief, the failure to comply with the usual forms of the export entry is ascribed to the neglect of the clerks to attend to the reasonable application of the merchant to complete his entry. The twenty days prescribed by law is for the convenience of the merchant, and it is the duty of the officers to afford him the facilities of completing his entry when his business enables him to do so. It is too evident that these frequent omissions on the part of the officers lead to very serious expense in calling for the legislation of Congress, and ought, in future, to be prevented.

19TH CONGRESS.] No. 758. [1ST SESSION.

REVENUE AT KEY WEST IN 1822-'3-'4.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 6, 1826.

TREASURY DEPARTMENT, *May* 5, 1826.

SIR: In obedience to a resolution of the House of Representatives of the 28th ultimo, directing the Secretary of the Treasury to furnish the House with a statement of the revenue which has accrued and the amount of revenue collected at Key West, since it was made a port of entry, and to inform the House whether regular returns and remittances of the revenue have been made by the Collector of that district, I have the honor to transmit, herewith, a report from the Comptroller of the Treasury, embracing documents numbered from one to fourteen, inclusive; a statement, prepared by the Register of the Treasury, of the gross and net revenue which accrued at Key West, from the year 1822 to 1824; and copies of the correspondence of this office, numbered from 15 to 32, which contain all the information in possession of the Department on the subject of the resolution.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

The Honorable the SPEAKER *of the House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office.*

SIR: On the subject of the resolution of the House of Representatives of the United States of the 28th ultimo, which you have referred to me, and which is in these words:

"*Resolved*, That the Secretary of the Treasury be directed to furnish this House with a statement of

the revenue which has accrued, and of the amount of revenue collected, at Key West, since it was made a port of entry, and to inform the House whether regular returns and remittances of the revenue have been made by the Collector of that district," I have the honor to communicate the following documents as containing all the information in possession of this Department on the several points of inquiry in the resolution, viz:

1. Copy of letter to the Collector, under date of the 10th July, 1824, enclosing his commission, blank official bond, oaths of office, forms, &c.

2. Copy of my letter to him under date of the 2d of August, 1824, acknowledging the receipt of his official bond and oaths, the same having been approved.

3. Copy of his answer, dated 28th of October, 1824, enclosing lists of bonds transferred to him, and stating that the office was unprovided with the Laws of the United States, as well as with the forms and instructions for rendering his accounts.

4. Copy of my letter to him, under date of the 17th of January, 1825, enclosing a new commission, on his appointment having been confirmed by the Senate, and blank bond and oaths of office, to be taken and executed.

5. Copy of my letter to him, under date of the 11th of February, 1825, enclosing another set of forms and instructions.

6. Copy of his letter, dated April 1, 1825, enclosing certain returns for the quarter ending the 31st of March, 1825.

7. Copy of my letter to him, under date of the 2d of April, 1825, stating that his official bond being defective another one was enclosed to him.

8. Copy of my letter to him, under date of the 5th of April, 1825, containing instructions as to the manner of stating his accounts; returning some imperfect ones, in order that others might be rendered in their stead; and enclosing another set of forms and instructions.

9. Copy of his letter, dated April 6, 1825, acknowledging the receipt of forms and instructions, and promising that his accounts should, thereafter, be rendered in the manner prescribed by this Department.

10. Copy of my letter to him, under date of the 9th of May, 1825, returning certain imperfect accounts, and requesting others to be rendered in their stead.

11. Copy of his letter, dated 15th of December, 1825, enclosing a bill of exchange for $3,500, (which has been paid,) stating the circumstances which prevented him from rendering his accounts conformably to the instructions of this Department, and promising to make out complete returns from the time he entered upon the duties of his office.

12. Copy of my letter to him, dated the 20th of December, 1825, from which it will be seen that a letter from this Department, returning some accounts to him, came back to the Department as a dead letter.

13. Copy of my letter to him, dated April 11, 1826, stating that if he did not forward his accounts, without further delay, his delinquency would be reported to the President of the United States.

14. Copy of my letter to him, dated the 15th of April, 1826, stating that if his official bond and oaths, required under his new commission, were not forwarded without further delay, the delinquency would be reported to the President of the United States.

I deem it proper to add, that the accounts promised to be rendered by him, in his letter of the 15th of December, 1825, in the form prescribed by this Department, not having yet come to hand, a settlement with him has necessarily been deferred.

I take leave further to remark, that having, by my correspondence with the Collector at Key West, discovered that the conveyance to that place by mail was quite uncertain, and having recently been informed by Mr. Simmington, a resident of Key West, that my communications would go safe if sent to the care of Mr J. G. Hoggewerff, merchant, of Baltimore, he having frequent opportunities of sending letters to Key West, the latter course has been adopted, but sufficient time has not yet elapsed to judge of the result of this means of communication.

With great respect, I have the honor to be your obedient servant, JOS. ANDERSON.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 1.

TREASURY DEPARTMENT, *Comptroller's Office, July* 10, 1824.

SIR: The President of the United States having been pleased to appoint you to the office of Collector of the Customs for the district, and inspector of the revenue for the port of Key West, your commission is enclosed. On the receipt of it you will take the oath prescribed by law, and enter into bond, with two or more sureties, in the sum $2,000, for the faithful discharge of the trust. Forms of the oath and bond are also enclosed. When taken and executed you will transmit them to this office for approbation, together with the certificate of the Collector at Baltimore, touching the sufficiency of the sureties.

Joel Yancey, esq., your predecessor in office, will deliver to you on application all the public property, books, and papers in his possession, together with the instructions relating to the duties of the office, with which he has been furnished by this Department, for all which you will give him duplicate receipts, specifying every article.

In relation to the tranfer of bonds outstanding it is deemed necessary to give you some special instructions in order to obviate any difficulty that may arise in the settlement of your own or your predecessor's accounts. With that view I have to request that the following lists of the bonds outstanding may be made out by you, to be forwarded by your predecessor:

1. A list of the bonds put in suit on which judgments have been obtained.

2. A list of the bonds put in suit on which judgments have not been obtained.

3. A list of the bonds not yet due and placed in your hands.

Forms of those lists are enclosed, from which you will perceive that, with respect to the bonds in suit, it is particularly necessary that the partial payments made on them, and to whom made, should be ascertained with the greatest precision, because, for the balance of these bonds, after deducting the partial payments, added to the amount of bonds not yet due and placed in your hands, you will be debited and your predecessor credited.

Respectfully, JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, Florida.*

No. 2.

TREASURY DEPARTMENT, *Comptroller's Office, August* 2, 1824.

SIR: Your official bond and oaths have been received and approved. The Secretary of the Treasury authorizes you to procure a suitable boat and to employ hands as boatmen, but declines authorizing you to charge the United States with the rent of an office, there being no law justifying it.

Respectfully,

JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida, now at Baltimore.*

No. 3.

KEY WEST, *October* 28, 1824.

SIR: In obedience to your instructions I now enclose two abstracts, showing the amount of bonds received by me from the late acting Collector, Mr. Mc McIntosh; also, the bonds left by Mr. Ayres in Mr. Mc McIntosh's possession, and the amount received by Mr. Ayres on those bonds. I have also given receipts to Mr. Mc McIntosh for the amount of cash received by him and which will appear in my quarterly accounts.

I have passed receipts for the other property belonging to this Department.

I beg leave to observe that there are no bonds in this district unpaid, none as yet having become due.

Among the list of bonds returned there are several upon which two and a half per cent. only will be receivable, as they are for goods shipped with benefit of drawback. This office is entirely unprovided with the laws of the United States, as well as instructions and forms of keeping and transacting accounts. I trust I may be furnished ere long.

Respectfully,

WM. PINKNEY, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller.*

No. 4.

TREASURY DEPARTMENT, *Comptroller's Office, January* 17, 1825.

SIR: The Senate having confirmed your appointment to the office of Collector of the Customs for the district and inspector of the revenue for the port of Key West, a new commission is enclosed. On receipt of it you will take the oaths prescribed by law and enter into bond, with two or more sufficient sureties, in the sum of two thousand dollars, for the faithful discharge of the trust. Forms of the oaths and bond are also enclosed. When taken and executed you will return them to this office for approbation, together with the certificate of a judge or clerk of a court, or of some other prominent and respectable character, touching the sufficiency of the sureties.

Respectfully,

JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida.*

No. 5.

TREASURY DEPARTMENT, *Comptroller's Office, February* 11, 1825.

SIR: I duly received your letter of the 28th ultimo, with the abstracts which accompanied it.

Having furnished your predecessors with the laws of the United States and the instructions and forms for keeping and rendering the accounts of the office, who ought to have delivered them over to you, I regret to learn that you are unprovided in those respects.

Another set of forms and instructions are, therefore, transmitted herewith.

If it be practicable to procure another set of laws of the United States, they shall be forwarded with the least possible delay.

Respectfully,

JOS. ANDERSON, *Comptroller.*

W. PINKNEY, Esq., *Collector, Key West.*

No. 6.

KEY WEST, *April* 1, 1825.

Enclosed I have the honor to transmit a cash account current, also a bond account, for the quarter ending 31st ultimo.

Also, the vouchers for disbursements made during the same period.

Respectfully,

W. PINKNEY, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller.*

No. 7.

TREASURY DEPARTMENT, *Comptroller's Office, April* 2, 1825.

SIR: Your official bond being defective, for want of seals to the names of the obligors, a new one is enclosed.

Respectfully,

JOSEPH ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida.*

No. 8.

TREASURY DEPARTMENT, *Comptroller's Office, April* 5, 1825.

SIR: It is to be regretted that the forms and instructions furnished to both of your predecessors had not been delivered over to you, as your accounts from the time of your appointment up to the 31st December last might then have been stated in the manner required by this Department, instead of which, they are found, upon examination, to be rendered in a form altogether different from that prescribed.

Having recently furnished you with a complete set of the forms and instructions, you will, on referring to them, readily perceive where the difference exists.

It may be well, however, to observe, that on the importation of goods into your district you are to render quarter yearly an abstract of the duties arising on such goods, and credit the United States in your account current of the customs with the amount of such duties.

A part of these duties may be paid in cash, and for the other part bonds will be taken, of which a particular account should be rendered, agreeably to the form prescribed. With the cash received and the bonds taken you account for the amount of duties credited by you.

When goods are exported for benefit of drawback you ought to issue debentures according to the directions contained in the 8th section of the collection law of the 2d March, 1799, making them payable at the times, respectively, at which the duty bonds on which they are predicated become payable.

When the duty bonds shall be paid you are to surrender them to the party, crediting the bond account with the amount, and thereupon you are to pay the debentures predicated on them, taking a receipt on the back, cancelling them by punching a hole through your signature, and rendering an abstract of them, the amount of which you are to charge in your account current of the customs.

Where the importer is also the exporter of the goods for the benefit of drawback, and he continues to hold the debentures until the duty bonds become due, the former will, of course, be an offset *pro tanto* to the latter, and by giving a receipt to you on the back of the debentures and paying the difference between the duty bond and the debentures, (which will be the amount required by law to be retained,) you will surrender the duty bond, as you will receive credit at the Treasury for the amount of the debentures, and he will have paid you the usual retention.

The bond account is, of course, to be credited with the duty bonds thus discharged.

In order to a settlement of your accounts at the Treasury to the 31st December, 1824, it will be necessary that all the proceedings mentioned should be observed in relation to the transactions which have taken place at your office up to that time, and to be continued thereafter.

For instance, you are to render an abstract of the duties on the goods imported and an account of the bonds given for such duties.

You are then to issue debentures for the duties (deducting the usual retention) on the goods exported for benefit of drawback, taking a receipt on the back of the debentures, cancelling them in the manner stated, rendering an abstract of them, and charging the amount in your account of the customs.

You are also to render abstracts of the tonnage duties and light money, and of the marine hospital money collected by you, agreeably to forms prescribed.

The accounts of the inspector and weigher paid by you, not having been verified as required by the act of the 7th May, 1822, are returned herewith, in order that the deficiency may be supplied.

Your early compliance with the present instructions is desirable; and lest the forms and instructions recently transmitted to you may not have got to hand, another set is enclosed herewith.

Respectfully,

J. ANDERSON, *Comptroller.*

W. PINKNEY, *Collector, Key West.*

No. 9.

KEY WEST, *April* 6, 1825.

I had the honor to receive your letter of the 11th February, transmitting the forms and instructions for keeping and transacting the accounts of this office.

The accounts for the last quarter have [not] been made up, because it would be impossible to render them in the precise manner required by those forms, they not having been received until this day. Although the accounts hitherto rendered are not in the precise form required, they are perfectly accurate and supported by duplicate vouchers in every instance. Hereafter they will be rendered in the manner required.

Respectfully,

WM. PINKNEY, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller.*

No. 10.

SIR: For similar reasons with those stated in my letter to you of the 5th ultimo your cash and bond account for the quarter ending on the 31st March last, together with the accounts of the inspectors and weighers, are returned herewith.

In lieu of them you are requested to furnish, as early as possible, other accounts agreeably to the forms prescribed.

JOS. ANDERSON, *Comptroller.*

W. PINKNEY, Esq., *Collector, Key West.*

No. 11.

KEY WEST, *December* 15, 1825.

SIR: I have the honor to transmit to you a bill of exchange for $3,500, (first,) drawn by Lieutenant Commandant Paine, upon the Navy Department, and for which bill I have furnished the money by order of Commodore Warrington, and under instructions from the late acting Secretary of the Treasury, (the Hon. Mr. Southard, Secretary of the Navy.) The second bill (of same tenor and date) I shall transmit by another conveyance, as well as a copy of the letter of Commodore Warrington, making requisition for the above sum. The third I shall transmit to the Treasury as a voucher with my quarterly accounts.

These bills will be endorsed by me, payable to the honorable the Secretary of the Treasury.

Circumstances beyond my control, owing to my ill health upon this Key, and consequent absence to the north, together with the want of forms and instructions relative to keeping the accounts to be rendered to the Treasury, together with the decease of the late Isaac Merrick, inspector of the revenue, have prevented me returning these abstracts.

The forms and instructions above alluded to have only reached here in May last, at which time I was in the United States, (New York,) and the inspector, Mr. Merrick, wife, and family, were at the point of death. Under these circumstances he was compelled to leave this Key, and Mr. T. A. Brown was left in charge of this office. He is since deceased, and I have only been able to reach here on the 5th November last. I have therefore been the whole time engaged in making up the returns and accounts, which will be forwarded as soon as possible, to embrace the *whole period*, from the time I arrived on this Key to the quarter ending December 31, 1825.

It is a subject of much regret to me that I should have found, in entering upon the duties of this office, not a single instruction, form, or paper from the Treasury, Mr. Ayres (as I am informed) having removed them to Norfolk; of course, when I arrived here, compelled as I was to enter upon the duties of this office, I was totally ignorant of the different abstracts required by the Treasury, as well as the form of accounts current.

I furnished accounts current to the Department for two quarters ending 30th April last, but not being in *form* they are returned. May I beg the favor of you to lay this letter before the honorable the Secretary of the Treasury, which will explain why the returns have not been made hitherto according to law.

The inspector being deceased, I am now obliged to perform his duty as well as my own.

Respectfully,

W. PINKNEY, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller, Washington.*

No. 12.

TREASURY DEPARTMENT, *Comptroller's Office, December* 20, 1825.

SIR: The enclosed documents are returned to you, the letter from this office which contained them having been returned to the post office as a dead letter.

Respectfully,

JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida.*

No. 13.

TREASURY DEPARTMENT, *Comptroller's Office, April* 11, 1826.

SIR: You have rendered no accounts for any quarter of the year 1825. For this omission you are subjected to a fine of $1,000, agreeably to the 21st section of the collection law of 1799. If you have any sufficient excuse for your neglect, it will be necessary for you to address it to the President of the United States, with whom only the power of remitting the fine is placed. Unless your accounts be rendered without further delay it will become my painful duty, enjoined by the act of January 31, 1823, to report your delinquency to the President.

Respectfully,

JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida.*

No. 14.

TREASURY DEPARTMENT, *Comptroller's Office, April* 15, 1826.

SIR: On the 17th of January, 1825, a letter was addressed to you from this office apprising you that the Senate had confirmed your appointment to the office of Collector, and enclosing a new commission. That letter required you to execute the bond, and take the oaths required by law. Forms of the bond and oaths were also enclosed. The compensation act of March 2, 1799, requires every Collector to give bond within three months after the date of his official oath. After the lapse of so many months beyond the time allowed you by law it becomes my duty to inform you that unless your bond and oaths be transmitted without further delay I shall be constrained, however reluctantly, to report your delinquency to the President of the United States.

Respectfully,

JOS. ANDERSON, *Comptroller.*

WM. PINKNEY, Esq., *Collector, Key West, East Florida.*

A statement exhibiting the amount of gross and net revenue which accrued in the district of Key West from the 19th of December, 1822, *to the* 31*st day of December,* 1824.

	1823.	1824.
Gross amount of duties on merchandise	$389 11	$14,108 79
Gross amount of duties on tonnage and light money	29 47	1,509 02
Net amount of hospital fund	50 43	85 88
Gross revenue	469 01	15,703 69
Payments for debentures issued		12,805 42
Payments for expenses of collection	764 83	2,012 20
Net revenue		886 07

[No account for 1825 received.]

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, May* 4, 1826.

No. 15.

TREASURY DEPARTMENT, *January* 1, 1823.

SIR: Your letter of the 27th ultimo was received by due course of mail and referred on the same day to the Navy Department. Enclosed is the reply of the Secretary.

I cannot, consistently with the law or the practice of the Treasury, authorize an inspector to receive at the rate of three dollars a day whether he is employed or not. It has been the practice of the Department to authorize the Collectors, under particular circumstances, to agree to a monthly compensation, always, however, much below the sum the inspector would receive at three dollars a day if constantly employed through the year. The practice has been particularly applied to cases where the inspector is stationed at places different from the port of entry, so that it was impossible for the Collector to know how many days he was employed. The compensation in such cases has been regulated by the degree of vigilance required of the inspector to prevent smuggling.

As it is presumed that the inspector you may employ will remain under your inspection at the port of entry, it is not deemed expedient to act upon the case at this time as one of a peculiar nature.

There is no objection to your appointing the measurer, gauger, &c., your deputy.

I am, &c.,

WM. H. CRAWFORD.

JOEL YANCEY, Esq., *Collector of Key West, Norfolk.*

No. 16.

SIR: Your favor of the 1st instant has been received. I thank you for your prompt attention to my request to obtain permission from the Secretary of the Navy for me to go with Commodore Porter to Key West. I have since addressed a letter to him soliciting his assent. When I get there I will write to you again and give a minute account of the place.

No. 17.

NORFOLK, *January* 28, 1823.

SIR: If the law tolerated an allowance for office rent, building warehouses, &c., as Key West is a new establishment, and consequently destitute of such accommodations, it would suit me very well; and my object in this address is to know if you consider it within your power, without an appropriation for the specific purposes alluded to, to authorize in such cases the building or renting an office and warehouse at the public expense. Will you be so obliging, on the reception of this, as to write me an answer?

I am, sir, your friend and most obedient servant,

SIR: Your letter of the 30th ultimo has been duly received, and I approve of the appointment of Samuel Ayres as an inspector of the customs at Key West, it being understood, however, that he cannot be entitled to receive any compensation until he has taken the oaths of office, and entered on the duties at Key West.

I am, &c.,

WM. H. CRAWFORD.

JOEL YANCEY, Esq., *Collector of Key West, Norfolk, Va.*

TREASURY DEPARTMENT, *July* 9, 1823.

SIR: The gentleman whom you left at Key West as Deputy Collector has died since your departure from it. I understand that he caught the yellow fever at Havana, and died shortly after his return. Your presence is therefore indispensable; the more so, as the revenue cutter is now ready for service.

Until you arrive, or until another deputy can be appointed, all business at the custom-house must be suspended. I have had several intimations that a plan was in contemplation to enter coffee and other West India articles there for reshipment to other ports of the Union. As it is difficult to conceive any fair or honest motive for such a course, the suspicion naturally arises that illicit practices will be resorted to by those who engage in it. It will therefore be an imperious duty to exercise the strictest inspection, and the utmost vigilance as to the solvency of those who offer themselves to bond duties at the custom-house. The best security among persons of doubtful credit will be a deposit of a sufficient portion of merchandise to secure the payment of the duties.

I am, &c.,

WM. H. CRAWFORD.

JOEL YANCY, Esq., *Collector, Key West, Glasgow, Key.*

No. 20.

NORFOLK, *February* 11, 1823.

SIR: Your favor of the 4th instant has been received, in which you were pleased to approve Samuel Ayres as inspector of the revenue for Key West. I have now to inform you that I have appointed Mr. Joseph Dawley, of the State of Virginia and county of Norfolk, Deputy Collector for the district of Key West. Mr. Dawley sustains an unsullied character, and has given very satisfactory security.

I am, sir, your friend, and most obedient servant,

JOEL YANCY, *Collector, Key West.*

No. 21.

THOMPSON'S ISLAND, *June* 15, 1823.

SIR: As merchants, residing at this place, we beg leave to represent that we are obliged to suspend our commercial operations, (owing to the death of the Deputy Collector of this port, and the resignation of Mr. Ayres, who was the inspector,) which cannot be revived until the Collector, Joel Yancey, esq., returns to the duties of his office, or appoints a deputy. As we shall be subjected to much inconvenience and a great loss if we are obliged to wait until arrangements are made by Mr. Yancey, who resides in Kentucky, we respectfully apply to your honor to prescribe some immediate remedy.

A vessel is now in port, on whose cargo duties would be payable to the amount of $2,500, the object of whose voyage is destroyed by not being able to secure them here. A large business has commenced with the port of Havana, which must be discontinued until the custom-house is re-established.

We pray your honor to take our situation into consideration, and to afford us the necessary relief immediately.

Your obedient servants,

JNO. R. MIFFLIN,
P. C. GREENE,
J. WHITEHEAD,
R. FITZPATRICK,
J. W. MONTON.

Hon. W. H. CRAWFORD, *Secretary of the Treasury, Washington city.*

No. 22.

U. S. GALLIOT SEA GULL, *Allenton, Thompson's Island, June* 24, 1823.

SIR: Apprehending that the Secretary of the Navy may be absent from Washington, I have taken the liberty of sending you a copy of my communication to him on a subject which claims an early attention.

The absence of the Collector and inspector, and the death of the Deputy Collector, has left no protection here to the revenue but myself. I have not allowed vessels coming from foreign ports to land their cargoes, but have sent them elsewhere, persuaded, as I am, that there can be no motive in their doing so but the interest which they hope to derive from illicit practices.

To vessels going coastwise I give a certificate, stating the cargo, if any, and the fact that there are no revenue officers here.

There are no custom-house fees collected, however, and this is the only inconvenience felt from the want of a Collector; a consideration not worth taking into account, as the number of vessels which arrive and depart is so limited.

I have the honor to be, with great respect, your obedient servant,

D. PORTER.

Hon. WILLIAM H. CRAWFORD.

SEA GULL, *Allenton, June* 24, 1823.

SIR: I have the honor to send, for your information, copy of a letter to the Captain General of Cuba, which so fully explains the object of writing it, that it leaves little more for me to say than that I hope the course pursued by me will meet your approbation.

I am under the impression that the practice of wrecking Spanish vessels on our coast by Colombian cruisers, in order to secure their cargoes, has, for a long time past, been pursued to a considerable extent, and that the establishment at Key Vacas was made with this object chiefly in view.

I feel myself somewhat at a loss how to act in this business, which appears to be one of peculiar delicacy. I thought that the first proper step was to remove all cause of suspicion and complaint from the authorities of Cuba, reserving to myself the right of acting as circumstances might hereafter make necessary.

I beg your early instructions on this subject, both as regards the disposal of the property and the course I ought to pursue toward the cruiser, (which claims the character of a Government vessel,) if she should be detected, and the individuals (aiders and abettors) residents at Key Vacas.

The goods from that place are invariably, I am informed, sent to Norfolk, where it is likely a strict scrutiny might detect a more extensive concern.

As wrecking on this coast is a business of great importance and extensively carried on, I should be glad to be informed whether there are any laws to regulate it. Previous to my coming here the neighboring keys were much frequented by English wreckers, who took the property to New Providence; but the detention of two of them, by Lieutenant Commanding Watson, occasioned an alarm which has since kept them from the coast. A correspondence took place between the Governor of Bahama and myself on the subject, which I have the honor to enclose you.

It is my opinion that much smuggling, if not already practiced, will be attempted. It is out of the power of any custom-house officer here to prevent it; and, having had some experience in these matters while at New Orleans, I know that, without being clothed with some authority from the Treasury Department, I cannot lawfully make a seizure. Whatever powers are given to me I will exercise whenever the public interest may require it; and I solicit from you early instructions how I am to proceed.

I have the honor to be, with great respect, your obedient servant,

DAVID PORTER.

Hon. SECRETARY OF THE NAVY.

True copy: P. WILSON.

No. 23.

GLASGOW, *July* 24, 1823.

SIR: On the 9th instant I wrote you a letter relative to one I wrote you 17th April last from Mobile; since which, on the 21st instant, I received from Mr. Fras. A. Thornton, Mr. Samuel Ayres, and my brother Charles, letters informing me of the death of Mr. Joseph Dawley, my late deputy at Key West; and Mr. Thornton informed me, as well as Mr. Ayres, that the laws, papers, blanks, &c., were sent on to Mr. Dawley's brother, at Norfolk; and Mr. Ayres observed that it was your advice, as well as the Comptroller's, that I should appoint a deputy to report from the papers. I have done so, and appointed my brother, Charles Yancey, of Richmond, Virginia, and have directed Mr. Dennis Dawley to bring all the business there to my brother, who will, no doubt, report as quick as possible. I am a good deal shocked at the account of the yellow fever appearing at Key West so soon, and have concluded not to return till fall, nor to order Mr. Ayres to return before, although I am very uneasy about the stagnation of business for want of officers, but before I would return there now I really would resign, even if I was not detained here, as I am, by indispensable business. What would you advise me to do? Had I better appoint a deputy, if I can get one, and send him on, and let him procure a temporary inspector if any business should occur? And although I dislike very much to be troublesome to you, should be extremely obliged to you for your advice, as I am very uneasy lest I should be the means of injuring the public service.

I am, sir, with great respect, your friend,

JOEL YANCEY.

No. 24.

TREASURY DEPARTMENT, *August* 9, 1823.

SIR: Yours of the 24th ultimo has been received by this day's mail. It is important that an officer should be at Key West as soon as practicable. The cutter has sailed for that station and will have frequent occasions for instructions and advice.

Key West is considered healthy. Your deputy caught the yellow fever at Havana, as have all those who have been afflicted with that disease. If he had remained at his post it is highly probable that he would have escaped and continued in health.

I am, &c.,

WM. H. CRAWFORD.

JOEL YANCEY, Esq., *Collector, Key West, Glasgow, Kentucky.*

No. 25.

GLASGOW, *Kentucky, August* 29, 1823.

SIR: On the 26th instant I had the honor of receiving yours of the 9th instant, and have, some time since, on the 6th instant, received yours of the 9th ultimo; but a most severe and distressing affliction among some of my very near relations prevented my going on to Key West or sending a deputy, even if I had not have been a good deal panic struck about sickness at the island. I have now appointed Mr. Braxton B. Winn, of this county, my deputy, who will go on immediately, and I shall soon follow him; he is a man of business and integrity. I have given him the most particular and pointed instructions to have a very vigilant inspection observed, and to be very cautious as to taking securities for duties, and, in fact, that he had better, in all cases, keep, according to your advice, a sufficiency of merchandise to pay the duties when there is the least doubt of solvency, and, as the Collector will be very much unacquainted, he had better, perhaps, resort to the method advised in all cases. I am very much gratified at the account of the health of Key West given by you in your favor of the 9th instant; also, at the liberal and friendly manner you have acted towards me, as to the suspension of business, on account of Mr. Dawley's unfortunate death. I have been detained here by imperious causes, and I am happy that there has been no expression of blame, as it would have been extremely mortifying to me, as I know that I had made great exertions to have the office properly carried on, and I am happy to find that, if there is a proper disposition manifested by public officers to do their duty, even if there should arise a suspension of business from such cause as the one at Key West, you are, as I know you would be, disposed to act liberally. I sincerely hope the business will be very shortly resumed and executed correctly. I am very glad you have sent a revenue cutter, as it, no doubt, will be very essential in a district so well situated for smuggling as that is. There being no office nor warehouse yet will be a very great inconvenience, but I hope it will soon be obviated by the erection of suitable buildings. I shall observe a due attention to economy, and shall only rent a warehouse in case of absolute necessity, as you directed. I have discovered no disposition on the part of any that might probably have buildings to rent to show any quarters as to price.

Accept assurances of my esteem, and believe me to be your sincere friend,

JOEL YANCEY.

No. 26.

WASHINGTON CITY, *January* 3, 1824.

SIR: I do hereby resign my commission as Collector of the Customs for the district of Key West, in East Florida.

I am, sir, your friend and most obedient servant,

JOEL YANCEY.

No. 27.

HAVANA, *February* 4, 1824.

SIR: I arrived here this morning, and shall take passage in the United States schooner Wild Cat, this evening, for Key West. By conversation with John Warner, esq., our commercial agent at this place, and also with Captain Ramage, of the Navy, (both of whom are direct from Key West,) I am informed that there is no Collector there, and that it is absolutely necessary for one to be there, or that I be instructed by you how to act in regard to the revenue of that place.

I have the honor to be, sir, your most obedient servant,

S. AYRES.

Hon. SECRETARY OF THE TREASURY.

No. 28.

ALLENTON, *Thompson's Island, February* 20, 1824.

SIR: On my arrival here, and seeing the absolute necessity for a Collector at this place, I was induced, by the advice and consent of the commanding officer of this station, to act also as Collector until I could be instructed from your Department. I have heard nothing of the recently appointed Collector except that he was in New Orleans about four months since, soon after he was appointed deputy to the former Collector, Mr. Yancy. For further information I beg leave to refer you to Captain Rosseau, of the Navy, who has commanded here for the last four months, and by whom this will be handed you.

I would further state that it appears very necessary that an inspector should be appointed to reside

at Key Vacas, owing to the great number of English wreckers that cruise and rendezvous in that neighborhood; and, likewise, that a set of the United States Laws and a seal are greatly wanted at this office.

I have the honor to be, &c.,

S. AYRES.

Hon. W. H. CRAWFORD, *Secretary of the Treasury.*

No. 29.

TREASURY DEPARTMENT, *April* 23, 1825.

SIR: As no returns have been received from you at this office since your appointment as Collector at Key West, and as it is not known whether the instructions transmitted to your predecessor were turned over to you, it is proper to inform you that a punctual transmission of your accounts to the Comptroller of the Treasury for settlement, pursuant to the 21st section of the collection law, is deemed to be a matter of the first importance.

The documents required for this office, and which must also be rendered with punctuality, are the following:

A monthly return of moneys received and paid by you. In regard to this return the following particulars must be observed: First, it must uniformly bear date on the last day of the month, and must contain all the receipts and payments of the entire month. Second, the moneys received on bonds paid at maturity and on bonds in suit; for duties on merchandise paid at the time of importation; for duties on tonnage; and moneys received from seamen as hospital money must be respectively distinguished from each other; and also from moneys received on any other account. Third, the payments made into the Treasury; the payments for debentures falling due on the same day with the duties on the same parcel of merchandise; for debentures issued for drawback of duties already paid; for bounties on pickled fish and salted provisions; for drawbacks on the exportation of domestic distilled spirits; and for expenses attending the collection of the revenue, must be respectively distinguished from each other and from payments on any other accounts.

A monthly return of debentures issued during the month for drawbacks, and of such entries made during the month as will hereafter entitle the person making the same to either a drawback or bounty.

A monthly abstract of bonds put in suit during the month, designating those paid, and noting also, at the foot of the abstract, the bonds put in suit at any time previous to the month embraced by the abstract, and which may have been paid during said month.

A monthly schedule of liquidated bonds.

A quarterly return of moneys received and paid by you for the temporary relief and maintenance of sick and disabled seamen.

If, on the receipt of this letter, no returns have been prepared by you for transmission, the first return may be made to embrace the whole period from your appointment till the last of the present month, after which your returns will be made monthly and quarterly, as before required.

The public moneys which may be collected by you, over and above the current expenses of your office, must be retained in your hands to meet the expenditures of the Government in your district. The date of all payments made by you on Treasury drafts or otherwise will be entered in your monthly return.

I will only further add that, in taking bonds for securing the payment of duties on imports, it is indispensably necessary that you should be fully satisfied of the solvency of the parties, and that whenever you have any doubts on that point it will be advisable to refuse to accept the security which may be offered.

I am, &c.,

S. L. SOUTHARD, *A. S. T.*

WM. PINKNEY, Esq., *Collector, Thompson's Island.*

No. 30.

TREASURY DEPARTMENT, *May* 14, 1825.

SIR: By a letter addressed to the Secretary of the Navy on the 19th ultimo by Captain Warrington, it appears that both you and he are desirous of making an arrangement by which he may be enabled occasionally to draw from you so much of the public moneys received by you as may be required for the disbursements of the United States naval squadron on that station. You are therefore authorized and requested to dispose of any moneys which may be in your hands from time to time as Collector, over and above what may be required for the purposes of the revenue, to purchase the bills of the commanding officer on that station upon the Secretary of the Navy to any amount for which he may exhibit to you the authority of the Secretary of the Navy so to draw, and the bills so purchased are to be sent by you to this Department as a remittance of so much of the public money in your hands as Collector, and charged in your account with the United States.

These bills must be drawn in triplicate in your favor, and by you endorsed to the Treasurer of the United States. Two of the set must be transmitted to this Department by different conveyances and by the earliest opportunities. The third must accompany your quarterly account, in which it is to be charged.

I am, sir, your most obedient servant.

To ——— ———, *Collector of the Customs, Key West.*

No. 31.

KEY WEST, *December* 15, 1825.

SIR: Enclosed I have the honor to transmit to you a bill of exchange, (second,) first of same tenor and date transmitted, (by schooner Ardent, via New York,) for $3,500, being for a sum of money paid to Lieutenant Paine, commanding this Key, by requisition of Commodore Warrington, and under the authority of the honorable the Secretary of the Navy, (late acting Secretary of the Treasury.)

I have the honor to be, with great consideration, your obedient servant,

WILLIAM PINKNEY, *Collector.*

Hon. JOSEPH ANDERSON, *First Comptroller.*

No. 32.

TREASURY DEPARTMENT, *April* 14, 1826.

SIR: It is proper to inform you that no returns of any kind have been received at this office since your appointment to the collectorship of Key West, and that, with one exception, no quarterly accounts have been received from you at the Comptroller's office. Although the peculiar situation of your district is unfavorable to a regular intercourse, it is nevertheless believed that frequent opportunities offer by way of the Havana, and occasionally by the revenue cutters, bound to Mobile or Charleston, from both of which places your communications to this Department would find a ready conveyance.

I have, therefore, to request that you will, as soon as practicable after the receipt of this letter, transmit to me a general statement of your receipts and expenditures from the time you assumed the duties of the office down to the latest period, and that at the end of every succeeding month you furnish me with a return, agreeably to the enclosed form.

I have further to request that when Captain Doane, of the revenue cutter Marion, leaves Key West for Charleston in order to obtain supplies you will send by him, to be deposited to the credit of the Treasurer in the Branch Bank of the United States at that place, all the public moneys in your hands beyond the sum required to defray the current expenses of your office, observing to take duplicate receipts therefor from Captain Doane, who is also to take duplicate receipts from the Cashier of the bank, one of which he must transmit to this office.

I am, very respectfully, your obedient servant,

RICHARD RUSH.

WILLIAM PINKNEY, Esq., *Collector, Key West.*

19TH CONGRESS.] **No. 759.** [1ST SESSION.

ADMISSION OF ARTICLES FOR CHURCH SERVICE FREE OF DUTY.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 10, 1826.

Mr. MARVIN, from the Committee of Ways and Means, to whom was referred the petition of Benedict Joseph Flaget, Bishop of Bardstown, in the State of Kentucky, made the following report:

The petitioner prays to be exonerated from the payment of the duties upon certain articles, consisting of vestments, furniture, and paintings, presented to him for the use of the church over which he presides, and which have been imported into the United States, and which are intended solely for the use of said church, as connected with its religious worship.

The committee are of opinion, the articles referred to by the memorialist not having been purchased or imported by him with a view to any commercial profits, and not being articles of consumption except as connected with the service of the church over which he presides, it is but reasonable to exempt them from the payment of duties. In adopting this principle the committee are satisfied they propose only to extend to the Bishop of bardstown privileges similar in character to those which have from time to time been extended to various religious societies and institutions in different sections of the country. The committee have therefore reported a bill.

19TH CONGRESS.] **No. 760.** [1ST SESSION.

DISTRIBUTION OF THE SURPLUS REVENUE AMONG THE SEVERAL STATES FOR EDUCATION, INTERNAL IMPROVEMENTS, &c.

COMMUNICATED TO THE SENATE MAY 11, 1826.

Mr. DICKERSON, from the committee to whom was referred the resolution proposing to divide among the States annually a portion of the revenues of the General Government for the purposes of education and internal improvement, made the following report:

That the committee, from as careful an examination of the subject as a due attention to their other duties would permit them to make, have come to the conclusion that great advantages would result to

the United States from an annual distribution among them, by some equitable ratio, of a portion of our national revenue for the purposes of education and internal improvement, or for such other purposes as the State governments may respectively deem most to their advantage.

Whether the United States shall devote the whole of their revenues beyond what are required for the usual expenditures of the Government, domestic and foreign, civil, military, and naval, to the reduction of our public debt until the whole of it shall be extinguished; or whether they shall apply a portion of those revenues, as proposed, for the most important purposes, and thereby cause a more gradual reduction of the public debt, resolves itself into a question of expediency.

It remains for Congress to determine which of these courses will most effectually promote the present as well as future prosperity of the country.

There can be no doubt that money distributed among the States as proposed would be invested in a way to give them much greater profit than the interest on such money would yield at three, four and a half, or even five per cent., which are the rates of interest now paid upon the greater part of our public debt.

As a large portion of this debt is payable to persons in Europe, to discharge it as fast as our means would permit would be to send from the country sooner than necessary funds that are wanted at home, the inconvenience of which would be sensibly felt in the present embarrassed state of our moneyed market, and most probably for several years to come.

Money distributed as proposed would give new activity to industry and enterprise in all the States, and that equally and simultaneously.

It would create a vigilance on the part of the State governments over the expenditure of the General Government, and thereby prevent the waste of money and the adoption of extravagant measures that might diminish the amount of the annual dividends.

It would secure impartial justice to all the States in the distribution of the expenditures of our revenue, a failure of which, at present, is a subject of loud and just complaint.

It would relieve the General Government of the serious inconvenience of an overflowing Treasury, which, if not provided for in the manner proposed or by a reduction of our revenue, will impair the most important principles of our Constitution.

It would relieve the two Houses of Congress of a large portion of legislation now devoted to the disposal of our surplus funds—legislation of the worst kind, calculated to produce combinations, sectional feelings, injustice, and waste of the public treasure.

It would transfer to the States the regulation of the expenditures for internal improvements by roads and canals, which, if retained and exercised by the General Government contrary, as is believed by many, to the spirit and letter of our Constitution, will, in time, so far decrease the powers of the State governments, and increase those of the United States Government, as to destroy the federative principle of our Union, and convert our system of confederated Republics into a consolidated Government.

It would remove the cause of the great and increasing difficulties, arising from an objection on constitutional grounds, to the exercise of the right claimed on the part of the United States of making roads and canals through the different States of the Union.

It would enable the General Government to keep in operation an efficient system of finance and revenue with advantage to the States; and, should the exigencies of the country require the application of all our means to some object connected with our national peace and prosperity, those means could soon be brought into operation by suspending for a time the dividends to the States. By this our Treasury would be filled without a sudden resort to new taxes, which might be oppressive to agriculture, and which might create much inconvenience by interrupting the pursuits and industry of our citizens.

Money collected from the sources which now give us our revenues, and distributed among the States as proposed, would produce a rapid and profitable circulation of our funds from the centre to the extremities of the Union, and thus add to the force of the moneyed capital of the country.

By the following calculation it will appear that on the 1st day of January, 1831, the six per cent. debt may be extinguished, twenty millions of dollars divided among the States, and more than a million and a half of dollars left in the Treasury, and that thirteen millions of dollars might be annually divided among the States thereafter, should it be deemed expedient to leave the five per cent. and four and a half per cent. debt, as well as the three per cent. debt, unredeemed.

The calculation, however, is continued under a presumption that it may be deemed expedient to extinguish the five and four and a half per cent. debt in the reasonable time proposed.

On the 1st day of January, 1838, the whole of the six per cent., five per cent., and four and a half per cent. debt may be extinguished, amounting to $67,689,306 27; interest paid upon the same, and upon the three per cent. debt up to that date, to the amount of $23,428,021 03; and that dividends may be made among the States in that time to the amount of $89,666,734 48; in all, $180,784,061 78.

By this calculation it appears that the sum for distribution on the 1st of January, 1838, falls short of the proposed amount of $10,000,000 by $333,265 52; and that there will remain chargeable to the annual assumed fund of $15,000,000 the interest on the three per cent. debt, amounting to $398,886 94. These sums, however, may be provided for from retrenchments, to be made before the year 1838, in the expenditures for the Navy and fortifications; and $10,000,000, instead of the sum stated, may be divided among the States on the 1st of January in that year, and $15,000,000 annually thereafter.

In 1827 the appropriation of half a million of dollars a year for the gradual increase of the Navy is to cease, and, as our most expensive fortifications are nearly completed, there will soon be a considerable reduction of expenditures under that head; and it is believed that important reductions may be made in other subjects of expenditure, by which the charges above stated may not only be provided for, but large additions made to the sums proposed for distribution.

By making payments on the public debt quarter-yearly, there would be a reduction of the amount of interest not embraced in this calculation.

As this plan, if adopted, will be an experiment, the distant operation of which cannot be foreseen, the committee do not think it advisable to provide, in the first instance, by law, for making the dividends proposed beyond the year 1831, by which time they believe that $20,000,000 may be divided among the States; and for that purpose they beg leave to submit a bill.

Under a plan to distribute among the States a portion of our national revenue, and at the same time to provide for the gradual reduction of the public debt, it is proposed to divide annually, after the year 1827, one-half of the amount appropriated for the Sinking Fund, to wit: $5,000,000 among the several States, by some equitable ratio, until the funded debt bearing six per cent. interest shall be extinguished;

after that, to divide among the States $10,000,000 annually until the funded debt bearing five per cent. interest, and that bearing four and a half per cent. interest, shall be extinguished; and after that, to divide among the States $15,000,000 annually, leaving the residue of the funded debt, bearing three per cent. interest, to be redeemed at some distant period.

By the report of the Secretary of the Treasury, of the 22d December, 1825, it appears that the funded debt of the United States would amount, on the 1st day of January, 1826, to $80,985,537 25; which, divided into the different classes of which it is composed, may be stated thus:

Aggregate of debt bearing six per cent. interest		$38,857,439 24
Annual interest on do	$2,331,446 35	
Aggregate of debt bearing five per cent. interest		12,792,000 20
Annual interest on do	639,600 00	
Aggregate of debt bearing four and a half per cent. interest		16,039,866 83
Annual interest on do	721,794 00	
Aggregate of debt bearing three per cent. interest		13,296,231 45
Annual interest on do	398,886 94	
		80,985,537 25
Annual interest of the whole debt	4,091,727 29	
Total of six, five, and four and a half per cent. debt		$67,689,306 27
Amount of three per cent. debt		13,296,231 45

By the report it appears that of the revenues of 1825, after paying the expenditures of the year, including the interest on the public debt to the 1st day of January, 1826, there would remain in the Treasury the sum of $5,284,061 78, of which $3,500,000 are subject to former appropriations, and $1,000,000 of unavailable funds, leaving for the year 1826 the sum of $784,061 78; and by estimate in that report of the receipts and expenditures of the year 1826, after applying the amount of the Sinking Fund, $10,000,000, to the discharge of the interest and principal of the public debt, there will remain in the Treasury on the 31st of December, 1826, a balance of $4,915,269 98, applicable to the same purpose, if deemed expedient.

Although it is in contemplation to reduce the duties on tea, coffee, and some other articles, this measure, if adopted, will not produce a correspondent reduction of the revenues; for there will be an increased consumption of the articles in consequence of such reduction of the duties, while the revenue will be gradually augmented as our population shall increase, and with it the consumption of articles on which our duties are collected.

It is, therefore, believed that there will be an increase rather than a decrease of public revenue for many years to come, and it may be safely assumed that the two sums mentioned, to wit: the amount of the Sinking Fund of $10,000,000, and the balance of $4,915,269 98, which may be taken at $5,000,000, will be the annual fund, from which may be paid the dividends proposed to be made, the interest on the public debt, and the sums necessary for the gradual reduction and final extinction of the six per cent., five per cent., and four and a half per cent. debt—all of which debt, except such portions of it as are not yet due, may be discharged at such times and in such portions as may suit the convenience of the General Government; and the loans not yet due may be discharged in like manner as they fall due, the last of which will be in the year 1835.

Upon this basis the Committee of Ways and Means of the House of Representatives, in their report of the 6th of February last, have stated that the debt bearing six per cent. interest may be extinguished on the 1st day of July, 1829, provided the whole of the proposed fund, except what may be necessary for discharging the interest on the public debt, should be applied to that purpose.

Upon the fund thus assumed the following calculations are made:

The amount of the balance of 1825, applicable to the year 1826, as before stated	$784,061 78
The sum appropriated to the Sinking Fund	10,000,000 00
Balance in Treasury on the 31st December, 1826, $4,915,269 98, assumed at	5,000,000 00
	15,000,000 00
Available for the year 1826	15,784,061 78
Deduct 1 year's interest on the funded debt	4,091,727 29
Leaving applicable to payment of principal on the 6 per cent. debt	11,692,334 49
January 1, 1827, deduct for payment on the 6 per cent. debt	11,000,000 00
Leaving a balance of	692,334 49
Add the 10 and 5 millions of dollars	15,000,000 00
	15,692,334 49
Deduct 1 year's interest	3,431,727 29
	12,260,607 20
January 1, 1828, deduct for the first distribution	5,000,000 00
Applicable to the principal of 6 per cent. debt	7,260,607 20
Deduct for payment on 6 per cent. debt	7,000,000 00
Leaving a balance of	260,607 20
Add as before	15,000,000 00
Carried forward	15,260,607 20

Brought forward	$15,260,607 20

19TH CONGRESS.] **No. 761.** [1ST SESSION.

FRAUDS UPON THE REVENUE LAWS.

COMMUNICATED TO THE SENATE MAY 15, 1826.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 23d of March last, requesting information concerning the official conduct of the Collector and other revenue officers of the port of Philadelphia, I transmit herewith a report from the Secretary of the Treasury, with documents containing the information desired by the resolution.

JOHN QUINCY ADAMS.

WASHINGTON, *May* 15, 1826.

TREASURY DEPARTMENT, *May* 13, 1826.

The Secretary of the Treasury, to whom was referred the resolution of the Senate of the 23d of March, requesting that the President would "transmit to the Senate any information he may possess in relation to the official conduct of the Collector and other revenue officers of the port of Philadelphia in the case of certain teas said to have been imported by Edward Thompson, of this city," has the honor to lay before the President the enclosed papers:

1. The letters of instruction to Samuel Harrison Smith, Esq., who was employed as the agent of the Department to examine into the situation of the custom-house at Philadelphia, and the circumstances attending the failure of Edward Thompson; a letter from the Department to John Steele, Esq.; and the documents to which the instructions refer, numbered from 1 to 10, and marked A, B, C, D.

2. The report of the agent, and the documents to which it refers, numbered from 1 to 84, inclusive, and marked A, B, C.

3. The report of the First Comptroller of the Treasury, and the documents to which it refers, numbered from 1 to 21, inclusive, which contain all the information in the possession of this Department upon the subject of the resolution; the whole being copies of papers and documents transmitted to the House of Representatives on the 22d of March, in obedience to a resolution of that body passed on the 27th of December preceding.*

Respectfully submitted.

RICHARD RUSH.

The PRESIDENT *of the United States.*

19TH CONGRESS.] **No. 762.** [1ST SESSION.

DUTY ON IMPORTED AND EXCISE ON DOMESTIC SPIRIT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES MAY 19, 1826.

Mr. CONDICT, from the Select Committee, to whom were referred the resolutions "that it is expedient to increase the duty on all imported spirit, and to levy an excise on domestic liquors," and to apply the revenue from this source to purposes of "internal improvement and education," made the following report:

That before they could decide upon the expediency of an excise upon domestic spirit, which they consider to be the most material subject of their investigation, they deemed it proper to look to the experience of the Government in the operation of former laws, and ascertain the amount of revenue heretofore raised; the various rates of duty imposed; the quantity of spirit imported; the amount distilled at home, with the proportions from foreign and from domestic materials; the quantity consumed in the United States; the expense of collecting the tax, and what mode of collection was preferred.

These points, with some others connected with their inquiry, they undertook to investigate themselves, by examining the various reports and documents scattered throughout the records of this House. They, however, soon discovered the difficulties, as well as delays, of this mode, and in an interview which they requested of the Secretary of the Treasury, for the purpose of consultation, that gentleman expressed a willingness and readiness to afford the committee all the facilities for this information which the records of the Treasury Department could furnish. Accordingly, the various points were committed to writing and presented to the Secretary.

They required much investigation and labor, and the committee regret that the previous calls made by Congress upon that Department had been so numerous and important as to engage the constant attention of all the clerks until a late period of the session, and that this investigation was not begun as early as was desired. The answers to the queries could not be made out earlier than the 16th May, and is presented with this report, which the committee desire may be considered as part thereof.

* The several documents referred to in this communication of the Secretary of the Treasury will be found in antecedent No. 752 of this volume, March 23, 1826.

The committee have not had an hour to inspect these papers, but presume that they present, fairly and faithfully, the results of the excise laws of 1793 and of 1813, and their various supplements. Whether these results, in the existing state of our finances, are such as ought to induce Congress to carry into effect the wishes of that respectable portion of community who have petitioned us to levy an excise on domestic spirit, is a question which may well employ the wisdom and serious consideration of that body. The committee, however, have no hesitation in expressing it as their opinion that no fairer subject of taxation and revenue can be presented to the Government than *ardent spirit*, whether *foreign* or domestic; and they would desire to see a larger portion of our revenues derived from this source, and that some of the more immediate articles of prime necessity, to the comfort of the poor and of the middle classes in society, might be free of duty.

Foreign liquors now pay a considerable duty, and are used to considerable extent as articles of luxury. Domestic liquors are made from various materials, and in every section of the country. They are *used* by the citizens of the United States to an extent which many believe to be incompatible with the public good, and perhaps the consumption is increasing beyond the ratio of population. The consequences are deeply felt, and are greatly to be deplored by every friend of man.

The question presented is not whether, by sumptuary laws, we will prohibit intoxication; but whether intoxicating liquor is not a fair and lawful object of taxation, from which the Government may draw its revenues to pay the public debt, to distribute widely the blessing of *free schools*, and improve the internal condition of our country? And if, by the imposition of such a tax, the consumption of ardent spirits is diminished, will not the public morals, the comfort and happiness of the community, the wealth and character of the nation be advanced?

These points are merely glanced at for the present, as questions of magnitude and of vast importance to the statesman and patriot, the philanthropist and the Christian, and to which, the committee indulge the hope, that the serious attention of Congress will be directed at its next session.

It may also be important to the agriculture of our country, which now produces vastly beyond its own wants, to inquire how far it may be politic to increase the duties on foreign spirit and brandies, with a view to substitute for them the productions of our own soil. There can be no necessity, from the want of materials at home, to import our whiskey from Ireland, our gin from Holland, or our rum from the West India islands. The diversity of soil and climate, with suitable application and skill, can furnish home productions of equal quality; and there can be no doubt that in time we may produce our own wines and brandies, from American grapes, without being tributary to or dependent on other countries.

In respect to another branch of the inquiry referred to this committee, viz: the application of the revenue which might be derived from this source to purposes of education and internal improvement, it is deemed unnecessary at present to express themselves further than to say that the existence of our free institutions of government is intimately connected with the general diffusion of knowledge among the people, and that facility of intercourse is conducive to the prosperity, the welfare, and harmony of the various portions of our extensive empire.

How far a continuation of the excise on distilled spirit after the peace of 1815 might have comported with sound policy, is not now a matter of inquiry. Perhaps the embarrassments so generally felt, and the deranged state of the currency, required us to dispense with all demands on the pockets of the people, except such as are made by the regulations of the custom-house.

The committee have understood from the Treasury Department that, if further time were allowed to collect, digest, and arrange all the information relating to the subjects alluded to, many omissions might be supplied which have been necessarily passed over, and which would be important if Congress hereafter determine to levy an excise on domestic spirit. And with this view, the committee conclude this brief and imperfect report by recommending to the House the adoption of the following resolution, viz:

That the Secretary of the Treasury be instructed to collect such further information as he can obtain, connected with the subjects of this report, and especially with the inquiries submitted to him by the Select Committee, and submit the same at an early day of the next session of Congress.

HOUSE OF REPRESENTATIVES, *April* 3, 1826.

SIR: Since your interview with the Select Committee, raised on the subject of an excise on distilled spirits, I have been instructed, in their behalf, to ask from the Department information upon the several points alluded to in the enclosed paper.

In behalf of the committee, respectfully, your obedient servant,

LEWIS CONDICT.

The SECRETARY OF THE TREASURY.

Information is requested from the Treasury Department on the following points by the Select Committee appointed by the House of Representatives to inquire into the expediency of an excise on domestic distilled spirit:

1. The net revenue derived annually from the excise on domestic spirits during the two former periods of its operation, viz: 1793 and 1813, &c.
2. The rates of duty in those periods, and average expense of collection.
3. The average amount of spirits annually imported.
4. The average amount distilled annually in the United States from materials domestic and foreign, (separately stated,) in the years 1814 and 1815.
5. The average annual consumption of spirits of all kinds in the United States.
6. What mode of collecting an excise of domestic spirit has been found by experience to be most convenient, least vexatious and expensive?
7. Will a duty on the *capacity* of the still, and a duty on the *product*, *both* be necessary to insure an equal apportionment as well as a fair collection of the tax? If not, which mode is preferable?
8. Assuming 20 cents per gallon as a basis or rate of duty upon spirit of first proof distilled from grain, what would be a fair ratable proportion for spirits distilled from molasses, from fruit, and from roots?

9. Upon the same basis or rate of duty for domestic spirit, what would be a fair corresponding duty on imported spirit?

10. Would the same principles and rates which regulate the system of drawback of duty on other articles exported apply to domestic spirit when exported?

In behalf of the Select Committee.

LEWIS CONDICT.

COMMITTEE ROOM, *April* 3, 1826.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *May* 17, 1826.

SIR: I had the honor to receive your letter of the 3d of April, written on behalf of the Select Committee raised on the subject of an excise on distilled spirits, and requesting from this Department information upon the several points indicated in the paper that was enclosed in your letter. The proper offices of the Department, where the information desired was deposited, have accordingly been resorted to, and I now beg leave to transmit, in the form of a letter from the Fifth Auditor, dated the 28th of April, and another from the Register, dated yesterday, all that it has been found practicable to obtain. With a view of throwing additional light on some of the points, there have been subjoined to the letter of the Fifth Auditor copies of a series of letters addressed by the late Commissioner of the Revenue to the Secretary of the Treasury during the years 1815 and 1816, when the former system of internal duties was in operation in the United States.

I have the honor to remain, with great respect, your obedient servant,

RICHARD RUSH.

Hon. LEWIS CONDICT, *Chairman of the Committee.*

TREASURY DEPARTMENT, *Fifth Auditor's Office, April* 28, 1826.

SIR: In answer to the sixth and seventh branches of the inquiry contained in Mr. Condict's letter of the 3d instant, on the subject of levying and collecting an excise on domestic distilled spirits, which you referred to me, I have the honor to state that no plan or system for collecting an internal revenue which has presented itself to my mind appears to be better calculated to effect the object, both as it regards the public interest and the convenience of individuals, than that adopted in 1813. By this the several States were divided into convenient collection districts, for each of which a Collector was appointed, with authority to appoint a suitable number of deputies, accountable to him only, he himself being accountable, at short periods, immediately to the Treasury.

The system, however, having comprehended, besides a tax on distilled spirits, a direct tax, a tax upon carriages, licenses to retailers, sales at auction, stamps, and upon refined sugar, was administered at a much less expense to the United States than it can be if applied to stills and distilled spirits only. These several taxes, united, produced in each district a considerable sum, upon which the collectors were allowed a commission of six per centum if it did not annually exceed $40,000, and a reduced commission if it exceeded that sum. The Collectors were thus well compensated, and in general discharged their duties with fidelity and punctuality; but if the system be revived in relation only to distilled spirits, the sum to be collected, if the tax be levied as formerly, will be so materially reduced that the commission of six per cent. would not be an inducement for competent and responsible men to undertake the service.

Under the late system the tax was first levied on the capacity of the still and boiler by the act of the 24th July, 1813, and produced, for the year 1814, $1,674,358. To the tax on the capacity of the still and boiler was added, by the act of the 21st December, 1814, twenty cents per gallon on the quantity of spirits distilled. The two taxes united, from the 1st February, 1815, to the 31st December of that year, produced a revenue of $3,048,906.

On the 19th April, 1816, an act passed abolishing those duties and laying other duties on the capacity of the still and boiler at higher rates than those fixed by the first mentioned act of 24th July, 1813. The revenue arising under this act for the year 1817, the last year the act was in force, amounted to $847,572 only.

It will hence be seen that the mode of levying the tax underwent several modifications during the operation of the system, and that the one which experience recommended as preferable was upon the capacity of the still and boiler. As affording the views of the late Commissioner of the Revenue upon the subject from time to time, I subjoin a series of letters addressed by him to the Secretary of the Treasury between the 20th November, 1815, and the 3d December, 1816.

If the system be revived, and the tax levied upon the capacity of the still at the rates established by the last law upon the subject, (19th of April, 1816,) which were nearly double those fixed by the first law, (24th July, 1813,) with such an increased duty upon foreign spirits as will, by diminishing its importation and consumption in the country, encourage the production of domestic spirits, the revenue to be derived from it may be estimated at about $2,000,000 annually.

To insure the collection of this sum by competent and responsible men, a less commission than twelve per cent. cannot be relied on; and if three per cent. be added for insolvencies, a net revenue will result of $1,700,000.

Under the late system there were 199 Collectors in the different States and Territories, and the same number, on a revival of it, would be required. The commission of twelve per cent., above estimated, would afford an average compensation of about $1,200, but it might be so graduated as to allow none less than $600 nor none more than $1,600, according to the collections they might respectively make.

I have the honor to be, very respectfully, sir, your obedient servant,

S. PLEASONTON,

Fifth Auditor and Acting Commissioner of the Revenue.

Hon. SECRETARY OF THE TREASURY.

The Register of the Treasury, to whom was referred the communication from the Hon. Mr. Condict, chairman of the Select Committee appointed by the House of Representatives to inquire into the expediency of an excise on domestic distilled spirits, respectfully reports:

Upon the first point of inquiry, "the net revenue derived annually from the excise of domestic distilled spirits during the two former periods of its operations, viz: 1793 and 1813, &c."

The excise of 1793, from its general unpopularity, and from considerable opposition to its collection, did not go fairly into operation until the year 1796; and that of 1813 until after the 1st of January, 1814.

NET REVENUE.

The annual net revenue derived from domestic distilled spirits and stills, on the average of seven years, from 1794 to 1801, amounted to	$464,675 81
During the year ending on the 31st of December, 1814	1,624,697 23
During the year ending on the 31st of December, 1815	2,812,570 80
During the year ending on the 31st of December, 1816	1,861,066 02
During the year ending on the 31st of December, 1817	775,803 91

2d point of inquiry: "The rates of duty during those periods, and average expense of collection."

1. *Rates of duty.*

In 1791* the following duties were directed to be paid upon all spirits distilled within the United States, after the 30th of June, wholly or in part from molasses, sugar, or other foreign materials, viz:

1. For every gallon more than 10 per cent. below proof,† 11 cents.
2. For every gallon under 5 and not more than 10 per cent. below proof, 12 cents.
3. For every gallon of proof, and not more than 5 per cent. below, 13 cents.
4. For every gallon above proof, and not exceeding 20 per cent., 15 cents.
5. For every gallon more than 20 and not more than 40 per cent. above proof, 20 cents.
6. For every gallon more than 40 per cent. above proof, 20 cents.

Upon spirits distilled in any city, town, or village, from articles the growth or produce of the United States, at the following rates, viz:

1. For every gallon more than 10 per cent. below proof, 9 cents.
2. For every gallon under 5 and not more than 10 per cent. below proof, 10 cents.
3. For every gallon of proof, and not more than 5 per cent. below proof, 11 cents.
4. For every gallon above proof, but not exceeding 20 per cent., 13 cents.
5. For every gallon more than 20 and not more than 40 per cent. above proof, 17 cents.
6. For every gallon more than 40 per cent. above proof, 25 cents.

An annual duty of sixty cents per gallon was imposed on the capacity of every still, including the head thereof, employed in any other place than a city, town, or village, for the distillation of spirits from articles the growth or produce of the United States.

In 1792,‡ after the 30th of June, the following duties were directed to be paid on spirits distilled and stills employed within the United States, in lieu of those imposed by the act of March 3, 1791, viz:

1st. Upon spirits distilled wholly or in part from molasses, sugar, or other foreign materials, viz:

For every gallon of the 1st class of proof, 10 cents.
For every gallon of the 2d class of proof, 11 cents.
For every gallon of the 3d class of proof, 12 cents.
For every gallon of the 4th class of proof, 14 cents.
For every gallon of the 5th class of proof, 18 cents.
For every gallon of the 6th class of proof, 25 cents.

2. Upon spirits distilled from materials the growth or produce of the United States, in any city, town, or village, at any distillery at which there were one or more stills, which, singly or together, were of the capacity of four hundred gallons or upwards, the following rates of duty, viz:

For every gallon of the 1st class of proof, 7 cents.
For every gallon of the 2d class of proof, 8 cents.
For every gallon of the 3d class of proof, 9 cents.
For every gallon of the 4th class of proof, 11 cents.
For every gallon of the 5th class of proof, 13 cents.
For every gallon of the 6th class of proof, 18 cents.

When domestic materials were employed, and the still or stills, singly or together, were of a capacity less than four hundred gallons, an annual duty of 54 cents was laid on every gallon of the capacity thereof; or the proprietor of the stills, in lieu of the annual duty, might pay at the rate of seven cents for every gallon of spirits distilled; or at the rate of 10 cents per gallon of the capacity of the stills employed for every month they were made use of.

In 1797§ the option to pay an annual duty of 54 cents upon every gallon of the capacity of certain stills employed, or to pay at the rate of seven cents per gallon of spirits distilled, &c., as per act of May 8, 1792, was discontinued after the 30th of June, 1797; and other rates of duties were thenceforth to be paid by the proprietors of the stills above referred to, viz:

For a license to use each and every of such still during the term of two weeks, 6 cents per gallon, according to the capacity thereof, including the head.

For a license for one month, 10 cents per gallon, as aforesaid.
For a license for two months, 18 cents per gallon, as aforesaid.
For a license for three months, 24 cents per gallon, as aforesaid.
For a license for four months, 30 cents per gallon, as aforesaid.
For a license for five months, 36 cents per gallon, as aforesaid.
For a license for six months, 42 cents per gallon, as aforesaid.

* Act of March 3, 1791.
† The proof to be according to Dycas' hydrometer.
‡ Act of May 8, 1792.
§ Act of March 3, 1797.

In 1802* the duties imposed upon spirits distilled, and on stills employed within the United States, ceased after the 30th of June, 1802.

In 1813,† after the 1st of January, 1814, a duty was directed to be paid by every person who should use any still, or other implement in lieu of a still, employed for the purpose of distilling spirituous liquors within the United States. The duty was laid on the capacity of the still, including the head thereof, as follows, viz:

1st. For stills employed on domestic materials—

For a license to use the same during two weeks, 9 cents per gallon on the capacity

For a license to use the same during one month, 18 cents per gallon on the capacity.

For a license to use the same during two months, 32 cents per gallon on the capacity.

For a license to use the same during three months, 42 cents per gallon on the capacity.

For a license to use the same during four months, 52 cents per gallon on the capacity.

For a license to use the same during six months, 70 cents per gallon on the capacity.

For a license to use the same during one year, 108 cents per gallon on the capacity.

Half the aforegoing rates were paid on the capacity of such stills as were employed wholly in the distillation of roots.

2d. For stills employed on foreign materials—

For a license to use the same during one month, 25 cents for each gallon of the capacity.

For a license to use the same during three months, 60 cents for each gallon of the capacity.

For a license to use the same during six months, 105 cents for each gallon of the capacity.

For a license to use the same during one year, 135 cents for each gallon of the capacity.

In all cases where steam was substituted to the immediate application of fire to the materials from which the spirituous liquors were distilled, however the boiler so employed to generate the steam might be constructed, a duty double the amount of the rates above enumerated was laid upon each gallon of the capacity of such boiler, &c., including the head thereof.

In 1814‡ a duty of twenty cents per gallon upon all spirits distilled within the United States and the Territories thereof, whether from domestic or foreign materials, in stills or boilers, was to be paid from the 1st of February, 1815, in addition to the duties imposed by the act of the 24th of July, 1813.

The duties imposed by acts of 24th of July, 1813, and 21st of December, 1814, were applicable to every still or boiler employed in the rectification of spirituous liquors, and to the spirits rectified therein.

The owner of one still only, whose capacity did not exceed one hundred gallons, or of one boiler only, whose capacity did not exceed fifty gallons, if employed in distilling spirits from domestic materials, was allowed the option to comply with the terms and conditions of the present act and those of the act of 24th of July, 1813, or to pay at the rate of twenty-five cents upon every gallon of spirits distilled.

By the same act (21st December, 1814,) other licenses, in addition to those granted by the act of 24th of July, 1813, were authorized to be issued for stills or boilers, on payment of the following duties for every gallon of the capacity thereof, viz:

For stills employed for one week in distilling spirits from domestic materials, five cents.

For boilers employed for the same time and on the same materials, ten cents.

Only one-half of these rates of duties was paid for stills or boilers employed wholly in the distillation of roots.

After the 30th of June, 1816,§ the provisions of the act of the 1st of December, 1814, were suspended, and the following duties were paid in lieu thereof, viz:

1st. For licenses to use stills in the distillation of spirits from domestic materials—

For one week, 4½ cents for every gallon of the capacity thereof, including the head.

For two weeks, 9 cents for every gallon of the capacity thereof, including the head.

For one month, 18 cents for every gallon of the capacity thereof, including the head.

For two months, 36 cents for every gallon of the capacity thereof, including the head.

For three months, 54 cents for every gallon of the capacity thereof, including the head.

For four months, 72 cents for every gallon of the capacity thereof, including the head.

For five months, 90 cents for every gallon of the capacity thereof, including the head.

For six months, 108 cents for every gallon of the capacity thereof, including the head.

For one year, 216 cents for every gallon of the capacity thereof, including the head.

When the stills were employed wholly in the distillation of roots one-half of the above rates of duties only was paid.

2d. For licenses to use stills in the distillation of spirits from foreign materials—

For one month, 23 cents for every gallon of the capacity thereof, including the head.

For two months, 46 cents for every gallon of the capacity thereof, including the head.

For three months, 68 cents for every gallon of the capacity thereof, including the head.

For four months, 90 cents for every gallon of the capacity thereof, including the head.

For six months, 135 cents for every gallon of the capacity thereof, including the head.

For eight months, 180 cents for every gallon of the capacity thereof, including the head.

For one year, 270 cents for every gallon of the capacity thereof, including the head.

For all boilers, however constructed, where steam was substituted to the immediate application of fire to the materials from which the spirituous liquors were distilled, double the aforesaid rates of duties was paid on every gallon of the capacity, including the head thereof.

In 1817‖ the duties laid upon spirits distilled within the United States and Territories thereof ceased after the 31st of December, 1817.

2. *Expenses of collection.*

The first system of excise was laid, as has been already observed, in 1791; the subject was then novel; difficulties which opposed themselves on every side had to be overcome, prejudices weakened or removed, its utility developed by experience, and, from its complex character, a great number of auxiliary officers subordinate to the supervisors were employed, which increased the expenses of collection so much that they have been estimated at twenty-four and one-half per cent.

* Act of 6th April, 1802

† Act of 24th July, 1813.

‡ Act of 21st December, 1814.

§ Act of 19th April, 1816.

‖ Act of 23d December, 1817.

When the exigencies of the country called for additional revenues the Treasury was in possession of all the imperfections and the difficulties which opposed themselves in the collection of the duties under the first system; and the second, that of 1813, was presented in a more simple form, with a single officer for each collection district, who was immediately accountable to the Treasury.* Hence the expenses incident to the collection of this branch of revenue was not only much diminished but reduced to a low per centage.

The expenses of collection for the following years on domestic distilled spirits is estimated by a proportion of the whole amount of duties on spirits to the whole amount of the internal duties, viz:

		Per cent.
In 1814, on distilled spirits, &c.....	$56,252 18, equal to	3.31
In 1815, on distilled spirits, &c.....	130,179 13, equal to	4.26
In 1816, on distilled spirits, &c.....	115,081 89, equal to	5.76
In 1817, on distilled spirits, &c.....	52,126 58, equal to	5.94
	353,639 78	4.81¾

Which gives an average amount of 4.81¾ per cent. The late Commissioner of the Revenue† estimated the expenses of collection incident to the whole of the internal duties in the year 1816 at four and eight-tenths per centum on the amount paid into the Treasury.

It may be remarked here, that upon so much as relates to the expenses of collection under the first system a very definite opinion cannot be given, as the records which contained the details were lost when the Treasury was destroyed in 1814; and to make the selection from the official papers, in order to ascertain the true amount, would not only be attended with considerable labor, but would also require a considerable consumption of time to complete it. Upon such an investigation it is believed the expenses of collection would be considerably reduced. Yet, after all, perhaps no valuable or very important purpose would be answered.

The expenses of collection in 1814, 1815, 1816, and 1817, have been made in proportion to those of other revenues, but, if confined to spirits alone, will no doubt fall short of the true amount, particularly if we take into consideration the expenses of an office and its contingencies at the seat of Government to superintend the collection of the duties.

3d point of inquiry: "The average amount of spirits annually imported."

Spirits imported.

The average quantity of spirits annually imported in periods of ten years, from 1790 to 1820, have been—

	Gallons.
From 1790 to 1800.....	5,317,327
1800 to 1810.....	8,561,531
1810 to 1820.....	4,245,628
And from 1820 to 1825.....	4,672,461

4th point of inquiry: "The average amount distilled annually in the United States from materials domestic and foreign, (separately stated,) during the years 1814, 1815," &c.

This point can only be treated comparatively. By the act of the 24th of July, 1813, the duties were laid wholly upon the capacity of the still, and by that of the 21st of December, 1814, which took effect after the 2d of February, 1815, as well upon the capacity as on the quantity distilled, with certain optional privileges hereinbefore mentioned; then followed the act of the 19th April, 1816, which repealed that of the 21st December, 1814, and continued the duty on the capacity at new rates. The last act took effect after the 30th June, 1816.

By the act of the 21st of December, 1814, the duty laid on the quantity distilled, in addition to that on the capacity, was 20 cents on every gallon of spirits from domestic or foreign materials. Taking this duty as a data, the following are the results agreeably to the returns of the Collectors:

Domestic distilled spirits.

Year.	From domestic materials.	From foreign materials.	Total.
1814.....	8,107,714	297,722	8,405,436
1815.....	9,808,080	796,145	10,604,225
1816.....	6,774,931	605,152	7,380,083
1817.....	3,849,907	630,921	4,480,828
Total gallons ...	28,540,632	2,329,940	30,870,572
Annual average.	7,135,158	582,485	7,717,643

5th point of inquiry: "The average annual consumption of spirits of all kinds in the United States."

* This system was prepared by the Hon. Mr. Gallatin, then Secretary of the Treasury.
† Samuel Harrison Smith, Esq.

Consumption.

The following annual statement exhibits by estimate as near an approximation to fact as the above data will admit of:

Years.	DISTILLED SPIRITS.					Estimated population.	Average per head.
	Imported foreign.	Domestic distilled.	Total.	Foreign and domestic exported.	Consumed.		
1814.....	567,210	8,405,436	8,972,646	15,794	8,956,852	8,200,000	1.092
1815.....	4,030,570	10,601,225	14,631,795	243,302	14,391,493	8,440,000	1.705
1816.....	6,910,867	7,380,083	14,290,950	1,219,716	13,071,234	8,680,000	1.506
1817.....	4,692,454	4,480,828	9,173,282	830,385	8,342 897	8,920,000	0.936
Total gallons.....	16,201,101	30,870,572	47,071,673	2,309,197	44,762,476	.....	5.239
Average of 4 years...	4,050,255	7,717,643	11,767,918	577,299	11,190,619	8,560,000	1.047

It then appears that the average annual consumption of the above four years was 11,190,619 gallons by an estimated population of 8,560,000, giving one gallon and a fraction per head.

6th point of inquiry: "What mode of collecting an excise of domestic spirit has been found by experience to be most convenient, least vexatious and expensive."

On this point I beg leave to introduce an extract from "*A Sketch of the Finances of the United States*," by Hon. ALBERT GALLATIN, printed in 1796, who, speaking of the mode of laying a tax of this description, says: "The most eligible mode of doing it that has been suggested is to lay a moderate monthly or yearly duty on stills, proportionate to their capacity, repealing altogether the option now given by law to pay in proportion to the quantity distilled. It is believed the following valuable purposes will be answered by the change. The difficulty of discovering the quantity of spirits manufactured naturally causes evasions of the duty equally injurious to the revenue, to the fair trader, and to the morals of the people—a premium, indeed, seems to be offered by the present law to those who shall violate their oaths, a temptation, perhaps, too strong to be always resisted by all the individuals of the numerous class of people to whom it is presented. Every distiller feels interested that the duty be paid by all; on the present plan he can by no means check the frauds committed by others; on the plan proposed he will contribute to secure the public against them. In every point of view the expenses of collection will be diminished; evasions of the duty will become almost impossible; and the distiller, after having paid for his license, will be liberated from the visits of the officers and from the duty now imposed on all, however inconvenient to many, of keeping correct books and accounts. The only objection to the adoption of this mode is a fear of its being unequal. It will fall more heavily upon small stills, which are commonly owned by men of less capital and used in less advantageous situations.

"This, however, may be remedied by making the duty something less, in proportion to their capacity, upon stills under a certain dimension. It may be further observed that, however improper and dangerous it may be for Government to pass laws with a view of giving a certain direction to industry and capital, it cannot be doubted that the effects of a provision which tended gradually and without any injury to the capital now vested in that species of property, to diminish the immense number of small distilleries would prove favorable to the general wealth and to the morals of the community. The same quantity of labor produces, perhaps, a double quantity of spirits in large than in small distilleries; and if these may sometimes fall under the favorable denomination of family manufactures, that advantage is more than counterbalanced by their becoming the tippling houses of every neighborhood where they prevail."

On these sentiments, in general, was based the system of 1813, which experience has proved answered all the purposes expected by the Government. In 1814 a duty was laid on the quantity distilled, in addition to that on the capacity, which continued until the 30th of June, 1816. Hence it may be inferred that Congress was fully satisfied that the mode of laying a tax on the capacity and quantity distilled, or on the product alone, was more vexatious and expensive than when confined to the capacity of the still or boiler employed; for the act of the 19th of April, 1816, repealed the duty laid on the product, and restored the system of 1813.

What has been said on this point may be considered as applicable to the 7th point of inquiry, which is, "Will a duty on the capacity of the *still* and a duty on the *product, both* be necessary to insure an equal apportionment as well as a fair collection of the tax?"

8th point of inquiry: "Assuming 20 cents per gallon as a basis or rate of duty upon spirits of first proof distilled from grain, what would be a fair ratable proportion for spirits distilled from molasses, from fruit, and from roots?"

Upon this inquiry, by a reference to the act of the 21st of December, 1814, it will be seen that the additional duty imposed on spirits distilled was 20 cents per gallon, whether the material was foreign or domestic, without any regard to the proof; and for the discrimination of duties laid on the capacity of stills and boilers employed on domestic or foreign materials the committee are referred to the preceding part of this report.

9th point of inquiry: "Upon the same basis or rate of duty for domestic spirit, what would be a fair corresponding duty on imported spirit?"

This inquiry involves difficulties not easily solved, inasmuch as the consumption of foreign spirits depends so much upon taste. While the greater number on the Atlantic board will give a preference to the foreign manufacture, the inhabitants of the interior, in general, are satisfied with the domestic as a beverage. Under this view no adequate materials exist at present for giving a distinctive or satisfactory opinion under this head of the inquiry.

10th point of inquiry: "Would the same principles and rates which regulate the system of drawback of duty on other articles exported apply to domestic spirit when exported?"

Drawback.

By the act of the 3d of March, 1791, an allowance was made to the exporter, by way of drawback, equal to the duties thereupon, according to the rates in each case by that act imposed, deducting therefrom half a cent per gallon, and adding to the allowance upon spirits distilled within the United States from molasses which shall be so exported three cents per gallon, as an equivalent for the duty laid upon molasses by the act of the 10th of August, 1790.

By the act of the 5th of June, 1794, the drawback on domestic distilled spirits was allowed only when the quantity amounted to 150 gallons or upwards.

The act of the 30th of April, 1816, allowed a drawback of six cents per gallon on domestic distilled spirits, not below first proof, when exported to any foreign place other than the dominions of any foreign State not immediately adjoining the United States, adding four cents to the allowance for every gallon of such spirits so distilled from foreign molasses; provided, the quantity exported was not less than 150 gallons; and that the exportation was made in vessels of thirty tons burden or upwards.

For information upon some of the preceding points of inquiry reference may be had to Document No. 32, vol. 1, Reports, &c., 2d session of the 14th Congress, which complies with a resolution of the House of Representatives of the 9th of March, 1816, requiring the Secretary of the Treasury to report to the next session of Congress "whether any, and if any, what, alterations are necessary to equalize the duty on the capacity of stills and boilers and other instruments used in distillation."

All which is respectfully submitted.

JOSEPH NOURSE, *Register.*

MAY 16, 1826.

HON. RICHARD RUSH, *Secretary of the Treasury.*

Statement of spirits distilled in the United States in the year 1815.

States.	Spirits distilled from domestic materials.				Spirits distilled from foreign materials.

From foreign materials	91,616 59	
		842,119 81
		3,232,806 66

NOTE.—The duty of 25 cents a gallon was paid by persons employing but one still, or one boiler, in distilling spirituous liquors from domestic materials, without taking out a license to employ said still or boiler, and paying the duty on the capacity thereof.

TREASURY DEPARTMENT, *Revenue Office, November* 20, 1815.

SIR: I have the honor, in compliance with your letter of the 30th of August, to submit the following statements:

1. Statement of the amounts of the respective internal duties which accrued during the year 1814:

On licenses for stills and boilers employed on domestic materials	$1,614,813 86	
On licenses for stills and boilers employed on foreign materials	59,544 33	
		$1,674,358 19
On carriages		225,123 72
On licenses to retailers		784,442 12
On sales at auction		154,629 20
On refined sugar		11,670 27
On stamps, viz:		
On stamped paper and bank notes	$370,666 42	
On compositions of banks	39,571 25	
		410,237 67
Interest received		1,196 85
Moiety of fines, penalties, and forfeitures		2,647 34
Total accruing duties		3,264,305 36
Deduct amount of duties refunded or remitted		11,793 84
		3,252,511 52

There remain to be received partial returns from two districts, by which the above amount will be in a small degree augmented.

2. Statement of the amounts received from the respective internal duties during the year 1814, with the existing balances on the 31st of December, 1814:

Amount of duties received by the Collectors	$2,071,918 40
Amount of payments to the Treasurer	$1,762,003 23
Balances on the 31st of December, 1814, viz:	
In bonds uncollected	$1,168,382 29
In duties not bonded	1,396 29
In cash and Treasury notes	195,168 39
	1,364,946 97

The deficient returns, as stated above, will also affect the amount of these balances.

The two foregoing statements, being formed from the accounts of the Collectors as transmitted to this office, uncorrected by the revision of the accounting officers of the Treasury, do not precisely balance, and may not precisely correspond with the results of the accounts as finally settled.

As distinct and more detailed statements are required by law to be laid before Congress, which will be made the subject of a separate and early communication, I beg leave to refer you to them for any more particular information that you may require.

3. Estimate of the probable amounts of the internal duties which will accrue for the year 1815:

On licenses for stills and boilers	$1,000,000
On distilled spirits	2,500,000
On carriages	175,000
On licenses to retailers	900,000
On sales at auction	850,000
On refined sugar	50,000
On stamps	400,000
On furniture and watches	300,000
On manufactured articles, other than the foregoing	874,000
	7,049,000
From these duties, and the outstanding balances on the 31st of December, 1814, it is computed that there will be received by the Collectors, during the year 1815, the amount of	$5,000,000
Computing the expenses of collection at six per centum	300,000
There will remain a net revenue of	4,700,000
Leaving a balance outstanding on the 31st of December, 1815, of	3,413,946

In the estimate rendered on the 16th of December, 1814, it was computed that the whole accruing internal duties, including those contemplated in pending bills to be imposed, for an entire year after they should be in full operation, would amount to $10,379,000. The preceding estimate falls considerably short of this sum. This difference arises from the omission of the duties on postage of letters; from several of the new duties not being in operation during a considerable portion of 1815, some of the acts imposing them not having been passed as early as was contemplated; from the entire rejection of some, and radical changes in other of the proposed duties; from the modifications of several of the suggested provisions for their collection, and from the effects of peace. For instance, the duties on lotteries and on horses, which it was calculated would produce $220,000, were not imposed; the proposed duty on leather was reduced one-half, by which its estimated proceeds would be diminished $300,000; that on candles was so limited as to except candles of spermaceti, and all tallow candles other than mould; while the duties on hats,

paper, and playing cards, were considerably diminished. In the case of carriages, the proposed rates of duty were not only greatly reduced, but provisions rejected that were viewed as necessary to its fair collection. But the greatest effect has probably ensued from the state of peace, by which the quantity of spirits distilled, as well as of various other dutiable objects of manufacture, has been considerably diminished, especially from the subtracted war demand for the former by the army, and generally from the apprehension of foreign competition.

4. Your letter calls, in the next place, for a statement of such of the internal duties as may, in my opinion, be most advantageously reduced, or entirely taken off.

At the threshold of this inquiry, it is proper to observe that much embarrassment must attend the expression of any definite opinion, without the previous assumption of the total amount of revenue annually required; of the probable proceeds of the duties on customs; and of the degree, if at all, in which it may be proposed to reduce the existing duties of this description, and the direct tax. As these points, however, do not fall within the sphere of the duties assigned to this office, which does not, consequently, furnish the materials for forming a correct judgment upon them, I shall abstain altogether from their direct consideration, only so far incidentally noticing such of them as the inquiry demands.

Combining the various circumstances that enter into a consideration of the subject, I am of opinion that the existing branches of internal revenue are eligible in the following order:

Duty on stills.
Direct tax.
Duty on sales at auction.
Duty on stamps.
Duty on licenses to retail.
Duty on carriages.
Duty on distilled spirits.
Duty on various goods manufactured, including refined sugar.
Duty on household furniture, and gold and silver watches.

The principal circumstances that have led to the formation of this opinion, of the preference of some over other of these as subjects of taxation, are their comparative productiveness, the certainty of their products, their equality of operation, either individual or geographical, and the ease with which they may be collected.

The duty on stills and the direct tax eminently, although in different degrees, possess these qualities. Should the former be raised fifty per centum, and the latter be diminished one-half of its present amount, these qualities will, it is believed, be more completely insured than by the imposition of either at a higher rate. The product of each will be considerable and sufficiently certain; that of the duty on stills will be augmented, while that of the direct tax will remain unaffected by a state of external embarrassment; the duty on stills will fall heaviest on those districts that are the least affected by the direct tax; the duty on stills will, in the first instance, be drawn from a few, while the direct tax will be payable by nearly every member of the community; and both may be collected without oppression, and at a moderate expense.

The duties on sales at auction, on stamps, and on licenses to retailers, possess, though not in equal or in so high a degree, the same qualities.

The duty on sales at auction is very uncertain in its amount. In a period of prosperous commerce it may be estimated at $600,000, while, under contrary circumstances, it may sink to $300,000. It is, however, collected with the greatest ease and certainty; and although paid by a few persons, and in a few places, its operation is nearly the same with that of the duties on customs. It may be proper here to observe that, however correct the opinion generally expressed by economical writers may be under the circumstances assumed by them that this duty falls principally, if not exclusively, on the seller, there is the best reason, under the circumstances and limitations of the existing duty, to think this opinion inapplicable to it, as it attaches to few objects other than foreign merchandise, on the sales of which, by auction, the importer is understood, generally, to gain a higher profit than by private sales. Should this duty be continued, it is proposed that its amount remain unchanged.

Although the duty on stamps appears, on first impressions, to fall exclusively on a particular class of the community, yet it is obvious that it is a class which, from dealing more extensively in money or in articles consumed by others who eventually pay the taxes imposed on them, would not, but for some such tax, pay a due proportion of the public burdens. The product, moreover, of this duty is considerable; it is collected with scarce any difficulty, and from the diffusive effects of money and credit its eventual operation may be viewed as sufficiently equal. It is also proposed that this duty, if not abandoned, remain unchanged in its amount.

The duty on licenses to retailers is calculated to yield a considerable revenue. It has the disadvantage, in common with the duty on sales at auction, of sinking in its amount when it will be most wanted, and in almost an equal degree. It is, however, probable that this defalcation would be fully supplied by the augmented proceeds of the duty on stills; it is easily collected, and is not exposed to much objection on local grounds, but it must be admitted to be extremely unequal in its operation on individuals; so unequal that nothing but its moderation justifies it. For this reason it is submitted that this duty be reduced to its original amount.

I cannot refrain, on this occasion, from suggesting that this duty has fallen with a severity greatly to be regretted on destitute orphans and widows, who have sought relief in the limited profits of a small store, and who are often totally unable to pay a duty the same in amount with that payable by the most opulent retailer. If it should comport with the wisdom of Congress, without infringing the constitutional provision which requires all duties to be uniform throughout the United States, to exempt this unfortunate class of persons from the duty, I think the exemption can be so extended as to guard the revenue from any serious incidental abuse.

Should the internal duties and the direct tax be retained, under the suggested modifications, they may be computed to produce the following amounts:

Duty on stills	$1,800,000
Direct tax	3,000,000
Duty on sales at auction	400,000
Duty on stamps	400,000
Duty on licenses to retailers	750,000
Carried forward	6,350,000

Brought forward.....	$6,350,000
Allowing for the expenses of collection and bad debts.....	350,000
There will remain a net revenue of	6,000,000

While a prosperous condition of the nation will gradually increase the proceeds of these duties, it is not believed that they would be materially diminished by a contrary state of affairs; and it may be added in their favor that their modes of collection have become familiar, and are generally satisfactory to those on whom they are imposed.

The entire abrogation of the duties on carriages, on distilled spirits, (except, perhaps, where distilled in small distilleries,) on various goods manufactured, including refined sugar, on household furniture, and on gold and silver watches, is respectfully suggested.

The duties on carriages will not, it is believed, produce more than $175,000. The amount, in most instances, payable is so small, and the number of persons on whom it operates so large, being not less than seventy-six thousand, by which its collection is rendered peculiarly troublesome, as to render the policy of its continuance very doubtful, notwithstanding its abstract correctness. It should be added, that while every owner of a carriage is permitted, as under the present act, to affix his own value to it, the duty must continue to operate very unequally.

The duty on distilled spirits would, undoubtedly, if retained, be productive. It is not, however, believed that it will, under any modification of which it is susceptible, be equally productive with that which may be imposed on stills. The various strengths to which spirits are now raised, without being, in any considerable degree, under the present system, subjected to proportionate duties, necessarily renders this duty unequal; nor has any mode been as yet devised, except the hydrometrical test, of ascertaining these strengths with precision. If the application of this test shall be still considered by Congress as impolitic, if not impracticable, in a country of such wide extent, and in which the distilleries are so numerous, a steadily increasing inequality will characterize the continuance of this duty, much dissatisfaction will be felt by those who consider themselves as extraordinarily burdened, and a disposition be too likely to prevail to evade an honest compliance with the requisitions of law. The information which I have received from different districts of the United States leaves no doubt on my mind of the gratification which would generally be felt at a commutation of the duty on spirits into one on stills; especially if the latter shall not exceed double the amount of the existing duty, as fixed by the act of July 24, 1813. I am not prepared to say that this change would be generally satisfactory in those districts in which the stills are small, and principally used in the distillation of fruit. Although it is very questionable whether an adherence to the present system, so far as it applies to small stills, will not eventually be found to be impolitic and unsafe, it is not apprehended that any great immediate defalcation of revenue will ensue from it.

The duties on various manufactured articles, of which that on refined sugar, although laid by a distinct act, is considered as falling under the same principle, have been always viewed as of doubtful policy, and a state of peace has weakened many of the reasons for their imposition. Although the present system for their collection was revised with a view to supersede a resort to the odious features of an excise, the existing provisions would seem to be far from being generally satisfactory to the manufacturers. The impression certainly does exist, to a considerable degree, that they are burdensome and oppressive. As it is not perceived that they could be collected on any plan less obnoxious to the manufacturer, as their product will not, considering the number of the objects, be great, and as the trouble incident to their collection, both to the individual and the officer, is considerable, it is proposed that they be entirely taken off.

It seems scarcely necessary to add a word in favor of repealing the act imposing a duty on household furniture, and on gold and silver watches. The smallness of its product must make it manifest, either that it is an improper subject of taxation, or that the mode of its assessment is radically incorrect.

It may be useful to notice that the acts laying stamp duties on promissory notes, &c., and on refined sugar, expire by their own limitation on the 18th of February next.

5. I proceed, in the last place, conformably to your request, to state such existing defects in the laws for imposing and collecting internal duties as have come to my knowledge, and which require amendment.

Duty on licenses to distillers.

No drawback of the duty is at present allowed on domestic spirits exported. It seems reasonable that it should be. As, however, great, if not insuperable, difficulty must arise in ascertaining the identity of the domestic spirits exported, and the heavy drawback allowed on foreign spirits exported may, consequently, be fraudulently exacted on domestic spirits, I would propose that an invariable sum, to be somewhat less than the virtual duty on domestic spirits, be allowed on the exportation of all spirits, whether foreign or domestic. In case the duty on spirits be taken off, and that on stills be increased fifty per centum, the drawback might be six cents a gallon. This will operate as a bounty on the domestic manufacture, and may so far be considered as beneficial; the drawback to be paid by the collectors of the customs, subject to the same conditions as other drawbacks, only, however, on spirits not below first proof. As the drawback will be paid solely at the ports of exportation, the strength of the spirits can be easily ascertained by the officers employed in the collection of the customs.

Under the old revenue laws, in the case of the exportation of domestic spirits made out of molasses, the drawback allowed included the duty paid on the importation of that article. If, in like cases, the present duty on molasses, which is ten cents a gallon, be allowed to be drawn back, great fraud may be practiced on the revenue, from the improved process of distillation, by which it is understood that spirits made from molasses may be so refined as to be incapable of being distinguished from the higher kinds of spirits made from grain; whence the drawback allowed on the former may be exacted for the latter. I perceive no effectual remedy for this inequality of burden, except in the reduction of the duty on imported molasses, or in the subjecting the distilleries in which spirits are made from foreign materials to a more rigid inspection and control than are sanctioned by the existing laws, or would, perhaps, be agreeable to the manufacturer.

Duty on licenses to retailers.

Numerous cases occur of persons who have received licenses in one place removing to another in which a higher rate of duty is paid, who, under the existing provisions of law, are obliged to take a new license, thus losing a portion of the duty originally paid commensurate with the unexpired period for which it was issued. It is proposed that an authority, under suitable regulations, be given to the Collectors to grant in these cases a new license on the payment of the difference of duty, and that a like authority be given to grant other licenses in all cases in which they are chargeable with higher duties than those originally granted.

Stamp duty on notes, &c.

The same duty is now laid upon discounted promissory notes of like value, without regard to the length of time for which they may be given or discounted. It was, nevertheless, probably imposed under the idea that the period for which they would be discounted would be within sixty days. Some banks, to reduce the duty, discount notes for a much longer term, while others continue their loans for an enlarged period on the same note given for sixty days, which is retained by them as a security, after it becomes payable. Although the effects thus actually produced may not be considerable, as their causes are as yet partial, so far as they do exist, they create a corresponding inequality in the duty, and are, from this and other circumstances, likely to be much extended. To remedy the evil it is proposed that the act laying this duty be so amended as to require any bank that shall discount notes having more than sixty days to run, exclusive of the days of grace, to account for and pay at the same rate for the time beyond sixty days as is now imposed, considering the existing duty as laid on notes given for sixty days, unless such notes be stamped with a sum in the ratio, under this aspect of the present duty, or unless an endorsement of the payment of such excess shall have been made on them by the collector, who will in that case account for it. I have not been able to devise a more adequate amendment, and this can only be viewed as such on the presumption that the banks will act with strict correctness, on which, indeed, the avails of the existing duty greatly depend.

It is proper to add that the first section of the act of March 3, 1815, "to fix the compensations," &c., of Collectors of the direct tax and internal duties, applying only to the year 1815, should no new provision be enacted previous to the 1st of January, 1816, the provisions of the seventh section of the act of August 2, 1813, "making further provision for the collection of internal duties," &c., will be reinstated; by which a commission of six per centum on the internal duties, and a graduated commission on the direct tax, are, under certain limitations, allowed to the Collectors.

I am, with great respect, your obedient servant,

S. H. SMITH, *Commissioner of the Revenue.*

Hon. A. J. DALLAS, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *Revenue Office, January* 1, 1816.

SIR: I have received your favor of the 30th ultimo, enclosing certain inquiries of the Committee of Ways and Means, relative to the internal duties, on which I have the honor to submit the following report:

1. The first inquiry is, "whether, on the supposition of its being determined to repeal the excise on distilled spirits, it may not be advisable, instead of an uniform addition to the present duty on the capacity of the still, so to modify it on stills of different construction as in some measure to equalize the operation of the tax."

The vessels used for distillation in the United States are of two descriptions, commonly distinguished by the names of stills and boilers, the duty on the latter of which is double that imposed on the former. Although these stills, as well as boilers, are greatly diversified in their construction, and their products of spirits correspond in a certain degree with this diversity, I am not sensible that any criterion can be formed by which a just scale of duties could be devised coresponding with their various constructions, so as to lay different rates of duties on differently constructed stills of the same capacities, or on differently constructed boilers of the same capacities. This will appear sufficiently obvious, not only from the great changes in the forms of these vessels already effected, but still more so from the radical alterations they are constantly undergoing. The inquiry of the committee may therefore be considered as confined to two points, viz: the equity of the existing proportion between the duty on stills and boilers, and the correctness of the present scale of duties, as it respects either the period for which licenses are granted, or the materials used in distillation.

The data do not exist at the Treasury for forming a positive opinion whether the proportion between the existing duty on stills and boilers is equitable. Without such information, there would be much hazard, it is apprehended, in disturbing it. The popular opinion undoubtedly is that the duty on boilers is relatively too low. But there is strong reason to distrust the correctness of this opinion. The accompanying statement shows the number of licenses, of different denominations, issued for boilers to the present time, amounting to 1,171. From an examination of the licenses for stills issued during the same period, they appear to amount to 45,396. As the boilers are, in general, of much smaller capacities than the stills, it is not thought, notwithstanding the double duty paid by them, that the relative product of the whole duty received for them will exceed the proportion which their number bears to that of the stills that have been licensed. If so, the duties received for boilers will not exceed a thirty-eighth part of that received for stills, and while the boilers may be computed to have contributed $56,195, the stills may be estimated as having contributed $2,079,246, from the commencement of the duty to the present time, so far as returns have been received. Had the distillation by boilers been attended with the superior profit ascribed to it, their relative numbers could have scarcely failed to have been augmented. There is, indeed, good reason to infer that their relative numbers have not increased during the past year, as I find that, on an enumeration of the stills and boilers ascertained on the 25th of November, 1814, to have been issued, there was found to have been granted 18,846 licenses for stills, and 542 for boilers. A comparison of those numbers with those specified above, shows that the proportion of boilers to stills has since been diminished.

It will be remarked that the general use of boilers is confined to a small part of the United States, about two-thirds of the whole number being in the State of New York. Did the boilers possess the superior advantages alleged, the aggregate *license duty* paid in that State should bear a decidedly lesser proportion to the *duty on spirits* than that of a State, say Pennsylvania, in which but sixty-five boilers have been issued, and the materials used for distillation are the same. But on recurring to facts, it is found that the amount of the duties accrued since the 1st of January last, in New York, on licenses, is $84,000, and that on spirits, at 20 cents per gallon, is $142,000; while in Pennsylvania the amount of the license duty is $133,000, and the same duty on spirits, $252,000. Did the same proportion between these two duties subsist in New York as in Pennsylvania, the amount of the duty on spirits in New York would be $17,000 more than it actually is. This result furnishes a strong argument that the duty on boilers is relatively sufficiently high.

The next point of inquiry is, whether the present scale of duties, as it respects the periods for which licenses are granted and the materials used in distillation, is correct.

Considering the importance of the distillation from fruits, and its character in general of a domestic manufacture, it would seem doubtful whether it is duly protected by the existing scale, which, rising in a rapid ratio with the diminutions of the periods for which licenses are granted, falls upon this species of the manufacture with disproportionate severity, notwithstanding the greater facility and celerity with which spirits may be extracted from fruits. Should the alternative of paying twenty-five cents on the gallon of spirits be abolished, and it be determined to augment the license duty as proposed by the Secretary of the Treasury, I would submit the expediency of substituting the following scale, requiring, however, that in all cases where the duty on a license does not exceed twenty dollars, it shall be paid at the time of obtaining it.

For a license for a still employed on domestic materials—

For 1 week	9 cents.
For 2 weeks	16 cents.
For 1 month	30 cents.
For 2 months	56 cents.
For 3 months	80 cents.
For 4 months	102 cents.
For 6 months	140 cents.
For 1 year	216 cents.

The great rise in the price of molasses, and the embarrassments therein incident to the ordinary habits of distillation from this material, recommend, in my opinion, the substitution, in lieu of the present scale of duties on stills employed on foreign materials, of one in all respects corresponding with that by which the issue of licenses for stills employed on domestic materials is regulated, excepting its augmentation, in the ratio of twenty-five per centum, which, while it will vary the rates paid for the shorter periods, will leave that payable for a year undisturbed. The equity of this modification seems to be strengthened by molasses having become in one section of the United States a domestic material, from which a considerable quantity of spirits is made, the duty on a license for making which, in that section, will be much less than on a like license in another section where the molasses used is foreign.

2. Estimate of the product for an entire year of each of the internal duties proposed by the Secretary of the Treasury to be continued permanently:

On licenses for stills and boilers	$2,400,000
On carriages	175,000
On licenses to retailers	750,000
On sales at auction	400,000
On stamps	400,000
On refined sugar	150,000
	4,275,000

3. Estimate of the product for an entire year of each of the duties proposed by the Secretary of the Treasury to be repealed:

On household furniture and gold and silver watches		$300,000
On various goods, manufactured within the United States, on which duties are imposed by the act of January 18, 1815		1,600,000
On licenses to retailers		375,000
On distilled spirits	$2,800,000	
But it is proposed to double the present duty on stills, by which it is computed that an increase of revenue from stills will accrue of	1,200,000	
Deducting the last sum there will remain	1,600,000	1,600,000
		3,875,000

I am, with great respect, your obedient servant,

S. H. SMITH, *Commissioner of the Revenue.*

Hon. SECRETARY OF THE TREASURY.

TREASURY DEPARTMENT, *Revenue Office, February* 22, 1816.

SIR: I have the honor to acknowledge the receipt of a letter from the Committee of Ways and Means, dated the 20th instant, which you have referred to me, and to make thereupon the following report:

The first inquiry made by the committee is, "What amount of duty should be imposed on those stills with which *heaters* are used for heating the liquor before it is put into the still, in order to equalize them with the common still?"

Of this description of stills, the kinds now in use are so various, and the facility of multiplying them so great, that it is not perceived how they can be designated by any definition that will effectually distinguish them from what the committee denominate common stills. It is believed that by far the greater part of spirits distilled in the United States is by their agency. The heater is sometimes connected with, and forms a part of, the still, subject, it is believed, as such, to the duty. Sometimes it forms a separate vessel. Whether the committee embrace both these kinds of stills, or only the former, does not distinctly appear from the terms of the inquiry. That the former have a considerable advantage over what are called common stills is undoubted; but it is an advantage which, with very little if any additional expense, is open to all. The ratio of this advantage will be necessarily as various as the diversity in the construction of the stills; and if this construction cannot be defined with precision, an ineffectual attempt to define it may be more productive of fraud than revenue. The most approved still now in use in the United States is, perhaps, that in which Witmer's improvement on Anderson is used, in which the heater forms a constituent part of the still, in the form of a globe at its top. Its superiority to other stills consists principally in the economy of fuel and the rapidity with which the process of distillation is conducted in it. There is good reason to believe that the expenses of distillation in it are at least one-sixth less than in the old still. While this fact may serve in some measure to graduate the ratio of the duty, it decisively proves that the principal advantage to the distiller must continue to flow, not from a difference of duty, but from the difference in the expense of distillation, independently of the duty.

The second inquiry of the committee is, "What amount of duty should be imposed on steam stills where the heat is communicated to a small boiler filled with water, and the liquor for distillation is put into wooden vessels, where it is boiled by the application of steam from the boiler?" On this point, having fully expressed my ideas, accompanied by a statement of official facts, in my letter to you of the 1st of January last, I beg leave to refer to it as conveying my present impressions.

The third inquiry of the committee is, "What scale of duties will equalize the tax upon the broad-bottomed shallow still and the common deep still?"

Most of the ideas expressed under the first head of inquiry equally apply to this, with this difference, that the line of separation in this last case will be still more difficult to be drawn, and that in point of fact the broad-bottomed stills have a very limited existence in this country. Whether, indeed, they bestow, according to the modes in which distillation is conducted in the United States, any decided advantages over the other stills may well be doubted. In some parts of Europe they certainly are attended with great relative benefits. But this, so far as I have attended to the subject, arises almost exclusively from their filling their stills with liquors free from the gross material—a course totally opposite to that practiced in the United States.

The fourth inquiry of the committee is, "Ought any alteration to be made in the rates imposed upon stills used in distilling foreign materials?"

Considering foreign materials as equivalent to molasses, the only foreign material extensively used in the United States, I shall confine my remarks to spirits made from it. The principal facts applicable to this species of distillation are, that the process is conducted with much greater rapidity, and, so far as regards machinery and labor, at a less expense than in that in which grain is the material. It was on this ground, connected with the policy of giving a preference to the consumption of the domestic material, it is presumed, that a higher rate of duty was originally imposed on distillations from foreign than from domestic materials. The justice of the discrimination does not appear to have been then questioned. As the supply of molasses was, at that time, abundant, and as its price was relatively much lower than it either is at present or is likely hereafter to be, the manufacture, notwithstanding the higher rate of duty, was prosperous, in consequence of which very expensive and costly establishments were formed in several of the eastern States. Since that period the price of molasses has risen probably more than any other foreign commodity, and there has been imposed upon it a high additional duty. The effect of these and other causes has been to paralyze, or entirely suspend the manufacture. An attempt is now making to revive it, the success of which is represented as equivocal, but which would be greatly aided by a reduction of the duty to that paid on stills employed on domestic materials. Representations which I have recently received on this point, in which I have great confidence, induce me to believe that such a reduction will augment the revenue without in anywise interfering with distillations from domestic materials.

The obvious conclusion, from the foregoing remarks, is, that it is not expedient to impose special duties on the stills mentioned in the first and third inquiries, inasmuch as it is impracticable to define them so as to distinguish them with precision from other stills. Even should it be possible to do this, so far as regards stills now in use, the equalization would probably be but temporary, as, by a modification of the principle of their construction, the additional duty would be soon evaded. This seems to be the necessary effect of the progressive improvements in the arts which are, perhaps, in no instance, more active or fruitful of change than in the formation of the implements of distillation in the United States.

If it shall, nevertheless, be determined by the committee to lay distinct duties on the kinds of stills stated by them, it will give me pleasure, in case of a more detailed statement of their views, to state the amounts of duty to which they ought, in my opinion, to be respectively subjected according to their productive capacities.

I am, with great respect, your obedient servant,

S. H. SMITH, *Commissioner of the Revenue.*

Hon. A. J. DALLAS, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *Revenue Office, December* 3, 1816.

SIR: The Secretary of the Treasury having, on the 29th day of June last, referred to me a resolution of the House of Representatives of the 9th of March preceding, requiring him "to report to the next session of Congress whether any, and if any, what, alterations are necessary to equalize the duty on the capacity of stills, boilers, and other implements used in distillation," I have the honor to make thereon the following report:

To obtain the best materials for forming an opinion on the point referred to me, a letter was, on the 14th July, addressed to Dr. Samuel L. Mitchell, of New York, and to Alexander Anderson, Esq., of Philadelphia, a copy of which is annexed, (marked A.)

On the 15th of the same month a circular letter (marked B) was addressed to the respective Collectors of the internal revenue.

Messrs. Mitchell and Anderson, having promptly undertaken to fulfil the trust confided to them, have transmitted, as the result of their inquiries, the annexed communications, (marked C, D, E, and F.)

Answers have been received from most of the Collectors, from which it is computed that there are in the United States—

650 boilers, of an average capacity of one hundred and two gallons;
11,070 stills, of capacities not exceeding fifty gallons;
17,080 stills, of capacities between fifty and one hundred gallons;
9,160 stills, of capacities between one hundred and two hundred gallons, and
570 stills, of capacities exceeding two hundred gallons.

Agreeably to the information derived from these and other sources, aided by that previously in the Treasury, it appears—

That by far the greater number of stills, more, probably, than nine out of ten, are of the common old construction, which is generally very uniform.

That the shallow stills, though at present few in number, are increasing slowly.

That if the late changes and present most approved forms of construction be taken as a guide, the advantages, combining all the incidental circumstances of the shallow over the deep still, do not seem to be generally considered as great.

That the benefits attached to stills with Witmer's and Anderson's improvements appear to be much greater.

That the new stills in use exhibit a great variety of construction, and differ in their productive powers much from each other.

That the boilers, as well in their construction as their products, differ greatly from each other.

That, although the present duty on the boilers is generally considered as relatively lower than that on the stills, the former do not seem materially, if at all, to increase; that, on the contrary, the instances are frequent in which they have been abandoned for stills, a circumstance which arises, perhaps, principally from the inferior quality of the spirits made with the boilers. A contrary opinion is, however, expressed on this point, as well as others connected with boilers, by Mr. Anderson.

The inequalities in the operation of the existing duties do not, in my opinion, sensibly affect the revenue, or give to one description of vessels advantages, in their practical effects, greatly injurious to those of a different description. As, however, it satisfactorily appears that several cases exist of stills, as well as boilers, of a particular form, paying at present but an inconsiderable duty compared with that generally paid, it is probable that these inequalities, however limited at present, will, unless seasonably counteracted, become the germs of much greater inequalities.

It has been suggested that this counteraction may be effected by graduating the duty according to the size and form of each still or boiler, on a principle resulting from a combination of their form and size.

It was, in a great measure, with a view of ascertaining the practicability of this suggestion that the inquiry submitted to Messrs. Mitchell and Anderson was instituted. Their answers, and particularly the experiments of Mr. Anderson, will show the light they have been enabled to shed upon this point.

Although it does not appear, either from their researches or from a general consideration of the subject, that the adoption of such a principle is absolutely impracticable, the complexity attendant on any plan that has been devised for its application is so great as to render the result at least questionable; while, if the opinion of Mr. Anderson, on the relative products of shallow and deep stills, be received as correct, the necessity for adopting such a principle is greatly shaken.

Should, under the impression that shallow stills have, according to a given ratio, any advantage over deep ones, a duty be laid on their capacity up to a certain line, and a lower duty on their capacity above such a line, increasing at pleasure the several rates of duty, it must be obvious that, as the forms of the stills now in use are extremely different, and are daily becoming more so, the inevitable effect of such a principle would be, unless equal in its operation on all possible kinds of stills, to act as a bounty, at the expense of all the rest, on vessels so constructed as least sensibly to feel the duty.

To show how difficult it is to find and to apply such a principle, it may be useful to state the recent use of a deep still, with a large hollow cylinder, open at the bottom and rising at the centre to a considerable height, by which the surface around this centre exposed to the direct action of the fire, is greatly enlarged. Here, then, is an instance of a deep still, the duty on which would be relatively light, possessed, perhaps, of equal, if not greater, productive powers than a shallow still.

If it shall be deemed useful to adopt a principle doubtful in theory, and attended with such difficulties in its application, and it shall, nevertheless, be considered expedient to attempt a further equalization of the existing duties, the following is suggested as the most equitable and effectual plan:

It has been stated that by far the greater number of stills, more, probably, than nine out of ten, are of a uniform construction. As it is on considerations drawn from the productive powers of these that the present duties were imposed, all that is requisite to insure an equal and impartial operation of the duties, as well on existing stills of a different construction as on such as may be hereafter constructed, is to impose duties on these two classes, agreeably to their productive powers, proportionate to those paid on stills of the common kind. To effect this object it is respectfully proposed: That the present duties on stills be the minimum duties imposed, to be exacted in all cases not specially provided for; and that it be specially provided that, in the case of stills which deviate from the common construction, a particular survey be made of each still at the time it shall be first used, and that the duty on its capacity be specifically fixed on its computed productive powers, agreeably to the award on such survey: that this survey and award be made by the Collector, with such professional skill as he may call to his assistance; but that, in case the award be not satisfactory to the owner of the still, a reference be authorized to such person as may be named by the Collector and such person as may be named by the owner of the still, with power, in case of their disagreement, to name an umpire; that the expense, if there be no appeal from the original survey, be defrayed by the United States, and, if there be an appeal, by the owner of the still; and that the award thus given shall continue to regulate the duties payable until the still shall undergo a change in its former size, when a like survey shall be repeated.

In the case of boilers, it would seem best to submit them all to a special survey, adhering to the present as the minimum rates of duty.

An essential feature of this plan is, in no instance, to receive on any still or boiler a lower rate of duty than that now imposed: for, should the system admit, according to circumstances, of a diminution

as well as augmentation of duty, from the prescribed standard, it would be difficult to assign any limits to the consequent defalcation of revenue.

The objection to this plan, on the ground of expense, cannot be great, as the anomalous cases to which it would apply would not, probably, in the first year, amount to one thousand, while, in subsequent years, they would be comparatively few.

I have the honor to be, &c.,

S. H. SMITH.

Hon. WILLIAM H. CRAWFORD, *Secretary of the Treasury.*

19TH CONGRESS.] No. 763. [2D SESSION.

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE DECEMBER 13, 1826.

TREASURY DEPARTMENT, *December* 12, 1826.

SIR: I have the honor to transmit a report prepared in obedience to the directions of the act supplementary to the act entitled "An act to establish the Treasury Department," passed on the 10th of May, 1800.

I have the honor to be, with the highest respect, your obedient servant,

RICHARD RUSH.

The Hon. the PRESIDENT *of the Senate.*

REPORT.

In submitting to Congress the annual report required by law on the finances, the Secretary of the Treasury is happy in being able to represent them for the present year as in a satisfactory condition. Whilst other countries, and some with which the United States maintain extensive dealings, have beheld great branches of their industry, if not altogether prostrated, interrupted to an extent productive of a high degree of suffering, the United States have experienced within themselves no such calamitous occurrences, and have been freed from all other than a slight recoil of the pecuniary evils which have been seen to press so heavily in other regions. When adverting to the complicated connexions that bind together the pecuniary interests of commercial States having large exchanges with each other, the reaction from abroad has been less felt than might have been expected, and has brought with it no results afflictive to the community, or inauspicious to the regular operations of the Government. The public obligations have all been punctually fulfilled without any increase of the public burdens; and the national revenue, which derives no aid from the existence of direct taxes or internal duties of any kind, but rests upon the customs almost exclusively, has been unusually abundant in the sums realized for the year drawing to a close, and promises to be fully adequate to meet every stated head of the public expenditure, including the sums annually devoted to the extinguishment of the debt for the year that is to come. This substantial prosperity, the result of the general industry fostered by good laws and a just economy in the public administration—laws which, by enlarging the home demand for the productions of the soil, have aided in supplying deficiencies in the foreign demand, and which, by superadding to exports the results of manufacturing to those of agricultural labor, have tended to open new avenues to external traffic—this state of the country in its financial resources and concerns for the year will be seen in the recapitulations that follow. They will consist, first, of the amount of moneys paid into the Treasury in 1826 and in the year preceding, and the expenditures for those two years; next, of the state of the public debt, and the portions of it that have been paid off, which will be seen to exceed the sums regularly appropriated by law for that purpose within the year; and, lastly, of the estimates of the public revenue and expenditure for the year 1827.

I.—OF THE PUBLIC REVENUE AND EXPENDITURE OF THE YEARS 1825 AND 1826.

The net revenue which accrued from duties on imports and tonnage during the year 1825 amounted (see statement A) to		*$24,358,202 57
The actual receipts into the Treasury from all sources during the year 1825 amounted to		$26,840,858 02
Viz:		
Customs, (statement A)	$20,098,713 45	
Public lands, (statement D)	1,216,090 56	
Dividends on stock in the Bank of the United States, arrears of internal duties and direct taxes, and incidental receipts, (statement E)	482,134 69	
Repayments of advances made in the War Department for services or supplies prior to the 1st of July, 1815	43,919 32	
Loan of five millions, under the act of Congress of the 26th of May, 1824	5,000,000 00	
Making, with the balance in the Treasury on the 1st of January, 1825, of		1,946,597 13
An aggregate of		28,787,455 15

* Statements B and C, connected with this document, are reserved for a separate communication.

Brought forward			$28,787,455 15
The actual expenditures of the United States on all accounts during the year 1825 amounted (statement F) to			23,585,804 72
Viz:			
Civil, diplomatic, and miscellaneous		$2,748,544 89	
Military service including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817		5,692,831 19	
Naval service, including the gradual increase of the Navy		3,049,083 86	
Public debt		12,095,344 78	
Leaving a balance in the Treasury on the 1st of January, 1826, of			5,201,650 43

The difference, amounting to $82,411 35, between this balance and that stated in the last annual report from the Treasury, which was $5,284,061 78, is owing to the balance last year having been given as an estimate only. Actual settlement has fixed it at the sum now stated.

The actual receipts into the Treasury during the first three quarters of the year 1826 are estimated to have amounted to			$19,585,932 50
Viz:			
Customs		$18,031,426 86	
Public lands (statement G)		1,053,961 29	
Dividends on stock in the Bank of the United States		402,500 00	
Arrears of internal duties and direct taxes and incidental receipts (statement H)		80,492 72	
Repayments of advances made in the War Department for services or supplies prior to the 1st of July, 1815		17,551 63	
And the actual receipts into the Treasury during the fourth quarter of the year are estimated at			6,300,000 00
Making the total estimated receipts into the Treasury during the year 1826			25,885,932 50
And with the balance in the Treasury on the 31st of December, 1825, of			5,201,650 43
An aggregate of			31,087,582 93
The expenditures of the first three quarters of the year 1826 are estimated to have amounted (statement I) to		$18,714,226 66	
Viz:			
Civil, diplomatic, and miscellaneous	$2,029,331 55		
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	5,266,980 93		
Naval service, including the gradual increase of the Navy	3,321,332 79		
Public debt	8,096,581 39		
And the expenditures of the fourth quarter are estimated at		5,947,817 30	
Viz:			
Civil, diplomatic, and miscellaneous	840,000 00		
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	1,293,000 00		
Naval service, including the gradual increase of the Navy	900,000 00		
Public debt, viz:			
Reimbursement of principal	$2,002,306 71		
Payment of interest	912,510 59		
	2,914,817 30		
Making the total estimated expenditure of the year 1826			24,662,043 96
And leaving in the Treasury, on the 1st of January, 1827, an estimated balance of			6,425,538 97

Should the estimate of receipts for the fourth quarter prove to be correct, the total amount of receipts for the year 1826 will have exceeded the total estimates presented to Congress last year by a sum approaching four hundred thousand dollars.

Of the balance of $6,425,538 97 stated, by estimate, as that which will be in the Treasury on the 1st of January, 1827, it is proper to remark that it will be subject to the following charges: 1. The balances of unapplied appropriations which will remain to be satisfied after the 1st of January, 1827, amounting, by estimate, to $3,425,000. 2. About one million of dollars in funds not at present effective, as particularly explained (page 8) in the last annual report. 3. The reservation of $2,000,000, under the fourth section of the act of Congress of the 3d of March, 1817, entitled "An act to provide for the redemption of the public debt."

The directions issued last year to the Receivers and Collectors of the public revenue in all parts of the United States not to receive, in any payments made to them, bank notes of any of the State banks of a less denomination than five dollars, continue in full force, and are lending their aid in discountenancing the circulation of small notes, and substituting in their stead a greater proportion of the metallic medium.

II.—OF THE PUBLIC DEBT.

That the precise nature and amount of the funded debt of the United States as it exists at the present time may be seen, the several descriptions of debt of which it is composed, with the periods at which they were contracted and are redeemable, will be stated.

The aggregate amount of the debt on the 1st of October last (statement No. 3) was $75,923,151 47. This sum includes the remnant of the debt of the Revolution, amounting to $13,296,247 70, at an interest of three per cent., and the sum of $7,000,000 subscribed to the Bank of the United States, the United States owning an equal amount in the shares of the bank. These sums, making together $20,296,247 70, are both redeemable at the pleasure of the Government.

The remainder of the debt has been contracted since the 1st of January, 1812, and consists of the sums that follow, redeemable at the dates that follow:

1. The sum of $11,254,197 46, at six per cent., being the residue unpaid of the loan under the act of the 8th of February, 1813, and redeemable in 1826.

2. The sum of $13,096,542 90, at six per cent., being the residue unpaid of loans made in 1814, and redeemable in 1827.

3. The sum of $9,490,099 10, at six per cent., being the residue unpaid of loans made in 1815, and redeemable in 1828.

4. The sum of $769,668 08, at an interest of four and a half per cent., being one half of the six per cent. stock of 1813, exchanged under the act of Congress of the 3d of March, 1825, and redeemable in 1829.

5. The sum of $769,668 08, at an interest of four and a half per cent., being the other half of the six per cent. stock exchanged as above, and redeemable in 1830. These two last enumerated sums were set down last year by estimate at $792,569 44, respectively. The accounts of the Commissioners of Loans having since been adjusted, the true amounts are ascertained to be as now exhibited.

6. The sum of $18,901 59, at five per cent., being the one-third part of the sum of $56,704 77 issued in exchange for the six per cent. stocks of 1813, 1814, and 1815, under the act of the 20th of April, 1822, and redeemable in 1831.

7. The sum of $18,901 59, at five per cent., being one other third part of the sum subscribed as above stated, and redeemable in 1832.

8. The sum of $10,000,000, at four and a half per cent., being stock borrowed under the acts of the 24th and 26th of May, 1824, of the Bank of the United States; one half to pay the Florida claims, the other half to pay off the six per cent. stock of 1812, and redeemable in 1832.

9. The sum of $999,999 13, at five per cent., being the stock created by the act of Congress of May 15, 1820, and redeemable in 1832.

10. The sum of $18,901 59, at five per cent., being the remaining third, subscribed under the act of April 20, 1822, and redeemable in 1833.

11. The sum of $2,227,363 97, at four and a half per cent., being one half of the amount subscribed in exchange for six per cent. stock of 1813, under the act of May 26, 1824, and redeemable in 1833.

12. The sum of $2,227,363 98, at four and a half per cent, being the other half subscribed under the act last above stated, and redeemable in 1834.

13. The sum of $4,735,296 30, at five per cent., being the amount of stock issued under the act of March 3, 1821, and redeemable in 1835.

By the foregoing enumeration it appears that the amount of debt redeemable at the periods specified is	$55,626,903 77
That the amount redeemable at the pleasure of the Government is	20,296,247 70
Making the total amount of the funded debt on the 1st of October, 1826	75,923,151 47
This amount will be reduced by a payment to be made on the 1st of January, 1827, so as to stand on that day at	$73,920,844 76

The amount of Treasury notes outstanding on the 1st of October, 1826, is estimated (No. 4) at $15,040; and the amount of Mississippi stock unredeemed on that day, including awards not applied for, (No. 5,) at $7,400 17.

It will next be proper to state the operations that have been had in relation to the debt since the last annual report from this Department. In that report it was stated that the unpaid loans of 1813, bearing an interest of six per cent., amounted to the sum of $16,270,797 24, the whole of which was redeemable in 1826. It was thought to be incumbent upon the Department to recommend to the consideration of Congress such provision for paying off this sum during the year 1826 as, in the judgment of the Department, gave promise of being most advantageous. The exhibition, in detail, of the entire public debt, as contained above, serves to show that considerable savings in interest had heretofore accrued to the nation by exchanges effected under the authority of Congress of stock bearing an interest of six per cent. for stock bearing a lower interest; or by loans under the same authority, for the purpose of paying off portions of the debt contracted at six per cent. when the time for redemption had arrived, by the creation of new debt to the same amount, subject to an interest of less than six per cent. Under the sanction of past legislative approbation of this economical process in relation to the debt, it was recommended that a loan should be authorized for 1826 to the amount of $9,000,000, redeemable in 1829 and 1830, at a rate of interest not exceeding five per cent., to extinguish this debt of $16,000,000 and upwards, bearing an interest of six per cent., which the Government was thus at liberty to extinguish in 1826, provided it had the means. $9,000,000, it was believed, would have formed a sum adequate to this operation, in conjunction with the other means which it was supposed the Treasury would probably have had at command for the service of the debt in 1826. There is reason to think, from the prices which the public stocks bore in the course of the last winter, and subsequently to the winter, that, had Congress sanctioned a loan to that amount, the efforts to obtain it would not have proved unsuccessful, and the whole of the stock in question have consequently been paid off. But, as no loan was authorized, it became the duty of the Department to proceed otherwise in its measures for extinguishing as large a portion of this six per cent. stock, redeemable within the year, as the means of the Treasury, without the aid of the loan, rendered practicable. This was accordingly done in the manner following: The stock consisted of the residue unpaid, amounting

to $5,064,732 65, of the loan of $7,500,000, under the act of the 2d of August, 1813; and of the residue unpaid, amounting to $11,254,197 46, of the loan of $16,000,000, under the act of February 8, 1813. The former of these balances was wholly paid off with the moneys which the Treasury had at its disposal on the 1st of last July. As regards the latter, the Commissioners of the Sinking Fund, at a meeting held on the 27th of September, resolved that $2,000,000 should be applied towards its reduction at the end of the present year. The holders of this stock, to an amount representing $2,000,000, have accordingly had notice that on the 1st of January, 1827, they will receive payment of the whole of the principal sum specified in their certificates. By the terms under which this loan of the 8th of February, 1813, was contracted, it became redeemable at the pleasure of the United States after the 31st of December, 1825, by the reimbursement of the whole sum which stood credited to any proprietor of the stock at the time when the reimbursement took place. It followed that, in paying off any portion of this loan, no partial payments could be made to the holder of a certificate, but that he was entitled to receive its full and absolute amount without deduction, and also the full amount of all other certificates of this particular stock of which he was at the same time owner. It therefore became necessary, as no preference could be shown to one public creditor over another, to determine by lot the numbers of the certificates to be redeemed, until their aggregate amount should represent the sum intended to be paid off; and such was the plan pursued. The precise mode in which it was carried into effect will be seen by an explanatory paper (L) among the documents transmitted. This resort to chance terminated in giving a small excess over the sum wanted, so that the sum to be paid off on the 1st of January amounts, in exact figures, to $2,002,306 71.

It may be proper to mention that the unpaid six per cents of 1813 were stated last year at $16,270,797 24, when the true amount was $16,316,599 96. The difference was included in the four and a half per cent. stock, under the act of March 3, 1825, since ascertained to have belonged to the stock of 1813. It should be further mentioned that the three per cents were stated last year at $13,296,231 45; to which have been added this year $16 25, since issued for interest on the old registered debt, under the act of 12th June, 1798.

After the proposed payment of $2,002,306 71 shall have been made on the 1st of January, the funded debt will have been reduced from $80,985,537 72, its amount last year, to $73,920,844 76, the amount at which it will stand on the 1st of January, 1827. It hence appears that the means which the Treasury was found to possess for the reduction of the principal of the debt within the year 1826, using those means as largely as could be justified, and as the Commissioners of the Sinking Fund thought proper to sanction, amounted to 7,067,039 36; and that this sum has served to extinguish by so much the unpaid six per cent. loans of 1813, amounting, as by statement in the annual report of December last, to $16,270,797 24. The payment of interest upon the whole debt within the year will have amounted by the close of the last quarter to $3,944,359 33, making in the whole, principal and interest, applied to the debt in 1826, $11,011,398 69.

Of the foregoing sum of $73,920,844 76, of which the debt will consist on the 1st of January, 1827, $31,838,532 75 will be at an interest of six per cent.; $12,792,000 20 at an interest of five per cent.; $15,994,064 11 at an interest of four and a half per cent.; and $13,296,247 70, the remnant of the revolutionary debt, at an interest of three per cent.

It remains to offer such suggestions, connected with the debt for the year ensuing, as a provident regard to the public resources is thought to point out. It is seen from the recitals that have preceded that much the largest part of the debt exists at present in stock of six per cent. This is the highest rate of interest which is paid by the Government. It is conceived to be higher than it is proper should be paid unless where demanded by the public faith. The time and concomitant circumstances which characterized the creation of this part of the debt necessarily burdened it with so heavy a rate of interest; but that with the ample resources, the unquestioned security, and the exalted credit of the Government, it should continue to pay it, where the option concurs with the presumed ability to shake it off seems no longer warrantable. Of the whole sum, approaching thirty-two millions of dollars, which stands at this interest, nine millions have been redeemable within the present year. Thirteen millions will become redeemable on the 1st of January, 1827, and nine millions on the 1st of January, 1828. Fractions are dropped in the recapitulation. The advantage to the nation of converting by loans, or by exchanges, as large a portion as possible of this part of the debt into debt that shall be charged with a lower interest appears to be so obvious that the expediency of recommending to Congress the proper measures to effect it again suggests itself as an incumbent obligation upon the Department. It is not overlooked that the probability of obtaining a loan for this purpose diminishes, other things remaining equal, as we are brought nearer to the time proposed for its redemption. But the prospect of obtaining it is still believed to be sufficient to justify the endeavor. It is, therefore, respectfully recommended that authority be given by law, and at an early period of the session, to borrow the sum of $16,000,000, at a rate of interest not to exceed five per cent., to be redeemable at the pleasure of the United States, in equal portions, in 1829 and 1830. These years are fixed as the periods of redemption for the reason that operated last year, namely, that under the present arrangement of the entire debt only a very small portion of it (less than $1,000,000) becomes redeemable in either of those years. Should such a loan succeed, it would pay off at once more than one-half of all the stock at six per cent., thereby producing a clear saving to the nation of at least one per cent. on a capital of $16,000,000 for two years, and for a longer period on a part of that capital. The residue of the six per cent. stock, amounting to $15,838,532 75, would await the application of the disposable means of the Treasury during the years 1827 and 1828. Whether those means would prove sufficient for its complete reduction within those years depends upon events that cannot be accurately foreknown. All that can be remarked is, that to the full extent of the ability of the Treasury the means would be applied, and at the periods of time best adapted to the exigencies of the public service, under the directions of the Sinking Fund act and the lights of past experience at the Treasury. If, nevertheless, a part of this residue of the six per cent. stock should be found unextinguished on the arrival of the year 1829, as probably would be the case, the obligation of paying it off then would constitute neither objection nor inconvenience to the measure of a loan upon the terms proposed. It is consequently believed that under all views of the subject the measure would give promise of public advantage. Such a law as is recommended being passed, and its execution confided to the discretion of the Executive, that discretion would be exerted to insure the accomplishment of its object, regarding both the time of obtaining the loan and its conditions, in a manner the most satisfactory.

III.—ESTIMATE OF THE PUBLIC REVENUE AND EXPENDITURE FOR 1827.

The importation of foreign articles into the United States in 1825 was larger than common, having amounted, as by the statements transmitted to Congress on the 30th of last March, to more than $96,000,000 in value. This exceeded by about $16,000,000 the average value of importations for the three years preceding. The excess was larger than could be justified by the mere gradually increasing demand of the country, through its increasing populousness, for foreign supplies, and could only have proceeded from the influence of those accidental and temporary causes which, in commercial countries, are always affecting the operations of trade. A supply so redundant for one year might have been expected, by the natural reflux of these operations, to be followed by supplies more limited for the year succeeding. On this account, as well as through other causes that were adverted to in the annual report of last December, the probability of there being a falling off in the value of the importations of 1826, as compared with those of 1825, was intimated, and has been the fact. The whole importations for 1826 have amounted, from the returns and estimates at present before the Treasury, to about $85,000,000 in value; the whole of the exports, for the same time, to about $78,000,000. Of the imports, about $80,000,000 have been carried in American vessels; and of the exports, about $70,000,000. Of the latter, about $53,000,000 consisted of the product of the United States, and the remainder of foreign productions. The diminished value of importations for 1826 has obviously arisen, in some degree, from the fall of prices in those countries of Europe from which the largest quantity of manufactured articles are sent to the United States, and gives countenance to the opinion that the decrease in quantity has not been in proportion to the decrease in value. If, indeed, the comparative amount and value of exports be assumed as the measure of a correct judgment upon this point, it would even lead to the inference that, as regards some of the principal articles of importation into the United States for 1826, there has been no decrease in quantity, as compared with the importations of 1825. The value of exports from the United States for 1825 exhibits a greater excess over those of 1826 than is seen in the imports; yet, in some of the chief articles of export, the records of the Treasury attest that the quantity, as far as yet known, was greater in 1826. In 1825 the export of cotton was 176,000,000 of pounds; in 1826 it was 192,000,000. The value of the latter, or larger quantity, was $24,000,000. The value of the former, or smaller quantity, was $36,000,000. In like manner, the quantity of flour exported in 1826 was greater than in 1825, whilst the value was less, though not in the same proportion as with cotton. The same is true of rice. The export of flour in 1826 was, in quantity, 858,360 barrels; in value, $4,139,063. In 1825 it was 813,906 barrels; and in value, $4,212,127. The exports of rice in 1826 was 110,635 tierces in quantity, and $1,909,227 in value. In 1825 it was 97,015 tierces in quantity, and $1,925,243 in value. It may be proper to subjoin, that, of the export of cotton in 1825, between nine and ten millions of pounds were of the Sea Island cotton; and of the export of 1826, between six and seven millions. Of tobacco, the quantity exported, as well as its value, rose higher in 1825 than in 1826. But in 1826 the export of tobacco, though considerably less than that of 1824 in quantity, was greater in value. The comparative amounts, in quantity and value, for the three years, stands thus: for 1825, 75,984 hogsheads, and $6,115,623; for 1826, 59,780 hogsheads, and $5,322,964; for 1824, 77,883 hogsheads, and $4,885,566. Taking the three years, therefore, it appears that the quantity exported was greatest in 1824, and the value least.

It would be desirable, with a view to judge accurately of the effects of the tariff upon the importations of foreign merchandise, to ascertain the fluctuations from year to year in the *quantity* of such importations. This cannot be done at present, so far as any official or satisfactory standard at the Treasury is concerned. The returns of the Collectors of the Customs, in relation to goods which pay duty *ad valorem*, have hitherto fixed nothing but their value; and it is known that goods subject to duty under this form comprehend much the largest class of foreign importations. Measures have been put in train for ascertaining henceforth, as far as practicable, the entire quantity of goods subject to this description of duty, as well as the value. But even when time shall have matured these measures and exhibited their results, they will furnish no standard of comparison as to the quantity of importations prior to their adoption. The information will, however, become useful after the lapse of a few years, in its bearing upon the course and developments of our home industry and foreign trade, showing how each, under wise principles adapted to each, may advance co-equally; how the channels and the objects of the latter may shift under the advance of the former without any loss, but with gain, in effective national results—results operating upon the most extensive interests and enriching to the greatest mass of numbers; or how, under the growth of the one, the other is at all destined to become disadvantageously and lastingly abridged. The beneficial parts of these consequences are looked to with confidence and hope from the tariff, as well from our own experience thus far, as from that of other nations of the world distinguished by high degrees of opulence and civilization, and where both have rested upon durable rather than transitory foundations—foundations that have been carefully laid in applying the home industry to the multiplied operations of manufacturing art, no less than to the tillage of the soil, and in making the accumulated productions of both the basis of a great foreign trade. But facts that may shed a distinct light upon the whole subject should be sedulously collected, to serve, if need be, as the groundwork to us of a more perfect system of legislation, in relation to a course of policy so closely interwoven with the interests and character of the social state, and with the national prosperity and power. The foreign trade of the United States, to its inherent causes for progressive extension, superadds another and distinctive one in the constant desire of the Government, as manifested in their permanent laws and emphatically in their recent treaties, to carry it on, freed from all restrictions upon navigation, as well as upon the most enlarged principles and the most entire reciprocity in all other respects. If these principles, of which the United States have largely set the example, were practiced upon more universally by nations, and to the extent uniformly proposed by this Government to their acceptance, the fact might be more important in its influence upon general trade, and upon that of each nation in particular, than abstract declarations illustrative or commendatory of them.

The value of cotton goods subject to *ad valorem* duty imported into the United States in 1826 was, as far as at present ascertained, $8,905,316. The value of the same description of goods imported in 1825 was $12,509,516. The value of woolen goods subject to *ad valorem* duty imported in 1826 was $7,445,493. The value of the same description of goods imported in 1825 was $11,392,264. But, as already intimated, this difference in value cannot be relied upon as a safe test of the difference in quantity. There are seasons when it would be peculiarly misleading, and the present is believed to be one of them. The

duties on each description of these manufactures were calculated on the prices which each respectively bore at the places of exportation during the respective years; and the great fall in prices in 1826 will undoubtedly serve to account, in part, for the difference in the aggregate value of the two importations. Further elucidation will be afforded to the point when it is added that, although the value of cotton manufactures imported in 1826 stands below those imported in 1825 in the proportion stated, it exceeds the value of the same kind of manufactures imported during either of the two years preceding, viz: 1824 and 1823. The same is not true of the woolen manufactures. The value of the latter paying duty *ad valorem*, imported in 1826, is found, from the returns as yet before the Treasury, to be below the value of the same kind of importations for 1824 and 1823, though the difference is far less considerable than between their value in 1826 and 1825; nor is it known at this Department what may have been the comparative value of woolen goods at the places of exportation during the four consecutive years indicated. The valuation of merchandise constituting the total aggregate of our foreign trade, is always made at the port or place of shipment, and the rule applies, consequently, both ways; that is, to all articles of export as well as import, thereby freeing it from objections to which it might otherwise be open. The mode of valuing is, in effect, as follows: the party making the shipment annexes the value to the manifest or list of articles, superadding his oath that it is the true value according to their actual cost, or according to the value which they truly bear at the port and time of shipment. This oath is taken under the supervision of the Collectors as regards exports, and under that of our consuls or other commercial or substituted agency abroad as regards imports. Some other formalities are observed under our laws, particularly in relation to imports; but they are all in aid of the chief provision here stated.

The articles of American manufacture exported from the United States in 1826 will, it is believed, be found to exceed $6,000,000 in value. The particular kinds of manufacture which have made up this profitable and growing branch of the export trade will be presented in detail, and their total value ascertained with more precision, in the general statistical tables now in course of preparation, under the act of 10th of February, 1820, which will be transmitted to Congress at as early a day as their voluminous nature will allow. Of the amount of American manufactures produced for consumption within the United States during the year it is impossible to speak with exactness; but, from indications that cannot deceive, it is evident that it is large—so large that the amount exported would sink to a level below all comparison with it. The surest guide to our belief, under this head, is, that in those branches which have at length been enabled, through a provident legislation, to stand up against that overwhelming competition of pre-established excellence and capital from abroad, which must otherwise have kept down forever their first attempts, the article can now be had cheaper in price, as well as better in quality, than the same articles from abroad, as it was seen in our markets, prior to the efficient protection afforded to our own; hence the apprehensions of monopoly pass away; hence the certainty that competition at home will bring down prices eventually, if not immediately, whilst it creates and diffuses new wealth at home; labor being the foundation of wealth, and producing and disseminating it more universally, and in higher degrees, in proportion as it exists under diversified forms and in full activity. It is then that the farmer, the artisan, and the merchant, give support to each other, each enlarging the occupations and the gains of each; the State, meanwhile, reaping the fruits in fiscal prosperity and political power. As regards the cotton manufactories of the country, there are grounds for supposing that they now make a call for full one-fourth part of all the raw cotton grown in the United States. Authentic information as to the exact quantity is not, indeed, possessed at the Treasury; but, as an approximation, it is believed that the above proportion may be taken without the hazard of essential error. It is gratifying to add that those parts of the United States where manufacturing establishments of all kinds flourish most exhibit an animated industry, an orderly aspect, and an increasing population. Towns and villages are seen rapidly to rise up in such districts, in resorting to which the rural population of the vicinity find ready and profitable sales for the various productions of farming enterprise and labor. It is believed that, as these establishments shall rear themselves up, under adequate encouragement, in augmented numbers and importance, a corresponding activity in foreign trade will become their concomitant in the same portions of country; since, besides the trade in exports, to which, after supplying to their full share the home demand, they open the way, and which will not fail to bring its proper returns on the broad scale of exchanges, the very existence of manufactures, as they assume great variety and reach perfection, superinduces the necessity of constantly bringing into the country new varieties of ingredients as subsidiary to them. So wide, so full of dependence upon all other kinds of labor, not only of our own but of other regions, is this great department of national industry. So certainly do its multifarious and beneficial operations in large, refined, and busy communities perpetually react upon all the other departments; so quick are the alternations of consumption and supply, and over so great a surface of things do both spread themselves, in such communities. It cannot escape attention that the portions of our country, for the most part, answering to these remarks, or to some of them, are not favored, or favored in but a slight degree, with the capacity of producing those immense and exhaustless treasures of the soil spoken of in this paper. For the absence of them their inhabitants, in part, seek compensation in pursuing artificial modes and combinations of industry, which take these treasures as a substratum; by which the great scheme of national advancement is to be seen in its true component parts in our Union; parts naturally destined to make up one systematic whole, where the plough, the loom, and the ship, will each have its appropriate sphere in raising to a proper elevation the entire fabric of our social and public prosperity; in carrying to the highest attainable pitch our riches, our happiness, our power A policy short of this belongs not to a free and intelligent people, surrounded, by the bounty of Providence, with varieties of climate and territory, fostering inclinations and aptitudes for variety in human employments, by an exuberance of mineral and fossil, no less than of agricultural wealth; by vast waters flowing through this territory that serve as natural highways and supply the fund for artificial ones, affording pre-eminently, in connexion with that mighty agent in navigation as in mechanics, the steam power, the means and inducements for an universal and rapid transfer of the products of labor from hand to hand, whether they consist of commodities of useful and ingenious workmanship from the repositories of art or of harvests from the fields of nature; by all the elements and attributes, in fine, geographical, political, and moral, of a great empire. The foundations of such a policy once securely laid in that legislative assistance to our manufactures, without which they must struggle in vain against those of other countries long and thoroughly established, an advantage not inherent but adventitious, yet an overpowering advantage; and, as already proved in some articles of national importance to which we have afforded efficient protection, we shall have nothing to fear for the future. Then, and only then, shall we be raised up to a level in this respect with other countries; then, and only then, shall we stand in a position of equality to listen to doctrines,

right enough it may be in themselves, but of which others have never accorded us the benefit or thought of holding up as doctrines for reciprocal practice, even with numerous safe-guards and reservations, until their own manufactures, in all branches that conduced to national resources and power, had acquired, through ages of experience, of capital, and of skill, a stability not to be shaken.

A resolution passed the House of Representatives in May directing the Secretary of the Treasury to cause to be prepared a well digested manual, containing the best practical information that could be collected on the growth and manufacture of silk, adapted to the different parts of the Union; containing also such facts and observations in relation to the growth and manufacture of silk in other countries as might be useful; and that the same should be laid before Congress at the commencement of their present session. Steps were taken, without loss of time, to obtain the information contemplated by the resolution, as well from all parts of this country as from Europe; but, from the scope which the subject was found to assume, all the information expected under inquiries that have been instituted has not yet got to hand; nor will it now be practicable to have it digested and arranged, even should it all be received, by the time designated. The resolution will continue to command every attention, and be finally acted upon as soon as may be compatible with the accomplishment of its interesting objects. A branch of industry that may be turned to so many purposes useful and ornamental, and which ministers to the wealth of nations with so little cost in the material on which it is originally founded, as well as in the species of labor that is applied to it, naturally merited, as it has received, all the attention which the terms and spirit of the above resolution bespeak.

The value of importations for the year giving the basis of the impost revenue rather than their quantity, it follows that, as the value of those for 1826 has fallen below the value of those for 1825, so will also the revenue from this source be less. The amount of duties secured by bonds on merchandise imported during the first three quarters of the present year is estimated at $21,250,000. The amount that will probably accrue during the last quarter is estimated at about $4,250,000, making for the whole year $25,500,000. The languid state of the tea trade for 1826, a trade always so productive in revenue when it flourishes, has lent its aid, in conjunction with the fall of prices abroad, in diminishing the accruing amount from the customs during the year. Some revival of this valuable trade, valuable under fiscal and commercial views, and from its tendency to encourage more largely the taste for an innocent and wholesome drink in place of those that are neither valuable even under moral views, may perhaps be anticipated in 1827. It may also be presumed that the extensive depression of prices witnessed in Europe in 1826 will not have place upon a similar scale in 1827. Nevertheless, with the causes little likely, in their combination at least, to be marked by speedy repetition that have operated to lower the accruing revenue from the customs for the current year below that of the year preceding, there is every reason for supposing that it will exceed the revenue arising from this source during any one of the four years that immediately preceded 1825, and even go beyond the amount received in that year, though not the amount that accrued in that year. This fact will be entitled to its proper weight in determining to what extent the regulations of the present tariff are likely to bring injurious inroads upon the commercial revenue of the nation.

The debenture bonds issued for drawbacks during the first three quarters of the present year amounted to $3,840,869 10. This is less by $648,841 19 than those issued during the corresponding period of 1825. The amount of those outstanding on the 30th of September last, and chargeable upon the revenue for the next year, was $1,294,310 94, which is less by $564,004 70 than was chargeable on the same day in 1825 upon the revenue of 1826. The deduction in the shape of drawbacks from the accruing revenue of 1826 will therefore, perhaps, exceed $5,000,000.

The amount of duty bonds in suit on the 30th of September was $4,007,882 76. This is a large sum, exceeding by $1,020,535 54 the sum that was in suit on the same day in the year preceding. The excess is in a great degree to be accounted for by the fraudulent transactions in one or two of the principal cities of the United States in relation to imported teas.

Whilst the impost revenue receivable next year will be less than that which accrued in 1825, and has been received or is still to be received in 1826, the public lands promise to yield next year more than they have this. The probability of increased productiveness in this branch of revenue rests on the following grounds: 1. The act of the last session, making "provision for the extinguishment of the debt to the United States by the purchasers of public lands," has arrested almost entirely for the present year the payments for lands sold on credit. That law will, however, expire next July, and the payments under it will be thrown upon the year 1827. 2. A considerable quantity of the lands relinquished to the United States will, it is expected, be brought into market in the course of the next year, amongst others those at Huntsville, which are valuable, being dispersed through a fertile country occupied by a thriving population. It is believed that they will sell promptly and at good prices. 3. A large portion of the best of the public lands in Florida will be offered for sale in 1827. It is understood that these lands are in demand, and anticipated that they will sell well. On these and other grounds it is thought, at present, that the revenue from the sale of the public lands in 1827 will not be overestimated when it is set down at $2,000,000. The state of the Land Office generally will be seen by a report from the officer at the head of that establishment, which accompanied the President's message to Congress at the opening of the session, and will, it is hoped, be found satisfactory.

From the foregoing facts and considerations affecting the customs and public lands, it is believed that the whole revenue of the United States for 1827, from these and other less important sources, may be estimated at upwards of $23,000,000, and that it will arise thus:

From customs	$20,400,000 00
From public lands	2,000,000 00
From bank dividends	420,000 00
From miscellaneous and incidental receipts	330,000 00
	23,150,000 00

The expenditures for 1827 are estimated as follows, viz:

Civil, miscellaneous, and diplomatic	$1,826,549 54
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	5,646,144 36
Naval service	3,230,260 23
Public debt	10,000,000 00
	20,702,954 13

Which will leave in the Treasury on the 31st of December, 1827, after satisfying all the demands of that year on the basis of the foregoing calculations, a surplus estimated at $2,447,045 87. This surplus will be a disposable surplus, over and above the sum before stated, as not in effective funds, and of the $2,000,000 to be reserved in the Treasury under the Sinking Fund act of March 3, 1817.

In the estimate of expenditures for 1827 the annual appropriation of $500,000 for the gradual increase of the Navy, under the act of the 3d of March, 1821, has not been inserted, that appropriation expiring with the present year. Whatever renewed sum the wisdon of Congress may set apart for this effective arm of the public defence will add another item to the list of expenditures for the year, and lessen by so much the estimated balance at its expiration.

All which is respectfully submitted.

RICHARD RUSH.

TREASURY DEPARTMENT, *December* 12, 1826.

E.

Statement of moneys received into the Treasury from all sources other than customs and public lands during the year 1825.

From arrears of new internal revenue	$25,771 35
From arrears of new direct tax	2,330 85
From fees on letters patent	8,940 00
From cents coined at the Mint	19,496 25
From postage of letters	469 56
From fines, penalties, and forfeitures	3,411 06
From sales of public lots in the city of Washington	1,572 38
From surplus emoluments of officers of the customs	26,960 06
From consular receipts under the second section of the act of 14th April, 1792	2,292 10
From trading establishments with the Indians	10,020 80
From net proceeds of vessels and cargoes condemned under the acts prohibiting the slave trade	4,473 57
From net proceeds of vessels captured from the pirates	325 13
From rent of the Naval Hospital farm, Chelsea	267 45
From interest on balances due by banks to the United States	5,792 42
From Bank of Tennessee, for premiums on drafts for money belonging to the United States, and deposited with said bank	190 38
From interest on notes given for the purchase of the Northumberland House estate	274 87
From annuities to Christian Indians on the river Thames	1,474 98
From moneys previously advanced on account of Second Census	71 48
From moneys previously advanced for ascertaining land title in Louisiana	500 00
From dividends on stock in the Bank of the United States	367,500 00
	482,134 69
From balances of advances made in the War Department, repaid under the third section of the act of the 1st May, 1820	43,919 32
From loan of five millions, at 4½ per cent., per act of 26th May, 1826	5,000,000 00
	5,526,054 01

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1826.

A statement exhibiting the duties which accrued on merchandise, tonnage, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for drawback on domestic distilled spirits and domestic refined sugar exported; of bounty on salted fish exported; of allowances to vessels employed in the fisheries; of expenses of collection, and of payments made into the Treasury during the year ending on the 31*st day of December,* 1825.

Duties on merchandise	$31,673,687 67
Duties on tonnage and light money	138,847 83
Duties on passports and clearances	12,638 00
Debentures issued	6,391,778 69
Drawback on domestic distilled spirits and domestic refined sugar exported	3,565 00
Bounties and allowances	209,285 57
Gross revenue	25,220,544 24
Expenses of collection	862,341 67
Net revenue	24,358,202 57
Payments made into the Treasury	20,098,713 45

Redemption of 7 per cent. stock		25 00	
			8,096,581 90
			18,714,226 66

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1826.

L.

TREASURY DEPARTMENT, *October* 12, 1826.

The Commissioners of the Sinking Fund having, on the 27th of September, 1826, resolved that two millions of dollars of the six per cent. stock, created by the act of Congress of the 8th February, 1813, should be redeemed on the 1st January, 1827, the following was the course adopted at the Treasury to carry the resolution into effect:

1. All the Loan Offices were instructed to transmit to the Treasury the numbers of the certificates of this stock, and the names of the holders as they stood upon the books of the offices, respectively, on the 16th of September, 1826; the books being always closed against transfer fourteen days before the end of a quarter.

2. The amount of the whole being $11,248,389 26, composed of different and unequal sums on the books of the several offices, the two millions were made up among all the offices by taking a proportional sum for each. For example: the entire sum standing upon the books of the New York office being $2,225,533 49, the sum of $395,600 bore the same proportion to two millions that $2,225,533 49 did to $11,248,389 26. The entire sum upon the books of the offices in South Carolina being $555,149 39, the sum of $98,684 bore the same proportion to two millions that $555,149 39 did to $11,248,389 26; and in this manner the proportional sum was fixed for all the offices.

3. All the certificates, or the numbers representing them, returned by each office were then formed into as many parcels as there were offices, and successively put into as many boxes. As many of them were then drawn out from each box, by lot, as made up the proportional amount ascertained as above to belong to each office. The holder of any one number or certificate thus drawn out was, by the terms of the notice under which the contract for the loan was entered into, to be paid off, not only to the full amount of that particular certificate, but of all other certificates of this same stock of which he was the owner.

The doctrine of chances rendering it nearly impossible to draw out in exact figures the sum wanted in the case of each office, the last drawn certificate or number in each case was found to give an excess, in some instances greater, in others less.

4. This excess, the agregate of which amounted to $162,599 63, was disposed of thus: The whole of the numbers or certificates already successively drawn out on account of all the offices were put back again into one box and a new drawing was had from amongst them all, for exemption, to the amount of the foregoing aggregate excess, so as to bring back the result to the two millions wanted. As the last drawn certificate or number in performing this operation proved to be a large one, it led to the opposite result of lowering the amount below the level aimed at by as much as $57,293 58.

To absorb this deficit, a further drawing was resorted to from the entire mass of the undrawn numbers, which were put into another box; and this operation terminated in reaching the sum required, with only a fractional excess of $2,306 71. This was deemed too small to make it necessary to renew the drawing for exemption, and the whole operation was accordingly closed.

The principle of apportionment among the different offices was believed to be the most proper mode of paying off the sum in question. It was alike equal to the stockholders, and tended to produce payments more equal throughout the different States than if the drawing had taken place from all the certificates representing the whole sum of $11,248,389 26 thrown into a common mass.

The drawing of the lottery commenced on the 29th of September, and was completed this day. The delay was owing to the Banks of the United States at Philadelphia and Boston (acting as Loan Offices) not having made return of the certificates standing on their books in due time; those from the former not having been received until the 3d instant, and those from the latter not until yesterday. It had otherwise been intended to complete the drawing of the lottery on the 29th of September, and issue the notice to the public creditors to be paid off by its decision on the last day of the quarter.

No. 1.

Statement of the debt of the United States, October 1, 1825.

Three per cent. stock		$13,296,231 45
Six per cent. stock of 1813, (loan of 16 millions)	$12,403,051 66	
Six per cent. stock of 1813, (loan of 7½ millions)	5,452,884 46	
Six per cent. stock of 1814	13,096,542 90	
Six per cent. stock of 1815	9,490,099 10

Six per cent. stock of 1814	13,096,542 90	
Six per cent. stock of 1815	9,490,099 10	
Five per cent. stock, subscription to the Bank of the United States	7,000,000 00	
Five per cent. stock of 1820	999,999 13	
Five per cent. stock of 1821	4,735,296 30	
Exchanged 5 per cent. stock of 1822	56,704 77	
Funded 4½ per cent. stock, per act of May 24, 1824, (Florida loan)	5,000,000 00	
Funded 4½ per cent. stock, per act of May 26, 1824	5,000,000 00	
Exchanged 4½ per cent. stock of 1824	4,454,727 95	
Exchanged 4½ per cent. stock of 1825	1,539,336 16	
		62,626,903 77
		75,923,151 47
Amount of the debt of the United States, per the foregoing statement No. 1, and per statement No. 3, which accompanied the report of the Secretary of the Treasury of December 22, 1825		$80,985,537 72
Add stock issued in the first quarter of 1826, viz:		
Three per cent. stock	$16 25	
Exchanged 4½ per cent. stock of March 3, 1825, in lieu of 6 per cent. stocks of 1813*	1,539,336 16	
		1,539,352 41
		82,524,890 13
Deduct stocks surrendered, and payments on account of the principal of the debt, viz:		
Six per cent. stocks surrendered, and for which exchanged 4½ per cent. stock was issued in lieu, under the act of March 3, 1825, of the 16 million loan	$1,148,854 20	
Seven and a half million ditto	390,481 96	
Payment of the residue of the 7½ million loan on July 1, 1826	5,062,402 50	
		6,601,738 66
Amount of the debt, as above, on October 1, 1826		75,923,151 47
From which deduct the amount proposed to be paid off on January 1, 1827		2,002,306 71
Leaving the amount of the debt on January 1, 1827		73,920,844 76

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1826.

No. 4.

Estimated amount of Treasury notes outstanding on the 1*st October*, 1826.

Total amount issued, as per No. 4 of the last report		$36,680,794 00
Cancelled and reported on by the First Auditor		36,664,194 00
Outstanding		15,040 00
Consisting of small Treasury notes	$2,240 00	
Notes bearing interest	12,800 00	
		15,040 00

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1826.

No. 5.

Statement of the stock issued under the act of Congress entitled "An act supplementary to the act for the indemnification of certain claimants of public lands in the Mississippi Territory," passed March 3, 1815.

Amount of claims awarded, per statement No. 5 of the last report	$4,282,151 12½

* The amount of the 6 per cent. stocks of 1813, exchanged under the act of March 3, 1825, was stated last year, by estimate, at $1,585,138 88; the accounts of the Commissioners of Loans have since been adjusted, and the true amount ascertained to be $1,539,336 16, one moiety whereof, or $769,668 18, is redeemable in 1829, the other in 1830.

Whereof there was paid in for lands, per said report		$2,447,539 39
Payments at the Treasury to the 30th September, 1825, per said statement	$1,826,765 56	
Payments at the Treasury from 1st October, 1825, to 30th September, 1826	450 00	
		1,827,215 56
Balance outstanding on the 1st October, 1826, consisting of certificates outstanding	7,355 57	
Awards not applied for	44 60½	
		7,400 17½
		4,282,151 12½

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, November* 30, 1826.

STATEMENTS

EXHIBITING THE REVENUE ARISING FROM

DUTIES ON MERCHANDISE, TONNAGE, ETC.,

During the year ending December 31, 1825; *referred to in the Annual Report of the Secretary of the Treasury upon the State of the Finances, of December* 12, 1826.

A.

Statement exhibiting the duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments on domestic distilled spirits and domestic refined sugar exported; of bounties on salted fish exported; of allowances to vessels employed in the fisheries; of expenses of collection and of payments made into the Treasury during the year ending on the 31*st day of December,* 1825.

Duties on merchandise	$31,707,794 32
Duties on tonnage and light money	138,847 83
Duties on passports and clearances	12,638 00
Drawback on foreign merchandise exported	6,391,783 57
Drawback on domestic distilled spirits and domestic refined sugar exported	3,565 00
Bounties and allowances	209,285 57
Gross revenue	25,254,646 01
Expenses of collection	843,903 16
Net revenue	24,410,742 85
Payments made into the Treasury	20,098,713 45

NOTE.—Table A, which accompanies the annual report of the Secretary of the Treasury of December 12, 1826, was prepared before the books of the revenue for the year 1825 were closed. By that table the duties on merchandise are stated to be $31,673,687 67

To which add—

Bonds taken in Key West for duties on merchandise, the particulars of which were not rendered by the late Collector	34,106 65
As above	31,707,794 32

Drawback on merchandise exported	$6,391,778 69
Add, on rifles exported	4 88
As above	6,391,783 57

Expenses of collection	$862,341 67
Deduct surplus of emoluments	18,438 51
As above	843,903 16

Net revenue		$24,358,202 57
Add bonds taken in Key West	$34,106 65	
Add surplus of emoluments, &c	18,438 51	
	52,545 16	
Deduct debentures, as above	4 88	
		52,540 28
As above		24,410,742 85

B.

Statement exhibiting the values and quantities, respectively, of merchandise on which duties actually accrued during the year 1825, *(consisting of the difference between articles paying duty imported and those entitled to drawback re-exported;) and, also, of the net revenue which accrued that year from duties on merchandise, tonnage, passports, and clearances.*

MERCHANDISE PAYING DUTIES AD VALOREM.

7,285 dollars, at 12 per cent		$874 20	
1,569,003 dollars, at 12½ per cent		196,125 36

19TH CONGRESS.] No. 764. [2D SESSION.

ALTERATIONS IN THE REVENUE LAWS.

COMMUNICATED TO THE SENATE DECEMBER 15, 1826.

RESOLUTIONS OF THE GENERAL ASSEMBLY OF LOUISIANA.

Resolved by the Senate and House of Representatives of the State of Louisiana in General Assembly convened, That our senators in Congress be instructed, and our representatives requested, to unite and exert all their efforts to procure the adoption by Congress of an act amending the fiscal laws of the United States in such a manner as to effect the following purposes, which this General Assembly consider as of the utmost importance for the commerce of the United States in general, and for that of Louisiana in particular, to wit:

1. That all goods entered for exportation may be warehoused for two years, in stores to be provided by Government, or by the importer, under the lock of Government, and under such regulations as Government shall think fit; and that the Secretary of the Treasury may be permitted to grant further time for any such goods to remain warehoused, if he shall see cause so to do.

2. That spirits may be imported in casks of eighteen gallons or upwards, and that the proprietor of warehoused goods may be permitted, under such regulations as may be adopted by Government, to unpack, sort, separate, and repack any such goods, and to make such lawful alterations thereon as may be necessary for their preservation or for their sale and shipment.

3. That the formalities required at present for cancelling bonds given on the exportation of debenture goods be repealed, and that, in lieu of the certificate of landing now required, an officer of the customs may accompany all goods so exported until at sea.

And be it further resolved, That the Governor be requested to transmit, as early as possible, copies of the above resolution to the Secretary of the Treasury and to each of our senators and representatives in Congress.

A. B. ROMAN, *Speaker of the House of Representatives.*
H. S. THIBODAUX, *President of the Senate.*

Approved February 3, 1826. H. JOHNSON, *Governor of the State of Louisiana.*

19TH CONGRESS.] No. 765. [2D SESSION.

IMPORTATIONS OF SHEEP'S WOOL ON THE SKIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 20, 1826.

TREASURY DEPARTMENT, *December* 20, 1826.

SIR: In obedience to a resolution of the House of Representatives of the 11th instant, "directing the Secretary of the Treasury to report to the House whether sheep's wool on the skin is allowed to be imported free of duty, and how much of such wool has been imported during each of the two last years,"

I have the honor to submit a letter from the First Comptroller of the Treasury, with the correspondence therein referred to, which contains all the information in the Department upon the subject of the resolution.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office, December* 19, 1826.

SIR: The resolution of the House of Representatives of the 11th instant, which you have referred to me for the information required therein, directs that the Secretary of the Treasury report to that House "whether sheep's wool on the skin is allowed to be imported free of duty, and how much of such wool has been imported during each of the two last years."

In reply to the inquiries contained in that resolution I have the honor to state that upon the question being submitted to this Department, whether sheep skins with the wool on were entitled to the exemption from duty extended by law to raw skins or hides, it was decided that the skins were, but the wool was not so entitled.

A copy of that decision being contained in a letter to Collector Steele, under date of the 20th of November, 1822, is enclosed herewith, numbered 1.

It having been represented to the Treasury, in the month of April last, that a different construction was put upon the law by some of the Collectors, who, considering sheep skins with the wool on in the character of "*raw skins*," excepted them from duty, letters were addressed by this Department to the Collectors at Boston, New York, and Baltimore.

Copies of those letters, of the answers received to them, and instructions predicated thereon, are enclosed herewith, numbered 2, 3, 4, 5, and 6.

The Collector at Baltimore in his answer, it will be perceived, refers to a letter from this Department under date of the 15th October, 1823.

A copy of that letter is enclosed (No. 7) to show that the instructions contained in it had relation to a different article from raw sheep skins with the wool on.

With respect to the quantity of sheep's wool on the skin, which has been imported during each of the two last years, I have to observe that there is no information in this Department, nor is it believed in the custom-houses, as it is not presumed that a special account of such skins has been kept.

A communication on that point will, however, be made to the Collectors of the principal ports, whose answers shall be laid before you immediately after their receipt.

With considerations of high respect, I have the honor to be, your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 1.

TREASURY DEPARTMENT, *Comptroller's Office, November* 20, 1826.

SIR: I have received your letter of the 16th instant relative to the sheep skins imported by Messrs. George D. Blackie and others with the wool on.

Upon mature consideration of the subject, I am of opinion that the wool imported, although the skins are exempted, is liable to duty. In this opinion the Secretary of the Treasury concurs. The manner of ascertaining the quantity and value of the wool is left to your own judgment.

Respectfully,

JOS. ANDERSON, *Comptroller.*

JOHN STEELE, Esq., *Collector, Philadelphia.*

No. 2.

CUSTOM-HOUSE, *Baltimore, Collector's Office, April* 20, 1826.

SIR: In answer to the inquiry in your letter of the 18th instant I can only say that the instances of sheep skins imported here with the *wool on* have been so rare that we could not, as yet, turn to one, but our recollection is that a few have been brought from Buenos Ayres or other South American countries, in such a state as fitted them for foot mats, or other special purposes; on which, as slightly dressed, a duty of fifteen per cent. was taken, agreeably to instructions from the Comptroller's office of the date of 15th October, 1823. If any considerable quantities had arrived, wearing the appearance of the *wool* being the principal object of the importation, we should probably have dealt with them as that article constituting their distinctive character for duty. In some cases, again, we think they might have been passed free, as directed in the case of fish skins, &c., heretofore.

JAMES H. McCULLOCH.

No. 3.

CUSTOM-HOUSE, *New York, Collector's Office, April* 22, 1826.

SIR: I have received your letter of the 18th instant, stating that information had been received from a highly respectable source, stating that importations had been made, to a considerable extent, of sheep skins with the *wool on*, which had been admitted free of duty, and requesting information as to the practice at this office in relation to such skins.

In answer, I state that "*raw hides and skins*" (by the act of April 27, 1816) have been admitted free of duty, whether having hair, fur, or wool thereon, so long as the hides or skins were in the raw state, as taken from the animal, and only dried or salted.

With respect, &c.,

JONATHAN THOMPSON.

Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

No. 4.

CUSTOM-HOUSE, *Boston, April* 24, 1826.

SIR: There have been several importations into this port of sheep skins with the *wool on*, but not in any considerable quantity, until the arrival on the 20th instant of the brig Banian, from Buenos Ayres, which has a very large quantity I have considered them free, under the 2d section of the act of April 27, 1816, being included in the words "*raw hides and skins.*" It is true that the *wool* separated from the *skins* pays a duty; so does *horse hair*, and that from the skins of *horned cattle*, when imported separate; but the *hides* being covered with it has not subjected *them* or *goat skins* to duty.

No doubt considerable wool may be thus introduced, but I do not perceive how a duty can be enacted upon them, without an amendment to the tariff establishing an *ad valorem* duty upon *sheep skins with the wool on*, or a specific duty on each skin, on the pound of skin and wool. If they are classed as "*unenumerated articles*," and subject to 15 per cent., the same reasoning would also subject ox and horse hides and goat skins to 15 per cent., and if they are charged with the duty on wool at 25 per cent. *ad valorem*, the skins would thus pay as much duty as the wool, when they are, in fact, free.

But as my views may be incorrect, I shall cause the duty on this last importation to be received, subject to your decision whether to be exacted or not, and, if exacted, the rate of duty.

With respect, &c.,

H. A. S. DEARBORN.

Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

No. 5.

TREASURY DEPARTMENT, *Comptroller's Office, April* 29, 1826.

SIR: From the tenor of your reply to my letter of the 18th instant, which has just been received, I am induced immediately to enclose you a copy of a letter addressed by this Department to the Collector at Philadelphia, under date of November 20, 1822, showing the footing on which sheep skins, imported with the wool on, should be placed.

You will be pleased to consider the instructions in that letter as though they were addressed to yourself.

Respectfully,

JOS. ANDERSON, *Comptroller.*

H. A. S. DEARBORN, Esq., *Collector, Boston.*

No. 6.

TREASURY DEPARTMENT, *Comptroller's Office, May* 1, 1826.

SIR: From the tenor of your reply to my letter of the 18th ultimo, I am induced to enclose you a copy of a letter addressed by this Department to the Collector at Philadelphia, under date of November 20, 1822, showing the footing on which sheep skins, imported with the wool on, should be placed.

You will be pleased to consider the instructions in that letter as though they were addressed to yourself.

Respectfully,

JOS. ANDERSON, *Comptroller.*

JONATHAN THOMPSON, Esq., *Collector, New York.*
JAMES H. MCCULLOCH, *Baltimore.*
} *Copy to each.*

No. 7.

TREASURY DEPARTMENT, *Comptroller's Office, October* 15, 1823.

SIR: I have received your letter of the 13th instant, stating the reasons which induced you to consider dressed catskins or furs in the light of *leather*, and liable to an ad valorem duty of 30 per cent.

Upon mature consideration of the subject, I am of opinion that as *undressed furs* are free of duty, and *dressed furs* are not specially provided for in the tariff, otherwise than as "all articles not free, and not subject to any other rate of duty," the latter are liable only to the rate properly chargeable upon such articles.

Respectfully,

JOS. ANDERSON, *Comptroller.*

JAMES H. MCCULLOCH, Esq., *Collector, Baltimore.*

19TH CONGRESS.] **No. 766.** [2D SESSION.

AFFAIRS OF THE BANK OF THE UNITED STATES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 9, 1827.

TREASURY DEPARTMENT, *January* 8, 1827.

SIR: In obedience to a resolution of the House of Representatives of the 3d instant, I have the honor to transmit the monthly statements of the Bank of the United States for the year 1826.

I have the honor to remain, very respectfully, your obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives.*

Bank of the United States, *January* 1, 1827.

S. JAUDON, *Second Assistant Cashier.*

19TH CONGRESS.] No. 767. [2D SESSION.

ASSAY OF FOREIGN COINS.

COMMUNICATED TO THE SENATE JANUARY 17, 1827.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 10th of May last, I transmit a report from the Secretary of the Treasury, with a letter from the Director of the Mint, showing the result of the assay of foreign coins, and the information otherwise relating thereto desired by the resolution.

JOHN QUINCY ADAMS.

WASHINGTON, *January* 17, 1827.

TREASURY DEPARTMENT, *January* 16, 1827.

The Secretary of the Treasury, to whom was referred a resolution of the Senate of May 10, 1826, "requesting the President of the United States to cause an assay to be made of all the gold and silver coins of all foreign nations whose coins are known to circulate or to be in use in any part of the United States; and to cause a report, distinguishing the respective dates of their coinage, to be made to Congress at their next session, of the actual weight of each of those coins; the fineness, alloy, and component parts of each; the current and nominal value of each; the actual value of each according to the standard and denomination of the coins of the United States, and the rate at which each might justly be made a legal tender," has the honor to lay before the President a report, dated the 27th ultimo, of the Director of the Mint, prepared in obedience to the said resolution.

RICHARD RUSH.

The PRESIDENT *of the United States.*

MINT OF THE UNITED STATES, *Philadelphia, December* 27, 1826.

SIR: I have now the honor to report to you on the subject of the foreign gold and silver coins circulating in the United States, according to your instructions, accompanying the resolution of the Senate of the 10th of May last, by which the President of the United States is requested "to cause an assay to be made of all the gold and silver coins of all foreign nations whose coins are known to circulate or be in use in any part of the United States, and to cause a report, distinguishing the respective dates of their coinage, to be made to Congress at their next session; of the actual weight of each of those coins; the fineness, alloy, and component parts of each; the current and nominal value of each; the actual value of each, according to the standard and denomination of the coins of the United States; and the rate at which each might justly be made a legal tender."

Conformably to the above resolution, assays have been made of the various coins designated, of which the result will be found in the annexed tables, comprehending, as far as has been practicable, and with no material exception, it is believed, all the foreign gold and silver coins which have either a general or local currency within the United States, and exhibiting, severally, their date, weight, fineness, alloy, component parts, current value, and actual value in coins of the United States.

In selecting from various coins the proper subjects for examination it was considered desirable to present an instructive variety of dates. The range will be found, however, in many instances very limited. Of some the issue is but recent. Others, having a restricted circulation only, occur but rarely. Of these not many specimens were obtained.

Average weights, derived from as many trials as practicable within the dates mentioned, are uniformly taken as the basis of calculation, and referred to throughout the tables. When the specimens obtained have been few, their average has been corrected or confirmed, when this could be done, by recurring to former trials of the weight of such coins here, or to other satisfactory records.

The proportion of fine metal and alloy in the various foreign coins examined, and the actual quantity composing each specific coin, are derived from the average of repeated assays made for this occasion.

The resolution has not been construed to require an analysis of the alloy found in foreign coins; its quantity alone, and not its composition, being of any moment as affecting their value. On this subject, however, it may be satisfactory to observe that copper, of various degrees of purity, but sufficiently pure to secure its ductility, forms the alloy of all the silver coins examined; and that all the gold coins are alloyed, as are those of the United States, with a mixture of silver and copper in variable proportions.

The judicious restriction contained in the act of Congress establishing the Mint, by which the quantity of silver is not to exceed that of copper in the alloy for gold, appears not to prevail universally in the gold coins of foreign nations. An excess of silver in some and of copper in others of the same nation and of the same date frequently occurs to a degree which sensibly impairs their beauty. These varieties are not very remarkable in the gold coins of Great Britain and Portugal, which are of the standard of the United States, nor even in those of France, which are but slightly inferior. They are, however, obvious in the gold coins of Spain, which contain sensibly more alloy, and in those of the Republics of Mexico and South America, which are of the Spanish standard. Specimens of the gold coins of those nations are occasionally seen alloyed almost wholly with copper or almost wholly with silver, which deviate so obviously, in the first instance by too high, and in the second by too pale a color, from that of fine gold as to have created a distrust of their purity. By the assay they are found to be genuine.

The current value per pennyweight assumed in the table for gold coins accords with that assigned to them, severally, as a legal tender by the act of Congress of April 29, 1816. Though no longer sanctioned by law, except in payments on account of public lands, it remains the basis on which those coins are

usually estimated when received by weight, differing slightly, however, as will be noticed on inspection, from their actual value as now determined.

The current value by tale assigned to the several gold coins conforms, it will be seen, very nearly to their medium actual value, having been practically established according to their ascertained value at a medium weight. Under both forms of expressing their current value, the fluctuating premium on gold coins in our principal seaports, and which affects, in some measure, their currency throughout the United States, has been disregarded. This premium varies in different parts of the Union, according to local facilities and transient demand, from one to ten per cent., and has vibrated through nearly this whole range in the same city within a few years. Facts thus variable cannot be usefully subjected to tabular arrangement.

The actual value of the several gold and silver coins, according to the standard and denomination of the coins of the United States, has been deduced from the fine gold or fine silver contained therein, respectively, at the rate of 247½ grains of fine gold to the eagle of ten dollars, and 371¼ grains of fine silver to the dollar.

These remarks may suffice as to the general structure of the tables. In relation to the various coins specified therein, such illustrations as may seem to be required will be found under their proper head in the order in which they occur.

OF FOREIGN GOLD COINS.

The only species of the ducat examined is that of Holland. This is not of frequent occurrence, and all other coins of that denomination are still more rare in the United States. On the concurring authority, however, of the English and French tables, it may be stated that the ducat of Sweden, Russia, and Prussia, that of Hamburg, and the specie ducat of Denmark, of all which it is occasionally desirable to determine the value, are of the same standard as the Holland ducat, and conform to it in weight with remarkable precision.

The actual value of the sovereign of full weight is found, as will be observed, to be $4 56.6. This coin being the representative of the pound sterling of Great Britain, of which $4 44 has long been estimated as the par value, an explanation of the discordance appears necessary, especially as some confusion in the currency of gold coins results sensibly from it. This topic, which is not new, will be noticed only in reference to the present subject.

When, by the act of Congress of July 31, 1789, the pound sterling was assumed at $4 44, this was doubtless considered the true par. It had but recently ceased to be nearly so; an equivalent proportion under another form had long prevailed. Before the year 1730, when the Spanish dollar of full weight contained 386 grains, nearly, of fine silver, it was a just proportion. The trivial change of the Spanish standard, adopted in 1730, by which this proportion was slightly disturbed, probably passed unnoticed; and the more important reduction of it in 1772 could have attracted little attention during an interval marked by events of peculiar interest. The proportion was, however, conclusively deranged on the establishment of the Mint in 1792, and the institution of a national coinage, of which a dollar, containing 371¼ grains of fine silver, was made the unit.

In 1793 an act was passed for regulating the currency of foreign coins, in which the gold coins of Great Britain are made a legal tender at the rate of 100 cents for 27 grains thereof, equivalent to 88⅞ cents per pennyweight. This, which is their actual value in coins of the United States, and has been assigned to them in all subsequent acts extending the currency of foreign gold coins, gives for the value of the guinea of full weight $4 79.4. The value of the pound sterling, deduced from the value of the guinea, is $4 56.6, conformably to that of the sovereign in the table.

In the meantime the par value of the pound sterling, designated in the act of 1789, and subsequent corresponding acts, had been transferred by proportion to the guinea, the par value of which was consequently supposed to be $4 66⅔. Thus there are two rules for estimating the gold coins of Great Britain derived from those two series of acts. The one proceeding on the assumed par of $4 44 for the pound sterling and determining by proportion the par value of the guinea, the other founded upon the acts making those coins a legal tender at their intrinsic value. The latter appears to be very generally adopted by public institutions, but among dealers in bullion and foreign coins the supposed par of $4 44 for the pound sterling and $4 66⅔ for the guinea appear still to maintain their place. The current price of English gold above those rates is, of course, considered as a premium. English gold coins have never, indeed, been obtainable on those terms in coins of the United States, and hence the maxim has become familiar that this species of gold is always above par whatever may be the current rate of other foreign gold. Above the par in question it must necessarily be under every condition of our foreign exchange, its intrinsic value, if brought to the Mint as bullion, being nearly three per cent. above it.

The gold coins of Great Britain may now be quoted at a premium of about seven per cent. on their medium intrinsic value, or about ten per cent. on the par above referred to. They are frequently reckoned by tale, and may thus be estimated at $4 90 for the sovereign. Being available as a legal tender in remittances to England, the premium bears a settled relation to that of exchange on London, from which it differs about two and a half per cent. if computed according to the same par.

The gold coins of Portugal approach very nearly to the standard of those of the United States, which they sometimes reach. The laws regulating the currency of foreign coins estimate them as of the same value. In strictness they are inferior, as reported in this instance, by a very minute difference.

No change is perceived in the standard of the gold coins of France within a period extending back to 1787. The premium on the gold coins of France and Portugal may be stated at about four to five per cent. on their actual or intrinsic value.

The gold standard of Spain has been adhered to generally with less precision than either of those before mentioned. The deviations from it are, however, unimportant; they occur in coins of the same date as well as in those of different years, and the average given in the table, after a careful comparison of the present with many former assays, may be taken as true. The value of the gold coins of Spain, according to the regulations of 1816, it will be noticed, differs obviously from that now determined. By a reference to the law it appears that the rate assigned therein to those coins is 100 cents for 28½ grains thereof, or 84 cents per pennyweight, two expressions which are not equivalent. It is presumed that, in the original act, $84\frac{32}{100}$ cents is the rate designated, which is the corresponding value.

The gold coins of Spain may now be quoted at a premium on their medium value by the tables of

eight to ten per cent. They are most frequently computed by tale, and may be estimated at from $15 50 to $16 for a doubloon, the parts being in proportion.

The gold coins of the Spanish American States, though exhibiting, under the assay, minute varieties, may be considered as of the full Spanish standard. The current value of their doubloons, however, is from twenty-five to fifty cents less than that of the Spanish, being excluded, it is understood, from those markets where coins of that denomination are in request at the highest value. Of Central America and Peru no gold coins have been obtained for examination.

The gold coins of Colombia are observed to exhibit the most conspicuous examples of that deviation from the color of ordinary gold coins, before referred to, which results from a large excess of silver in the alloy.

Among the gold coins examined was one variety purporting to be the Spanish doubloon of 1821, but conjectured to be spurious, of which considerable numbers, it appears, were lately introduced into the United States. They bear the designation G.A in the margin. In external appearance they are not very distinguishable from the Spanish doubloon of regular coinage; they are deficient, however, in weight, by 10 to 12 grains, and in fineness are a little below 20 carats. Their actual value is 80 3-10 cents per pennyweight, or $13 55 by tale.

The gold coins of Brazil are of the same standard as those of Portugal, and may be quoted at the same premium of four to five per cent.

In specifying the premium on the several species of foreign gold coins, reference is constantly had to our principal commercial cities, and to a period embracing the last two months.

FOREIGN SILVER COINS.

The silver coins of Great Britain issued since 1816 are, as will be observed, of less intrinsic value than those of earlier coinage; they are, however, still a legal tender, it is understood, at their former nominal value, but only to an amount not exceeding forty shillings sterling; they are, in like manner, a legal tender, probably with the same restriction, in the British Provinces contiguous to the United States, in some sections of which they have thence obtained a local currency at the same nominal value.

The new crusado of 480 reas has been alone specified of the silver coins of Portugal. Its current value is given as received from the only quarter of the United States where it is referred to as known in circulation.

In the silver coinage of France the issue of crowns ceased in 1793. The difference of standard between that denomination and the five-franc piece, as exhibited in the tables, has become familiar in the United States.

No change having been made for a long series of years in the regulations of the Spanish mint relative to the weight of the dollar and its divisions, the difference therein observable in the tables is to be attributed to the effect of use alone, and is found to bear a near proportion to the period of their circulation. The pillar dollar seems to offer an exception, arising, it is presumed, from the fact that, on the adoption in 1772 of a new and inferior coinage, the dollars of former emission were soon withheld from ordinary circulation.

There is an appearance presented by repeated assays that the Spanish dollars issued within the first few years after the regulations of 1772 had been adopted were slightly inferior to the subsequent emissions. If, however, there has been within the last thirty years any variation discoverable in those coins, it has tended towards a finer rather than an inferior standard; at least, the standard has been maintained with constancy.

All the divisions of the Spanish dollar are decidedly equal in fineness to the standard of the dollar itself. This point has been investigated with minute attention, and is the more distinctly stated because a doubt appears to have been entertained respecting it tending prematurely to degrade a very useful class of coins.

Spanish dollars, bearing the impression of Joseph Napoleon, are often seen of dates from 1809 to 1813, during which period the Ferdinand dollars continued to be issued from the Mexican mint. The latter only are inserted in the tables; the former are, however, of the full standard and value of the Ferdinand dollar.

The pistareen, though a Spanish coin, is no part of the Spanish dollar, from the standard of which it differs very conspicuously. In 1772 the pistareen as well as the dollar was reduced in fineness; at the same time the head impression was substituted in both for the devices by which they had before been severally distinguished. This denomination existed from an early date, and is still issued. Pistareens have never been made a legal tender by act of Congress; they are current, however, in many parts of the United States at the rates specified in the tables.

The dollar of Mexico, Central America, and Peru is of the silver standard of Spain. That of Mexico usually exceeds, by a minute difference, the weight of the Spanish dollar of the same year. The dollar of Colombia, in all the specimens of it which have been examined, is found, as the table represents, singularly deficient both in standard and weight. Its actual value being, as will be noticed, only 75 cents.

The dollars of Chili and La Plata are of the Spanish standard, but are found inferior in weight to the Spanish dollar.

The Brazilian piece of 640 reas, of the year 1824, bearing the name of the Emperor, may be taken, it is presumed, as a specimen of the national coins. The currency of Brazil is understood, however, to be chiefly supplied by pieces of 960 reas, which are of the value of the Spanish dollar, and, on examination, are perceived to consist of dollars restamped. No coin representing the millrea has been found for assay either in gold or silver. Its value, deduced from either of the above pieces, is 105 cents. Its value, deduced from the new crusado of Portugal, of full weight, is 111 cents. Its value, estimated on the gold coin of Portugal and Brazil of 400 reas, may be stated at 115 cents.

The value, by tale, of the several denominations of foreign coins circulating in the United States, taken in that proportion of their various dates which actually obtains, is not precisely the mean of the several values given in the tables, but approximates nearly to it. The earliest dates, it will be found, occur most rarely, and affect, therefore, in a less degree the general result. The average value of the emissions of any series of years may be considered as exhibited in coins of the year anterior to the latest date of that series by one-third of the whole period. This principle has been investigated more perfectly in relation to the Spanish dollar and its parts, but appears to be applicable, with all desirable strictness, to other foreign coins.

It is to be observed that the actual value, by tale, of the several coins specified in the tables pertains to them only when they are of their genuine standard and of the weight mentioned, when divested of all earthy or other extraneous matter. Large masses of those coins generally fail, therefore, to give precisely corresponding results; their weight consisting, in part, of impurities which water will discharge equal to about one-fourth of a grain on each dollar long in circulation, and some of their number being partially base or wholly base. The effect of this may be estimated at one base dollar in two thousand of all those hitherto deposited at the Mint.

The question remains to be considered at what rate the several coins examined may justly be made a legal tender.

In general it may be considered just to make foreign coins a legal tender at the rate of the fine metal they contain, estimated according to the standard and denominations of the national currency; and accordingly certain foreign coins have been made a legal tender in the United States at their supposed actual value, which has been occasionally modified, conformably to the result of assays instituted for the purpose of effecting such corrections.

Conformably to this principle, taken without limitation, the actual value of the several foreign coins specified in the tables would determine their just rate as a legal tender, and a reference thereto would satisfy the inquiry. It is, however, apparent that a system thus various and involved would, by reason of its inexpediency, have the effect of being unjust. Some discrimination is therefore to be adopted on considerations applicable in the case, and tending to control the general principle by salutary restrictions. Among these restrictions are conceived to be the following:

That foreign gold coins, as heretofore, be made a legal tender only by weight; that no foreign gold coins be now made a legal tender, unless of standards which have become familiar to the community; that no foreign silver coins be made a legal tender which may be expected to occur but rarely in circulation; that no foreign silver coins be made a legal tender but such as, in computation by tale, associate readily with the denominations of the coins of the United States; that no foreign coins be made a legal tender at a value which may induce the exportation or destruction of our own in preference to foreign coins.

Within the above limitations, and in obedience to the resolution of the Senate, I respectfully submit a selection from the gold and silver coins specified in the tables, which may, it is believed, justly be made a legal tender, and at the following rates, severally, viz: The gold coins of Great Britain, Portugal, and Brazil, of their present standard, at the rate of $88\frac{89}{100}$ cents per pennyweight; the gold coins of France, of their present standard, at the rate of $87\frac{35}{100}$ cents per pennyweight; the gold coins of Spain, Mexico, and Colombia, of their present standard, at the rate of $84\frac{25}{100}$ cents per pennyweight; the milled dollars of Spain, Mexico, Central America, and Peru, of their present standard, at the rate of 100 cents for a dollar, of which the weight shall not be less than seventeen pennyweights and seven grains; and the parts of the Spanish dollar at the rate of 50 cents for each half dollar, the weight of which shall not be less than eight pennyweights and thirteen and five-seventh grains, and in proportion for the subordinate divisions thereof: *Provided*, That the said parts and divisions of the Spanish dollar shall not be a legal tender at the above rate for a greater amount than ten dollars in any one payment.

On the principles adopted in this selection the ducat is excluded—a coin of rare occurrence in the United States, and of a standard unknown in our currency. The silver coins of Central America are admitted, but not the gold, of which no specimens have been found for an assay. The gold coins of Colombia are admitted, but not the silver, of which the specimens thus far exhibited are of anomalous standard and weight. The gold and silver coins of Chili and La Plata are omitted; the gold coins of neither having been tested in any specimens of very recent date, and the dollars of both hitherto tried being inferior in weight to the minimum assumed for the dollars embraced in the selection. The pistareens and the silver coins of Great Britain, Portugal, and Brazil are excluded, presenting standards diverse from any hitherto recognized in our currency, or values not well adapted to the denominations of the coins of the United States. The crowns and five-franc pieces of France are also excluded; the first ceased in 1793 to be issued, are now of rare occurrence, and their average weight, no longer sustained by new emissions, has very sensibly diminished, those of the latest dates being below the weight assumed in the acts making them a legal tender. Both the crown and the five-franc piece are assimilated with difficulty to our national coinage. If, however, it be deemed expedient further to extend their currency, the French crown may justly be assumed at 109 cents, provided the weight thereof be not less than eighteen pennyweights and fourteen grains; and the five-franc piece at 93 cents, provided the weight thereof be not less than sixteen pennyweights.

Of the silver coins thus proposed to be made a legal tender the following may be taken as the medium intrinsic value, founded on an estimate of the proportion of the several dates of each denomination now circulating in the United States, with a correction of one base coin in two thousand of the whole circulation, viz:

	Cents.	*Mills.*
Carolus dollar	100	$1\frac{1}{2}$
Carolus and Ferdinand dollar	100	3
Ferdinand dollar	100	$4\frac{1}{2}$
Half dollar	49	4
Quarter dollar	24	5
Eighth of a dollar	12	4
Sixteenth of a dollar	6	$1\frac{1}{2}$
Mexican dollar	100	6
Central American dollar	100	$5\frac{1}{2}$
Peruvian dollar	100	$5\frac{1}{2}$
French crown	109	4
Five-franc piece	93	$1\frac{1}{2}$

It will be observed that all the above mentioned coins, except the divisions of the dollar, are of a higher medium value than the rate proposed to be assigned to them as a legal tender. This reserve has been generally evinced in the acts of Congress making foreign coins a legal tender by tale. An inspection of the tables proves that it has not been too rigid. The value of the Spanish dollar, which constituted the mass of the currency in 1793, was at that period about 100 cents five mills. It is now less than 100 cents; and, within the circle of its influence, operates to repel the national coins of recent

emission or consign them to the crucible. The highest in value of the dollars now suggested as a legal tender will, in thirty years, be reduced to 100 cents by the ordinary effect of circulation.

The average loss on a silver currency, it appears, is nearly four grains of silver from the dollar, or about one cent in value in a period of fifty years. The loss on gold coin, it may be incidentally remarked, appears, by the most instructive ranges in the tables, those of the guinea and Johannes, to be not less than two per cent. within the same period. The divisions of the dollar, being auxiliaries to the general currency by performing the lighter offices of coin, are in more constant action and lose proportionally more. The loss on the Spanish half dollar on this account, it will be perceived, equals that on the dollar; the quarter loses in the same time about eight mills; the eighth, five mills; and the sixteenth, four mills.

The difficulty of sustaining the smaller denominations of a metallic currency at their nominal value suggests the expediency of protecting them, under judicious limitations, by legislative favor. The principle now proposed in relation to those coins is the most satisfactory that has occurred after much reflection. It estimates them, by a facile proportion of seven dollars for six ounces, at a minute excess above their intrinsic value as bullion, according to the rigorous determination of that value now presented in the tables, of $116\frac{1}{16}$ cents per ounce. This gives for the value of 8 pennyweights and $13\frac{5}{7}$ grains $49\frac{757}{1000}$ cents. The difference between this and their nominal value is scarcely appreciable in a single coin of the subordinate denominations, and is less than $2\frac{1}{2}$ cents on the amount proposed as the maximum of their legal tender.

The divisions of the Spanish dollar are performing a very useful service in our currency, and cannot conveniently be dispensed with until more copious emissions of the smaller denominations of our national coins have been diffused through the United States.

In presenting the above modifications of the foreign currency of the United States, the suggestion is with deference submitted that all the varieties of the dollar now proposed to be admitted as a legal tender, appear to be at present an acceptable tender wherever they are known in the United States. They are received universally, it is believed, by the banks at the rate of the Spanish dollar, as are the gold coins of the Spanish American States generally at the rate per pennyweight of the gold coins of Spain. It may also be deserving of remark that, while all those varieties of the dollar, from their ready association with the denominations of the national coinage, without the sanction of a legal tender, circulate freely by popular consent, the French crown and five-franc piece, though sustained by legal provisions, have been received but partially and reluctantly into our currency.

It appears necessary to recur for a moment to the subject of foreign gold coins generally. The premium on those coins so frequently referred to renders it manifest that gold cannot now be retained in circulation. It is apparent to casual observation that it forms no part of our ordinary currency.

By an act of Congress of March 3, 1823, the legal tender of certain foreign gold coins, which had before been general, was restricted to payments on account of public lands. It appears from authentic sources that the amount received in those coins, under this special designation of their use, has borne no sensible proportion to the payments of the whole interval, and presents few evidences of their existence in the payments of the last year. The general proportion for the whole period, according to the communications received, does not exceed one dollar in gold to one hundred dollars. The proportion within the last year, it is believed, does not exceed one dollar in gold to one thousand dollars received in payments on account of public lands.

An inquiry, it is perceived, arises on the preceding facts whether foreign gold coins may not justly be made a legal tender at a higher value than that heretofore and now assigned to them.

The value assigned to them is that of the gold coins of the United States when the foreign coin is of the same standard, and in proportion for inferior coins. This inquiry is therefore arrested by the higher question of the expediency of changing the relation which gold bears to silver in the coins of the United States—a question of no trivial moment, and, in some of its aspects, delicate—one which, it is conceived, was not intended by the resolution of the Senate to be presented on this occasion, and on which, therefore, I am restrained, by respectful considerations, from indulging in any discussion or obtruding an opinion.

I have the honor to be, with great respect, your obedient servant,

SAM. MOORE.

Hon. Richard Rush, *Secretary of the Treasury.*

19TH CONGRESS.] **No. 768.** [2D SESSION.

IMPORTATION OF SHEEP'S WOOL ON THE SKIN.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 17, 1827.

TREASURY DEPARTMENT, *January* 16, 1827.

SIR: In further compliance with the resolution of the House of Representatives of the 11th of December, 1826, referred to in the communication from this Department of the 21st of the same month, which directed the Secretary of the Treasury "to report to the House whether sheep's wool on the skin is allowed to be imported free of duty, and how much of said wool has been imported during each of the last two years," I have the honor to transmit a letter from the Comptroller and copies of his correspondence with the Collectors of the Customs to which it refers.

I have the honor to remain, with the highest respect, your obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives.*

TREASURY DEPARTMENT, *Comptroller's Office, January* 15, 1827.

SIR: In compliance with the promise in my report to you, under date of the 19th ultimo, a communication was addressed to some of the Collectors of the principal districts requesting them to furnish a statement of the sheep's wool on the skin which was imported into their districts, respectively, during each of the last two years.

I have the honor now to transmit herewith copies of the answers which have been received, being numbered from 1 to 6.

With considerations of high respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

CUSTOM-HOUSE, *New York, Collector's Office, January* 3, 1827.

SIR: I have received your letter of the 20th ultimo requesting information as to the quantity of sheep's wool imported on the skin. In reply, I have to state that no account has been kept in this office of sheep's wool on the skin, and it would be next to impracticable to ascertain the quantity; however, this much is known, that the quantity of wool thus imported is very small when compared with the same as imported without the skin.

With great respect, I remain your obedient servant,

JONATHAN THOMPSON, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

CUSTOM-HOUSE, *Baltimore, Collector's Office, December* 23, 1826.

SIR: Your letter of the 20th instant, requiring information on the subject of sheep skins imported with the wool on, was received yesterday, and we have given it the attention that was due to the importance it has been allowed in the Congress of the United States; but we can add nothing to the statement contained in my letter of 20th April last upon the subject. The article has been scarcely

known here, and when presented to our notice, as before observed, it was perhaps only for floor mats, or cleaners, put at entrances of houses. But for whatever use they may have been intended, if brought here from a foreign port we took good care to exact the appropriate duty, and go to the very skin, for whatever it would yield, as close as any manufacturers.

I beg your indulgence in a little hastiness, and remain, with much personal respect, sir, your obedient servant,

JAMES H. McCULLOCH.

JOSEPH ANDERSON, Esq.

No. 5.

DISTRICT AND PORT OF NEWPORT, *Collector's Office, December* 26, 1826.

SIR: There has not been an importation of sheep's wool on the skin at this port during the last two years.

Most respectfully, sir, your most obedient servant,

CHRIST. ELLERY, *Collector.*

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 6.

COLLECTOR'S OFFICE, *Providence, December* 26, 1826.

SIR: No account of the quantity of sheep's wool on the skin has been kept in this district, and it is believed none has been imported here within the last two years.

I am, sir, very respectfully, your obedient servant,

THOS. COLES, *Collector.*

JOSEPH ANDERSON, Esq., *Comptroller of the Treasury.*

No. 7.

APPRAISERS' OFFICE, *Boston, December* 27, 1826.

SIR: I find on inquiry that South American sheep skins, with wool, are worth 18 to 19 cents each. The expense of pulling the wool is about 10 cents each, and produce one and a half pound of wool.

The pelt will generally pay the expense of taking off the wool. Danish skins, with wool, are worth 34 cents each, and will yield about two pounds each. The expense of pulling is as before stated.

The above are the only kinds of skins with wool that have been imported into this district, to my knowledge, and the quantity has been small.

Respectfully, your most obedient servant,

ISAAC WATERS.

H. A. S. DEARBORN, Esq., *Collector.*

No. 8.

COLLECTOR'S OFFICE, *District of New London, December* 30, 1826.

SIR: I had the honor to receive your letter, under date of 20th instant, directing me to furnish, if in my power, the quantity of sheep's wool on the skins imported into this district during the years 1825 and 1826.

There has been but one importation for the two years mentioned, which was a small adventure from Bermuda, in September last, of very coarse wool. I sent one of the largest dealers in skins, with the surveyor, Mr. Champlain, on board the vessel to examine the skins, and they were adjudged by them to be 132 pounds of wool, at 5 cents per pound, which agreed with the invoice cost of the skins at Bermuda as nearly as could be ascertained.

I have the honor to be, with great respect, your obedient, humble servant,

RICHARD LAW, *Collector.*

Hon. JOSEPH ANDERSON, *Comptroller of the Treasury.*

No. 9.

CUSTOM-HOUSE, *Boston, December* 30, 1826.

SIR: In addition to the information communicated in my letter of this date, I enclose a statement from the appraisers relative to the quality and value of the sheep skins and wool *in this country*, which was not received in time, before the closing of the mail, to accompany my letter.

They state, also, that none of the kind of wool imported on the skins was worth, *in the country where obtained*, more than nine cents, and most of it not over eight cents per pound.

Very respectfully, your most obedient servant,

H. A. S. DEARBORN.

JOSEPH ANDERSON, Esq.

No. 10.

CUSTOM-HOUSE, *Boston, December* 30, 1826.

SIR: Your communication of the 20th instant has been received.

The number of sheep skins imported in 1825 was 14,767, and the wool on them was estimated to weigh ..... 27,568 pounds.

The number imported in 1826 has been 15,245, and the wool on them is estimated to weigh 26,926 do.

Total number of pounds 54,494

These skins came from South America and the Baltic, and the wool was of an inferior quality, a large portion of it being worth less than ten cents per pound at the places where obtained.

Very respectfully, your most obedient servant, H. A. S. DEARBORN, *Collector.*

Jos. ANDERSON, Esq.

STATEMENTS IN RELATION TO EXISTING AND PROPOSED DUTIES ON WOOLEN GOODS.

SUBMITTED BY MR. CAMBRELLING TO THE HOUSE OF REPRESENTATIVES.

List of the sterling cost of woolen goods, and the duty on them, under the present tariff and the proposed one.

19 0 to 25 0	60 inches.....	37½ per cent.....	57 to 43 per cent.

LIST—Continued.

Articles.	Present duty.	Proposed duty.
Woolen goods to pay a duty on 40 cents the square yard.	*Per cent.*	*Per cent.*
PLAINS.—These are coarse blue cloths, costing from 8*d* to 1*s.* 3*d.* per yard; worn generally by sailors, watermen, and by the negroes in the Southern States.....	27½ to 37½	75 to 40
PADDINGS.—These are coarse cloths, used principally in stiffening coat collars, costing from 6*d.* to 1*s*.....	27½ to 37½	75 to 40
FLANNELS.—The lower qualities are used by the laboring classes, and costing 4*d.* to 1*s*.....	37½	75 to 40
BOCKING, BAIZES, AND SERGES.—The lower qualities are used by the laboring classes, and costing 4*d* to 1*s*.....	37½	75 to 40
CAROLINE PLAIDS.—An article composed of cotton and wool, not manufactured in the United States, and of which there is a great quantity consumed by the laboring and middle classes.....	37½	75 to 40
COATINGS AND LION SKINS.—Worn by sailors, watermen, farmers, and the laboring classes.....	37½	55 to 40
LOW-PRICED BROADCLOTHS.—Used by the same people as plains, costing from 1*s.* 10*d.* to 2*s.* 3*d.*.....	37½	45½ to 37½
Woolen goods to pay a duty on $2 50 per square yard.		
DRAB KERSEYS.—A large quantity of this article is imported, and costing from 1*s.* 4*d.* to 5*s.* It is 27 inches wide; consumed by sailors, watermen, fishermen, farmers, mechanics, &c.....	37½	224 to 62
FOREST CLOTHS.—Costing the same as the above, and consumed by the same people.....	37½	224 to 62
CASSIMERES.—Costing from 3*s.* to 5*s.*; worn by all classes of people.....	37½	103 to 62
BROADCLOTHS.—Costing from 2*s.* 4*d.* to 6*s.* These prices include a very large proportion of woolens imported.....	37½	219 to 103
FLANNELS.—The better qualities will pay the higher duty.....	37½	224 to 156
PELISSE CLOTHS AND COATINGS.—Costing from 2*s.* 4*d.* to 6*s.* Neither of these articles are at present manufactured in the United States.....	37½	219 to 103
BLUE PLAINS.—Costing from 1*s.* 4*d.* to 3*s*.....	37½	224 to 103
WOOLEN SHAWLS.—An article not manufactured here, and worn principally by the laboring people.....	37½	224 to 103
MIDDLE PRICED AND FINE BROADCLOTHS.—Costing from 6*s.* to 16*s.* 9*d*.....	37½	103 to 41
Woolen goods to pay a duty on $4 the square yard.		
BROADCLOTHS—Costing from 19*s.* to 25*s*.....	37½	57 to 43

These calculations are made the same as the duty is now paid in New York. There may be errors in them, but the proposed duty is under stated. What is called 33⅓ per cent. under the present tariff is, in fact, 37½ per cent. The way in which the duty is calculated is as follows:

Take an invoice amounting in England to	$100 00
Two per cent. is added for charges at the shipping port.....	2 00
	102 00
Then the ad valorem duty of 10 per cent. added, is.....	10 20
	112 20
Then the 33⅓ per cent., or one-third, is taken.....	37 40

Leaving $37 50 within ten cents; but before the goods are clear of the custom-house the duty and expenses will invariably exceed $37 50; on coarse goods it will be 38 per cent.

19TH CONGRESS.] No. 769. [2D SESSION.

DUTY ON IMPORTED SALT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 23, 1827.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned, having been named as a committee to draught a memorial to Congress on the subject of the repeal of the duty on salt, humbly show:

That the distress of the Revolution and the high price and want of salt led some enterprising individuals to attempt to make it from sea-water by solar evaporation; that at that time, when salt sold for three or four silver dollars per bushel, the manufacture partially succeeded. After the revolutionary war, until the year 1804, a very considerable increase and improvement was made in the manufactories; at that time the salt tax was repealed. The State of Massachusetts, perceiving the situation in which this important manufacture was placed, and well remembering revolutionary sufferings for the want of that necessary article, immediately passed a law entirely exempting the manufactories of salt from all taxation, which law continued in force until lately. The manufactories continued, and, in consequence of our difficulties with Great Britain, were tolerably prosperous until the year 1814, when a law passed Congress laying a duty of twenty cents per bushel. Since the year 1814 the manufactories have constantly increased until the present day. Improvements in the manufacture have from time to time been made until the present. At this time the salt manufactured is generally of the best quality, and is done with as little labor and expense as circumstances will admit. At the present price of salt the manufactories afford a moderate profit, which can readily be understood when we state that as many as can be placed upon one acre of land would be sufficient to manufacture about 450 bushels of salt and would cost $1,500, and that they are liable to be injured by wind and need frequent repairs. In addition, the water must be pumped from the ocean, and these vats carefully covered at night to avoid rain and dews. These manufactories, extending from the State of Rhode Island to Cape Anne on the seaboard, afford an opportunity to those who have been engaged in navigation, when they retire from business, by reason of age or other circumstances, if they can raise a small capital, to invest it in a salt manufactory. There are hundreds who have no other means of living; they have a small capital invested in salt-works, and with their labor in tending them they obtain a living.

Permit us to express some surprise that a report has been laid before the Senate stating that, "notwithstanding the duty on salt, its manufacture on the seaboard has declined rather than increased." This statement we consider as entirely a mistake. Some small manufactories may have declined and gone to decay; we have known of a few; but we have no hesitation in saying, for we know the fact, (some of us being conversant with every part of the seacoast in the Union,) that the salt manufactories on the seacoast have more than doubled within seven years past, and more than twice the quantity of salt is now manufactured from sea-water than was manufactured seven years ago. Nor is the manufactory inconsiderable. We have in the county of Barnstable fifteen millions of feet of vats, worth, at a fair estimate, $1,300,000. Each manufactory is entirely separate, and there are more than 1,000 owners.

Depressed as commerce has been for some time past, we know that on return voyages the merchants are anxious to bring salt. They have brought it until the market has been glutted with the imported salt and our domestic salt. The effect has been the depression of the price; it has gradually fallen from 60 to 50, 40, and this year good salt has not brought more than 33 cents per bushel at the manufactories. Owing to the weather the last year our crop was small, and as the price was low our income from salt was small. We were aware that the merchant who imported salt complained and the manufacturer complained of hard times. The competition is severe, but both must continue to struggle, if possible. If the manufacture be abandoned, all the capital must be lost. This might benefit the importer, for, having got rid of competition, he might make better profits. The manufacturers and importers have been complaining of the low price of salt, but we were surprised that the farmers and purchasers also complained. We have supposed that all duties and imposts were laid mainly with a view to revenue, and that the encouragement of any particular manufacture was a secondary consideration. Be that as it may, a duty was laid on salt in 1814, and has been continued to this time. What effect that duty has had upon the price we are unable to determine, but under it our salt manufactories have grown up. We have an extensive seacoast, affording an abundant opportunity to others to engage in the business. Salt springs abound in the interior. If it be a necessary article, why should we not manufacture it ourselves and be independent of foreign nations? We therefore pray Congress to consider what good reason there can be for destroying our only manufactories, while all others are encouraged. We do not complain if others are protected, nor pray for an increase of duty. But we are confident that for a few years past the salt manufactories have greatly increased, and that the present price is the very lowest for which it can be afforded. If, therefore, the duty be partially repealed, it must be partial ruin; and if wholly repealed, total ruin and a total loss of the capital invested.

19TH CONGRESS.] No. 770. [2D SESSION.

FRAUDS IN THE IMPORTATION OF WOOLEN GOODS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 25, 1827.

TREASURY DEPARTMENT, *January* 24, 1827.

SIR: In obedience to that part of the resolution of the House of Representatives of the 22d instant, which directs the Secretary of the Treasury to inform the House, if the information be attainable, of "the quantity of manufactures of wool, or in which wool is a component part, (except worsted stuffs and blankets,) imported in the several years between the 30th of September, 1820, and 30th of September, 1826, designating, so far as may be, the quantity of such manufactures which cost not more than forty cents the square yard, the quantity which cost not more than one dollar the square yard, and the quantity which cost one dollar and fifty cents the square yard," I have the honor to transmit herewith a report from the Register, dated yesterday, by which it appears that the information sought cannot be furnished by the Treasury, as the returns from the custom-houses exhibit only the *value* of goods subject to *ad valorem* duty.

For reply to the remainder of the resolution, which directs the Secretary to inform the House whether there is any evidence in the Department "to prove the existence of frequent frauds or evasions of the revenue laws by false valuations or descriptions of such goods, (those specified in the former branch of the resolution,) and if so, to what extent and amount," I beg leave to state that there is no evidence, of record in the Department, of the nature indicated. Verbal representations to that effect were, however, made to it by respectable persons during the latter part of last and the beginning of the present month. These representations it was not thought proper to disregard; and in order to call the attention of the Collectors promptly and specially to them, a circular letter was addressed to these officers at the principal seaports, viz: at Boston, New York, Philadelphia, Baltimore, Norfolk, Charleston, Savannah, and New Orleans, dated the 6th instant; and under the same date a separate letter was addressed to the Collector of New York, the port against which the allegations of fraudulent importation, touching the goods in question, were mainly directed. Copies of these letters are enclosed, together with copies of the answers from the Collectors of New York and Baltimore, being all that have as yet been received. This correspondence comprehends all the information of which the Department is at present in possession on the subject-matter of the latter clause of the resolution.

I have the honor to remain, with great respect, your obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives.*

TREASURY DEPARTMENT, *Register's Office, January* 23, 1827.

The Register of the Treasury, to whom was referred so much of the resolution of the House of Representatives of the 22d instant as relates to furnishing "the quantity of manufactures of wool, or of which wool is a component part, (except worsted stuffs and blankets,) imported in the several years between the 30th of September, 1820, and 30th of September, 1826, designating, so far as may be, the quantity of such manufacture which costs not more than forty cents the square yard, the quantity which costs no more than one dollar the square yard, and the quantity which costs one dollar and fifty cents the square yard," respectfully reports that there are no materials in the Treasury which will enable the Department to furnish the information called for by the resolution, as the returns from the custom-houses exhibit only the value of such articles as are subject to *ad valorem* duties.

JOSEPH NOURSE, *Register.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *January* 26, 1827.

SIR: In addition to the circular which you will receive under this date, it is proper I should mention that accounts have reached the Department, through other channels than the newspapers, that woolen cloths entered at the custom-house in New York have had the value put on them abroad in an unfinished, or apparently unfinished state, upon the basis of which value the duty is computed; and that afterwards, by some slight process of finishing, they are brought up to a value out of all proportion to the expense of such finishing; in which state of augmented value, after having thus defrauded the revenue, they are thrown upon the market, to the injury of the American manufacturer. I have therefore to draw your special attention to this subject, by which it would appear that the whole intention of the act of Congress of the 1st of March, 1823, is in danger of being defeated. It is expected that you will be extremely vigilant in your efforts to detect all such expedients to get the better of the law, enforcing promptly the penalties of its thirteenth section wherever this can be done, and making immediate representations of all the circumstances of the case to this Department where it cannot be done.

I remain, respectfully, your obedient servant,

RICHARD RUSH.

JONATHAN THOMPSON, Esq., *Collector, New York.*

TREASURY DEPARTMENT, *January* 6, 1827.

SIR: Representations have been made to this Department that, in the entries of foreign merchandise imported into the United States, the duties, through various devices and evasions still practiced on the part of the importers, are frequently charged upon an under valuation of the merchandise, whereby the revenue is defrauded, and the interest of our home manufactures injuriously affected. These representations have not been made in a shape sufficiently definite to be given to you in detail, but they have proceeded from sources too respectable to be disregarded.

It is therefore deemed proper to advise you of them, and to make this letter circular to the Collectors of the principal seaports. Its object is two-fold: First, to recall your attention to the act of Congress of the 1st of March, 1823, and particularly to the fifth and thirteenth sections of it, in order to the most rigid execution of their provisions, and the most scrutinizing inquiries into the artifices that may be resorted to to defeat them. Secondly, that if, in your opinion, any new act or modification of the present one is necessary to secure a more strict and faithful valuation of foreign merchandise paying *ad valorem* duty, you will communicate that opinion to this Department, in connexion with the facts and remarks that may serve to shed the best light upon it.

I remain, very respectfully, your obedient servant,

RICHARD RUSH.

CUSTOM-HOUSE, COLLECTOR'S OFFICE, *New York, January* 12, 1827.

SIR: I have received your circular, and another letter of the 6th instant, relative to frauds having been committed on the revenue, particularly at this port, in the importation of woolen goods, being invoiced below their true value, either in a finished or unfinished state. No such importations have come to my knowledge, excepting a few importations of stuff goods, the greater number of which have been submitted to you under the second appraisement. If there have been any, they must have been trivial indeed, for I have personally, from the commencement of my duties in this office, inspected the entries and invoices of goods subject to *ad valorem* duties, and designated the particular packages for the examination of the appraisers, who, I am confident, have carefully and faithfully attended to the values of the merchandise sent to them for examination. I have referred the aforesaid communications to the appraisers, and herewith transmit their report, by which you will see how much foundation there has been for the representations and communications made. With the report of the appraisers, and their suggestion relative to bounties and discounts on British linens, I accord. The importation of British woolen goods during the last year was comparatively small to that of the preceding year, and generally at a loss, as was frequently stated, of 20 to 25 per cent. to the importer I do not perceive how it could be otherwise, as our manufacturers could buy their wool as cheap as those of England; they could card, spin, and weave as cheap; the dyeing and finishing is probably less in England. Against this advantage our manufacturers have the duties of 33½ per cent. *ad valorem*, packing, transportation, freight, insurance, interest, commission, and a difference of 10 to 12 per cent. in the exchange; all of which charges would operate as a bounty of about 50 per cent. in favor of our manufacturers. I have often heard persons concerned in British woolen manufactories say that they could manufacture their goods at less cost in this country than in England, and that they were disposed to transfer their establishments to this country, but the only difficulty in the way was in disposing of their property there without a very great sacrifice.

The *ad valorem* duty on imported wool is quite too low; it should be a specific duty of ten cents per pound, as the farmers of our country can produce all that is necessary for our manufactories, and also for exportation, provided encouragement was given them. As it now is, we receive the refuse of almost all the markets in the world, and the article is imported in a very dirty and filthy state. The quantity and quality tends to depress the value of that which is good and clean, whether imported or produced in our country. Our manufacturers and consumers both suffer, as a prime or good fabric cannot be made from bad or inferior materials.

I remain, with great respect, your obedient servant,

JONATHAN THOMPSON, *Collector.*

Hon. RICHARD RUSH.

APPRAISERS' OFFCE, *New York, January* 11, 1827.

SIR: From certain publications preceding the application of the woolen manufacturers for an alteration of the tariff, we were prepared to expect the communications made by the Secretary of the Treasury under date of the sixth instant, and we have been endeavoring to ascertain the direction of the party to whom his suspicions or information might reasonably attach.

That impositions to a limited extent, not sufficiently gross to be met by the provisions or penalties of the law, may be occasionally practiced upon this and other custom-houses in the United States, we cannot reasonably doubt, because the difference between *possible purchases for cash* and actual purchases on long payments by persons of questionable credit, under the present commercial and manufacturing distresses in the foreign market, enables the latter class of purchasers to misrepresent prices in their invoices, and state them much below actual cost, without any means of detection by the custom-houses here. But that any considerable amount of importations has passed this custom-house below *possible prices*, the examinations under our superintendence authorize us confidently and unequivocally to deny.

According to our best recollection, few or no cloths have been imported from England denominated by invoice "*unfinished cloths.*" There are, however, occasional importations made by an English merchant here, (not called "*unfinished cloths,*") who has erected a brushing establishment for the purpose of *re-polishing* cloths, which, from the insufficiency of their original polish, from their lying long unsold in warehouses, or from any other cause, require a better face in order to exhibit them more attractively to purchasers at our auction stores. The goods imported by the owner of this establishment have undergone

a careful scrutiny at our office; but we have never discovered in their materials, texture, or prices, any reasonable grounds to question the correctness of his invoices.

From the intimate knowledge you have of the course of business under our charge, you must be sensible that if satisfactory cause existed for the extravagant rumors which have reached the Treasury Department we should long since have been apprised of it, either by private or other communications from those immediately aggrieved; especially as we offer inducements for such communications, by adopting instant measures for the correction of abuses, and by uniform and constant expressions of thanks to those who thus enable us to disarm fraud of its mischief, and to arraign it for punishment. But, in this case, the respectable gentlemen who are possessed of the secret have made no communication to us; nor are we enabled from our own inquiries to distinguish any one in this community, or connected with importations here, to whom we can reasonably ascribe the *unpunished frauds* which have been made the subject of this formal representation to Government.

With regard to modifications of the present tariff, (if it be proper for us to speak,) we believe we could suggest several amendments tending to simplify and facilitate the collection of duties; and so far as impositions upon the revenue are concerned, we do not hesitate to say that the most serious one consists of the indulgence allowed by law and practice towards foreign bounties, especially on British linens, which, by reducing their price on exportation in many instances thirty per cent., deprives the revenue of its legitimate ratio of duty, and enables the foreign artisan to labor for one of our staple supplies upon terms at least equal, if not more favorable than our own.

Very respectfully, your obedient servants,

ABRAHAM K. LAWRENCE.
FREDERICK JENKINS.

JONATHAN THOMPSON, Esq., *Collector.*

CUSTOM-HOUSE, *Baltimore, Collector's Office, January* 10, 1827.

SIR: Your letter of the 5th instant was received here this morning, and is declared to be intended for a circular to the Collectors of the principal seaports. As such it would need no answer, but a dutiful attention to the injunctions it contains. These, however, being the observance of laws that have long been the rule of our actions, it might only perhaps be necessary to assure you of our readiness and zeal to execute them, and especially the provisions of the act to which you call our particular attention. The appraisers of this port seem sufficiently alert and skilful in the performance of their duties, and the officer charged with the squaring of such goods as are subjected to it by law is observant and careful of their qualities, &c., as well as that circumstance. The invoices of the importers are all in their hands, and the operations of each enlarge the sphere of examination beyond the simple letter of the law. They result, indeed, in a double examination in most instances, especially when it is further observed that upon exportation another examination takes places. Upon the whole, there appears nothing for us to communicate, agreeably to the direction in the conclusion of your letter, that would tend to secure a more strict and faithful valuation of merchandise paying ad valorem duty. There is no objection to more specific duties, except that they will require more officers, and that, beside the expenses to the public and to individuals, the importers are more incommoded, (perhaps it might be said harassed,) than they are at present; with little more advantage than that it would compel those who now talk of "devices and evasions, frauds on the revenue, and injuries to home manufactories," to shift their ground a little and change their surmises. This they can easier do than the enactment and execution of laws can be made satisfactory; particularly as you observe, "these representations are not in a shape sufficiently definite to be given us in detail." However respectable the sources of these may be, we cannot but observe that our experience does not correspond with them; and we feel bound to make an explicit declaration, in respect to the mercantile body with whom we communicate, that no body of men, in any occupation, appears better to deserve our faith and commendation than they. We have many spontaneous acts in cases against their pecuniary interests, and information of their receiving what never would be known but by their own declaration, and every assistance given us in investigations of doubtful cases. We have further to say that we have lately instituted particular inquiries upon the importations of foreign houses here, and have been assured by intelligent native merchants, importing largely on their own accounts, that the invoices of goods from English owners and manufacturers are almost universally above their value—it being erroneously supposed by them that high prices will effect proportionately better sales.

It will not be without the scope of present consideration, and I beg leave to say that overwrought and strained laws and regulations will finally fail, either by their own tension breaking, or relaxing powerless. Such laws will not be long executed thoroughly. And it is probable that the examinations of goods being much multiplied, some of them will be neglected or slurred over. Such are those of goods transported coastwise, small articles, as wood screws, tacks, wire, &c., of little value, and enclosed in large packages of ironmongery, which must be opened, with great trouble and inconvenience to merchants and officers, to ascertain the weights, numbers, &c. They are too probably taken by the invoice account to save the trouble and vexation. There is nothing lost, I imagine, by this; but it has a bad effect as regards the laws. It would be better to suffer some loss, if it were actually so, than to weaken the moral effect of laws. Such things have been suggested by those who are neither moralists nor politicians, whose object is a conjectural, and at best a pitiful gain.

I remain, sir, respectfully, your obedient servant,

JAMES H. McCULLOCH.

RICHARD RUSH, Esq.

19TH CONGRESS.] No. 771. [2D SESSION.

PROTECTION TO WOOLEN MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 1, 1827.

REPORT.

COMMONWEALTH OF MASSACHUSETTS.

IN HOUSE OF REPRESENTATIVES, *January* 26, 1827.

The Special Committee of the House of Representatives, to which was referred so much of the Governor's message as relates to the depressed state of our woolen manufactures, have taken the same subject into consideration, and respectfully report:

That your committee are deeply impressed with the importance of our woolen manufactures as a source of wealth to this Commonwealth, and as essential to that real independence of foreign nations by which our national resources are to be made adequate to supplying us with every indispensable commodity. Your committee have reason to believe that a large amount of capital is already invested in woolen manufactures, which now give employment and support to thousands of our citizens, and that an additional amount of capital will seek similar investments if our manufactures obtain relief from their present embarrassments.

This relief must proceed from measures devised and adopted by the wisdom of Congress, and calculated to protect our own manufactures from the ruinous competition of an overgrown foreign manufacturing interest. To Congress is given, by the Constitution, the power to "regulate commerce;" and your committee cannot doubt that, in the existing emergency, Congress will exercise this power in the manner most conducive to the mutual benefit of our manufacturing, agricultural, and commercial interests. The period has gone by when it can be successfully urged that the protection of the first of these great interests must be injurious to the others. Commerce and agriculture find their best resources and support in manufacturing industry and its results, and, reciprocally, manufactures create new markets for the products of agriculture and commerce, and breathe new life into the labors of the husbandman and the enterprise of the merchant. To the wisdom of Congress, therefore, your committee look for such measures as are calculated to relieve our woolen manufactures in their present depressed condition, and they accordingly recommend the adoption of a resolve herewith submitted.

Per order of the committee.

JOHN BRAZER DAVIS, *Chairman.*

"*Resolved*, That the House of Representatives of the Commonwealth of Massachusetts is deeply impressed with the importance of our woolen manufactures as a source of national wealth and power, and have full confidence in the wisdom of Congress to devise and adopt such measures as shall relieve them in their present depression."

BOSTON, *January* 26, 1827.

DEAR SIR: As it is possible that the fate of the new tariff on woolens may not have been decided on the receipt of this letter, and conceiving that a few statements of facts may be of some service to us, I take the liberty of forwarding to you two votes passed yesterday by the Wolcott Woolen Manufacturing Company, in consequence of the great losses they have met with during the past year, their accounts having been made up to the 31st December, 1826, and show a loss of more than ten per cent. upon their capital stock, not by bad debts, as they do not exceed one hundred dollars, but in consequence of the large quantity of woolens sent to this country from England and Germany, and sold at auction at a very great loss, if the fair duties had been paid upon them.

The Wolcott Woolen Manufacturing Company have been incorporated several years; they have the most approved machinery, and the cloths made at the factory have been sold from $1 75 to $10 37½ per yard; they obtained the medal of the New England Society for the best cloth exhibited in October last; there has been manufactured at the factory during the past year forty-four thousand five hundred and seventy-five yards broadcloth, valued at from $1 50 to $8 per yard. The losses by other woolen manufactories must be about equal to ours; and we must suspend the business entirely, unless the Government grant us some protection by an increase of duties.

In the factory at Woodstock, to which the second vote refers, we have had in full operation the last year fifteen broad hand-looms and other necessary machinery for making superfine cloths; you will observe that mill is to be closed as soon as possible; and at Southbridge we have had sixteen power-looms and five hand-looms in operation, together with the necessary machinery for finishing, &c. One-fourth part of the hands employed there are to be dismissed immediately, and the wages of those retained are to be reduced; and it is our intention to continue to lessen the number employed until the work is entirely suspended, unless we get some relief from Congress during the present session.

With the hope that you will afford us all the assistance in your power, I remain, with great respect, your obedient servant,

SAMUEL TORREY.

Hon. DANIEL WEBSTER.

At a meeting of the directors of the Wolcott Woolen Manufacturing Company, holden on Thursday, January 25, 1827.

Present: Wm. Payne, president, Ebenezer T. Andrews, John Williams, and S. Torrey.

Voted, That the agent be required to dismiss, as soon as possible, one-fourth part of the hands now employed in the factory at Southbridge; and that the wages of those retained in the employ of the company be reduced, so as to average about twenty per cent. from the prices now paid.

Voted, That the agent be required to have finished all the cloth now in preparation at Woodstock, and to suspend all business there by the 1st of April next, if possible.

A true copy of the record.

Attest: SAMUEL TORREY, *Clerk*.

19TH CONGRESS.] **No. 772.** [2D SESSION.

IMPORTATIONS OF WOOL AND WOOLEN MANUFACTURES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 3, 1827.

TREASURY DEPARTMENT, *February* 2, 1827.

SIR: In obedience to a resolution of the House of Representatives of the 12th ultimo, "directing the Secretary of the Treasury to report to the House an abstract of the quantity and qualities of foreign wool and woolen manufactures imported into this country during the last two years, designating the countries from which imported, and where produced or manufactured, respectively, and whether on foreign account and in foreign vessels, or by citizen merchants, and in their own vessels, together with the invoice prices of each, respectively, and the rate and amount of duties they have paid;"

And, also, "directing the Secretary of the Treasury to report to the House whether any, and if any, what, evasions of the duties imposed by law on imported foreign wool and woolen manufactures have been practiced within the same period, and where, and by whom, and the most effectual means, in his opinion, for preventing in future all such evasions, and on what and how much of each of these commodities, and where and by whom the power to assess and impose duties thereon, at a rate exceeding the invoiced prices thereof, has been exercised and enforced," I have the honor to transmit herewith a letter of the Register of the Treasury, dated the 1st instant, accompanied by three tabular statements, which contain the information required by the first clause of the resolution, so far as the same is afforded by the returns which have been made to this Department.

Under the second clause, I beg leave to submit, as containing the views of the Department upon the several points referred to, a report of the Comptroller of the Treasury, dated the 30th of December, to whom has been assigned, under the provisions of the act of the 8th of May, 1792, the superintendence of the collection of the duties on imposts and tonnage; and as further connected with this branch of the subject, I respectfully beg leave to refer to a former report of this Department to the House, under date of the 24th ultimo, and to the documents which accompanied that report, as presenting information deemed to be within the scope of this part of the resolution.

I have the honor to remain, with the highest respect, your obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives of the United States.*

TREASURY DEPARTMENT, *Register's Office, February* 1, 1827.

SIR: I have the honor to transmit herewith statements exhibiting the value, &c., of manufactures of wool, &c., imported into the United States in American and foreign vessels during the years 1825 and 1826, prepared in pursuance of a resolution of the House of Representatives of the 12th December, 1826.

The Treasury does not possess materials for complying fully with the resolution, as the custom-house returns do not distinguish between importations made by citizen merchants from those on foreign account.

I have the honor to be, with great respect, sir, your obedient servant,

JOSEPH NOURSE, *Register*.

Hon. R. RUSH, *Secretary of the Treasury*.

TREASURY DEPARTMENT, *Comptroller's Office, December* 30, 1826.

SIR: In reply to that part of the resolution of the House of Representatives of the twelfth instant, which you referred to me, and which is in the following words: "*Resolved*, That the Secretary of the Treasury be directed to report to this House whether any, and if any, what, evasions of the duties imposed by law on imported foreign wool and woolen manufactures have been practiced within the same period, (meaning the last two years,) and where, and by whom, and the most effectual means, in his opinion, for preventing in future all such evasions, and in what and how much of each of these commodities, and where and by whom the power to assess and impose duties thereon, at a rate exceeding the invoiced prices thereof, has been exercised and enforced," I have the honor to state that I have no knowledge of any evasions of the kind alluded to having been practiced on the officers of the customs; some of whom, however, according to their views of the exemptions by law in relation to *raw hides or skins*, have admitted sheep skins with the wool on free of duty, on the subject of which a report was made to you by

this Department on the 19th instant, in compliance with a resolution of the House of Representatives, under date of the eleventh of the current month.

With respect to the power which has been exercised and enforced of assessing and imposing duties on foreign wool and woolen manufactures at a rate exceeding the invoiced prices, I have to observe, that the power of making additions to the invoice prices, not only of these particular articles, but of all ad valorem goods, whereby the amount of duty on them is increased, is expressly given by the 11th section of the supplementary collection law of 20th April, 1818, and the 13th section of that of the first of March, 1823, to the appraisers authorized to be appointed under these laws respectively.

It has been considered by this Department to have been the object and policy of these laws to establish a system whereby all importers of the same description, texture, and quality of ad valorem goods would have to pay the same amount of duty; and this, it was conceived, was to be effectuated through the vigilance of the Collectors and appraisers, by obtaining correct information as to the *current market value* of such goods; and if any invoices were presented which were suspected not to exhibit such *value*, to apply the corrective which appraisements afforded.

Instructions, accordingly, were given to these officers; but by a decision of the Supreme Court of the United States, at its last session, in the case of the United States *vs.* Tappan, the words "true value," in the 11th section of the first mentioned act, are to be considered as meaning the *actual cost of the goods*, and not their *current market value;* and, therefore, although a Collector may suspect that goods are invoiced below the *current market value thereof*, yet, if he does not suspect that they are invoiced below *their true and actual cost*, he has no right to direct an appraisement.

The grounds upon which this decision appears to me mainly to rest are, that the purport of the oath to be taken by the person entering ad valorem goods, taking the 4th and 5th sections of that act in connexion, is, that the invoice exhibits the actual *cost* of the goods; that any other construction would place it out of the power of any man to take the oath; and hence, that it would be unreasonable that an importer of such goods should be liable to a penalty because the invoice did not exhibit a fact differing from that to which he was required to swear.

The act of 1818 having, however, expired by its own limitation, it may be proper to advert to the provisions of the act of 1823, which was passed as a substitute for the former, in order to ascertain how far the principles of the decision of the Supreme Court are applicable to the existing law.

By referring to the provisions of the 4th, 5th, 7th, and 8th sections of this law, as to the forms of the oaths to be taken, and the manner in which the ad valorem duties are to be estimated, it will be perceived that it is only in the case of goods actually *purchased* that the invoice is to exhibit the *actual cost*, and the duties are to be estimated with reference to such cost; and not when goods are procured in any other manner than by purchase, or when shipped on a manufacturer's own account, in which cases the invoices are to exhibit the *fair market value.*

The principles of the decision of the Supreme Court are, therefore, considered applicable to the existing law only so far as respects importations of ad valorem goods actually purchased.

But it is with great deference submitted, whether, even in such cases, it would not comport with sound policy to modify that law so far as to give to the Collectors the right to direct appraisements to be made, although they may not suspect that the invoices do not exhibit the *actual cost*, but have reason to believe that they do not exhibit the *fair market value.*

If it be equitable, as to the question between the importer and the Government, that, on all importations of ad valorem goods of the same fabric, texture, and quality, the same amount of duty should be paid; and if this equality cannot be effectuated in any other manner than by appraisements, the propriety of granting the right in question, it is respectfully conceived, will be manifest.

Contemporaneous, however, with a modification in this respect of the existing law it may be considered proper, as the importer is to swear that the invoice exhibits the *actual cost;* and, therefore, it is not reasonable that he should be liable to the additional 50 per cent. specified in the law, because the invoice does not exhibit a different fact, namely, the *fair market value of the goods*, that a further modification should be made, so as to exempt an importer of goods actually purchased from such liability, unless it should be satisfactorily ascertained that the invoice does not exhibit the actual *cost.*

With these modifications in the existing law, importers of goods *actually purchased* would, in the case of appraisements, be subject to pay duties only on such additional amount as the appraisers might adjudge the invoice prices to be below the fair market value of the goods, unless the invoice should prove to be fraudulent, when they would be liable to the additional 50 per cent.

In conclusion, it may be observed that, as the law stands, the oath of the party interested, as to the *cost* of the goods, will generally be received as conclusive evidence, and, on a matter of fact, in relation to which the Collectors, possessing no information, will feel a delicacy in questioning; but if they were, in all cases, left to the exercise of their judgment as to whether the invoices exhibited the fair *market value*, they would then be enabled to act understandingly, the means of information as to that value being within their reach.

With considerations of high respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

DUTIES ON IMPORTATIONS FROM CANADA FOR THREE YEARS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 3, 1827.

TREASURY DEPARTMENT, *February* 2, 1827.

SIR: In obedience to a resolution of the House of Representatives of the 23d ultimo, "directing the Secretary of the Treasury to inform the House what amount of revenue was collected during the three years ending the 30th of September last in each of the States of Vermont, New York, Pennsylvania, and Ohio, on British manufactures, and on teas, entered at the custom-houses on our inland frontier," I have the honor to transmit three statements, prepared by the Register of the Treasury, which contain the information required by the resolution.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

The Hon. the SPEAKER *of the House of Representatives.*

Statement showing the amount of duties accruing on merchandise imported into the State of Vermont during the years ending on the 30th September, 1824, 1825, *and* 1826.

19TH CONGRESS.] No. 774. [2D SESSION.

DUTY ON IMPORTED SALT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 6, 1827.

To the Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned, inhabitants of New Bedford, Dartmouth, Fairhaven, and the adjacent towns, respectfully represent:

That they view with serious apprehension a proposition now before Congress for a reduction of the duty on salt. Extensive works for the manufacture of this article from sea-water have been erected in this section of the country. The encouragement hitherto extended to them by the Government of this Commonwealth, in exempting them from taxation, has recently been withdrawn; and the present reduced price of salt is such as to afford the manufacturers a very moderate profit, and to induce the belief that, without the continuance of the existing duty on the importation, the business can no longer be prosecuted.

They would further respectfully represent that most of the works now in operation have been erected within a few years past, in the confident expectation that the apparently settled policy of the Government on this subject would remain unchanged; nor could it be deemed reasonable to apprehend that, while the General Government was affording encouragement to other important branches of domestic manufacture by additional protecting duties, it should pursue a different course toward this, and take away that encouragement which had been the principal means of bringing it into existence.

The works erected for this manufacture cannot, as we believe, be converted to any other useful purpose, and must, on the failure of the business, be a total loss to the proprietors, involving them, in many cases, in poverty and ruin.

Your petitioners deem it unnecessary to call your attention to the importance of this manufacture to the country in the event of war, or any other interruption to the supply of this indispensable article from abroad; but they beg leave simply to state that they do not now ask, nor have they ever asked, any special act of Government in their favor. They only respectfully request that the existing duty on imported salt, which has been of so long continuance, and which, as they believe, has not been found a heavy burden on any portion of their fellow-citizens, and which, they further believe, is essential to the very existence of its manufacture from sea-water, at the present time, in this section of the country, may not be altered.

FIRST MONTH (JANUARY) 20, 1827.

19TH CONGRESS.] No. 775. [2D SESSION.

SINKING FUND FOR THE PAYMENT OF THE PUBLIC DEBT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 7, 1827.

REPORT.

The Commissioners of the Sinking Fund respectfully report to Congress:

That the measures which have been authorized by the Board, subsequent to the last report of February 6, 1826, as far as the same have been completed, are fully detailed in the report of the Secretary of the Treasury to this Board, dated the third day of the present month, and in the statements therein referred to, which are herewith transmitted, and prayed to be received as part of this report.

NATHANIEL MACON,
President of the Senate pro tem.
J. MARSHALL,
Chief Justice United States.
H. CLAY,
Secretary of State.
RICHARD RUSH,
Secretary of the Treasury.
WILLIAM WIRT,
Attorney General United States.

WASHINGTON, *February* 6, 1827.

TREASURY DEPARTMENT, *February* 3, 1827.

The Secretary of the Treasury respectfully reports to the Commissioners of the Sinking Fund:

That the sums disbursed from the Treasury during the year 1825, on account of the principal and interest of the public debt, amounted, as per the last annual report, to. $12,101,864 78

And have been accounted for in the following manner, viz:

There was applied for the payment of a sum short provided on account of the public debt, prior to the 1st January, 1825, as per statement B, annexed to the last report..... $88,395 78

And there was applied during the year 1825, towards the payment of the principal and interest of the public debt, as ascertained by accounts rendered to this Department, as per the annexed statement A, the sum of $12,124,085 97

Viz: Brought forward		$88,395 78
In the redemption of Treasury note 6 per cent. stock	$1,479,374 82	
In the redemption of 7 per cent. stock	2,113 92	
In the redemption of exchange of 6 per cent. stock of 1812	56,539 30	
In the redemption of 6 per cent. stock of 1812	6,187,006 84	
In the payment of Mississippi certificates	1,524 02	
In the payment of Treasury notes	2,001 49	
And on payment of certain parts of the domestic debt	15 31	
	7,728,575 70	
The interest which accrued for the year 1825 amounted to	4,395,498 59	
And there was paid for premium on 7 per cent. stock	11 68	
	12,124,085 97	
Of this sum there was short provided, consisting of unclaimed dividends not applied for by the proprietors, as per annexed statement B	110,616 97	
		12,013,469 00
		12,101,864 78

That, during the year 1826, the following disbursements were made by the Treasury, on account of the principal and interest of the public debt, viz:

On account of the interest of the debt	$3,971,842 95
On account of the redemption of the 6 per cent. stock of 1813	7,070,730 91
On account of the redemption of 7 per cent. stock	25 00
In payment of Treasury notes	2,389 58
In payment of Mississippi certificates	450 00
In payment of certain parts of domestic debt	27 86
Making together, as appears by statement C	11,045,466 30

Which disbursements were made from the appropriation of ten millions of dollars for the year 1826, and from the unexpended balance of the appropriations at the commencement of that year, and will be accounted for in the next annual report, in conformity to the accounts which shall then have been rendered to this Department. In the meantime the manner in which the said sum has been applied is estimated as follows:

There is estimated to have been applied to the deficiency at the end of the year 1825, as per statement B		$110,616 97
In the redemption of the principal of the public debt, as per estimate E		7,073,623 35
And on account of the interest of the debt, viz:		
The interest for the year 1826 is estimated at	$3,940,361 55	
Of this sum there is estimated to have been short provided, as per estimate F	79,135 57	
		3,861,225 98
		11,045,466 30

A statement G is annexed, which exhibits the state of the annual appropriations on account of the debt on the 1st January, 1827, and a statement marked H, of the funded debt on the same day.

All which is respectfully submitted.

RICHARD RUSH.

A.

Statement of the application, during the year 1825, *of the funds provided for the payment of the principal and interest of the public debt.*

1. PAYMENTS ON ACCOUNT OF THE PRINCIPAL OF THE DEBT.

1. In the redemption of the Treasury note 6 per cent. stock	$1,479,374 82	
2. In the redemption of the 7 per cent. stock	2,113 92	
3. In the redemption of the exchange 6 per cent. stock of 1812	56,539 30	
4. In the redemption of the 6 per cent. stock of 1812	6,187,006 84	
5. In the payment of Mississippi stock	1,524 02	
6. In the payment of Treasury notes	2,001 49	
7. In the payment of certain parts of domestic debt	15 31	
		$7,728,575 70

2. PAYMENTS ON ACCOUNT OF THE INTEREST AND FOR PREMIUM ON STOCK PURCHASED.

1. Interest for the year 1825, as per account settled at the Treasury, amounted to	4,395,498 59	
2. Premium on the 7 per cent. stock purchased in 1824, settled for at the Treasury in 1825	11 68	
		4,395,510 27
		12,124,085 97

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, February* 1, 1827.

B.

Statement of the provision made before the 1st of January, 1826, for the payment of the principal and interest of the public debt.

The demands to be satisfied on the 1st of January, 1826, were as follows, viz:

1. Dividends payable by Commissioners of Loans, including dividends due on that day, and exclusive of dividends no longer demandable at their offices	$1,050,886 97	
2. Unclaimed dividends from the Loan Offices, payable at the Treasury, beyond the amount advanced for their payment	224,835 66	
3. Balance due to agents in London, per Treasury settlement, No. 43,824.	1,474 44	
		$1,277,197 07

The funds provided to satisfy these demands were as follows, viz:

1. Cash in the hands of Commissioners of Loans applicable to dividends.	1,052,653 14	
2. Cash advanced for Treasury dividends over the amount payable	9,989 22	
3. Cash paid for bills of exchange on account of the debt which were protested for non-payment, and not yet repaid, as per note A to statement B, which accompanied the report of the Commissioners of the Sinking Fund of the 7th February, 1822	103,937 74

19TH CONGRESS.] No. 776. [2D SESSION.

DUTY ON IMPORTED SALT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 13, 1827.

PROVINCETOWN, MASS., *January* 20, 1827.

SIR: The enclosed I am requested to send to you, and to say that, owing to the urgency of the case, they have not had time to get but a few subscribers; and that the salt works in this town are owned by about sixty-five individuals.

Yours, with respect,

RUFUS CONANT.

Hon. JOHN REED, *Washington City.*

To the honorable Senate and House of Representatives of the United States in Congress assembled:

The memorial of the undersigned, inhabitants of Provincetown, in the county of Barnstable and State of Massachusetts, concerned in the manufacture of salt, humbly shows:

That they have lately learned with surprise and concern that a report has been laid before the Senate stating, "that notwithstanding the duty on salt, its manufacture on the seaboard has declined rather than increased." This statement we know to be incorrect. A few small manufactories, in unfavorable situations, may have declined and gone to decay. But we know the fact that more than twice the quantity of salt is now made on the seaboard that there was seven years ago.

Relying on the permanency of the policy and laws of the country, we have erected, at great expense, buildings for the manufacture of salt by solar evaporation. While other manufacturers are soliciting further aid and encouragement, (which did not exist at the time of their commencement,) the manufacturers of salt, though the business yields but a moderate profit, have remained quiet and satisfied with the duties on foreign salt which existed at the time of their commencement.

In the town of Provincetown there have been erected about eleven hundred thousand square feet of salt works, at the expense of about ten cents per foot, amounting to one hundred and ten thousand dollars. These buildings would be of little or no value if the law imposing a duty on foreign salt were repealed, but must remain a heavy loss on the builders. The quantity of salt annually manufactured in this town may be estimated at forty thousand bushels. This has been generally sold at about fifty cents per bushel; but the competition between the importer and manufacturer, the increase in the manufacture, and the depression of the codfishery, have of late very much reduced its price. The crop of salt last season was very small, and that of the best quality would not bring more than thirty-four cents per bushel at the manufactories.

Every other town in this county is more or less concerned in the manufacture of this article. We have scarcely a manufactory of any other article in our county, even for our own consumption. Of course, a large proportion of tax on all other articles, subject to foreign duties, is paid by your memorialists.

Our situation in this town is peculiar; we are placed on a barren soil, utterly incapable of being made to produce any of the necessaries of life; our commerce is depressed; our codfishery is nearly abandoned as an unprofitable employment; and our almost sole resource to obtain an honest livelihood is the manufacture of salt. A partial repeal of the law imposing a duty on foreign salt would be a partial ruin of the manufacture; an entire repeal a total ruin; and nearly a total loss would ensue of the capital invested in salt manufactories.

Under these circumstances, your memorialists hope and trust that the duty on foreign salt will not be partially nor wholly removed.

[Signed by a number of the inhabitants of Provincetown.]

19TH CONGRESS.] No 777. [2D SESSION.

DUTY ON IMPORTED SALT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 13, 1827.

To the honorable Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned inhabitants of the town of Chatham, in the county of Barnstable, State of Massachusetts, humbly show:

That there are in this town about 1,400,000 square feet of buildings, for the manufacture of salt by solar evaporation, and which are owned by not less than eighty-six different persons. That the cost of said buildings cannot be estimated at less than $140,000. That the quantity of salt usually manufactured in said buildings annually is about 35,000 bushels, of the best quality. That nearly or quite one-third part of said buildings have been erected within the last three years, and all of them within a few years, and under the encouragement offered to the home manufacture by the duty on foreign salt. That had it not been for said aid and encouragement, and a full reliance on the permanency of the policy and laws of the country, said buildings would not have been built, as the business in its most prosperous condition has yielded but a moderate profit; and if said law should now be repealed, they would be of little or no value. The price of salt, from the increased number of salt manufactories, from a competition among manufacturers, and between them and importers, has been reduced within a year about one-third part, it being now sold at the manufactories for about thirty-three cents per bushel. The people of this county generally are deeply interested in the manufacture of salt. And during the late war the price of salt was considerably reduced and kept down in this part of the country by the supply that was furnished from this quarter, it being constantly shipped from here to the neighboring ports, and in such small quantities as to prevent a monopoly by speculators.

But as there are no other manufactories in this county, we, of course, pay a full share of taxes on all other foreign articles subject to duties. Under these circumstances, while other established manufactories in the country are soliciting and receiving the further aid of Government for their support and encouragement, which did not exist at the time of their commencement, we hope and trust that the duties now imposed on imported salt may not be removed, neither partially nor wholly, but that we may continue to receive in that form the aid and encouragement under which we have been enabled to commence.

[Signed by a number of the inhabitants of Chatham.]

CHATHAM, *January* 18, 1827.

19TH CONGRESS.] No. 778. [2D SESSION.

DUTIES ON IMPORTED WOOLEN MANUFACTURES.

COMMUNICATED TO THE SENATE FEBRUARY 19, 1827.

To the honorable the Senate of the United States:

The New York Chamber of Commerce has seen with extreme regret that a bill has passed the House of Representatives "for the alteration of the acts imposing duties on imports," and is now before your honorable body. They feel deeply affected by the principles of this bill, which they believe are subversive of the best interests of the nation.

This bill, under the pretext of altering acts imposing duties on imports, does, in effect, prohibit the importation of some kinds of woolen goods, and imposes an enormous duty on other kinds, all of which are essential to the comfort if not to the existence of the inhabitants of this climate. The duties which it imposes being calculated on the square yard, and, with reference to arbitrary minimum prices, will be found to be graduated from 40 per cent. to 220 per cent. on the first cost, making, with the addition of the premium of exchange and other charges of importation, a premium of 62½ per cent. to 242½ per cent. in favor of similar articles manufactured in the United States; and it ought to be especially noticed that the cheaper kinds of woolen goods, those which are worn by the poor and by the laboring classes, will, by this bill, pay the highest, and those consumed by the wealthy the lowest duties. The attention of the Senate is also respectfully requested to the inequality as well as the excessive rate of the proposed duties. The usual ad valorem principle on which duties have been collected is abandoned, and minimum rates of forty cents, one dollar and fifty cents, two dollars and fifty cents, and four dollars, are respectively established as the cost prices. It follows, of course, that while the article which is rated at forty cents the square yard pays a duty of 14⅔ cents, the article which costs more than forty cents, even if the increase is no more than a single cent, will pay 55 cents the square yard; and while the article rated at one dollar and fifty cents the yard will have to pay 55 cents, that which costs one dollar and fifty-one cents will have to pay 93 cents the square yard. This short detail will show the true nature of this bill, and, at the same time, lead to the conclusion that while its prohibitory and enormously excessive duties will materially diminish the national revenue, the execution of the law must be attended with numerous frauds and evasions.

If there existed any public necessity for the enactment of this bill, and it violated no principle of true

policy, your memorialists, onerous as are its provisions, would not complain; but they can perceive no sufficient reason to justify further encouragement to the industry of the manufacturing classes. Woolen fabrics imported at the present time have to pay an aggregate of charges amounting to nearly 56 per centum on the first class; this is a premium paid by the consumer to the home manufacturer, and if the business of the latter cannot succeed without a greater bounty, it had better be abandoned. The encouragement given by the tariff of 1824 induced many wealthy individuals to withdraw their capitals from commerce in which they had been previously employed, and to vest them in great manufacturing companies. These are managed by presidents, directors, treasurers, &c., and at an expense which prevents them from competing with individuals manufacturing on their own account; hence arises the application to the National Legislature which has resulted in the bill before your honorable body. Should it become a law in its present shape, the evils which are now felt would be increased; new combinations would be formed in favor of new protecting duties, and new monopolies, more odious and oppressive than that which is now proposed, would be applied for and perhaps obtained.

Your memorialists are not unfriendly to the manufacturing interest, nor would they lay a single burden on it from which other interests are exempted; but they object to that exclusive legislation which selects and fosters a particular class; they claim equal advantages to all. The enterprises of the merchant, which result in filling the Public Treasury, are not less meritorious than the exertions of the manufacturer; nor can the latter claim any merit superior to that which belongs to the grower of those great staples of our country which form the bulk of our export trade, and which contribute so much to the welfare and extension of our commerce and navigation.

Your memorialists have ever believed that the national Constitution was formed to establish a Government for the common benefit, and that it gave to every member of the Confederacy equal rights and privileges. *To establish harmony and to promote the general good are emphatically its objects. Laws* which give to one class of citizens exclusive advantages at the expense of other classes; which lay heavy burdens on some districts where manufactures cannot exist, to promote manufacturing in other districts, and which, according to the policy of the British corn laws, protect the *wool grower* and the *wool manufacturer* against foreign competition at the expense of the consumer, are not consistent with the spirit of that great national compact under which we have hitherto been a happy and united people, and have advanced with unexampled celerity to national power and greatness.

Your memorialists indulge the hope that an impartial and enlightened attention to the local circumstances and the rights of every part of the United States will induce your honorable body to reject the bill now before you. We look with anxious solicitude to the decision of the Senate on this momentous subject. Should this bill become a law, it may perhaps be considered in some parts of our country as having been passed under the influence of sectional feelings, and as bearing hard upon sectional interests. And if such opinions should prevail, may they not tend to foster jealousies between the different States, withdraw their affections from the General Government, and put to hazard the tranquillity of the Union?

And your memorialists, as in duty bound, will ever pray.

By order of the New York Chamber of Commerce.

ROBERT LENOX, *President.*

JOHN PINTARD, *Secretary.*

NEW YORK, *February* 15, 1827.

19TH CONGRESS.] **No. 779.** [2D SESSION.

AMOUNT OF DUTIES AND DRAWBACKS FROM 1815 TO 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 20, 1827.

TREASURY DEPARTMENT, *February* 20, 1827.

SIR: In obedience to a resolution of the House of Representatives of the 12th ultimo, directing "the Secretary of the Treasury to lay before the House a statement of the annual receipts from the customs from the fiscal year ending on the 30th of December, 1815, to the 30th of September last, noting the amount received under each separate head of revenue from this source, specific or ad valorem, and the annual amount of drawbacks for the same period and under the same heads," I have the honor to transmit a statement which contains the information required by the resolution so far as it is afforded by the returns made to the Department, together with a letter from the Register of the Treasury explanatory of the same.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives of the United States.*

TREASURY DEPARTMENT, *Register's Office, February* 20, 1827.

SIR: I have the honor to transmit a statement exhibiting the value of merchandise imported paying duty ad valorem, and the quantities of articles paying a specific duty, during the years 1815 to 1825, inclusive, prepared in obedience to a resolution of the House of Representatives of the 12th January, 1827, and beg leave to state that as the records of the Department do not at this time permit a compliance with the resolution as respects the specific sources of revenue from imports during the year 1826, the aggregate receipts into the Treasury from customs in that year is exhibited.

I have the honor to be sir, with great respect, your obedient servant,

JOSEPH NOURSE.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

Statement exhibiting the value of merchandise imported paying duty ad valorem, and of the quantity of articles paying a specific duty, during the years 1816 *to* 1825, *inclusive, and of the amount of duties secured thereon, respectively, (being exclusive of the value and quantity of, and of the duties secured on, merchandise re-exported;) showing, also, the amount of drawback which became payable during the same period, under same heads; prepared in obedience to a resolution of the House of Representatives, January* 12, 1827.

19TH CONGRESS.] No. 780. [2D SESSION.

DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE FEBRUARY 22, 1827.

To the honorable the Senate of the United States:

The memorial of the Philadelphia Chamber of Commerce respectully showeth:

That your memorialists have regarded with great anxiety the progress of "A bill for the alteration of the acts imposing duties on imports," whioh, it is understood, has passed the House of Representatives and is under the consideration of your honorable body. Believing, as they do, that this bill is not calculated to promote the common good, they beg leave, respectfully, to lay before you their remonstrance against the passage of it by the Senate

Your memorialists are not aware of the existence of such reasons as should induce the Legislature to make so great and important a change in the system of duties on imports as is contemplated by this bill. They do not perceive the evidence of this change being required by a sound regard to the interests of a particular species of manufactures; and if it was called for by those interests, it would seem to them that a sound and just policy would not, to effect it, exact so great a sacrifice as must here be made of the other interests of the community. On the other hand, there appears to your memorialists to be strong objections to this bill, some of which they respectfully beg leave to lay before you.

For several years there has been a progressive increase of the duties upon imports, the object of which has been to aid the manufacturing interest of the country. How far this system of protection has wrought a beneficial result to that interest is, perhaps, a question not easily to be settled. Its operation, however, upon the other great interests of society is considered by your memorialists as having been greatly prejudicial, and, indeed, upon the commercial interest it has been almost destructive. The regular and profitable commerce of the country undoubtedly languishes, and the cause is obviously seen in the prohibition of certain portions of our trade which has arisen from the system of protection to manufactures. When the tariff was revised in 1824 it was considered to be settled upon principles of accommodation and regard to the several interests of the community; and it was not expected that within so short a space of time so great a change, and yet one so partial in its operation, as that contemplated by this bill would be attempted. Your memorialists would respectfully submit that such an innovation upon the system as this is—one directed towards a single object, and without any consideration of the other parts of the system—cannot but be productive of extensive injury and inconvenience.

The amount of duties proposed to be laid by this bill upon certain kinds of woolens is considered by practical men as being, in effect, a prohibition of the article. It is believed that this article neither is nor can be advantageously manufactured among us so far as to supply at reasonable prices the demands of the country. The consequence is, a monopoly to the manufacturer, and all the evil which must flow from such a monopoly; so far, then, as the direct operation of this measure at home is seen, it is to exalt one interest upon the depression of many others; to give peculiar advantages to a particular manufacturing interest at the certain expense of the agricultural and commercial interests of the country.

But it is apprehended by your memorialists that this measure will be attended with other mischievous consequences, bearing seriously upon our foreign commerce. At a moment when Great Britain is relaxing her system in such a manner that the great agricultural product of our Middle States may find a market there, it would seem to be unwise on our part to prohibit the importation of the article naturally to be received in return for our productions. In addition, that same commercial nation may fairly be expected to countervail a measure bearing as this does upon an important branch of her manufactures, by the imposition of duties upon the great staple of our southern States, thereby crippling its cultivation here and protecting it in their own colonies. These considerations, prospective as they are, your memorialists respectfully submit, are reasonable in themselves and deserving of attention in your deliberations upon this important question.

The effect of the system of measures to which this belongs upon the revenue of the country derived from its imports is obvious. That revenue which has been so productive, which has been so faithfully, honorably, and effectually paid, and which at the same time is so lightly felt by the community at large, should, in the opinion of your memorialists, be regarded with peculiar care. The measure under consideration is calculated further to diminish that revenue, and offer incitements to evade and violate the law, and to depart from that line of rectitude which has signally distinguished those concerned in the importation of goods subject to the payment of duties.

Your memorialists are firmly persuaded that the bill in question will work serious and extensive mischief to the commerce of the country and to all those interests which are immediately connected with it and dependent upon it; they believe that a retaliation may reasonably be expected which would affect sensibly our great agricultural products; and they consider that the measure proposed in its operation will be partial, unequal, and unjust. On these grounds they respectfully request that the passage of the bill may be arrested, and that it may not receive the concurrence of your honorable body.

ROBERT RALSTON, *President of the Philadelphia Chamber of Commerce.*
JNO. VAUGHAN, *Secretary of the Philadelphia Chamber of Commerce.*

PHILADELPHIA, *January* 19, 1827.

19TH CONGRESS.] **No. 781.** [2D SESSION.

DUTIES ON IMPORTS OF WOOLEN MANUFACTURES.

COMMUNICATED TO THE SENATE FEBRUARY 22, 1827.

To the honorable the Senate of the United States:

The memorial of the Chamber of Commerce of Baltimore respectfully represents:

That they view with great concern, and even alarm, the proposed law for the increase of the duties on certain kinds of woolen goods imported from abroad. That this increase, amounting in fact to a prohibition of many articles essential to the comfort of the people of the country, and which cannot, for some years to come, be manufactured in sufficient quantities to meet the demands of mere necessity, will produce the greatest inconvenience and hardship. That this measure will be the more obnoxious as its more direct operation is on the poorer classes of consumers, on whom it will continue to fall with disproportioned severity, even after the domestic manufactories shall be enabled, by means of the contemplated protection, to afford the requisite supply, inasmuch as that protection is a virtual tax on the consumer to the whole amount of the difference between the present price and that which will be produced by the

contemplated duty. That this measure will be extremely detrimental to the agricultural, the commercial, and the shipping interests of these United States, in which interest is invested an immense capital, equally entitled, in point of principle, as the manufacturing, to the protection of Government, and more so, in point of fact, as the amount concerned is larger, and constitutes the dependence of a greater number of citizens.

Your memorialists, moreover, respectfully suggest that the frauds on the revenue, resulting from the imposition of the contemplated duties, will be immense; that they will be highly injurious to morals; and that they will have the double effect of enhancing prices in proportion of the risk incurred in furnishing this irregular supply, while, at the same time, the evasions of the customs will be of sufficient magnitude to deprive those who may invest their capital in woolen manufactures of the full benefit of the contemplated protection. Thus your memorialists foresee a triple loss to the industry of the country from the bill proposed.

Your memorialists forbear to add to these suggestions, which spring from the experience arising from their more immediate pursuits, the considerations of general policy and justice. Your honorable body is well aware that the policy of the principle on which this measure proceeds has been ably disputed by the wisest statesmen, and remains, to say the least, a matter of doubt. But when to this consideration is added the more immediate and important one of the unequal operation of this bill on the different sections of the country, the dissatisfaction which must thence result, and the prudence of allaying the jealousies which are but too apt to arise in the best ordered confederacies, they indulge the hope that their own individual interests will be fortified by reflections so just and powerful.

And your memorialists will ever pray.

WM. LORMAN, *President of the Chamber of Commerce, Baltimore.*
WILLIAM COOKE, *Secretary of the Chamber of Commerce.*

BALTIMORE, *February* 20, 1827.

19TH CONGRESS.] No. 782. [2D SESSION.

TRANSACTIONS AT THE MINT IN 1826.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES FEBRUARY 24, 1827.

To the Senate and House of Representatives of the United States:

I transmit herewith to Congress a report from the Director of the Mint, with a statement exhibiting its operations during the year 1826.

JOHN QUINCY ADAMS.

WASHINGTON, *February* 24, 1827.

MINT OF THE UNITED STATES, *Philadelphia, January* 1, 1827.

SIR: I have now the honor, respectfully, to submit a report on the general transactions of the Mint during the last year.

From the statement of the Treasurer, herewith transmitted, it appears that the coinage effected within the year has amounted to $2,110,679 25, consisting of 5,774,434 pieces of coin, viz:

Of gold	18,829 pieces, making	$92,245 00
Of silver	4,004,180 ..... do	2,002,090 00
Of copper	1,751,425 ..... do	16,344 25
	5,774,434 ..... do	2,110,679 25

The amount of gold deposits has been less than that of the year 1825 by about $64,000—a result attributable, probably, to the higher premium on gold, in bullion, and in every description of coin, which has distinguished the last year. This premium has varied from four to six per cent. on gold coins of the United States, France, and Portugal, while the gold coins of Great Britain have been in demand, by tale, at the rate of $4 85 to $4 95 for the sovereign, being about six to eight per cent. on the actual value thereof; and the doubloons of Spain at $15 50 to $16, being from six to nearly ten per cent. on their actual value, according to the standard and denomination of the coins of the United States. The diminished coinage of gold is, therefore, the less to be regretted, since, under existing circumstances, it cannot, when coined, be retained in circulation.

Of the gold bullion deposited within the last year, the proportion received from North Carolina may be stated at nearly $20,000; that from Mexico, South America, and the West Indies, at $55,000; and that from Africa at $6,000; leaving about $11,000 derived from sources not ascertained. The amount received from North Carolina, it may be satisfactory to mention, has exceeded by about $3,000 that of the year 1825, and by nearly $9,000 that of any previous year.

The value of the silver bullion received for coinage within the last year has been nearly $2,500,000, of which the proportion deposited by the Bank of the United States has exceeded $1,600,000.

A wish to expedite the issues from the Mint, conformably to this copious supply of silver, of which the pressure has been unexampled during the last six months, has induced the coinage, exclusively, of half dollars, that of the smaller denominations being suspended throughout the year.

The subject of small silver coins has, nevertheless, attracted within this period particular attention, with a view to ascertain the necessities of the currency in relation thereto. The result has been a strong

persuasion that a deficiency of these is felt, in any embarrassing degree, chiefly in districts where the larger coins are not abundant. It is almost superfluous to observe that the small divisions of silver coin can be retained in circulation at their appropriate value only as part of a metallic currency, or a currency effectively sustained on a specie basis. The power of the Mint, it is believed, therefore, has been hitherto exerted most usefully for the public good, on emissions of a denomination more acceptable to depositors of bullion, as involving less delay; leaving the circulation of small coins to be supplied by the accustomed fractions of the Spanish dollar, aided by occasional issues from the Mint, during that relaxed demand for coinage which has generally occurred heretofore at some period of the year.

Arrangements have, however, been commenced, and are in train to be early accomplished, for devoting to the emission of the smaller divisions of our silver coin every desirable attention, without injuriously retarding the more productive operations of the Mint. By this procedure, should the supply of bullion remain undiminished, which many indications render probable, it is anticipated that, at a period not far remote, the fractions of the Spanish dollar may be dispensed with in circulation, if that measure should then be considered desirable. In the meantime large emissions of our heavier coinage will have been diffused through the community, constituting an efficient basis of the national currency.

The coinage of half dollars in preference, generally, to that of the dollar, was adopted in the year 1805, on a suggestion, it is understood, from a source entitled to the highest respect, that this form of silver coin would impose a beneficial restraint on its exit from the country. The effect, it is believed, has justified this preference, and offers still an adequate motive for adhering to it.

The utility of the copper coins of the United States, as an auxiliary in ordinary circulation, appears to be more extensively acknowledged than heretofore. They are now called for in districts where popular fancy had, until lately, rejected them. The facility afforded by their transportation, at the expense and risk of the Government, to all parts of the United States within the range of ordinary means, contributes essentially to their diffusion.

On comparing the present report with those of former periods, it is perceived that the coinage effected within the last year has exceeded by $250,000 that of any previous year since the establishment of the Mint.

I have the honor to be, with great respect, your obedient servant,

SAML. MOORE.

The PRESIDENT *of the United States.*

Statement of the coins struck at the Mint of the United States from January 1 *to December* 31, 1826.

19TH CONGRESS.] No. 784. [2D SESSION.

DUTIES ON IMPORTS OF WOOLEN GOODS.

COMMUNICATED TO THE SENATE FEBRUARY 26, 1827.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the undersigned, inhabitants of the city of Boston and its vicinity, respectfully represents:

That they have regarded with the deepest interest the various measures which have been brought before Congress for several years past for the purpose of affording encouragement to the domestic manufactures of the United States, by enhancing the duties on imported articles of foreign growth and manufacture. Your memorialists are fully aware of the delicacy with which a subject so intimately connected with the industry of the community and the great interests of society should be approached, and the discernment, experience, and matured wisdom upon which all measures so deeply affecting the vital interests of society should be founded; still, having, after much reflection, aided by considerable experience, become fully convinced that any further increase on the duties now charged upon certain species of woolen goods would be productive of great injury to the United States, taking into one comprehensive view its most extensive and important interests, we beg leave most respectfully to express this opinion in reference to the measure now before Congress upon that subject. Your memorialists express this opinion the more readily from a conviction that a measure of this description must derive its support mainly from the aid of strong and enlightened public opinion, and because they believe that it has been usually represented and believed that public opinion in this part of the United States was in favor of the proposed increase of duties on woolen goods. Had the attention of this section of the United States been earlier awakened upon this subject, your memorialists entertain no doubt that vast numbers would have concurred with them in the opinions here expressed, and that very numerous memorials would have afforded unquestionable proof of a strong prevailing public opinion against the policy of further extending the duties on certain species of imported woolen goods in the manner now proposed.

Your memorialists are firmly convinced that the proposed increase of duty, by further multiplying the restrictions upon commerce, would paralyze many branches of useful industry, and be productive of extensive injury. But they have neither time, nor is there occasion, at this late moment of the session, to go into the general argument upon the subject. They, therefore, at the present moment, confine themselves to the expression of their opinion—a strong and deliberate opinion—against the measure, and their earnest hope that this great change of policy in regard to the most important interests of the country will not be adopted without mature deliberation and a clear and decided expression of public opinion in its favor.

BOSTON, *February* 19, 1827.

19TH CONGRESS.] No. 785. [2D SESSION.

DEBTS AND DEFALCATIONS IN CERTAIN LAND OFFICES AND BY INDIVIDUALS.

COMMUNICATED TO THE SENATE MARCH 2, 1827.

To the Senate of the United States:

I transmit to the Senate a report from the Secretary of the Treasury, with sundry documents containing the information requested by a resolution of the Senate of the 20th of April last, relating to the securities taken of the late Surveyor General of Illinois, Missouri, and Arkansas, of the late Receiver of Public Moneys in the western district of Missouri, and to the sums for which they were, respectively, defaulters; also to the sums due by each of the late Directors of the Bank of Missouri to the United States, and to the measures taken for obtaining or enforcing payment of the same.

JOHN QUINCY ADAMS.

WASHINGTON, *March* 2, 1827.

TREASURY DEPARTMENT, *March* 1, 1827.

The Secretary of the Treasury, to whom was referred a resolution of the Senate of the 20th of April last, "requesting the President of the United States to cause the Senate to be informed at the commencement of the next session of Congress what security was offered by, and what was ultimately taken of, the late Surveyor General of Illinois, Missouri, and Arkansas, upon his last appointment to that office, and for what sum, if for any, he is a defaulter;

"Also, what security was taken of the late Receiver of Public Moneys in the western district of Missouri, and for what sum, if for any, he is a defaulter;

"Also, what sum is due by each of the late Directors of the Bank of Missouri to the United States by transfer of their debts or otherwise; what measures have been adopted for the recovery of those sums; and to what extent, and against which of the Directors such measures have been enforced," has the honor to submit to the President a communication from the First Comptroller of the Treasury, dated the 26th ultimo, and one from the Commissioner of the General Land Office, dated the 28th, which, with the documents referred to by the Commissioner, contain the information required by those parts of the resolution which relate to the Surveyor General and the Receiver of Public Moneys alluded to.

In relation to the last member of the resolution, the Secretary has the honor to state that there are due to the United States by transfer from the Bank of Missouri, by the late Directors of that bank, the following sums: James Kennerly, $14,932 36; Angus L. Langham, $18,821 83; Michael Tesson, $3,046 50; Thomas H. Benton, $6,454 37; Joseph Philipson, $23,162 08; and by the firm of Thomas and Charles S. Hempstead, the first of whom was a Director of the bank, $18,127 43. It is understood that judgments have been obtained in all these cases, and that measures will be adopted by the agent to obtain payment, as early as practicable, as well of these debts as of the other debts transferred by the Bank of Missouri to the United States. Under this clause of the resolution, the Secretary also submits a communication from the Fifth Auditor of the Treasury, dated the 28th ultimo, embracing a statement of debts due to the United States by late Directors of the Bank of Missouri other than those arising from transfers, which debts originated in the War Department, and have been reported to that officer, as the Agent of the Treasury, by the Second Comptroller, for suit, agreeably to the provisions of the act of Congress passed on the 15th of May, 1820.

RICHARD RUSH.

The PRESIDENT *of the United States.*

TREASURY DEPARTMENT, *Comptroller's Office, February* 26, 1827.

SIR: The part of the resolution of the Senate, under date of April 20, 1826, which you have referred to me, requires information on the following points, viz:

1. What security was offered by, and what was ultimately taken of, the late Surveyor General of Illinois, Missouri, and Arkansas, upon his last appointment to that office; and for what sum, if any, is he a defaulter?

2. What security was taken of the late Receiver of Public Moneys in the western district of Missouri, and for what sum, if for any, is he a defaulter?

In relation to the first object of inquiry, I have to observe that the last appointment of William Rector, the Surveyor General alluded to in the resolution of the Senate, was dated February 20, 1823, and that, on the 27th of August following, he gave a bond in the penalty of $30,000, with the following sureties, which bond was approved by Mr. Secretary Crawford, viz: A. McNair, Stephen Rector, Thos. C. Rector, Jer'h Connor, B. G. Farrar, J. and G. H. Kennerly, Thos. Hempstead, and Jos. E. Brown.

It being the uniform practice for the Commissioner of the General Land Office to superintend the execution of the bonds of the Surveyor General, and these bonds not being transmitted to be filed in this office until after they shall have been approved either by himself or the Secretary of the Treasury, it is not known to this Department whether, anterior to the execution of the above mentioned bond, any other sureties were offered which were not accepted.

The accounts of Mr. Rector, to the 30th of September, 1823, were settled on the 1st of December, 1824, and a balance of $44,758 38 found to be due from him to the United States, to a final liquidation of which his attention was called on the 6th of January following.

This not having been complied with within a reasonable time, his case was reported to the Agent of the Treasury for suit on the 30th of June, 1826.

On the subject of the second object of inquiry, I have to observe, that it is also the uniform practice for the Commissioner of the General Land Office, not only to superintend the execution of the official bonds on the part of the Receivers of Public Moneys for public lands sold, but also to approve those bonds when executed, after which he transmits them to be filed in this office.

No bond having been executed by Mr. William D. McRay, the Receiver of Public Moneys alluded to in the resolution of the Senate, the Commissioner of the General Land Office, on the 18th of November, 1826, apprised this Department of that fact, and that Mr. McRay had been superseded; in consequence of which information his accounts were immediately put into a train for settlement, and were reported to the Agent of the Treasury for suit on the 30th of that month.

The balance which was found to be due from him to the United States on that settlement, and for which he was reported for suit, was $23,089 57.

With considerations of great respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

GENERAL LAND OFFICE, *February* 28, 1827.

SIR: In compliance with your request, communicated to me yesterday by Mr. Washington, I now transmit the correspondence with General Rector relative to the bond given by him under his last commission. The letters are marked from A to H.

The paper marked K is a copy of the bond given by General Rector on the 7th of August, 1823, and transmitted with his letter of the 7th of November, 1823, both of which were submitted to the Hon. Secretary of the Treasury on the 3d of September, 1824, and which are presumed to be on file in the Comptroller's office. The bond returned to General Rector on the 1st of December, 1823, was that acknowledged by my letter of the 18th of September, 1823, to have been received from him, and which, it is believed, was a duplicate of the one on file, with the exception of the certificate of the District Attorney as to the sufficiency of the securities. It will appear, from my letter to the Secretary of the Treasury, dated September 3, 1824, that General Rector never did execute a bond agreeably to the forms prescribed after I came into office. It is proper to state that no money ever was advanced after I came into office to General Rector on account of surveying the public lands.

The papers marked No. 1 to 7 contain the correspondence relative to the bond of William D. McRay.

It may be proper to remark that Mr. McRay was recommended for the office of Receiver by a gentleman of such high official standing that of course some confidence was reposed in his representations, but that, in consequence of his conduct, the regulations contained in the paper marked No. 8 were adopted, and are now in force.

I have the honor to be your obedient servant,

GEO. GRAHAM.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

TREASURY DEPARTMENT, *Fifth Auditor's Office, February* 28, 1827.

SIR: In reply to your letter of this day's date, enclosing to me a copy of a resolution of the Senate of the 20th of April last, I have the honor to inform you that of the names of the persons therein specified as directors of the Bank of Missouri, suits have been instituted against the following upon reports made to me by the Second Comptroller, viz:

James Kennerly, late agent of Indian Department; suit ordered September 3, 1823, for $29,890 59. Returned by clerk of court September term, 1825, *non est inventus.*

A. L. Langham, late captain 19th infantry; suit ordered December 17, 1821, for $2,572; judgment February term, 1823, for $2,755 25; levied on real estate; made on sale of real estate $572 76—marshal's return.

Thomas H. Benton, lieutenant colonel 39th infantry; suit ordered October 27, 1819, for $1,554 38; balance reduced May 15, 1820, to $384 05; judgment October term, 1822, $439 74.

Thomas Hempstead, military storekeeper at St. Louis; suit ordered November 22, 1822, for $15,052 65; balance reduced by subsequent settlements to $4,781 33; judgment June term, 1823.

Thomas Hempstead, paymaster of militia; suit ordered November 22, 1822, for $15,736 12; balance reduced by subsequent settlements to $7,625 97; judgment June term, 1823. Made on sale of real estate upon execution against the administrator of Elijah Beebe, one of the sureties of Hempstead, the sum of $2,446 80, after deducting costs.

Henry Dodge, the marshal, having retained this money in his hands, suit has been ordered against him for its recovery.

Thomas F. Riddeck, president of the Bank of Missouri, (agent for paying pensioners;) suit ordered August 18, 1824, for $2,596 32. No return received from District Attorney.

I have the honor to be, with great respect, sir, your most obedient servant,

S. PLEASONTON, *Agent of the Treasury.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

No. 1.

GENERAL LAND OFFICE, *February* 5, 1824.

SIR: I have the honor to transmit herewith your commission as Receiver of Public Moneys for the western district of Missouri. You will, therefore, be pleased to qualify yourself as such by taking an

oath to support the Constitution of the United States, and by entering into a bond, with one or more good sureties, in the penalty of thirty thousand dollars for the faithful execution of your official duties. The solvency of the sureties is to be certified by the United States Attorney or Judge for the district in which they reside. The oath and certificate are to be endorsed on the bond, which is to be transmitted to this office. The necessary forms and instructions for your government will be sent to Lexington in a few days. The books and blanks necessary for the transaction of your official duties have been received at Lexington.

I am.

WILLIAM D. MCRAY, *Receiver of Public Moneys at Lexington, Mo.*

No. 2.

GENERAL LAND OFFICE, *January* 26, 1825.

SIR: I have the honor to request your immediate attention to the forwarding of your official bond, which was sent with your commission on the 5th of February last.

I am.

WM. D. MCRAY, *Receiver of Public Moneys, Lexington, Missouri.*

No. 3.

LEXINGTON, *March* 10, 1825.

SIR: Your communication of January 26 reached me per last mail. Immediately on the receipt of my commission I had the bond filled up, and forwarded it to St. Louis for the approval of the district judge. He was, however, absent on a visit, I believe, to Kentucky. At what time last fall he returned I am not informed. I, however, did not hear from him until within a short time. He declined certifying the solvency of my securities on the ground that they were unknown to him.

They consisted of ten or twelve of the most substantial individuals in the Upper Missouri; and to remove all doubts in the mind of the judge, I procured the certificate of the Circuit Court where the gentlemen reside. This, sir, I hope will be satisfactory in removing any doubts which might possibly arise of an intention to neglect my duty. I will attend to your request as soon as possible. The moment circumstances will justify it, I will repair to St. Louis, get a bond executed and certified according to your instruction. It should have been done ere this, but for the indisposition of my family and my remoteness from St. Louis.

I have the honor to be, with very great respect, your obedient and very humble servant,

W. D. MCRAY, *Receiver.*

GEORGE GRAHAM, Esq., *Commissioner of the General Land Office.*

No. 4.

LEXINGTON, *April* 12, 1825.

SIR: Since my last communication I have been informed by the Receiver at Franklin that the certificate of one of the circuit judges of the State of the solvency of his securities has been received. As I informed you, I had procured this kind of certificate immediately on the receipt of my commission, but deemed incompatible with your instructions. If it will be satisfactory, I should greatly prefer forwarding you a bond of this description, as it would supersede the necessity of my calling on my friends at St. Louis. I have, however, engaged such men as will not be rejected by the United States judge in case the other will not answer. Have the goodness to forward me another blank bond with your instructions on this subject. I assure you, sir, it is a source of much mortification to me, but I hope and believe it will terminate to your satisfaction.

I am, &c.,

W. D. MCRAY, *Receiver.*

G. GRAHAM, Esq., *Commissioner of the General Land Office.*

No. 5.

GENERAL LAND OFFICE, *May* 23, 1825.

SIR: Your letter of the 12th ultimo is received. Agreeably to your desire another blank bond is herewith transmitted, with a request that you will have it executed and returned to this office, agreeably to your former instructions, with as little delay as possible.

I am.

WM. D. MCRAY, Esq., *Receiver of Public Moneys, Lexington, Missouri.*

No. 6.

LEXINGTON, *Missouri, April* 20, 1825.

SIR: I have deferred forwarding my return and account current for the month of February, with the expectation of receiving instructions for the Treasury Department to pay a draft on General Jesup, drawn by Captain Brant, assistant quartermaster, for $5,000. When the draft was presented Captain Brant showed me a letter of instruction from the Quartermaster General, in which he states instructions have been given from the Treasury Department to pay Captain Brant's drafts on him for the above amount. Under the impression that the next mail would bring the instructions, and in consideration of the distance between this and St. Louis, I paid the money. I have no doubt but General Jesup was under the impression that the instructions had been given, and, should he have been mistaken, he will doubtless make the arrangements at Washington.

I have the honor to be, &c.,

WM. D. McRAY, *Receiver.*

GEORGE GRAHAM, Esq., *Commissioner of the General Land Office.*

No. 7.

GENERAL LAND OFFICE, *September* 12, 1825.

SIR: Your monthly return and account current for July last has been received.

I take this opportunity of again inquiring repecting your official bond. No further delay in its transmission can reasonably be expected or admitted.

With great respect, &c.,

GEO. GRAHAM.

WM. D. McRAY, Esq., *Receiver at Lexington, Missouri.*

No. 8.

[CIRCULAR.]

TREASURY DEPARTMENT, *General Land Office, January* 30, 1826.

SIR: The Secretary of the Treasury has directed permanent instructions to be given that, in case of a new appointment of a Receiver for a Land Office, sales are to be suspended until such Receiver shall have exhibited to the Register of such office his official bond, regularly executed, for the due performance of his duties; and that, after the expiration of the commission of a Receiver, sales are also to be suspended until the Receiver shall have exhibited to the Register his official bond, regularly executed, under the new commission; so that, in either case, no sale will take place, except where there is a Receiver actually in commission, and acting under the responsibility of a proper official bond, and where the sale is within the time for which such commission is granted. The Receiver's commission will, therefore, be transmitted in all cases to the Register, who will have particularly to note the period of its limitation, and suspend sales agreeably to the instructions now given.

With great respect, your obedient servant,

——— ———.

Land Office at ———

A.

Copy of a letter from the Commissioner of the General Land Office to William Rector, Esq., dated June 13, 1823.

SIR: Enclosed you have a commission from the President of the United States, reappointing you, by and with the advice and consent of the Senate, surveyor of public lands in the States of Illinois and Missouri, and for the Territory of Arkansas, for the term of four years from the date thereof, (the 20th February, 1823.) You will please to qualify yourself by taking an oath to support the Constitution of the United States, and by entering into bond, with one or more good securities, in the sum of thirty thousand dollars. The sureties are to be approved by the United States District Judge or Attorney, which certificate must be endorsed on the bond, a form of which is enclosed. The bond and oath are to be sent to this office.

I am, &c., &c.,

JOHN McLEAN, *Commissioner.*

B.

SURVEYOR'S OFFICE, *St. Louis, July* 11, 1823.

SIR: I received by the last mail your letter of the 13th ultimo, together with a commission from the President of the United States, reappointing me surveyor of the lands of the United States in the States of Illinois and Missouri and Territory of Arkansas, and a blank bond which I am to enter into, with the necessary security, for the faithful discharge of the duties of my office.

I have qualified so far as it is practicable for me to qualify at this time, by taking and subscribing the usual oath of office. But as it is necessary for my securities to be approved of by the United States District Judge or Attorney, it is impossible for me at this time to obtain such approval, as the District Judge is now absent, it is said, on a visit to Tennessee, and the late District Attorney has deceased. As soon as the judge shall return home, or a District Attorney shall be present, the said bond shall be executed in due and legal form and forwarded to you.

I have the honor to be, &c., &c.,

WM. RECTOR.

Hon. JOHN MCLEAN, *Commissioner of General Land Office, Washington.*

C.

Circular to Surveyors General.

TREASURY DEPARTMENT, *General Land Office, July* 21, 1823.

SIR: Having deemed it necessary to adopt a new form for the bond required to be given by the Surveyors General by the act of the 7th May, 1822, I have to request that you will be pleased to renew your bond agreeably to the form enclosed, on the receipt of which the bond heretofore executed under your late commission will be returned.

I am, &c., &c.,

GEO. GRAHAM, *Commissioner.*

D.

[Extract.]

TREASURY DEPARTMENT, *General Land Office, August* 2, 1823.

"SIR: Yours of the 11th ultimo is received. The delay in fully executing your bond will be productive of no inconvenience, as I find it necessary to comply with the provisions of the law to vary the forms, of which you have been advised."

WILLIAM RECTOR, Esq., *Surveyor of Public Lands, St. Louis, Missouri.*

E.

SURVEYOR'S OFFICE, *St. Louis, August* 8, 1823.

SIR: On the 11th ultimo I addressed a letter to the Commissioner of the General Land Office acknowledging the receipt of his letter of the 13th June, together with my commission as surveyor of the public lands in Illinois, Missouri, and Arkansas, and of a blank bond to be entered into by me, with the necessary security, for the faithful discharge of the duties of my office. In my said letter I informed the Commissioner of the General Land Office that the United States judge for the district of Missouri was absent, as I understood, on a visit to Tennessee, and that the District Attorney had died a short time before the date of my letter, and that as soon as the judge should return to Missouri or a District Attorney be accessible to me, I would execute my bond, with the necessary securities, obtain the certificate required from the judge or attorney as the sufficiency of my securities, and forward it to the Treasury Department.

The judge has not yet returned home, and I have thought it best to enter into bond in duplicates, one of which you will herewith receive. As soon as I have an opportunity of obtaining the certificate required from the District Judge or Attorney, I will send the other with the said certificate annexed.

I am, with much respect, &c.,

WM. RECTOR.

Hon. GEORGE GRAHAM, *Commissioner General Land Office.*

F.

Copy of a letter from the Commissioner of the General Land Office to William Rector, Esq.

TREASURY DEPATMENT, *General Land Office, September* 18, 1823.

SIR: I have to acknowledge the receipt of your letter of the 8th ultimo, transmitting your official bond without the approval of the proper United States officer, for reasons satisfactorily explained in your letter. The bond in its present shape being only intended as temporary, you will be pleased to transmit the duplicate, properly certified, as soon as is in your power to do so.

I am, &c.,

GEORGE GRAHAM, *Commissioner.*

G.

TREASURY DEPARTMENT, *General Land Office, December* 1, 1823.

SIR: Your two letters, dated 7th ultimo, have been received. That covering your bond and requiring a further supply of money to meet the demands of surveying the public lands has been submitted to the Secretary of the Treasury, together with your letter of the 23d October, with a request that he would furnish you with such further credits on the Receivers as he might deem expedient.

Expecting that you would have left St. Louis for this place before a letter would reach you, I wrote to Mr. Bates, the Recorder, relative to the mode of resurveying the old confirmed Spanish surveys.

Should you get this letter before you leave St. Louis, I will thank you to furnish me with such information on this subject as may be in your power.

I am, &c.,

GEORGE GRAHAM.

P. S.—Your bond is returned, not being executed in the form prescribed by my letter of the 21st July; copies are enclosed.

H.

GENERAL LAND OFFICE, *September* 3, 1824.

SIR: I have the honor to enclose a bond executed by William Rector, late Surveyor General of the lands of the United States in the States of Illinois and Missouri and Territory of Arkansas, dated August 7, 1823, which was received on the 1st December last, when General Rector was advised that it was informal, and required to execute a new one agreeably to the form then enclosed to him. To that letter no answer has been received.

I have the honor to be, &c.,

GEO. GRAHAM.

Hon. WM. H. CRAWFORD, *Secretary of the Treasury.*

K.

Know all men by these presents, that we, William Rector, Alexander McNair, Stephen Rector, Thos. C. Rector, Jerh. Connor, B. G. Farrar, J. & G. H. Kennerly, Thos. Hempstead, Jos. C. Brown, are held and firmly bound unto the United States of America in the full and just sum of thirty thousand dollars, money of the United States; to which payment, well and truly to be made, we bind ourselves jointly and severally, our joint and several heirs, executors, and administrators, firmly by these presents. Sealed with our seals, and dated this 7th day of August, in the year one thousand eight hundred and twenty-three.

The condition of the foregoing obligation is such, that whereas the President of the United States hath, pursuant to law, appointed the said William Rector surveyor of the public lands in the States of Illinois and Missouri and in the Territory of Arkansas:

Now, therefore, if the said William Rector shall faithfully execute and discharge the duties of his office, then the above obligation to be void and of none effect; otherwise, it shall abide and remain in full force and virtue. (Signed duplicates.)

WM. RECTOR.	[SEAL.]
A. McNAIR.	[SEAL.]
STEPHEN RECTOR.	[SEAL.]
THOS. C. RECTOR.	[SEAL.]
JER. CONNOR.	[SEAL.]
B. G. FARRAR.	[SEAL.]

S. DAVIDSON KING.
GEO. WOOD.

SEPTEMBER 3, 1824.

20TH CONGRESS.] No. 786. [1ST SESSION.

STATE OF THE FINANCES.

COMMUNICATED TO THE SENATE DECEMBER 10, 1827.

TREASURY DEPARTMENT, *December* 8, 1827.

SIR: I have the honor to transmit a report, prepared in obedience to the directions of the "act supplementary to the act entitled an act to establish the Treasury Department," passed on the 10th of May, 1800.

I have the honor to be, with the highest respect, your obedient servant,

RICHARD RUSH.

Hon. the PRESIDENT *of the Senate.*

REPORT.

In obedience to the act making it the duty of the Secretary of the Treasury to "lay before Congress, at the commencement of every session, a report on the subject of finance, containing estimates of the public revenue and public expenditures, and plans for improving or increasing the revenues from time to time," the Secretary proceeds to the task which that duty enjoins upon him.

It is satisfactory to be able to state, in the beginning, that the revenue accruing for the current year is likely to exceed rather than fall below that of the last. This is the more satisfactory, when considered in connexion with the fact of the unusually large importations of foreign merchandise in 1825. The importations for that year having greatly exceeded their average value for many years preceding, a subsequent reduction in their value had been looked to, under analogous facts heretofore occurring in the foreign trade of the country. This has proved to be less the case than might have been anticipated. Although the importations for the year ending on the thirtieth of September last are believed to have been less than for the year ending on the same day in 1826, those for 1827, commencing on the first of January, and ending with the close of the present month, will, in all probability, be greater. It is on the year calculated in the latter way that the annual revenue from the customs is estimated. The importations for the third quarter of the present year have been large, owing to the quantity of woolen goods which they embraced. If this, on the one hand, has been a cause specially operating to augment the entire importations of 1827, there are circumstances connected with other branches of the foreign trade that have been specially in operation to diminish them. The opinion may reasonably be entertained, founded on these and other considerations, that the reaction under the heavy importations of 1825 has arrived at its close. Aside, therefore, from unforeseen events, the importations for the next year, on which the revenue so mainly depends, under the present system of finance, may be expected to prove sufficiently ample for every ordinary financial purpose. The actual receipts into the Treasury during the current year have been less, in particulars that will be presently stated, than the sum at which they were estimated. They have been sufficient, however, with the balance in the Treasury at the commencement of the year, to meet every appropriation for the service of the year, including the sum of ten millions on account of the public debt.

As the state of the public debt, and manner in which the process of extinguishment goes on from year to year, is a subject on which the nation desires and expects to receive accurate and full information, it will be exhibited to Congress, in the first instance, upon the present occasion. The exposition of this subject will be given in connexion with a short retrospect.

From the 1st of January, 1825, to the close of the present year, there will have been applied to the principal of the public debt the sum of $21,297,210 93, and paid on account of interest the sum of $11,863,445 20, making a total of $33,160,656 13. Of the applications on account of the principal during these years, $7,725,034 88 were made in 1825; $7,064,709 21 in 1826; and $6,507,466 84 will have been made by the close of 1827. Of the preceding sum of $21,297,210 93 it is proper to state that a portion of it, viz: $5,000,000, was borrowed under the act of the twenty-sixth of May, 1824, at an interest of four and a half per cent., to pay off an equal portion of debt standing at an interest of six per cent. The aggregate amount of the public debt on the 1st of January, 1825, was $83,710,572 60. To this must be added the stock, amounting to $5,000,000, at four and a half per cent., created by the above act, but which was not issued until after the commencement of 1825, and a small amount of three per cent. stock that was subsequently issued, viz: $16 25, making the whole amount of the public debt, in 1825, $88,710,588 85. The aggregate amount at which it will stand on the 1st January, 1828, will be $67,413,377 92. The whole of the $21,297,210 93 applied to the principal of the debt in the three years mentioned have gone towards the reduction of the six per cent. stock. $5,000,000 of this sum having been replaced by the stock at four and a half per cent., issued under the act of the 26th of May aforesaid, are, of course, again to be ranked as part of the debt. It follows, that debt, in six per cent. stock, to the amount of $16,297,210 93 will have been absolutely extinguished, in the course of these three years, by the surplus money of the Treasury, in addition to $11,863,445 20 paid as interest. It also follows that $21,062,332 17, in principal and interest, will have been applied to the public debt during the years 1826 and 1827, out of the means of the Treasury, without any assistance whatever from loans. This is an amount greater than was required to be applied to it for these two years by the obligations of the Sinking Fund act.

It will be satisfactory to Congress to know that, during the three years in question, besides these payments made on account of the debt, and all other payments to meet the annual expenses of the Government, large sums have been applied to objects wearing a character neither temporary nor annual. By these are meant internal improvements, in the form of subscriptions to canals, and appropriations for otherwise opening and extending intercourse throughout the country; fortifications and armories; ships-of-war, naval docks, and other establishments connected with the Navy; public edifices of various descriptions, whether for purposes marine or civil; arming the militia; the purchase of lands from the Indians, and other expenses belonging to this department of the public service. On such objects, and others

kindred to them, the expenditures during these three years have reached a sum little short of $12,000,000. A nation that, after providing for the regular support of its Government, is seen to proceed in this manner in the payment of its public debt, and in additional disbursements so considerable, for which equivalents remain that for the most part are of permanent value to the nation, cannot be regarded as other than prosperous in its financial condition.

That the exact situation of the whole funded debt at this time may be seen, the several parts of which it consists will be distinctly set forth for the full information of Congress.

Its total amount on the first of October last was (statement No. 1) $68,913,541 08. This sum comprehends the old revolutionary three per cents, amounting to $13,296,247 70, redeemable at the pleasure of the Government, and the seven millions subscribed to the Bank of the United States, also redeemable at the pleasure of the Government.

The residue of the debt was contracted after the commencement of the war of 1812, and consists of various loans and stocks, created and redeemable at periods as follows:

1. The sum of $4,244,587 07, at six per cent., being the residue unpaid of the loan under the act of the 8th of February, 1813, and redeemable in 1826. The amount authorized to be borrowed under this act was sixteen millions. For this sum certificates of stock issued to the amount of $18,109,377 43, a premium having been given to the lenders. Of this amount there remain unpaid, as above, $4,244,587 07.

2. The sum of $13,096,542 90, at six per cent., being the residue unpaid of loans made under the act of the 24th of March, 1814, and redeemable in 1827. The amount authorized by this act was twenty-five millions. Of this amount there was borrowed, under loans contracted in 1814, the sum of $12,942,423 26. For this sum certificates of stock issued to the amount of $16,108,014 43, under a premium to the lenders, as above, of which there remain unpaid of the loan contracted on the 2d of May in that year, $8,507,866 36; of that contracted on the 22d of August, $4,050,780 77; and of other smaller loans, contracted under the act in the course of the same year, $537,895 77; making, in the whole, $13,096,542 90, as first above stated.

3. The sum of $9,490,099 10, at six per cent., being the residue unpaid of the loan under the act of the 3d of March, 1815, and redeemable in 1828. This act authorized a loan of eighteen millions four hundred and fifty-two thousand eight hundred dollars. There was borrowed under it the sum of $11,699,326 63, principally by the funding of Treasury notes, and certificates of stock issued to the amount of $12,288,147 56, of which there remain unpaid, as above, $9,490,099 10.

4. The sum of $769,668 08, at an interest of four and a half per cent., being one-half of the six per cent. stock of 1813, exchanged under the act of Congress of the 3d of March, 1825, and redeemable in 1829.

5. The sum of $769,668 08, at an interest of four and a half per cent., being the other half of the six per cent. stock exchanged as above, and redeemable in 1830.

6. The sum of $18,901 59, at five per cent., being one-third part of the sum of $56,704 77, issued in exchange for six per cent. stock of 1813, 1814, and 1815, under the act of the 20th of April, 1822, and redeemable in 1831.

7. The sum of $18,901 59, at five per cent., being one other third part subscribed as above stated, and redeemable in 1832.

8. The sum of $10,000,000, at four and a half per cent., being stock created under the acts of the 24th and 26th of May, 1824, for sums borrowed of the Bank of the United States, one-half to pay the Florida claims, the other half to pay off the six per cent. stock of 1812, and redeemable in 1832.

9. The sum of $999,999 13, at five per cent., being stock created by the act of the 15th of May, 1820, and redeemable in 1832.

10. The sum of $18,901 59, at five per cent., being the remaining third subscribed under the act of the 20th of April, 1822, and redeemable in 1833.

11. The sum of $2,227,363 97, at four and a half per cent., being one-half of the amount subscribed in exchange for six per cent. stock of 1813, under the act of the 26th of May, 1824, and redeemable in 1833.

12. The sum of $2,227,363 98, at four and a half per cent., being the other half subscribed under the act last above stated, and redeemable in 1834.

13. The sum of $4,735,296 30, at five per cent., being the amount of stock issued under the act of the 3d of March, 1821, and redeemable in 1835.

The foregoing enumeration gives the aggregate of $68,913,541 08, stated as the amount of the debt on the first of October last.

Of this aggregate it may not be improper here to state that $49,001,215 36 are owned in the United States, and $19,912,325 72 by foreigners.

A payment being about to be made on account of the principal of the debt at the close of the present year, in addition to one that was made in July, its total aggregate amount on the 1st of January, 1828, will be $67,413,377 92.

To make up this aggregate all the items exhibited in the foregoing view of the whole debt are included; but the whole together gives the nominal, rather than the real amount of the debt. Its real amount on the 1st of January, 1828, will be but a fraction above sixty millions. The sum of seven millions subscribed by the Government to the Bank of the United States is, in effect, destroyed as debt by the United States owning an equal amount in the shares of the bank. So far is this sum from being any charge upon the Treasury, that the Treasury is annually receiving interest for it in the dividends upon the shares. Whenever the latter are sold, they may at least be expected to replace the sum that was invested in them. The old revolutionary three per cents, too, have now existed nearly forty years. By the provisions of the Sinking Fund act this stock can only be bought up and extinguished by the Government, when the price shall fall to sixty-five dollars for every one hundred dollars. This in all probability will prevent, for some time to come, the $13,296,247 70, of which this stock consists, being any charge upon the resources of the nation, so far as paying off the principal is concerned; as it would be difficult to say when the obligation to pay it off will attach under the above act, or when it could otherwise be done with full advantage to the public. It is many years since this stock has been as low as sixty-five dollars for one hundred, and there is no present prospect of its falling so low. The portions of the debt, therefore, which under the existing enactments of the law can alone be met by an annual and ascertained process of extinguishment, unless the three per cents should be paid off at one hundred, cannot be computed at more than $47,117,130 22. It is plain that this amount is rapidly hastening to extinguishment. If the United States continue at peace, and there is, happily, no present prospect of its interruption, their debt must in a few years more disappear. The new obligations which will devolve upon the National Councils, in reference to the pecuniary resources of the country, when liberated from large annual payments on account of the debt, the wisdom of those Councils will, at the proper season, know how to estimate.

It remains to make known, in conclusion, under this head, the operations had at the Treasury upon the public debt since the adjournment of the last session of Congress.

In the last annual report from this Department, a loan to the amount of sixteen millions, at an interest not to exceed five per cent., was recommended. The object of such a loan was to pay off a portion of the debt, equal to sixteen millions, bearing an interest of six per cent. No law to this effect having passed, it became the duty of the Department to proceed in the work of paying off the six per cent. as far as the means of the Treasury would allow. Accordingly, on the first July, the sum of $5,007,303 68 was paid on account of the six per cent. loan, created by the act of the 8th of February, 1813. By the decision of the Commissioners of the Sinking Fund, in September, it was agreed that the further sum of $1,500,000 should be paid, on account of the same loan, at the termination of the present quarter of this year. Public notices have been issued in conformity with this decision and are now outstanding. A small fraction over the sum is included in the notice, the terms of the loan having rendered it necessary that the certificates to be paid off should be fixed upon by lot, and the last drawn number in this instance, as in the payment of July, having given the fractional excess. The manner of drawing the lots having been minutely described in a paper annexed to the last annual report, it will not here be repeated. In deciding upon the further payment of $1,500,000, the Commissioners had due reference to the fourth section of the Sinking Fund act of March 3, 1817, which declares that, "whenever there shall be, at any time after an adjournment of Congress, in any year, a surplus of money in the Treasury above the sums appropriated for the service of such year, the payment of which to the Commissioners of the Sinking Fund will yet leave in the Treasury, at the end of the year, a balance equal to two millions of dollars, then such surplus shall be, and the same is hereby, appropriated to the Sinking Fund, to be paid at such times as the situation of the Treasury will best permit." But this provision was not viewed as creating any obstacle to the decision. The construction and practice at the Treasury, since the passage of the act, have invariably been not to consider the above provision as attaching, so long as any part of the ten millions remain unapplied to the debt, this sum being considered, under the very object and terms of the act, as a standing appropriation for the service of the year.

No further remarks are deemed necessary at this time in relation to the public debt. Should the laws respecting it remain unchanged, payments on account of the principal will continue to be made throughout the ensuing year, in such ways as the obligations of the laws direct and the means of the Treasury may best allow.

PUBLIC REVENUE AND EXPENDITURE OF THE YEARS 1826 AND 1827.

The net revenue which accrued from duties on imports and tonnage during the year 1826 amounted (statement A) to		$20,248,054 30
The actual receipts into the Treasury, from all sources, during the year 1826 amounted to		$25,260,534 21
Viz:		
Customs, (statement A)	$23,341,331 77	
Public lands, (statement D)	1,393,785 09	
Dividends on stock in the Bank of the United States, arrears of internal duties and direct taxes, and incidental receipts, (statement E)	500,228 90	
Repayments of advances made in the War Department for services or supplies prior to the 1st of July, 1815	25,088 45	
Making, with the balance in the Treasury on the 1st of January, 1826		5,201,650 43
An aggregate of		30,462,084 64
The actual expenditures of the United States on all accounts, during the year 1826, amounted (statement F) to		24,103,398 46
Viz:		
Civil, diplomatic, and miscellaneous	$2,600,177 79	
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	6,243,236 03	
Naval service, including the gradual increase of the Navy	4,218,902 45	
Public debt	11,041,082 19	
Leaving a balance in the Treasury on the 1st of January, 1827, of		6,358,686 18
The actual receipts into the Treasury during the first three quarters of the year 1827 are estimated to have amounted to		$17,488,810 07
Viz:		
Customs	$15,142,892 68	
Public lands, (statement G)	1,212,011 29	
Dividends on stock in the Bank of the United States	420,000 00	
Arrears of internal duties and direct taxes and incidental receipts, (statement H)	681,561 12	
(This item includes the sum of $602,480, as the first moiety of a sum paid by the British Government, by virtue of a convention under the first article of the treaty of Ghent, for slaves carried off by British officers in contravention of that treaty; which sum, as it is paid out to the American claimants by Treasury warrants in the usual form, has a place among the actual receipts of the year, though no part of the revenue.)

Making the total expenditure of the year 1827.....			22,695,390 96
And leaving in the Treasury on the 1st of January, 1828, an estimated balance of.....			6,269,585 29

It will be observed from the above statements that the receipts into the Treasury, from all sources in 1826, were $25,260,434 21. The sum at which they were estimated in the annual report of 1825 was $25,500,000. From the statements and estimates applicable to 1827, it will also be observed that the sums received and expected to be received, from all sources, during this year, (apart from the moneys paid under the treaty of Ghent,) will amount to $21,401,330 07. The amount at which they were estimated in the annual report of 1826 was $23,150,000. It is therefore expected that the entire receipts of 1827 will be $1,748,669 93 less than the estimates presented in 1826.

Of this difference upwards of $400,000 were caused by postponements in the sales of the public lands. The estimate in 1826 of receipts from this source for 1827 was fixed at two millions of dollars. This was founded, in part, as stated in the report, on expected sales of a considerable quantity of relinquished lands in Alabama. These sales having been postponed until 1828, the amount which it was anticipated they would yield should therefore be stricken from the estimate. With this deduction, the amount produced by the sales of the public lands in 1827 will be found to correspond very nearly, in all other particulars, with the estimate.

The remaining difference has been in the customs. This has proceeded from the uncertainties that attend all estimates of the revenue depending upon foreign commerce—itself ever uncertain. These estimates, whether given by this Department or by committees of Congress, specially scrutinizing them under all the lights attainable, have often, heretofore, from causes impossible to have been foreknown, been disappointed by the result. The disappointment has sometimes been upon a larger, sometimes upon a smaller scale. Such estimates can, therefore, on no occasion be regarded in any other light than as an approximation to that sum always desirable to be known, but rarely, if ever, in a long series of years, foretold with precision. The estimates presented for 1827 were formed upon bases which had the sanction of past experience in giving reasonable promise of a fair approach to the true result. Whilst, on the one side, expectations of a redundant income should not be too confidently indulged, it becomes a duty, on the other, not to estimate the receipts below the amount which the usual probabilities seem to warrant, lest the public service should be stinted in any useful particular by the restrained appropriations of Congress. The importations for 1827, taking into the account the calendar year, will, it is believed, as before intimated, exceed the importations for 1826. But those for the first two quarters of 1827 have been very small. Had they borne the same proportion to those of the last two quarters that the importa-

tions of the first two quarters have borne to those of the last two, on an average of five years preceding, the actual receipts into the Treasury from the customs in 1827 would have been larger. This effect would have grown out of the terms of credit allowed on duty bonds. By these terms a portion of the payments always falls due within the year, on importations made during the first six months of the year. The average importations for the first six months during five years that preceded 1827 were larger than those for the last six months. For 1827 there is every probability that this ratio of importations on the time of the whole year will be reversed. It is so as far as yet ascertained. We are reminded, even by the experience of recent years, of the frequent variations between the anticipations and the issue in this part of our fiscal system. In 1817 the estimated receipts from the customs were $24,000,000, and the actual receipts $26,283,348. In 1818 the estimated receipts were $20,000,000, and the actual receipts $17,176,385. In 1819, 1820, and 1821, the estimates from the same source were successively given at $21,000,000, $19,000,000, and $14,000,000. The sums successively received were $20,283 608, $15,005,612, and $13,004,447. These disappointments sprung from supervenient causes, the means of knowing which did not exist when the estimates were made. There have been, at other epochs, differences much more considerable, which need not be detailed; yet it may not be irrelevant to the purpose of setting forth the intrinsic uncertainties of this branch of revenue to add, that, for the last of the years here indicated, after the estimate had been given in from the Treasury at $14,000,000, the proper committee of one of the branches of the Legislature, thinking it too low, raised it to $15,000,000. The receipts for that year (1821) scarcely exceeded $13,000,000, as already stated. The allusion to these facts would be incomplete in its purpose without the further remark, that the affairs of this Department are well known to have been conducted with great general accuracy during the years mentioned.

The balance of $6,269,585 29, that will probably be in the Treasury on the 1st of January, 1828, will be subject to the following charges: 1. The balance of unapplied appropriations which will remain to be satisfied after the 1st of January, 1828, estimated at $3,980,000. 2. About $1,000,000 in funds that cannot be considered as effective, being made up of debts due from banks in several of the States heretofore used by the Government as banks of deposit, or the notes of which were received whilst payments in specie were suspended. As was stated in a former report, the recovery of these debts, though measures to that end are in train, must, in many instances, be regarded as doubtful, and will probably be slow in all. 3. The sum of $817,880, being the amount which it is believed will remain unpaid of the moneys received under the first article of the treaty of Ghent.

ESTIMATE OF THE PUBLIC REVENUE AND EXPENDITURE FOR 1828.

The value of importations into the United States during the year ending on the 30th of September last is estimated at $81,000,000. The exportations for the same period are estimated at $80,000,000. When the more exact statistical returns for the year are laid before Congress, as they will be in the course of the session, it will be perceived that there has been a diminution in the imports from China during the present year, as compared with the past. The diminution has been very considerable, both in teas and silks. This fact will show, in the end, the greater excess of importations from Europe during the present year, whence our foreign manufactures are principally derived. The fourth year is now in progress since the passage of the act of Congress augmenting the duties on imported merchandise. We are, therefore, at a point enabling us to speak on grounds more authentic than hitherto of the effect of that act upon the foreign commerce of the nation. By comparing the time that has elapsed since its operation with an equal portion of time that preceded, it appears that both the imports and exports have, in the aggregate, increased. They stand thus: Total value of importations for the years 1822, 1823, and 1824, $241,000,000; total for 1825, 1826, and 1827, $262,000,000. Total value of exportations for the three former years, $222,000,000; total value for the three latter years, $257,000,000. Fractions are dropped both ways. The result is not affected by the re-exportations of foreign merchandise for the same time, which bear a proportion, as nearly as may be, equal on the basis of importations for the two periods. It will be understood that in these statements of importations and exportations for a term of six years, those for 1827 are given by estimate only for a portion of the year; but it is not believed that there will be any such change in them as to shake the general results. The articles of domestic manufacture exported in 1827 are estimated at upwards of $7,000,000, a sum greater than that to which they have ever before amounted in any one year.

A tariff of duties upon foreign productions may, without doubt, be so raised as to affect injuriously the interests of foreign commerce. To suppose that the tariff of the United States, established by the act of May, 1824, is at such a pitch, would be contrary to analogies afforded by the history of other commercial nations, and, thus far, to the experience of our own. It is believed, on the contrary, that its rates might be augmented in important particulars without hazarding any such consequences to foreign trade in its ultimate course and aggregate value, and that a true national policy dictates their augmentation. The increase of our imports and exports since the tariff of 1824 becomes the more striking from the consideration that, in 1826, there was witnessed in Europe an extraordinary depression of prices. This was followed by a proportionate stagnation in all the operations of purchase and sale. The evil assumed a magnitude productive, in that hemisphere, not only of great individual suffering, but of anxiety in Governments. It was at such a moment that we began to reap the benefits of the profitable turn given to a portion of the industry of our own country by the provisions of the tariff. Had it not been for the demand of our own manufacturers for some of the agricultural staples of the country, the presumption is authorized that the fall of prices in Europe at that period would have been differently felt by our agricultural classes here. Similar occurrences abroad had, on former occasions, been followed by pecuniary losses in this country much more extensive and formidable. The increased number of artisans within our borders, and greater scope of their operations, evidently tended to leave the agriculturist less exclusively dependent upon foreign markets than if the latter had been his sole reliance. Nor have the benefits of manufacturing industry ended here. The proof strengthens that many articles have become cheaper, more abundant, and of superior quality, by the effect of competition among the home artisans, than when derived only from abroad. The opening of new objects of labor, by multiplying the occupations of men, has also increased the public prosperity. This has produced an increased ability to buy all articles of consumption whencesoever obtained. Hence foreign trade has not declined, of which we have the incontestable evidence just stated, whilst new domestic resources in manufacturing labor have been unfolding themselves. As the latter are more amply brought out, it is confidently anticipated that the former will become wider and more enriching in its range. If the new fields of labor have only, as yet, been opened in particular divisions

of the country, other divisions will reap a full measure of benefit. If there can be no dissent to the maxim, as between independent nations, that the prosperity of one promotes that of another, it cannot be doubted that different parts of the same nation will derive reciprocal prosperity from the same cause. The United States are distinguished in this respect by a lot as peculiar as it is favorable. Nothing can exceed the inducements to various and subdivided traffic that abound within their own limits. It is here that the economist may hope to see exemplified every essential advantage of the foreign and home trade blended in the same system, moulded by the same policy, and freed from the jealousies that have frustrated, and must ever continue to frustrate, the benevolent but impracticable theories of commercial intercourse as between distinct nations. It is not merely that the extent of climate and soil in the Union are adapted to all pursuits that can give activity and fruitfulness to industry under every form. These are but natural advantages. It is the exchange of the products of industry upon terms the most desirable and the most gainful throughout so ample an extent of home dominion that will exalt such natural advantages to the utmost. It is here that commerce may be carried on freed from every restriction, and probably for the first time upon a political and geographical theatre so expanded. The appropriate industry of each portion may go into unfettered action; of Louisiana and of Massachusetts, of Georgia and of Rhode Island. A vast home trade resembling foreign trade, as well by intervening distances as the nature of its exchanges, will be prosecuted, whether along the ocean or the water highways of the interior, untrammelled by tolls or imposts of any kind, and without even the necessity of custom-houses; or giving to such establishments uses only formal. Such a trade can only, however, have its proper value by the extensive success of manufactures. There is nothing else can impart to labor in the United States the necessary variety in its objects, and the necessary regularity and fullness in the demand. There is nothing else can adequately augment and diversify the list of commodities for which the necessities and enjoyments of improved life are ever making calls. There is nothing else will raise up towns on the surface of our territory at every commanding point, without which land can never be made to yield the full amount of which it is susceptible, or the farmer be sure of steady and remunerating prices. It hardly need be added how a course of policy that would infuse augmented vigor and briskness into a coasting trade embracing in its range nearly one-half of a continent would tend to enlarge in all ways the essential foundations of naval strength.

Manufactures are recommended by every consideration that can bear upon the riches, the security, and the power of the State. The effect upon agricultural prices produced by the perpetual presence of armies in a country will not too strongly illustrate the extent of the benefit that the manufacturing class renders to the class of farmers. The parallel ends, indeed, here, and ends beneficently; for, whilst the soldier does nothing but consume, the manufacturer produces as well as consumes, supplying the farmer with articles as necessary as those which he receives from him. Manufacturing industry advances the intellectual no less than the physical power of a State, by the various knowledge which its complicated pursuits put into requisition. It is the course of industry which must lay the foundation of those arts which tend to refinement in a nation, for which intellectual nations, and none more than Republics, have acquired renown. The time has passed when objections might be made to manufactures, from the limited amount of our population and the dearness of labor. The population throughout large portions of the Union is now sufficient, both in amount and density, for any operations of manual labor; while science, by applying its inventions to this kind of labor, has abridged its expensiveness. Where a single State of the Union has recently been seen to complete a public work, which, for its great extent and skilful execution, may compare with similar works achieved in any part of the world, it will not readily be believed that the country of which that State is but a part can be deficient in the means of prosecuting manufacturing labor, however extended the scale upon which it may be demanded. The completion of such a work—the New York canal—is, of itself, a memorial of the highest authenticity that the nation has reached a point qualifying it for whatever undertakings its true interests point out, and to which other nations have been found equal. As little has the objection to manufactures founded upon moral causes any place. That they lead to deterioration in portions of the people is not to be admitted. Facts, on the contrary, teach that the freest and most enlightened, as well as most opulent and powerful countries of Europe, are those in which manufacturers bear the greatest proportion to the other productive classes. Their success begets industry, which is favorable to good habits. It begets prosperity, which supplies them with comforts and raises up their condition. The remark rests on general results, aside from partial exceptions. It is equally borne out by facts that countries in which there is an undue predominance of agricultural population are the poorest, and their inhabitants the most depressed. Sailors, considered as a class, have their lives shortened by the hardships that they undergo. Yet when was this alleged as a reason for extirpating commerce? In like manner that co-equal agent in lifting up the condition of nations—manufacturing industry—would be entitled to favor, even if partial evils flowed from it, as these must give way in the scheme of society to preponderating good. But if authentic information justifies the conclusion that the pursuit of manufactures tends not to deterioration in a people, but the reverse, the policy inculcated acquires new force. The experience of our own country confirms the accounts from others, and we may be allowed to add the hope that the influence of our political institutions upon individual and social life will operate to keep up still more the moral tone of this portion of our population as time multiplies its numbers.

Remarks like the preceding are believed to be justified by the success which manufacturing industry has already attained in the United States, as far as it has received adequate protection. They are conceived to be not less appropriate to the design which is entertained of recommending an increase of that protection where it is most demanded. There is little hazard of a community ever forcing manufactures not adapted to its soil, climate, and all its other capabilities. Still less can the hazard exist where the powers of legislation are deposited in the hands of those who are imbued with the collective intelligence of the community. Every country possesses its physical characteristics; as those stamped by its government, its laws, and the leading wants and tastes of its population. In these lie the causes that make up its inherent capabilities for the pursuit of some branches of industry more than others. Manufactures once established to the proper limit of these, and scope enough will remain for foreign commerce in other commodities that will come into demand. The demand for others never fails to increase, as increasing wealth at home enlarges the capacity to procure them, and superinduces the new artificial desires that crave them. Wealth at home must increase as manufacturing labor increases. Money, as representing wealth, must increase, since each year that witnesses an increase in the amount of consumable goods must witness a proportionate increase in the medium necessary to circulate them. These are truths too obvious to be dwelt upon, and too important to national prosperity to be disregarded

in practice. Amongst the branches of home industry deserving special care at all times are those which conduce to subsistence, shelter, clothing, and defence. It is intended, on the present occasion, respectfully to recommend to the consideration of Congress, as classing under one or other of these primary heads, the expediency of increasing the present duties—

1. Upon woolen goods and foreign wool.
2. Upon fine cotton goods.
3. Upon bar iron.
4. Upon hemp.

The time that has passed since the tariff of 1824 has been sufficient to show that the duties fixed by it upon these articles are not adequate to the measure of success in producing them at home which their cardinal importance merits. A change since 1824 in the laws of Great Britain, in regard to those first named, has also rendered almost abortive the provisions of the tariff in their favor. It belongs to the purpose of this report, which looks to the encouragement of the national industry in preference to any that is foreign, here to state that for a period of six successive years, ending with 1826, the value of woolen goods and cotton goods imported into the United States from the country just named exceeds one hundred millions of dollars; and the value of iron and of articles manufactured from iron, seventeen millions. During one of these years the woolens exported from that country to this exceeded the amount of those exported to the whole of Europe put together. For the means of exchange against an amount of foreign manufactures so great, the United States have had three principal staples of their soil, viz: wheat flour, tobacco, and cotton. The first of these the same country has by her laws positively or virtually excluded, during the same period of years, from consumption within her domains. The second she has admitted under a duty of more than six hundred per cent. The third she has received with little scruple. She has known how to convert it into a means of wealth to her own industrious people, greater than had ever before, in her whole annals, been derived from any single commodity. This she has done, first, by working it up for her home use, upon the largest scale; and next, by making it subserve the interests of her foreign trade. She has sent it over all seas, wherever a market opened, but chiefly back again to us, to be bought under the enhancements of her own labor, at prices four and fivefold those which she has paid us for it. Commerce upon the terms attested by such facts cannot be pronounced just as between the parties. The conviction is deeply entertained that the best interests of the nation point to the expediency of reviewing and correcting a species of commercial intercourse so unequal. It may be applicable to subjoin that the woolen, cotton, and iron goods imported from all other parts of the world, during the years indicated, are found to be but about one-sixth part of the value of those obtained from the country whose laws fall with edicts of exclusion, or with such disproportionate duties, upon the produce of the United States—not only the articles mentioned, but more that might be mentioned.

The complete establishment of American manufactures in wool, cotton, iron, and hemp, is believed to be of very high moment to the nation. All the principal raw materials for carrying them on are at hand, or could be commanded. The skill for imparting excellence to them would come at the proper time. There would be no want of labor, to which an abundant water-power, as well as artificial machinery, would everywhere be lending its assistance. Capital would be found for investment in them. If their establishment by the immediate protection of the laws should at first raise the cost of the articles, and for a succession of years keep it up, a true forecast, looking to the future rather than adapting all its calculations to the existing hour, would not hesitate to embrace the protecting policy. Nations that would found schemes of solid and durable advantage must be ready to do so at the peril of temporary privation. It is the great term of national, as of individual superiority and distinction. To buy cheap is not the only or always the chief good. It is for legislators who have to deal with the practical interests of mankind to give to abstract propositions the necessary limitations. Considerations higher than those of present mercantile gain have often swayed the counsels of nations—of nations whose wisdom in this respect we ought not lightly to impugn, any more than we can at all question their long pre-eminence in prosperity. Need it be said that England had her laws to protect her tonnage for more than a century, during all which time she might have employed the tonnage of other States at a price much below that at which she built and used her own? Need it be added what results to her maritime and commercial sway have flowed from her resolute perseverance in those laws? Need it be said that France, conspicuous for positive as for progressive riches, and comforts, and power, still excludes from her territory fabrics that might trench upon the custom of her own workshops, in branches of labor and art believed to be conducive to the national resources, whilst they confer also the means of individual thrift? Shall the many laws of these two great States, at periods when they were laying the foundations of their manufacturing industry, be recounted, all tending to foster it by means the most efficacious; laws to the essential principle of which they still, in so many instances, systematically adhere? Shall we call to recollection, especially, the ordinance of M. Calonne, which invited to France artificers from all nations, allowing them equal privileges with those they enjoyed in their native countries, and granting them an immunity from duties on the importation of the materials used in their manufactures; nay, more, exempting them and their workmen from all personal or other taxes? These, with analogous illustrations, as numerous as applicable, will be forborne, as too familiar to be recapitulated. The protecting laws to our own tonnage, our own coasting trade, our own fisheries, still in force, and which first raised up the prostrate navigation of the United States, may supersede other references. These show how the fathers of the Republic were awake to the wisdom of other times and other nations, knowing how to make it their own. Their recorded opinions attest that they were equally awake to the principle of encouraging manufactures in the broadest sense. If they did not carry it further into practice, it is because a proper discrimination saw, in the circumstances of that early day, whether, as regarded the state of the world from without, or our own internal condition, no sufficient motive for giving to the principle a more extended application. But if this species of industry should not be prematurely gone into, so neither ought the laws to neglect it too long. Excellence is of slow growth. Rarely is it quick or spontaneous in the material any more than in the moral world. Time is an agent indispensable towards inducting a people into the full knowledge of the manufacturing arts. They are complex; they are difficult. They are to be learned only by stages, throughout a long course of application and efforts, as mind is evolved by education, institutions for promoting which the laws, in the wisest countries, are careful to found and to nuturre. When, therefore, neither paucity of population nor of means any longer hold as reasons for not cultivating these arts amongst us, and when those external circumstances have passed away which drew nearly all of our population into commerce or into husbandry, the period for permanently fixing them as an integral interest in the State seems finally to have arrived. Whilst we repose in tranquillity, the season is auspicious

for entering effectually upon the work of establishing those specially recommended. Should war happen, it is not easy to state the augmented resources with which we should meet its exigencies, with these manufactures flourishing in perfection, any more than to portray the inconvenience which we should know in their absence. It is, therefore, from the connexion of their success with the leading interests of the State, in peace or war, that the conviction is felt, that it would be expedient to secure their success, even at the sacrifice of cheapness to the individual purchaser.

But no such consequence is to be apprehended. If it were a question of fostering manufactures, for which the circumstances of the country yielded not the abundant facilities, as with England, when she fostered by her own laws her own tonnage, then, indeed, could success be accomplished only by indefinite forcing, to be followed by indefinite monopoly in price. Such is manifestly not the case. Manufactures of fine cottons, of woolens of almost all descriptions, of iron articles, and of those from hemp, have already arrived at a point in the United States justifying the conclusion that some additional encouragement from Congress is alone wanting to fix them upon lasting and profitable foundations. This additional encouragement is invoked, as a proper offset to the high degree of success which foreign industry has attained in these branches by the effect of capital and skill, long pre-existing in older nations, and long aided by their laws. These are advantages not intrinsic, but accidental. Yet they cannot be countervailed but by efficient legislative aid to our own establishments in the beginning. This afforded, and there is the strongest reason, from past experience, to feel assured that American industry and resources, stimulated into full competition, will supply the commodities cheaper in price, as well as better in quality, than they have heretofore come to us from other countries. The competition increasing with time will unfold effects more and more useful. Every branch of manufacture brought into successful operation is apt to become the parent of others. New materials are discovered, new combinations of skill struck out, new aptitudes developed. Industry becomes awakened, where before it was inactive, carrying the country forward in individual wealth, in general comforts, and in financial power. For promoting the last durably, all expedients must prove fallacious that are not based upon prosperous labor pervading all classes at home. The consumption of the products of every kind of home labor would necessarily increase with the increasing amount of production, and, under more encouragement given to manufactures in the branches recommended, might be expected to yield an excess that would flow into our export trade, augmenting its amount and the amount of its returns. As regards cotton articles, such is the exuberance of the raw material in the United States, that it cannot be assuming too much to suppose that the day is not remote when they will largely supply other countries of the world with these fabrics. Already they have begun to do so, to some extent, with those of the coarser species. European science applied to the manufacturing arts has indeed returned to India, in the manufactured state, the native cotton of India; but it will be the effect of our own policy if a similar traffic be long permitted to go on between Europe and the United States. That the latter will continue, under all circumstances, to supply Europe with a full portion of raw cotton cannot be doubted, from the present and growing state of that manufacture in Europe. That they might also be enabled, by the policy recommended, to vie with any nation in sending, even to the markets of Europe, articles manufactured from this material is an opinion which is believed to rest upon no exaggerated estimate of their manufacturing ability, however dormant it may be in reference to such a result now. That this invaluable raw material, but thirty years ago scarcely known to our own fields any more than to the British loom, is destined to draw out a far greater portion of the productive labor of this country than it has yet put into action, and mark an era in its manufacturing, as it has already done in its agricultural riches, is an anticipation which rational calculations of the future may justify. What is said of our cotton manufactures may, it is believed, be said with scarcely less confidence, eventually, though perhaps not immediately, of those of wool. The latter, from being more complicated in their whole process, and more difficult and costly in the skill necessary to their elaboration, naturally require more time to be reared to perfection. They claim, on this account, and claim the more imperiously, the immediate and decisive succor of the laws.

The opinion that these and other manufactures would come to be afforded to us, better in quality when obtained at home, cannot be passed over with only the simple expression of it. It is of a nature entitling it to some further notice. Amongst the disadvantages of manufactures not being more universally established in the United States, we are to rank that of their inhabitants being obliged to use wares of a low quality from abroad. It is known that a long list of articles is sent to us from both England and France, if not from other countries, which in those countries would be rejected by a large class of consumers. Furthermore, it is true, that an article injured in the making, in reference to the highest character of workmanship, will, notwithstanding, be sometimes shipped to this market, in the hope of finding for it bidders that could not so readily be commanded in Europe. If it be said that the wealth of this country does not at present yield a class of purchasers for European articles of the highest workmanship, the answer recurs that by multiplying our own workshops we should, at the proper time, be supplied with like articles. It ought not to be supposed that the resources of our own country, and the ingenuity of our own workmen, could not, under adequate incentives, supply them as excellent in quality and as perfect in finish as those made elsewhere. And, although it may not now be convenient to any considerable class of consumers in this country to make a call for articles of this highest stamp of manufactured excellence at the foreign prices, it is fully believed that the rivalry of numerous artisans at home would raise up skill to a point that would produce such articles, whilst it would bring down the prices to limits that would put them into circulation. It has not escaped observation that in American manufactures that have already, by the aid of the laws, obtained a preference to the foreign there is no inferiority as compared with the best standard of the same species of manufactures produced and consumed in the foreign country. By opening full scope to the competition and talents of our own artisans, the standard of excellence, as well as the faculty of discrimination, would be raised to a higher tone than when the one is formed and the other exercised, as is now too often the case, upon the secondary productions of other countries.

In appropriate connexion with these remarks, it may be stated, as a fact also known, that the raw cotton of the first quality and price which is sent from the United States to Europe is not that which is returned to the United States when manufactured. On the contrary, it is this species which is for the most part retained for consumption in Europe, whilst fabrics wrought from the inferior cotton are sent off to foreign markets generally, and to those of the United States amongst the number. Further legislative assistance to manufactures at this juncture, coming, as it would, after an interval that has left time for the judgment of the nation to pass upon the good effects of the tariff of 1824, as far as it has proved adequate, would impress the conviction, at home and abroad, that the manufacturing system was to be

incorporated with the well understood and durable policy of the nation. Besides other advantages from this conviction, we might reasonably expect to witness that of seeing a new class of emigrants come to the United States. They would consist not merely of unemployed journeymen from foreign workshops, however useful these may be, but, in all probability, of master manufacturers of capital and standing. How valuable emigrants of this description would prove; how they would help to quicken the progress of the country in manufacturing skill and general riches, is attested by the experience of all nations the wisdom of whose laws has superadded such emigrants to their own population. The effect of their coming would not be to injure our own manufactures. It would benefit them. It would increase their numbers. It would raise more speedily the whole class, by blending it more thoroughly with all the other interests of the State. The foreign artisans whom Britain sedulously drew to her shores at an early day, fully peopled as the whole of her circumscribed territory then was in comparison with ours now, rank among the causes that first and most prominently elevated her condition among nations. The effects of their ingenious industry exerted a meliorating influence upon social life, by investing it with new means of accommodation and embellishment, and was soon followed by the largest additions to the rural and commercial prosperity of the whole island. That the productiveness and perfection of English agriculture at the present day is owing to the size and power of her manufacturing classes is a truth not disputed. It is these classes to whose hands the harvests of her soil are carried, whether gathered from its surface or extracted in exhaustless mineral wealth from beneath it, and who become the customers of it all—the ready, constant, unfailing customers.

There is an inducement to increase legislative protection to manufactures, in the actual internal condition of the United States, which is viewed with an anxiousness belonging to its peculiar character and intrinsic weight. It is that which arises from the great extent of their unsold lands. The magnitude of the interests at stake in this part of our public affairs ought not to appal us from approaching it. It should rather impel us to look at it with the more earnest desire to arrive at correct opinions on any course of legislation that may affect, primarily or remotely, an interest so full of importance. The maxim is held to be a sound one, that the ratio of capital to population should, if possible, be kept on the increase. When this takes place, the demand and compensation for labor will be proportionably increased, and the condition of the most numerous classes of the community become improved. If the ratio of capital to population be diminished, a contrary state of things will be the result. The manner in which the remote lands of the United States are selling and settling, whilst it may possibly tend to increase more quickly the aggregate population of the country and the mere means of subsistence, does not increase capital in the same proportion. It is a proposition too plain to require elucidation, that the creation of capital is retarded, rather than accelerated, by the diffusion of a thin population over a great surface of soil. Anything that may serve to hold back this tendency to diffusion from running too far and too long into an extreme can scarcely prove otherwise than salutary. Moreover, the further encouragement of manufactures by legislative means would be but a counterbalance, and at most a partial one, to the encouragement to agriculture by legislative means, standing out in the very terms upon which the public lands are sold. It is not here intended to make the system of selling off the territorial domain of the Union a subject of any commentary, and still less of any complaint. The system is interwoven beneficially with the highest interests and destiny of the nation. It rests upon foundations, both of principles and practice, deep and immovable—foundations not to be uprooted or shaken. But our gravest attention may, on this account, be but the more wisely summoned to the consideration of correlative duties, which the existence of such a system in the heart of the State imposes. It cannot be overlooked that the prices at which fertile bodies of land may be bought of the Government under this system operate as a perpetual allurement to their purchase. It must, therefore, be taken in the light of a bounty, indelibly written in the text of the laws themselves, in favor of agricultural pursuits. Such it is, in effect, though not in form.

Perhaps no enactment of legislative bounties has ever before operated upon a scale so vast throughout a series of years and over the face of an entire nation to turn population and labor into one particular channel preferably to all others. The utmost extent of protection granted to manufactures or commerce by our statutes, collectively, since the first foundation of the Government has been, in its mere effect of drawing the people of the United States into those pursuits, as nothing to it. No scale of imposts, no prohibitions or penalties, no bounties, no premiums, enforced or dispensed at the custom-house, has equalled it. It has served, and still serves, to draw in an annual stream the inhabitants of a majority of the States, including amongst them at this day a portion, not small, of the western States into the settlement of fresh lands lying still further and further off. If the population of these States, not yet redundant in fact, though appearing to be so, under this legislative incitement to emigrate, remained fixed in more instances, as it probably would by extending the motives to manufacturing labor, it is believed that the nation at large would gain in two ways: 1st, by the more rapid accumulation of capital; and next, by the gradual reduction of the excess of its agricultural population over that engaged in other vocations. It is not imagined that it would ever be practicable, even if it were desirable, to turn this stream of emigration aside; but resources opened through the influence of the laws in new fields of industry, to the inhabitants of the States already sufficiently peopled to enter upon them, might operate to lessen in some degree, and usefully lessen, its absorbing force. The eye of legislation, intent upon the whole good of the nation, will look to each part, not separately as a part, but in conjunction with the whole. The rapidity with which, after all, a civilized population, founding new and sovereign communities, will grow up in those exuberant portions of territory, presents considerations favorable to the main policy inculcated. This population, carrying with it the wants and habits of society, will create a demand for manufactures which must, at least for some time, be supplied from other sources. It will hence form the natural market of purchase and consumption for those produced in other parts of the Union rather than in foreign countries. By this intercourse we may hope to see multiplied the commercial and pecuniary ties which it is fit should grow up and be cherished throughout the whole federal family, superadding themselves to all other ties, and harmonizing and compacting the elements of a great Empire. Should it still be apprehended by any that evils will be generated in a state of society where large manufacturing classes co-exist with a full population, to such minds the reflection must prove consolatory and reassuring that in the public lands a check to these evils will be at hand for ages to come. This immense domain, besides embodying all the ingredients, material and moral, of riches and power, throughout a long vista of the future, may, therefore, also be clung to, under the various springs and conjoint movements of our happy political system, as a safeguard against contingent dangers. Its very possession is conceived to furnish paramount inducements, under all views, for quickening, by fresh legislative countenance, manufacturing labor throughout other parts of the Union. It is a power to be turned to the

account of manifold and transcendent blessings rather than reposed upon for aggrandizing too exclusively the interest of agriculture, fundamental as that must ever be in the State. Agriculture itself would be essentially benefitted; the price of lands in all the existing States would soon become enhanced, as well as the produce from them, by a policy that would in anywise tend to render portions of their present population more stationary by supplying new and adequate motives to their becoming so. And as it is, the laws that have largely in effect, throughout a long course of time, superinduced disinclinations to manufacturing labor by *their* overpowering calls to rural labor in the mode of selling off the public domain, the claim of further legal protection to the former kind of labor at this day seems to wear an aspect of justice no less than of expediency.

Finally, the great plans of internal improvement, so wisely in prosecution or contemplated in different portions of the country, will lose much of their object and value if activity be not imparted to manufacturing industry. The increased facilities of conveyance which these plans are intended to effect, presupposes as their basis the necessity of transferring the produce of the country from place to place. How such transfers will be increased by multiplying the products of manufacturing labor is apparent. New resources for this kind of labor may be expected to rise up as these plans are in progress, whether by bringing to light occult treasures or by affording through improved transportation the means of use to those already known. And then, as manufacturing enterprise, acting upon a greater variety and abundance of materials, shall be seen to enlarge its spheres, how much more reciprocally beneficial will not its exchanges become with the produce of the land? It is this state of things that will emphatically bind together the farmer, the manufacturer, and the merchant in one indissoluble connexion. Towns and villages may be expected to rise up in good time under such a policy, lining the borders of our canals as of our natural streams. Scenes of stirring industry will strike upon the eye, flowing from various and subdivided labor, the aggregate results of all which will stand out in the advancing cultivation and embellishments of the earth, and extended prosperity and happiness of our people. This is the broad policy suited to a nation destined by natural gifts to reach the heights of civilization and power. Such a nation rejects as too confined the counsels that would limit her to the walks of agriculture, of commerce, or manufactures singly, seeing that her resources and aptitudes of all kinds confer upon her the warrant of pre-eminence in each. Unless in this combination, we have beheld no State enjoy any other than an imperfect or transitory greatness.

Whilst the efficient encouragement of manufactures is earnestly dwelt upon, as conducive to the fiscal strength and general prosperity of the Union, the claims of foreign commerce press not less forcibly upon our attention. Each interest is alike entitled, within proper bounds, to the fostering superintendence of the legislative power. Amongst the expedients for augmenting the foreign trade of a country, otherwise than in the exports of its own productions, none are believed to be more important than the warehousing system. It was this system that greatly contributed to the commercial riches of some of the European States of the middle ages, and that is now enlarging the commercial dominion of nations of the present day. The situation of the United States, locally; the number and position of their ports along so extended a line of coast; the tonnage of which they are actually in possession, with the commercial experience of their people, point them out as peculiarly fitted to derive advantage from this system, and serve to recommend for it more liberal enactments than any of which it has yet been the subject. By our laws, as they now stand, the merchant is compelled to re-export within a twelvemonth the foreign commodity which he has imported, or lose the benefit of drawing back the duty he has paid upon it to the Government. Hence, he loses all opportunity, after this limit of time, of sending the commodity to seek foreign markets when the market at home may fail. The restriction put upon him in this respect ought, it is conceived, to be done away, by extending the time during which he might exercise the right of re-exportation. It is not believed that the increased quantity of foreign merchandise which such an alteration in the laws might be the means of bringing to the country would interfere with the interests of home manufactures, under the protection claimed for the latter, and the guards with which they might be surrounded. The result might be expected to prove otherwise. At present, whenever a redundancy of foreign goods is seen in the country, as will happen occasionally in all trading countries, from the impossibility of adapting precisely the supply to the demand, the excess, if not sent abroad within the year, is thrown upon the home market, at whatever reduction of price. This operates to the injury both of the home manufacturer and the importer. By enlarging the time of re-exportation, with privilege of drawback, such excess, whenever existing, would be more likely to seek a vent in other countries, and with improved chances of finding it profitable. More especially might the prospects of this trade in re-exportations be increased if no transit duty existed on foreign merchandise passing through our ports, the necessary charges being also kept at the lowest possible point. This is a policy which the wisest commercial nations have observed. An increased trade in re-exportations, by increasing the carrying trade of the United States, may be expected to increase their tonnage; thus giving new activity to ship building, so highly important and valuable a branch of manufactures to the country. The aspect of the times recommends to favorable consideration the alteration in the drawback system proposed. Political and commercial revolutions occurring all around us, remind us of the expediency of reviewing our own commercial laws in points where these revolutions have affected, or may affect, the operation of them. We have seen the principal part of this continent change the relations which it held to Europe. We have seen, as the effect of this and other causes, ancient channels of trade deserted, colonial monopolies give way, and another system open. A new commercial era is begun, of which this hemisphere is to be the principal scene. We have beheld the nations of Europe watching the course of these changes, and accommodating their policy, especially the warehousing policy, to the new commercial wants and contingencies which have grown up or are anticipated. We have seen, above all, the leading commercial Power of Europe, whose wakeful eye is abroad throughout the commercial world, extend this very policy, under new and advantageous facilities, to her insular positions, in seas close to our borders. This she has done with the purpose, not concealed, of availing herself of these changes, and of meeting, in the spirit of fair commercial competition, similar measures which she naturally supposed would go into effect on the side of the United States. No such measures have been taken by the United States. In the midst of the changes adverted to, our own commercial legislation remains, so far as any bearing upon this new commercial era is concerned, at the point where it stood more than five and twenty years ago. The single exception is in the act of the last session of Congress, authorizing the importation of brandy in casks of smaller size than was permitted by the act of 1799; an act obviously designed to improve our export trade in this article to the new States of this continent. The merchant, like the manufacturer, and other interests of the State, requires at proper times the assisting hand of legislation; regulation, in one form

or other, being the great end of government, and useful or baffling to individual enterprise as it is wisely or improvidently exerted.

Should the wisdom of Congress deem an alteration in the laws, with a view to enlarge the privilege of re-exportation, expedient, an authority to build additional warehouses in some of the principal seaport towns would be a necessary adjunct to the alteration. The local accommodation for merchandise that must go into store under the existing laws is insufficient. Larger and better constructed edifices are required even for the present wants of our commerce, and would become altogether indispensable under an extension of the warehousing system. A commerce which yields to the National Treasury a revenue of $20,000,000 a year, under a tariff far more moderate, even since 1824, than that which has marked the career of any great State of modern times, is entitled to adequate and liberal provisions for the machinery necessary for carrying it on. Its local establishments should have reference as well to the security of the revenue as to the reasonable accommodation of the merchant and the prompt despatch of business. It is probably not too much to affirm, that of the foreign merchandise which, under the present commercial code of the Union, is deposited in warehouses, more than one-half is unduly exposed to depredation, to frauds, and to fire, from the nature and insecurity of the present buildings. They are, besides, too often situated in places remote from the custom-houses and other commercial establishments, and inconvenient otherwise to the transaction of daily commercial business. Under circumstances such as these, the propriety of drawing the attention of Congress to the defects of the warehousing system seems sufficiently justifiable.

Where interests are multifarious, as in free, populous, and opulent communities must be the case, the hand of Government must be variously extended. Sometimes it is wisely applied to the effective regulation of some of these interests, and sometimes it becomes as necessary to lighten its pressure upon others. Not only is it recommended to lessen the restriction which our laws have so long imposed upon the merchant in an extensive branch of the foreign trade; but it is also conceived that there are articles entering into the lists of our imports, the duties upon which it would be expedient to reduce. Among these it is thought proper to mention teas and wines as being prominent.

The use of tea has become so general throughout the United States as to rank almost as a necessary of life. When to this we add that there is no rival production at home to be fostered by lessening the amount of its importation, the duty upon it may safely be regarded as too high. Upon some of the varieties of the article it considerably exceeds one hundred per cent., and is believed to be generally above the level which a true policy points out. A moderate reduction of the duty would lead to an increased consumption of the article to an extent that, in all probability, would, in the end, benefit rather than injure the revenue. Its tendency would be to enlarge our trade in exports to China; a trade of progressive value, as our cottons and other articles of home productions (aside from specie) are more and more entering into it. It would cause more of the trade in teas to centre in our own ports, the present rate of duty driving our tea ships not unfrequently to seek their markets in Europe, not in the form of re-exportations, but in the direct voyage from China. It would also serve to diminish the risk of the United States ultimately losing any portion of a trade so valuable, through the policy and regulations of other nations.

The duty upon wines is also believed to be higher than a wise commercial and national policy dictates. The experience of our own as well as other countries has shown that high duties upon wines do not prove beneficial to the revenue. General experience also shows that the consumption of wine tends to diminish the use of ardent spirits. These are inducements for keeping the duties upon wines low. They are strengthened by the consideration that, by lowering them, we shall increase beneficially our trade to the countries whence we obtain wines. Some of these countries are unable to take our productions unless their wines be received as an equivalent. They are, at the same time, prepared to take them untrammelled by positive or virtual prohibitions. It seems but just that we should take freely the productions of nations that take ours freely. But, in point of fact, the present rates of our tariff favor most, in many and essential things, the productions of nations that favor ours least. The rate of duty upon wines is not only, in many instances, very high, but very unequal, as regards the different descriptions of wines and the countries producing them. The whole subject is thought to demand revision. Upon the superior wines of France, upon those of the Rhine, upon those, generally, of Spain, Portugal, the Italian States, and perhaps some other countries, the duties, it is believed, might be advantageously brought down. The manufacture of wine in the United States does not, at this juncture, comprehend any such large interest as to interpose serious objections to the policy recommended. The opinion may also be hazarded, that in proportion as the taste for wine comes to prevail over that for ardent spirits, under the encouragement of low duties upon those imported from abroad, will a better basis be laid for the prosecution, at a future day, of this branch of industry at home. Its prosecution might go on, hand in hand, with lower duties on foreign wines, even at the present time; a very small amount of capital being necessary to the production of wines at home.

A few remarks upon the state of the trade between the United States and the British colonies, since the interdiction put upon it by Great Britain, will close the more general observations of this report.

Sufficient time has scarcely elapsed to enable us to determine, with precision, the course that this trade will ultimately take, as regards the amount of supplies, the channels through which they will chiefly pass, and the proportions of American and British tonnage likely to be employed in their transportation. The British interdict of July, 1826, left an interval before its actual operation. This did not commence until the 1st of December of that year. The interval, it is understood, was improved in accumulating, in the British West India ports, supplies of provisions and other necessary articles from the United States. Geographical causes, in their nature unchangeable, render it manifest that such supplies can be sent to the British islands in more abundance and on cheaper terms from the United States than from parts of the world more remote, or from climates less favorable to their production. Nevertheless, the British Government, true to its invariable maxim of encouraging the industry of its own subjects in preference to that of foreigners, laid duties upon these supplies when coming from the United States, designed to countervail the greater cheapness with which they could be furnished over similar supplies from the British colonies of North America. It was to no purpose that Britain was urged, in protracted negotiations, to forego this discrimination in favor of her own subjects. She steadily adhered to it; affording a fresh and signal example to other nations that to protect the agricultural as the manufacturing labor of her own people, in whatever region situated, is a point in her policy to which that of buying cheap from strangers knows when and how to yield. As the British North American colonies were enabled, with the aid of these protecting duties, to furnish a portion of the supplies necessary to the British islands, leaving the United States to furnish the residue, whilst the direct intercourse between the latter and those islands

remained open, it is not believed that the trade, under ordinary circumstances, will be materially affected in amount by the direct intercourse being closed. The continued necessity of drawing the major part of those supplies from the United States was seen in the fact of Quebec having been made an entrepot for their flour and other articles at an early day after the commencement of the interdict, and afterwards by an act of the British Parliament, which admits, duty free, various products of the United States into Canada, whence their exportation to the islands is legalized as of the proper products of Canada. It is by the establishment of such depots that the desire of Great Britain is also evinced to draw to herself a preponderating share of the carrying trade between her islands and the United States. It is through these circuitous channels, also through New Brunswick and Nova Scotia, through the ports and islands of intermediate Powers, as St. Jago de Cuba, Carthagena, St. Bartholomew, St. Eustatius, St. Thomas, that Jamaica and the Windward islands will chiefly derive from the United States the supplies that they have heretofore had from them, and still continue to want. It is even known that biscuit has been shipped from Philadelphia for Jamaica by way of Liverpool; and the flour of the United States, under bonds in the warehouses of Liverpool, will also, it is thought, find its way to consumption in the larger islands of the British West Indies. The Bahamas will probably experience most inconvenience from the course of this trade being forced into these indirect channels, from their relative inability to sustain the increased expense with which it will be burdened. This we may presume will be shared by both parties, the transhipments and other intermediate agencies necessary to keep the trade in activity being, to a certain extent, common to both. What will be the relative proportion of the tonnage of the two nations employed in carrying on this trade cannot, at present, be stated with confidence. It is not probable that that of the United States will suffer where the competition can be made equal, but it is possible that some diminution of their shipping may be eventually witnessed in favor of the flag of some third Power. It is the declared policy of Britain to produce such a result, rather than allow, by any arrangements which she can control, the tonnage of a nation, already as large as that of the United States, to become larger. Next to the augmentation of her own tonnage it is the aim of the British laws to bring into employment the tonnage of the smaller maritime Powers of the world. If the anticipation be correct that the British islands will continue to receive, indirectly, their supplies from the United States without material diminution, the revenue will not suffer, since our exports, through whatever channels they reach the islands, may be expected to be followed by equivalent returns. It may be repeated, however, that further time is necessary for establishing definite conclusions upon this and the other points adverted to. It is ascertained that the imports into the United States from the whole of the West India islands, for the first six months of the present year, fall below the average rate of those of the first six months of the three years preceding, including importations from the British islands. On the other hand, our exports to the whole of the West Indies during the first six months of 1827 have exceeded their average amount for the same period during the three years preceding, including exports to the British islands.

The estimates, in detail, of the revenue for the ensuing year will now be given. For the general observations upon the home industry and foreign trade of the country that have been gone into, the indulgence of Congress is, with the utmost deference, solicited, under the motives that have prompted them. All financial plans must ultimately be dependent upon the flourishing state in which a sagacious and comprehensive policy may aid in placing the great agricultural, manufacturing, and commercial interests of the nation; not in a spirit of partisanship for either, but by weighing co-equally the claim of each, and striving to secure the enriching results of all. It is in the anxious endeavor and humble hope of exhibiting them, under this alliance, to the correcting and controlling wisdom of Congress that this report has been prepared.

The gross amount of duties which accrued on imports and tonnage, from the 1st of January to the 30th of September last, is estimated at twenty-one millions two hundred and twenty-six thousand dollars. The gross amount that will accrue for the last quarter of the year is estimated at five millions seven hundred and seventy-four thousand, making an aggregate of twenty-seven millions for the entire year.

The debentures for drawbacks issued during the first three quarters of the year amounted to $3,381,942 79; and the amount outstanding on the 30th of September was $2,516,966 45; of which $1,245,057 17 are chargable upon the revenue of 1828.

The amount of duty bonds in suit on the 30th of September last was $4,135,812 64; which is more by $128,929 88 than was in suit on the same day of the year preceding.

In estimating the probable amount of duties that will be received, as compared with the gross amount secured, on the importations of the year, the necessary deductions are to be made, not only for drawbacks, but for the expenses of collection, and various losses that may happen. Making what is judged to be a full allowance on all these accounts for the present occasion, the receipts from the customs in 1828 are estimated at $20,372,700 00

Those from the sales of the public lands are estimated at		1,400,000 00
From bank dividends		420,000 00
From all other sources		107,300 00
Making an aggregate of		22,300,000 00
The expenditure for 1828 is estimated as follows, viz:		
Civil, miscellaneous, and diplomatic	$1,828,385 14	
Military service, including fortifications, ordnance, Indian Department, revolutionary and military pensions, arming the militia, and arrearages prior to the 1st of January, 1817	4,332,091 05	
Naval service, including the gradual increase of the Navy	3,786,649 25	
Public debt	10,000,000 00	
Making a total of		19,947,125 44
And leaving an excess of receipts for the year over its expenditure of		2,352,874 56

The estimate of revenue from all sources for 1828 has been made $850,000 lower than that for 1827. This has been done to guard, as far as possible, against unfavorable contingencies. Nevertheless, the present estimate is formed on a larger amount of duties, secured by bond on merchandise imported,

than the estimate for 1827. Hence there is reason, from all present appearances, to believe that, although the estimate for 1828 is less than that for 1827, the receipts will prove greater.

All which is most respectfully submitted.

RICHARD RUSH.

TREASURY DEPARTMENT, *December* 8, 1827.

A.—*Statement exhibiting the duties which accrued on merchandise, tonnage, passports, and clearances; of debentures issued on the exportation of foreign merchandise; of payments for drawback on domestic distilled spirits and domestic refined sugar exported; of bounty on salted fish exported; of allowances to vessels employed in the fisheries; of expenses of collection, and of payments made into the Treasury during the year ending on the* 31*st day of December*, 1826.

Duties on merchandise	$26,087,352 78
Duties on tonnage and light money	150,070 55
Duties on passports and clearances	11,716 00
Debentures issued	5,046,310 00
Drawback on domestic distilled spirits and domestic refined sugar exported	9,188 60
Bounties and allowances	229,683 28
Gross revenue	20,963,957 45
Expenses of collection	715,903 15
Net revenue	20,248,054 30
Payments made into the Treasury	23,341,331 77

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, December* 7, 1827.

D.—*Statement of lands sold at the several Land Offices of the United States, and of moneys received in payment of public lands, from the* 1*st day of January*, 1826, *to the* 31*st December following, inclusive; showing also the incidental expenses of said offices, and payments made into the Treasury during the same period.*

Payments at the Treasury to the 30th September, 1826, per said statement.	$1,827,215 56	
Payments from the 1st October, 1826, to the 30th September, 1827	742 48	
		1,827,958 04
Balance outstanding on the 1st October, 1827, consisting of certificates outstanding	6,609 09	
Awards not applied for	44 60½	
		6,653 69½
		4,282,151 12½

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, December* 8, 1827.

TREASURY DEPARTMENT, *May* 16, 1828.

SIR: I have the honor to transmit a letter of the Register of the Treasury, accompanied by statements marked B and C, which were referred to in the statement marked A, annexed to the annual report of this Department on the state of the finances, dated the 8th of December last. Statement B exhibits, in detail, the duties on merchandise, tonnage, &c., and statement C exhibits the amount of tonnage employed in the foreign trade of the United States.

I have the honor to be, very respectfully, your obedient servant,

RICHARD RUSH.

The Hon. the PRESIDENT *of the Senate.*

TREASURY DEPARTMENT, *Register's Office, May* 15, 1828.

SIR: I have the honor to transmit herewith statement B, exhibiting the details of duties on merchandise, tonnage, &c., referred to in statement A, which accompanied the annual report of the Secretary of the Treasury on the state of the finances of the 8th of December last; also statement C, exhibiting the tonnage employed in the foreign trade of the United States for the year 1826.

I have the honor to be, with great respect, sir, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

B.

Statement exhibiting the values and quantities, respectively, of merchandise on which duties actually accrued during the year 1826, *(consisting of the difference between articles paying duty imported and those entitled to drawback re-exported;) and also of the net revenue which accrued that year from duties on merchandise, tonnage, passports, and clearances.*

Total tonnage employed in the foreign trade of the United States		1,031,351
Proportion of foreign tonnage to the whole amount of the tonnage employed in the foreign trade of the United States		11.7 to 100

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, May* 15, 1828.

20TH CONGRESS.] **No. 787.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 14, 1827.

Resolutions in relation to the Tariff Policy and Colonization Society, unanimously adopted by the Agricultural Society of St. John's, Colleton, South Carolina, on the 11th of July, 1827.

The Agricultural Society of St. John's, Colleton, impressed with the importance of the present eventful national crisis, believing that a revolution in the policy of the Government is about to be attempted, which, if successful, will array one branch of industry against another and engender incurable sectional feuds, thereby endangering the perpetuity of the Union, alarmed at the doctrines which have so often and deliberately been avowed on the floor of Congress in relation to the domestic institutions of the southern States, they would be recreant to their high and imperative duty as patriot citizens not to proclaim their explicit and undisguised opinion.

They believe that capital should be allowed to seek the most profitable channels, and that every pursuit ought to be free to compete in the grand career of human effort; they believe that the interest of agriculture, commerce, and manufactures, can best be promoted by the want of, rather than by, Congressional interference; and that, if either agriculture or manufactures should need the fostering aid of law, it is within the *unquestionable* competency of State legislation to effect that purpose by prudent and judicious disbursements from the State Treasury; they believe that, as long as the constituent members of the confederacy are permitted *undisturbedly* to adopt and to be governed by their own schemes of domestic policy; as long as the General Government revolves in its *obviously* constitutional sphere of action, so long shall the people of these United States be free, happy, and contented.

The present political situation of this country presents the anomalous aspect of 11,000,000 of citizens suffering under oppressive and insulting exactions to relieve the imaginary wants of as many hundred. Shall this state of things continue? Shall the interest of the yeoman and the merchant be forever tributary to the interest of a privileged order, created, it is true, by the operation of law, but not the less disgusting and odious on that account? Shall the southern planter humbly kiss the rod which chastens him? Shall he tamely submit to an anticipated system of taxation which in one momentous respect will bear *exclusively* on his capital? If not, then the period is rapidly arriving when it shall become him practically to prove that allegiance and protection are convertible terms. Influenced by these considerations, this society adopts the following resolutions, viz:

Resolved, That the creation of a manufacturing system by Congress is to protect the industry of one class of the citizens at the expense of all the rest, and to impose an indefensible and onerous tax on the consumer.

Resolved, That the present unexampled depression of the staple articles of the southern States is mainly to be ascribed to the operation of the tariff of 1816 and 1824.

Resolved, That the woolens bill was a wanton attempt to sacrifice the permanent welfare of the country on the shrine of a moneyed aristocracy.

Resolved, That the domestic policy of the southern States is not a legitimate topic of discussion for Congress. Those States believe themselves competent to self-government, and that they, and they alone, understand their true interest.

Resolved, That the Colonization Society aims a destructive blow at the *whole* property of the southern agriculturist.

Resolved, That Congress is not constitutionally empowered to extend to it its protection. Any attempt to attain that object would be impolitic, unjust, and a dangerous exercise of authority.

Rssolved, That the corresponding secretary be directed to transmit a copy of the foregoing resolutions to each of the Senators and Representatives in Congress from this State, accompanied with instructions to the delegate from this district to bring the resolutions to the view of Congress at an early period of its session.

JOHN R. MATTHEWES, *President.*

EPHRAIM M. SEABROOK, Sen., *Recording Secretary.*

20TH CONGRESS.] No. 788. [1ST SESSION.

AGAINST THE INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 14, 1827.

To the honorable the President and members of the Senate, and to the honorable the Speaker and members of the House of Representatives, in Congress:

The undersigned, citizens of Fairfield district, in the State of South Carolina, in the exercise of a right secured to them by the Constitution, respectfully approach your honorable bodies with an expression of their sentiments, the result of mature reflection, on the measure pursued by the General Government, for several years past, of increasing the duties on the importation of articles of foreign growth and manufacture, and especially upon the proposed measure of raising, to the point of exclusion, the tariff on coarse woolen manufactures. Your memorialists, if they could be persuaded that the increase of the tariff already made and in contemplation were rendered necessary by the exigencies of the Government, and effected with a single view to the support of public credit and supplying the National Treasury, however inconvenient it might be to them in the present season of pecuniary embarrassment, would forbear to complain, and yield without remonstrance to the measure. Your memorialists confidently appeal to history and to facts within the recollection of your honorable bodies for the truth of this declaration. But your memorialists cannot misunderstand the real motive of the increase of the tariff; they are well aware that the purpose of revenue is entirely out of view; that, in truth and in fact, such increase is made, and intended to be made, for the purpose of giving *aid* to the efforts of those individuals who have ventured to speculate in the chances of bettering their condition by abandoning their accustomed pursuits and of engaging in the establishment of manufactories. Your memorialists have little hesitation in expressing a decided opinion that the encouragement of this or any other speculation, by raising the imposts, is not within the constitutional competency of your honorable bodies. And they are constrained to express their surprise that the first clause of the eighth section of the first article of the Constitution should be resorted to and relied on for a sanction to a course of policy subversive of equal rights, imposing unequal burdens, and calculated to produce a violent change in the habits, manners, pursuits, and occupations of the people. If that article is subjected to such a construction, it may fairly be construed so as to authorize any measure, from the most visionary to the most ruinous, that can be conceived of. No limit can be assigned to the power of Congress, nor security claimed for the rights reserved to the individual States and to the people. The federative character of the General Government is destroyed; it is, to all intents, a consolidated Government, and the boasted omnipotence of Parliament is centred in the National Councils. The absurdity to which such a construction irresistibly tends is proof positive against its correctness. The words "general welfare," considered in connexion with the whole clause, imply nothing more than that money may be collected by taxes, duties, and imposts, and that, when collected, the same shall not go to the use of any particular State, but to the Government of the Union; they are declarative of a right to the money so levied, limit the amount to be collected, and contain a general direction as to its application. It is only by breaking up the sentence and destroying its symmetry, literally by garbling the sentence, that the assumed power can be drawn from those prolific and portentous syllables. But, should the sentence be forced to read *that "Congress shall have power to provide for the general welfare,"* your memorialists conceive that the subsequent clauses declare what the general welfare is, and limit the power to certain specified objects. They would contend that the whole of the sentence should be taken together, that its symmetry be preserved, and, if the words "general welfare" necessarily contain a grant of power, it must be some power or powers strictly analogous to the power of paying the "national debt," and providing "for the common defence." Your memorialists would suggest to your honorable bodies that, as the power of raising money in the manner pointed out in the clause referred to belonged previously to the States, to be applied to their individual use, the words "general welfare" might have been, through abundant caution, inserted for the purpose of showing that, for the future, the proceeds were payable into the National Treasury, and were subject to appropriation to general objects indicated in the Constitution, notwithstanding the same should be levied at a particular port or in a particular State. Your memorialists would further suggest to your honorable bodies that the harmony and consistency of a great plan of Government, of a particular form and decided character, portrayed in a written Constitution, ought not to be practically affected because of the admission of two words of supposed doubtful import; but, on the contrary, the true genius of the Government ought to be preserved inviolate on every principle of fair construction, even at the expense of those words. The first clause, section eight, empowers Congress to raise money; and, it is presumed, there cannot be a bona fide exercise of that power for any other purpose or with any other view whatever. If Congress can exercise a power given to supply the Treasury for the purpose of building up a system of domestic manufactures, Congress may exercise it, not with a view to supply the National Treasury, but to empty and impoverish it. So, if Congress, under the third clause of the eighth section, should exercise the power of regulating commerce with foreign nations, not for the purpose of promoting a free commercial intercourse with foreign nations, but for the purpose of annihilating foreign commerce, the same mischief and the same absurdity would result. The expectations of the States, in granting those powers, would, in either case, be wholly defeated, and their interests, tangled in the wiles of legislative subtility, must necessarily suffer.

Your memorialists are persuaded there is nothing in the Constitution which the ordinary rules of interpretation are not sufficient to elucidate. They see nothing mysterious in the magnificent outline of our free and equal Government, illumined with the splendor of the great virtues and the great talents exercised in its formation. The darkness imputed to it, and which has been imagined a safe cover for projects the most ambitious, results from efforts to wrest from their proper signification, their evident import, the plain English words in which it is most happily expressed, forgetful that common sense admonishes against the assumption of authority not clearly given, and that common law in its wholesome jealousy of prerogative inclines rather to a limitation of power than a construction calculated to give it amplitude and extent. Your memorialists are deeply impressed with apprehensions for the future happiness of the American Union, unless all assumptions of power by unnecessary implication be forthwith disclaimed and discontinued. Should the National Legislature, instead of applying to the

people for power, consider itself vested with the rights pertaining to a convention, and take power whenever it may deem the same expedient, without regard to the letter and the obvious meaning of the Constitution, all the evils that the worst enemies of our happy form of Government have maliciously anticipated and predicted may speedily affect our most vital interests.

Your memorialists consider the increase of the tariff for the purpose of protecting domestic manufactures a measure most erroneous on principles of national policy. In the partial or total exclusion of foreign commerce, in the impoverishment of the agricultural class, in the prostration of one section of the country to another, the natural fruits of such a measure, consequences to them the most disastrous, appear unavoidable. No reasonable objection can exist to the establishment of domestic manufactures in any part of the Union. No evils are anticipated from them if self-sustained. The citizens of this Republic are free to invest their capital according to the dictates of their discretion, and to give to their enterprise and industry such direction as they may deem most comportable with their true interests. Individuals are the best judges everywhere, whether the existing state of things will justify any undertaking, and whether it is likely to be prosperous and productive. The success of every speculation should rest on the judgment, skill, and capital of those who engage in it; and it is, at best, an act of impolitic interference whenever the rulers of a country attempt to calculate for private citizens and endeavor to operate on their accumulations by legal provisions. Such intrusion into private pursuits may promote the interests of a few, but always at the hazard of great injury and injustice to the many. In providing for the welfare of particular persons, or of a particular class, the Government is chargeable with a departure from its proper character as the common benefactor of a whole people, and takes an attitude which indicates a disregard to the great duty of strict impartiality. The equality between citizens of the same country is destroyed, and one portion are rendered tributary to and dependant on another. That the increase of the tariff for the purpose of fostering domestic manufactures will operate unjustly and unequally is evident. It is intended, by destroying competition from abroad, to enable domestic manufacturers to command higher profits on their productions than they otherwise could do. Their prices will be raised in proportion as the law gives countenance to their cupidity; and the difference between old and new, the natural and protected prices, is so much money extorted from the planting interest without an equivalent. It is, in fact, calculated to have all the effect of a tax upon the planters, to make up the capital of and compensate for want of skill in the domestic manufacturers; to enable the domestic manufacturers to prosper without deserving it, or to bear the losses incident to a rash and improvident investment of their means. Every cent which they receive in this way is so much wrested from the planting class, who are the chief consumers, and who are subjected to the humiliation of seeing the gains which they have honestly acquired transferred, by the magic of enactments, into the pockets of those who grasp at it contrary to every dictate of honesty. Your memorialists seriously object to be rendered the lawful prey of the domestic manufacturers, whose avarice of unearned wealth is insatiable. They object to be forced to pay them large sums in bounties on domestic productions, or, what is the same thing in effect, to be subjected by law, for the benefit of the manufacturers, to a high penalty for the exercise of honest industry in their accustomed avocations. Your memorialists also seriously object to be made to assume the character of assurers for the ultimate safety of their manufacturing brethren. If the manufacturers have miscalculated their means and rushed unadvisedly into a ruinous business, your memorialists, not previously consulted by the adventurers, free of any pledge of pecuniary support, without any claim secured to them of a share of manufacturing profits, ought not, in justice, to be held responsible for any losses incident to the speculation. The increase of the tariff, as it will eventually exclude all foreign productions, which your memorialists understand to be the perfection of the system called, in mockery of their rights and wants, "the great American system," will necessarily amount to a prohibition on the planting class from purchasing where they can purchase cheapest, so it will have the effect of prohibiting the planting class from selling their productions to the best advantage. If the merchandise of foreign countries is excluded from our markets, the productions of the planter, which are his merchandise, will be excluded from a market in those countries. An immense proportion of the mercantile business of the world is carried on in barter and exchange. Commerce must therefore grow languid or altogether cease where the natural course of trade is altered or interrupted. Those who are not allowed to sell are deprived of the ability as well as the disposition to purchase. An expectation, therefore, that an intercourse, devoid of reciprocity and not equally convenient and advantageous to all parties engaged in it, can be durable or long profitable to either has no foundation in an enlightened acquaintance with commercial affairs. Equally extravagant is the notion, propagated with much assiduity by the advocates of restrictive measures, that the domestic manufacturers will supply the planting class with as safe and profitable a market as they have heretofore found in foreign countries. It must be a wild miscalculation that the foreign countries with which we have the greatest intercourse have lost any portion of their wonted foresight, or that our dexterity has overmatched their vigilance. Proof is entirely wanting that the Governments of those countries have grown insensible to the dictates of self-esteem, and that the love of gain has ceased to inspire mercantile enterprise with its almost invincible energies. That the boasted American system is considered there with intense interest; that its features, its movements, its hopes, and aspirations, are watched with great jealousy; that the means of counteracting its effects will be seized upon with eagerness and exerted with perseverance is not to be questioned. Other portions of the earth will be rendered capable of supplying, to the consumers of southern productions, the great staples on which your memorialists depend for support; and the wealth which, but for exorbitant imposts, would continue to float on the Santee, the Savannah, and the Alabama, will find its way to the Nile, the Indus, and the Orinoco. An active demand for our productions will soon cease abroad, because of the opening of new channels of trade, and the foreign commerce, in which the planting class are essentially interested, will be finally cut off by a wide system of retaliatory measures. Such a course may be certainly calculated on, because it seems the dictate of common prudence, the desire of self-preservation, and those feelings of pride which belong to all men and to all Governments. In proof that the apprehensions of your memorialists are not groundless, that arrangements are in a regular train of accomplishment to render all dependence for supplies on the southern parts of the Union unnecessary, your honorable bodies need but advert to the appalling fact that, while the great staples of the south are lying heavily on the hands of the merchant and factor, productions of the same kind, and even inferior in quality, are sought for with avidity in remotest India, in wretched Egypt, and in the recently emancipated regions of South America. Should the tariff be raised to the point demanded by the untiring advocates of that measure, your memorialists are at once subjected to a train of evils of most serious magnitude. A home competition will be too feeble to insure the requisite application of labor and skill in the production of domestic

manufactures, or to regulate the prices of articles of prime necessity to the planting interest. A greater evil will exist in the lack of that active and steady demand for the staples of the south, which will allow reasonable profits to the grower, so that, in fact, the manufacturers will *make* to suit their own convenience, sell at such prices as they may think proper to demand, and *purchase* on their own terms so much of the raw material as they may have occasion to use. Your memorialists have seen nothing, as yet, in the conduct and character of the domestic manufacturers to warrant any other conclusions. With an utter recklessness of the rights of others, with a capacity for profits next to infinite, your memorialists have seen them combining, moving in fearful concert, projecting schemes of aggrandizement, and clamoring for advantages which the first principles of morals should teach them to look for in honest industry, well persisted in, and not in a system of laws calculated for their especial accommodation. Your memorialists ask leave to draw the attention of your honorable bodies to an additional topic, of more than ordinary importance, and well entitled, in their opinion, to your most serious consideration. The value of property everywhere depends on its productiveness; when planting capital ceases to yield its natural profits a depreciation in value is the natural consequence. Barrenness now threatens to succeed the rich and flourishing agriculture of the southern portion of the Union. Emigrants from abroad are no longer tempted to adopt it as their permanent home; and many citizens, by birth, are looking with deep interest to distant lands, where the rewards of industry may be more certain, and an opportunity enjoyed of escaping from oppressive exactions. The increase of the tariff, in all probability, will, among other evils, have the effect of deranging the ratio of physical strength and political consequence between different parts of this great Empire. Your memorialists have carefully sought, with a perfect openness to conviction, for the grounds on which the restrictive system can constitutionally rest; it is neither discoverable in the history of our country, detailing the causes which prompted the call of the Federal Convention, and assigning the motives for the adoption of the great charter of our liberties, nor in the expositions of eminent statesmen concerned in the formation of the Constitution, nor in the letter of the Constitution itself. Our ancestors were proudly jealous of State sovereignty; they yielded with a sparing hand the smallest portion of the essential attributes of sovereign power. In granting powers they were even overcautious in recording the reservation to themselves of those not granted. They were filled with the great ideas of equality of rights, equality of duties, equality of burdens. The Constitution, so guarded and so guarding, was the American system of a splended period in the annals of freedom. In the restrictive system, based on novel doctrines, and persisted in for alarming ends, your memorialists perceive, with grief, a flagrant violation of the very genius of our Government. Neither are your memorialists sensible of the great good which may result from that system as a measure of policy. In anticipation of a distant period, when a dense population, a scarcity of land, accumulation of capital, and cheapness of labor, shall naturally invite to manufactures, the system attempts to perform the work of nature and time by operation of law, and is committing havoc on one class of the community, laying waste one quarter of the country for the exclusive benefit of another, in no conceivable point of view less interesting or less deserving. From its ruinous example, from its crying injustice, from its blighting and demoralizing tendencies, your memorialists, with honest and confiding bosoms, appeal to your honorable bodies. They repose a manly trust in the wisdom and saving goodness of the National Legislature. They believe that the insinuations of interest cannot always silence the sacred voice of the Constitution nor repress its divine spirit. They believe that the Representatives of a great people, though they fall into error, cannot persist long in a mistaken policy. They call the attention of your honorable bodies to the momentous subject of their grievances, looking with a deep interest and a firm reliance on the efficacy of constitutional means, and no other, for their speedy redress. They earnestly pray that a revision of the tariff may be made with a view solely, and in perfect good faith, to the purposes of revenue; that it may be so arranged as to fall with exact equality upon every citizen of the Confederacy; and that every advance of imposts, with a view of promoting domestic manufactures, be totally repealed. Should a woolens bill be introduced at the ensuing session of Congress with any other object than the laudable one of reducing the present burdensome duties on the importation of foreign woolens, your memorialists insist that the same be rejected; and that, in the rejection of that bill, and in the revision of the tariff adapting it to the wants of the Treasury, the same may be seen, to the nation and to the world, to proceed from a high and holy regard for the Constitution. Such a course, your memorialists are pursuaded, would be a rendering to the Constitution the homage which it merits, and manifesting a due sense of its pre-eminent obligation and its inappreciable worth. An example so impressive will not be lost. Whenever the Legislature of a great people are seen to bow to the violated genius of their Constitution, that Constitution acquires additional sanctity in the eyes of all men, and a brighter hope arises that its blessings will be perpetuated to the end of time. Your honorable bodies are now presented with an opportunity of sanctifying the only policy which can safely conduct to the fulfilment of the destinies of our Republic—the policy of preserving, protecting, and defending the Constitution; of insuring justice, and of maintaining a free intercourse with all nations—a fruitful source of wealth, of knowledge, and of civilization. And your memorialists cherish the hope and prefer their prayers that it may not pass unimproved.

By order of the meeting.

D. R. EVANS, *Chairman.*

R. T. Nott, *Secretary.*

20TH CONGRESS.] No. 789. [1ST SESSION.

DUTY BONDS AND BONDS FOR VALUE OF GOODS IN CASE OF FORFEITURE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 14, 1827.

TREASURY DEPARTMENT, *December* 12, 1827.

SIR: I have the honor to transmit herewith the opinion of the Attorney General in the case of Thaddeus Laughlin, obtained in compliance with the resolution of the House of Representatives of the 3d of March, 1827, and to state that, in further compliance with the said resolution, the necessary directions have been given to suspend the process of execution against the said Laughlin until the close of the present session of Congress.

The documents received with the resolution are also transmitted.

I have the honor to remain, with the highest respect, your most obedient servant,

RICHARD RUSH.

Hon. ANDREW STEVENSON, *Speaker of the House of Representatives.*

OFFICE OF THE ATTORNEY GENERAL OF THE UNITED STATES, *March* 29, 1827.

SIR: I have examined carefully the petition of Thaddeus Laughlin, with the documents accompanying the same, submitted by you for my opinion "as to the legal liability of Thaddeus Laughlin, under a judgment recovered against him in favor of the United States in the District Court for the northern district of New York," and I have been able to discover no solid ground on which his legal liability under that judgment can be questioned.

The grounds on which the petitioner questions his liability under that judgment are two:

1. That the duty bonds on which the judgments were rendered were to be obligatory only on the condition that the goods which had been libelled for forfeiture should be restored to the claimant; whereas they were condemned.

2. That the suits upon the bonds were protracted until the principal obligor and the co-security became insolvent, which the petitioner considers as a legal absolution to him.

In the first ground the petitioner is mistaken in the fact. The duty bonds were not dependent on the condition of the acquittal or forfeiture of the goods, nor was the amount of the duties included in the stipulation given by David A. Ogden, this stipulation being only for the estimated value of the goods. The duty bonds were, therefore, entirely distinct from the admiralty proceedings; and the claimant having had the goods delivered to him for sale as if he had been the regular importer, the duties were due whatever might be the fate of the admiralty proceedings. The 89th section of the collection law offered to the claimant the option to suffer the goods to remain in the custody of the admiralty until the decision, or to take them out and treat them as his own, on the conditions prescribed by that section. These conditions were, that he should give bond in an amount equal to the appraised value of the goods, *and also produce a certificate from the Collector that the duties had been paid or secured;* of the bond for the appraised value the court takes possession; and the section provides that, if judgment shall pass in favor of the claimant, this bond shall be cancelled; but it makes no correspondent provision, in that event, either for refunding the duties if they shall have been paid, or cancelling the duty bonds if they shall remain uncollected. My opinion, therefore, is, that the duties, if paid, and the duty bonds, remain totally unaffected by the decision on the libel.

2. As to the protraction of the suits, it has been so often decided as to have passed into a settled law, that no *laches* can be imputed to the Government; and that no voluntary forbearance, either to institute or press a suit against the principal, can discharge the sureties.

The documents are returned.

I have the honor to remain, sir, very respectfully, your obedient servant,

WM. WIRT.

Hon. RICHARD RUSH, *Treasury Department.*

TREASURY DEPARTMENT, *January* 11, 1827.

SIR: In compliance with the resolution of the House of Representatives of the 5th of May last,* referring the petition of Thaddeus Laughlin to the Secretary of the Treasury, and instructing him "to procure from the Collector of the district of Oswegatchie, in the State of New York, and from the Attorney of the United States for the northern district of the State of New York, a statement or statements of the facts, transactions, and proceedings touching the matters set forth in the said petition, and particularly an explanation of the delay in prosecuting the suits by the United States against Benjamin W. Hopkins and Roswell Hopkins, and the petitioner to final judgment and execution, and make report thereof, together with such other facts or explanations as the said Secretary may deem material, at the next session of Congress, and that the Secretary of the Treasury be instructed to cause the execution process against the said petitioner, for the debt and costs of the judgment mentioned in the said petition, to be suspended until the 3d day of March next," I have the honor to state that letters were addressed to the Attorney of the United States for the northern district of New York, and to the present and former Collectors of the district of Oswegatchie, and a copy of the resolution and petition therein referred to transmitted to each of those gentlemen, with a request that they would make report to the Department,

* See documents herewith.

in as full a manner and at as early a period as practicable, "of all the facts, transactions, and proceedings, touching the matter set forth in said petition," accompanied by such remarks and explanations as they might deem in anywise material or pertinent to its subject-matter.

Answers have been received to each of those letters, and copies thereof are herewith transmitted, marked A, B, C, D, and E, and contain all the information in relation to the case of the petitioner that it has been in the power of the Department to procure.

A copy of a letter addressed by the Agent of the Treasury to the Attorney of the United States for the northern district of New York, marked F, is also transmitted.

The documents received from the House are herewith returned.

I have the honor to remain, with the greatest respect, your obedient servant,

RICHARD RUSH.

The Honorable the SPEAKER *of the House of Representatives.*

MAY 5, 1826.

The Committee of Ways and Means, to whom has been referred the petition of Thaddeus Laughlin, report:

That they have considered the case, which appears, by the statement of the petitioner, to be one of considerable hardship; but the committee deem it unsafe to act finally upon the subject without affording to the officers of the United States an opportunity of making an explanation of the principal facts relating to the transaction. The committee, therefore, beg leave to recommend the adoption of the following resolution:

Resolved, That the petition of Thaddeus Laughlin be referred to the Secretary of the Treasury, and that the said Secretary be instructed to procure from the Collector of the district of Oswegatchie, in the State of New York, and of the Attorney of the United States for the northern district of the State of New York, a statement or statements of the facts, transactions, and proceedings touching the matters set forth in the said petition; and particularly an explanation of the delay in prosecuting the suits by the United States against Benjamin W. Hopkins and Roswell Hopkins, and the petitioner to final judgment and execution; and make report thereof, together with such other facts or explanation as the said Secretary may deem material, at the next session of Congress; and that the Secretary of the Treasury be instructed to cause the execution process against the said petitioner, for the debt and costs of the judgment mentioned in the said petition, to be suspended until the third day of March next.

(See report of Committee on the Judiciary, House of Representatives, made the 25th of February, 1829.)

A.

DISTRICT ATTORNEY'S OFFICE, *Utica, June* 9, 1826.

SIR: Your letter of the 16th ultimo, enclosing a copy of a resolution of the House of Representatives of the United States relative to the petition of Thaddeus Laughlin, together with a copy of that petition, and requesting me to make report to you of all the facts, transactions, and proceedings touching the matters set forth in said petition, &c., has been received by me.

It appears from papers and entries in the office of the clerk of the District Court for this district, and from papers in my office, that, in the fall of the year 1814, eight trunks of dry goods and one bundle of dry goods were seized by Alexander Richards, Esq., then Collector of the district of Oswegatchie, as forfeited to the United States, and that said goods were libelled in the District Court for the district of New York, (the whole State then constituting but one district,) on the 28th day of October, in that year. The libel alleged the seizure to have been made "*on waters navigable from the sea by vessels of ten or more tons burden.*" Upon this libel a monition issued returnable at the city of New York on the 28th day of November, 1814, and which was returned as duly served by the marshal. There is an endorsement on the office copy of the libel in my possession, but at what time or by whom made does not appear and is unknown to me, that the goods were condemned and a sale ordered on fifteen days' notice. It appears, however, that at the May term of said court, 1815, an answer and claim were filed on behalf of one Benjamin W. Hopkins, for himself and one Gilbert Smissoult; and that, at the same term, on motion of N. Williams, Esq., as proctor for the claimant, certain persons were appointed to appraise said goods; and it was ordered that the goods should be delivered to the claimant on giving the usual bond in such cases, executed by himself and David A. Ogden, Esq. The bond not having been executed, a rule was made by the court, on the 8th of November, 1815, that said goods should be sold by the marshal within six weeks unless bonded. Upon this rule a *venditioni exponas* was issued, to which the marshal returned, bonded, &c. Said Benjamin W. Hopkins and David A. Ogden having executed said bond on the 15th day of said November, and on that day said Benjamin W. Hopkins, together with Roswell Hopkins and Thaddeus Laughlin, executed to the United States three bonds—one of which is conditioned to pay, on or before the 15th day of May, then next, $550, or the amount of duties to be ascertained on certain goods, wares, and merchandise, entered by said Benjamin W. Hopkins, (meaning, as I understand, a part of the goods above mentioned.) The ascertained duties are noted upon this bond at $508 34. Each of the other of said bonds is with a like condition, except the sum stated in each is $275; one of them being payable on the 15th day of August, 1816, and the other on the 15th day of November, in that year; and the ascertained duties are noted upon each at $254 17. Such is the origin of the bonds in question, so far as my information extends.

I cannot ascertain that any further step was taken in the prosecution of said libels, or that either of said bonds was prosecuted previous to the division of this State into two judicial districts. On the 18th

of April, 1816, the State having been so divided, the libel and all proceedings thereupon were certified from the Southern into the Northern District Court, and, on the 12th July, 1817, a stipulation was entered into between the then Attorney for the United States for the northern district of New York and the proctor for the claimant, that the testimony of witnesses taken in said cause before Commissioners should be read and admitted in evidence on the trial of said cause; and, on the 16th of May, 1822, another stipulation, of which a copy marked A is hereto annexed, was entered into between the then Attorney for said district and said proctor.

In July, 1817, three suits were instituted on the bonds above mentioned, and on the 26th day of January, 1821, the default of the defendants for not having plead in said causes was entered, and, at January term, 1822, a rule for judgment final in each of said causes was entered, but the amount due was not ascertained or any judgment record filed. It also appears that N. Williams, Esq., had given notice that he was attorney for the defendants in said causes, but by whom employed or why he omitted to plead in said causes, if he supposed they could be successfully defended, is entirely unknown to me.

Such was the situation of the prosecution for the condemnation of said goods, and the three suits on the bonds, when the papers came to my hands in the spring of 1823. At that time the testimony relative to said goods had not been taken by the Commissioners, and I was informed by Mr. Sutherland, who preceded me in this office, that he had agreed with the attorney for the defendants in the suits on the bonds to suspend proceedings in said causes until the prosecution for the forfeiture of said goods should be determined.

The testimony was not completed and returned by the Commissioners until December, 1823, and being put into the form of a case, as agreed upon by the stipulation of 16th May, 1822, the cause was noticed for a hearing at the ensuing January term. Being obliged to leave court and return home in consequence of indisposition, I was unable to bring on the argument at that term. It was, however, brought on at the ensuing May term, and the counsel who, on that occasion, appeared and opposed the condemnation of said goods insisted that the judge (notwithstanding the stipulation) should omit to decide upon the controverted matters of fact, and should refer such matters to the determination of a jury. At the ensuing August term, his honor, the judge, suggested that he should decline to decide such matters, and that a feigned issue must be made up and tried by a jury, but without any distinct explanation of the points which should be embraced in such issue.

Having ascertained from the depositions that the goods were not seized on waters navigable from the sea by vessels of ten or more tons burden, and therefore that it was not a case of admiralty jurisdiction to be tried exclusively by the court, but one (aside from the stipulation) in which matters of fact could alone be decided by a jury; the judge also having declined to act under that stipulation, and the claimant not only being dead but the claim and answer in reference to a common law proceeding being entirely informal, it was deemed most prudent, and indeed as the only course which gave a chance for success, to apply for permission to amend the libel, (see 8th Wheaton's R., 391, *The Sarah*,) and to strike out the claim and answer. A motion to that effect was made at the next term, (January, 1825,) and a rule, of which a copy, marked B, is hereto annexed, was granted. Of that rule due notice was given, and no opposition being made, the goods, at the ensuing May term, were condemned, &c.

A notice of a motion to be made at the then next August term for judgment on the bond of the surety (David A. Ogden) was given; but that term falling through by the death of the then judge of the district, the notice was renewed and the motion heard during the last January term, but was not then decided.

In the vacation preceding that term Mr. Hopkins, the late Collector above mentioned, had written to me urging that judgments should be perfected upon the bonds in question and executions issued, and informing me that although Mr. Laughlin was reputed to be a man of property, yet, if he should be apprised that executions were about to issue, he might dispose of his property to evade the collection, and intimating very distinctly that the debts would be hazarded by further delay.

Unwilling to do anything which should contravene a stipulation of my predecessor; not being entirely satisfied whether that stipulation contemplated a stay of proceedings upon the bonds not only until the goods should be condemned or acquitted, but also until the question as to the liability of David A. Ogden upon his bond should be determined; desirous, if possible, to avoid any loss to the Government by the delay, and presuming, at all events, that it could not have been expected when the stipulation was entered into that the ability of the signers of the bonds would be impaired, during the delay, so as to put their ultimate collection in jeopardy, I concluded that it was in all respects correct and proper, under the circumstances of the case, to perfect the judgments and have a levy made so as to secure the amount, and then such indulgence might be given in the collection as, upon the whole, should be deemed correct. Judgments were accordingly docketed for the ascertained duties, as noted on each bond, and interest from the time they respectively fell due, executions issued, and a levy made, as stated in the petition.

Having, in the meantime, ascertained from the marshal that the judgments were, probably, secured by the levy, I wrote to the Comptroller of the Treasury at Washington, on the 27th of February, stating that I presumed the judgments were so secured, and advising that proceedings should be stayed until a decision was had upon the motion then pending for judgment against the surety, David A. Ogden, and asking him if I should take that course. To this letter I received no answer from the Comptroller, but the Agent of the Treasury, by letter of the 13th of March, directed a suspension of all proceedings on the executions until the 4th of March, 1827, on condition that the costs should be forthwith paid. Of this order I advised Mr. Laughlin by letter of the 20th March. Thus the causes rested until I was directed by the Agent of the Treasury, by letter of the 8th ultimo, to stay proceedings, unconditionally, until the 3d of March next, and of which I wrote Mr. Laughlin on the 16th. It may be proper to add that, at the last May term of the District Court for this district, the motion made at the January term for judgment against David A. Ogden, on his bond, was refused, and substantially, according to my understanding of the opinion, on the ground that the bond being given in reference to the particular prosecution then pending, by way of libel on the admiralty side of the court, the responsibility of the surety could not be extended to embrace the case of a condemnation of the goods upon an information on the common law side of the court; that the amendment of the libel, by striking out the words *on waters, &c.*, had affected a radical change in the character of the prosecution, making it, instead of an admiralty, a common law proceeding, and in substance equivalent to the commencement of a new suit, and in reference to which the bond could not be construed to have been given.

Assuming this determination to be correct, and it is not only unnecessary, but would ill become me, in this manner, to call it in question, it will be seen that the only chance which the United States have

for realizing anything in relation to these goods, is upon the judgments. Whether it would be equitable to enforce these judgments against Mr. Laughlin, under these circumstances, is undoubtedly with great propriety referred to the determination of Congress.

There are various facts alleged in the petition, such as the pecuniary circumstances of the Messrs. Hopkins at and subsequent to the giving of the bonds; that Mr. Laughlin did not personally employ an attorney in the causes; that he rested easy, supposing the bonds had been cancelled, &c., of which I have no knowledge or information. Nor have I any information relative to the fact stated in the petition, that the bonds were taken for double the amount of the duties. The petition is the first and only intimation I have received upon that point; I am, however, very well satisfied that Benjamin W. Hopkins died in insolvent circumstances, and that Roswell Hopkins is now unable to pay anything.

I observe the petition states that the goods were *ordered* by the judge to be redelivered to the claimant on his giving bonds for the amount of the goods condemned and not returned, *and bonds for the duties if they should be restored to the claimant.* And upon this view it seems to be inferred by the petitioner that the bonds "were not due, and consequently no interest could accrue until after a trial and the goods should be released." It is also intimated that the judgments, on this ground, are irregular. This I apprehend is entirely incorrect. The bonds are in the usual form, payable at the times above stated, and do not refer to any such contingency as is stated in the petition, nor can I ascertain that any such order was ever made by the court. Such an order, indeed, would have been altogether unnecessary, and probably irregular, for the act of Congress (3 vol., 222, sec. 89,) in such cases requires the duties to be *paid* or *secured* in like manner as if the goods had been legally entered.

I have thus, sir, given you as full and minute a statement as I can suppose necessary, and as is in my power to furnish, of all the facts, transactions, and proceedings touching the matters set forth in the petition. It is of greater length than I could have wished; at the same time, it appeared to me, in all respects, necessary, in order to a just understanding of the merits of the application, that the history of the transaction, from its commencement to the present time, should, in all respects, be complete.

I have the honor to be, with great respect, your very obedient servant,

S. BEARDSLEY.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

DISTRICT COURT OF THE UNITED STATES, NORTHERN DISTRICT.

EIGHT TRUNKS AND ONE BALE OF DRY GOODS, BENJAMIN W. HOPKINS CLAIMANT, *vs.* THE UNITED STATES.

ALBANY, *May* 16, 1822.

1st. It is agreed that the affidavit of William Bayard, jr., one of the copartners of the mercantile house of LeRoy, Bayard, & Co., of the city of New York, tending to show the national character, present and former residence of a certain Gilbert Smissoult named in the claim filed in this cause, may be read in evidence upon the trial thereof, when sworn to before William P. Van Ness, Esq., judge, &c.

2d. That the parties may produce and read, as originals, certified copies of any letters or papers heretofore transmitted from the Treasury Department, and purporting to have been directed to Alexander Richards, late Collector of the district of Oswegatchie, subject to any objection to which the originals would have been liable.

3d. That Aaron Hackley, Esq., the Commissioner appointed by the parties to take the testimony in this cause, may proceed to take what is not already taken, upon giving eight days' notice of the time and place of taking such testimony to Alexander Richards, Esq., late Collector of the district of Oswegatchie, and to David A. Ogden, of the county of St. Lawrence.

4th. It is agreed that the claim heretofore filed by Benjamin W. Hopkins, without oath, (by an arrangement with a former District Attorney of the southern district, where the libel was originally filed,) shall be deemed and taken to be of the same validity as if sworn to by him.

Lastly. That the testimony which has already been or may be hereafter taken in this cause may be opened by the clerk of this court, and copies thereof furnished to either party requesting the same; and the proctors will make a case founded on said testimony, which shall be submitted to the judge of this court for decision, whose decision thereupon shall be considered, and have all the force and effect of a judgment of this court, subject to a suspension, as is customary in libel cases.

JACOB SUTHERLAND.
N. WILLIAMS.

B.

THE UNITED STATES OF AMERICA *vs.* EIGHT TRUNKS OF DRY GOODS AND ONE BUNDLE OF DRY GOODS.

FEBRUARY 4, 1825.

On reading and filing affidavit, &c., and on motion of Mr. Beardsley, Attorney for the United States, ordered, that the libel filed in this cause be amended by striking out the words "on waters which are navigable from the sea, by vessels of ten or more tons burden," and that the claim and answer of Benjamin W. Hopkins (he being dead) be stricken out; and that, unless some person or persons, as the representative or representatives of the said Benjamin W. Hopkins, appear and claim said eight trunks of dry goods and one bundle of dry goods at the next term of this court, and put in a claim and plea thereto, with the usual security, that said eight trunks of dry goods and one bundle of dry goods be condemned as forfeited to the use of the United States.

It is also ordered, that the said Attorney of the said United States serve a copy of this rule on Nathan Williams, the proctor of said Benjamin W. Hopkins, deceased, within twenty days.

DISTRICT OF OSWEGATCHIE, *Port of Ogdensburg, June* 20, 1826.

SIR: On my return recently from a journey I had the honor to receive your letter, under date of the 16th ultimo, enclosing "a copy of a resolution of the House of Representatives of the United States, passed on the 5th May, in relation to the petition of Thaddeus Laughlin, together with a copy of said petition;" and have now the honor to state that I have never had the possession of the bond in question, nor any knowledge of its existence, nor, of course, of any of the facts connected with its prosecution.

From having formerly acted as a Commissioner to take testimony in the libel suit for forfeiture, of the United States *vs.* Eight Trunks, &c., of Goods, in which Benjamin W. Hopkins was claimant, I had reason to presume that such a bond had been given under the collection law.

The bond was executed while my predecessor, Alexander Richards, Esq., of Madrid, in this county, (St. Lawrence,) was in office, and has never been delivered over to me. My possession of the office commenced on the 24th April, 1821.

As it was not in my power to furnish the answer to the inquiries of your letter above referred to, and as I did not conceive it entirely proper for me to dispossess myself of the letter and enclosures which you had officially sent to me, I thought it most advisable to transmit fair copies thereof to Judge Richards, my predecessor, at the same time expressing my expectation that he would furnish the information required by you, in pursuance of the aforesaid resolution.

Permit me, however, sir, to suggest that his performance of this duty may possibly be hastened by, or perhaps depend upon, your addressing him *directly* upon the subject.

I have the honor to be, with the highest respect, your obedient and humble servant,

AARON HACKLEY, *Collector.*

HON. RICHARD RUSH, *Secretary of the Treasury.*

C.

DISTRICT ATTORNEY'S OFFICE, *Utica, October* 12, 1826.

SIR: In the report which I had the honor to make to you on the 9th of June last, touching the matters set forth in the petition of Thaddeus Laughlin, I stated that certain goods therein named were libelled, in the fall of 1814, in the District Court of the *district of New York*. This was a mistake; the libel was filed in the District Court of the southern district of New York, after the State had been divided into two judicial districts, although it is entitled as a proceeding in the District Court of *the district of New York*. This error had escaped me until within a day or two since. By an act of Congress of 9th of April, 1814, (see 4 vol., Laws U. S., 679,) the State was divided into two judicial districts, the *southern* and *northern*, and a District Court organized in each. These courts, by their organization, were clothed with the ordinary jurisdiction of such courts; and by the ninth section of the judicial act of the 24th September, 1789, District Courts are vested with "exclusive" original cognizance of all seizures within their respective districts. The act of 9th April, 1814, it will be observed, annihilated the District Court of the *district of New York*, the Southern and Northern District Courts being substituted in its stead.

The seizure of the goods in this case was made in October, 1814, after the State had been so divided into two districts; it was made in the county of St. Lawrence, and in the *northern* district. The *Northern* District Court, therefore, had *exclusive* cognizance of the seizure. The seizure was also made on waters *not* navigable from the sea by vessels of ten or more tons burden; it was, therefore, a case of common law, and not of admiralty jurisdiction.

But the libel was, in fact, filed in the District Court of the *southern district* of New York, although entitled in and on its face appearing to be a proceeding in the District Court of the *district of New York*. The monition was also directed to the marshal of the district of *New York*, and was made returnable in the District Court of the district of *New York*. At this period there was no such court in existence, and the *Southern* District Court had no jurisdiction in the case—the seizure was not within its limits. The bond of David A. Ogden, as surety for these goods, also follows the error in said libel, and refers to a prosecution in the District Court of the district of New York—a court not in existence.

How these errors arose, or how at that time they could escape the observation of counsel, is more than I can explain; in my opinion, however, the whole proceedings in the Southern as well as in the Northern District Court in relation to the condemnation of the goods have been without jurisdiction, and utterly void.

The prosecution against these goods was, in its inceptions, peculiarly unfortunate.

1. The *Northern* District Court had *exclusive* jurisdiction of the case; but the libel was filed in the *Southern* District Court.

2. It was filed in the *Southern* District Court, although entitled in, and on its face appearing to be a proceeding in the District Court of the district of *New York*.

3. It was filed as a libel in an *admiralty* case, although, in fact, it was a *common law* proceeding.

4. The proceedings were certified from the *Southern* District Court to that of the *Northern* District, as having been instituted in the court of the district of *New York*, although they were, in fact, instituted in the *Southern District* Court.

The act of 3d April, 1818, (6 vol., 270, sec. 50,) authorized proceedings in causes which had arisen within the limits of the northern district of New York, and which had been instituted in the former District Court of the *district of New York*, to be transferred to the court of the northern district.

This, however, had not been in the court of the *district of New York*, but in that of the *southern* district, a court which had no jurisdiction in the case.

I do not know that this explanation is material in relation to the petition of Mr. Laughlin. The bonds *for duties* were given voluntarily, and may, in law, be valid, although the proceedings against the goods themselves were void. If I am correct in the opinion that the latter are void, it is entirely clear that the United States will realize nothing from these goods unless upon the bonds for duties.

May I request to have this letter considered as a part of my report upon the petition above-referred to?

I have the honor to be, with great respect, sir, your obedient servant,

S. BEARDSLEY.

Hon. R. RUSH, *Secretary of the Treasury.*

D.

TWADDINGTON, *November* 21, 1826.

SIR: Pursuant to the resolution of the House of Representatives and your letter of the 29th June last, I have the honor to submit a statement of the facts in relation to the petition of Thaddeus Laughlin. In 1814 Benjamin W. Hopkins illegally imported into the district of Oswegatchie a large amount of goods; they were seized and immediately reported to the District Attorney, in New York, the only law officer then appointed, or with whom the Collector could correspond, as there was no attorney, marshal, or clerk in the northern district, nor was the Collector apprised of the district being divided. The goods were libelled, and a default ordered against them at the first District Court for the northern district. The counsel acting for the District Attorney, on the request of Hopkins, consented to waive the default, and Hopkins then preferred a claim to the goods in behalf of Gabriel Smissourt, a native of Hamburg. The court further, in pursuance of the 89th section of the law of March 2, 1799, for the collection of duties, at the request of Hopkins, ordered the goods to be appraised and delivered to him on giving the security required by that section, and paying or securing the duties. This was done; and from that time every obstacle was thrown in the way of a trial by the claimant. The cause was repeatedly noticed for trial. I procured the attendance of witnesses at Utica at great expense; but the trial was postponed on the application of the claimant or his surety. We at length obtained a commission, and the testimony of the witnesses were taken in this district and returned to the court, when all attempts at defence were abandoned and the goods condemned. I have at all times urged a trial, as I was fully sensible the goods must be condemned if a trial was had. Notwithstanding the condemnation, the surety claims to be exempt from his bond for the value on legal ground, and the decision of the District Court has been in his favor. I should mention that the gentlemen who appraised the goods appear to have estimated their value, as in the case of lost invoices, for the estimate of duties; for, when Hopkins came to enter them, he wished to have the duties estimated on the appraisal; and when the invoices were produced, as the Collector insisted, they exceeded the appraisal by a considerable amount. Mr. Laughlin misunderstands or misrepresents the order of the court in this case, and appears to think that the payment of the duties depended on a contingency—the acquittal or condemnation of the goods; whereas the duties should have been paid when they became due. At that time I delivered the bonds to the District Attorney, with a request for their speedy collection. In reply to this request, as often as repeated to the District Attorney, I have been informed that the counsel for the defendant objected to judgments being entered on the bonds till a trial was had upon the goods. Mr. Skinner, the District Attorney when the suits were commenced on the bonds, appeared unwilling that any decision should be entered by him, as judge of the court, on questions in which he had acted as the attorney, &c.

Mr. Laughlin states in his petition that the duties secured by these bonds were doubled. The same duties were charged upon those goods as upon any other entered at the same time. In relation to the solvency and responsibility of Hopkins, I would state that, when he came to give the same bonds to which Mr. Laughlin is a party, he was informed that he could be admitted to no further credit on bonds for duties at the custom-house until he had cancelled two bonds then due for duties on a previous importation. To do this he gave his draft on a merchant in Utica, where *he represented* he had funds, endorsed by Gouverneur Ogden and Chaney Rice, the sureties on the bonds. The draft was returned *protested*, and the endorsers were compelled to pay the judgments; the remaining bond was prosecuted, and the same sureties had to pay the judgment obtained. Roswell Hopkins, whose property is represented as "large and unincumbered," was embarrassed by his engagements for B. W. Hopkins, and finally ruined by them, so as to be unable to pay Messrs. Gouverneur Ogden and Rice as he had promised, or to secure Judge Ogden, the surety for the goods.

On the facts contained in the above statements few comments are necessary. The delay, which appears so remarkable in this case, must be attributed to the insufficiency of the court for the northern district for several years, owing to the state of the health of Judge Tallmage, who was appointed to preside. That the claimant, B. W. Hopkins, and his sureties have used all efforts to prevent a decision on the goods until compelled to by the return of the commission for taking the testimony. The bonds for the duties (although perfectly distinct) were, by the arts of the claimant, made to abide the event of a decision on the goods.

Mr. Laughlin, in one part of his petition, complains that he was persecuted before a decision upon the goods in 1816; and in another laments the delay of prosecution. Mr. Laughlin, when he signed these bonds in 1815, well knew that B. W. Hopkins had been, during the war, and was engaged in extensive mercantile business, some of which was hazardous and contrary to the *laws of his country*; in other words, was a speculator and a smuggler. When arrested he ought to have seen that the bonds were paid, and not relied on the assurance of Hopkins that he would see them cancelled. By law a moiety of the proceeds of all goods forfeited accrues to the Collector who makes the seizure. In his account of liquidated bonds for the last quarter of 1815, these bonds were charged him, and credited, by direction of the Comptroller, in the same account for the second quarter of 1816, to be accounted for in account of "fines and forfeitures."

Should the prayer of the petition be granted, the following is the result: The illegal importer obtained the goods, worth $5,000; the surety for the goods is exempted, by the decision of the District Court, and the Collector loses not merely his portion of the goods, but the large expenses in seizing, and securing, and prosecuting, through every difficulty, to condemnation, goods, of the forfeiture of which there never could be a question.

I have the honor to be, very respectfully, your very obedient servant,

ALEX. RICHARDS.

Hon. RICHARD RUSH, *Secretary of the Treasury.*

E.

WASHINGTON, *December* 16, 1826.

SIR: Since I last had the honor of addressing you on the subject of Mr. Laughlin's case I have had a conversation with Mr. Ira Collins, who was my deputy and attended to the execution of the bonds, and is witness to them. He says at the time Mr. Laughlin signed the bonds he must have suspected Mr. Benjamin W. Hopkins' circumstances, as he refused to sign them until he was secured. All the parties were present, that is, B. W. Hopkins, Roswell Hopkins, and Mr. Laughlin. After some conversation the three left Mr. Collins and retired to another room, as Mr. Collins supposed (and it was stated) for the purpose of arranging the security. After they returned, Mr. Laughlin observed he was satisfied, and signed the bonds. Mr. Collins further says, from what passed he has no doubt Mr. Laughlin was satisfactorily secured at the time; if he has released it, it is his own wrong. He cannot now pretend B. W. Hopkins was then "in good and solvent circumstances," or that he had no reason to suspect his solvency. As represented in Mr. Laughlin's petition, it may be said his is a hard case, but not harder than many others who become surety where the principal fails.

Should the marshal be directed to collect the executions, I would beg leave to suggest the expediency of appointing an agent to purchase in the property for the United States. I believe there may be sufficient property to pay all the executions; yet, should it be sold for cash in the present scarcity of money in this country, I doubt whether it would sell for one-quarter of its value, and the United States would receive little or nothing.

I have the honor to be, very respectfully, your very obedient servant,

ALEX. RICHARDS.

Hon. RICHARD RUSH, Esq., *Secretary of the Treasury.*

F.

TREASURY DEPARTMENT, *Fifth Auditor's Office, May* 8, 1826.

SIR: In consequence of a resolution of the House of Representatives of the United States, passed May 5, 1826, in relation to the petition of Thaddeus Laughlin, I have the honor to request that you will suspend further proceedings for the debt and costs of the judgment obtained against him and others until the 3d day of March next.

I am, &c.,

S. PLEASONTON, *Agent of the Treasury.*

SAMUEL BEARDSLEY, Esq., *United States Attorney, Utica, New York.*

NORTHERN DISTRICT OF NEW YORK, *ss.*

I, Richard R. Lansing, clerk of the District Court of the United States of America for the district aforesaid, having inspected the records of my office, do find there remaining a certain judgment record, in the words and figures following, to wit:

DISTRICT COURT OF THE UNITED STATES OF AMERICA FOR THE NORTHERN DISTRICT OF NEW YORK.

Pleas before the judge of the District Court of the United States of America for the northern district of New York, at the city of Albany, in said district, of the stated term of January, in the year of our Lord one thousand eight hundred and twenty-six.

Witness the Hon. Alfred Conkling, judge of said court.

R. R. LANSING, *Clerk.*

NORTHERN DISTRICT OF NEW YORK, *ss.*

The United States of America put in their place Samuel Beardsley, their attorney, against Roswell Hopkins and Thaddeus Laughlin, survivors, &c., *in a plea of debt.*

NORTHERN DISTRICT OF NEW YORK, *ss.*

Roswell Hopkins and Thaddeus Laughlin, in their own proper persons, at the suit of the United States of America, in the plea aforesaid.

NORTHERN DISTRICT OF NEW YORK, *ss.*

Be it remembered, that on the second Tuesday in July, in the term of July, in the year of our Lord one thousand eight hundred and seventeen, before the judge of the District Court of the United States of America for the northern district of New York, at Utica, in said district, come the said United States of America, by Roger Skinner, then their attorney, and brought into the said court, before the judge thereof, then there, their certain bill against Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, in custody, &c., of a plea of debt, &c., which said bill follows in these words, to wit:

NORTHERN DISTRICT OF NEW YORK, *to wit.*

The United States of America, by their attorney, complain of Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, defendants in this suit, in custody, &c., of a plea that they render to the said United States of America the sum of one thousand dollars, which they owe to, and from the said United States unjustly detain. For that whereas the said defendants, on the fifteenth day of November, in the fortieth year of the independence of the said United States, in the year of our Lord one thousand

eight hundred and fifteen, to wit, at Oswegatchie, in the northern district of New York, by their certain writing obligatory, sealed with their seals, and to the said District Court for the northern district of New York now here shown, the date whereof is the day and year aforesaid, acknowledged themselves, by the name and description of Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, of the town of Hopkinson, in the county of St. Lawrence and State of New York, to be held and firmly bound, jointly and severally, unto the said United States of America, in the said sum of one thousand dollars above demanded, to be paid to the said United States when they, the said defendants, should be thereunto afterwards requested, which said writing obligatory was and is subject to a certain condition thereunder written, whereby it is provided that if the said Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, or either of them, did, on or before the fifteenth day of May next ensuing the date of said bond, well and truly pay, or cause to be paid, unto the Collector of the Customs for the district of Oswegatchie, for the time being, the sum of five hundred and fifty dollars, or the amount of the duties to be ascertained as due and arising on certain goods, wares, and merchandises, entered by the said Benjamin W. Hopkins, as imported in two canoes from Canada, as per entry dated the day of the date of the said obligation, then the said obligation was to be void, otherwise to remain in full force and virtue. And the said attorney, on behalf of the said United States, in fact, says that, after the making of the said writing obligatory, to wit, on the first day of December, in the year of our Lord one thousand eight hundred and fifteen, at the district of Oswegatchie, in the northern district of New York, aforesaid, the duties due and arising on the said goods, wares, and merchandises, so entered and imported by the said Benjamin W. Hopkins as aforesaid, were ascertained to amount to the sum of five hundred and eight dollars and thirty-four cents, current money of the United States, of which the said defendants, on the same day and year, and at the place last aforesaid, then had notice.

Nevertheless, the said United States, by their attorney aforesaid, in fact, say that the said Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, or either of them, did not, on or before the fifteenth day of May next ensuing the date of the said bond, pay, or cause to be paid, nor have they, or either of them, hitherto paid, or caused to be paid, unto the Collector of the Customs for the district of Oswegatchie, the aforesaid sum of five hundred and fifty dollars, or the said sum of five hundred and eight dollars and thirty-four cents, being the amount of duties ascertained to be due and arising as aforesaid, or either of them, or any part thereof, although often requested so to do, to wit, at the place aforesaid, contrary to the form and effect of the said condition of the said writing obligatory.

By means of which said premises the said United States have sustained damages to a large amount, to wit, to the amount of one thousand dollars; whereby an action hath accrued to the said United States to demand and have of and from the said defendants the said sum of one thousand dollars above demanded. Yet the said defendants, although often requested so to do, have not, nor hath either of them, as yet, paid the said sum of one thousand dollars above demanded, or any part thereof, to the said United States; but to pay the same, or any part thereof, to the said United States have hitherto wholly refused and still do refuse, to the damage of the said United States of one thousand dollars, and thereof the said attorney, on behalf of the said United States, brings suit, &c.

And now, at this day, that is to say, on the last Tuesday of January, in the term of January, in the year of our Lord one thousand eight hundred and twenty-six, until which day the said defendants had leave to imparl to the declaration aforesaid, and then to answer the same before the said court, at the city of Albany, in the said northern district, come the said United States of America, by Samuel Beardsley, their attorney; and the said attorney, on behalf of said United States of America, suggests and shows unto the court here, that since the exhibition of the bill in this cause, that is to say, on the first day of December, in the year of our Lord one thousand eight hundred and twenty-five, the said Benjamin W. Hopkins, one of the above named defendants, departed this life; but inasmuch as the said action survives against the said Roswell Hopkins and Thaddeus Laughlin, the said attorney, on behalf of said United States of America, prays that said cause may proceed against said Roswell Hopkins and Thaddeus Laughlin; and said Roswell Hopkins and Thaddeus Laughlin, although solemnly demanded, come not, but make default, by reason whereof the said United States of America remain therein undefended against the said defendants; wherefore the said United States of America ought to recover against the said defendants so much of said debt as is due, according to equity, &c. And it appearing to the said court now here by the premises aforesaid, &c., and by due proof, &c., that eight hundred and four dollars and seventy cents of the debt aforesaid are due to the said United States of America, according to equity, and that the said United States of America ought to recover the same, &c.; and the said United States of America, by their said attorney, freely here in court declaring that they will not further prosecute said cause for the recovery of the residue of said debt over and above the sum last aforesaid:

It is considered by the said court that the said United States of America do recover against the said defendants their said debt to the sum of eight hundred and four dollars and seventy cents, so due as aforesaid; and also fifty-four dollars and seventy-eight cents for their costs and charges by them laid out and expended in and about the prosecution of their said suit, by the court now here adjudged to the said United States of America, and with their assent. And the said defendants, in mercy, &c.

Judgment signed February 6, A. D. 1826.

NORTHERN DISTRICT OF NEW YORK, *ss.*

I, Richard R. Lansing, clerk of the District Court of the United States of America for the district aforesaid, having inspected the records of my office, do find there remaining a certain judgment record, in the words and figures following, to wit:

DISTRICT COURT OF THE UNITED STATES OF AMERICA FOR THE NORTHERN DISTRICT OF NEW YORK.

Pleas before the judge of the District Court of the United States of America for the northern district of New York, at the city of Albany, in said district, of the stated term of January, in the year of our Lord one thousand eight hundred and twenty-six.

Witness the Hon. Alfred Conkling, judge of said court.

R. R. LANSING, *Clerk.*

NORTHERN DISTRICT OF NEW YORK, *ss.*

The United States of America put in their place Samuel Beardsley, their attorney, against Roswell Hopkins and Thaddeus Laughlin, survivors, &c., in a plea of debt.

NORTHERN DISTRICT OF NEW YORK, *ss.*

Roswell Hopkins and Thaddeus Laughlin, in their own proper persons, at the suit of the United States of America, in the plea aforesaid.

NORTHERN DISTRICT OF NEW YORK, *ss.*

Be it remembered, that on the second Tuesday in July, in the term of July, in the year of our Lord one thousand eight hundred and seventeen, before the judge of the District Court of the United States of America for the northern district of New York, at Utica, in said district, come the said United States of America, by Roger Skinner, then their attorney, and brought into the said court, before the judge thereof, then there, their certain bill against Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, in custody, &c., of a plea of debt, &c., which said bill follows in these words, to wit:

NORTHERN DISTRICT OF NEW YORK, *to wit.*

The United States of America, by their attorney, complain of Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, defendants in this suit, in custody &c., of a plea that they render to the said United States of America the sum of five hundred dollars, which they owe to, and from the United States unjustly detain. For that whereas the said defendants, on the fifteenth day of November, in the fortieth year of the independence of the said United States, in the year of our Lord one thousand eight hundred and fifteen, to wit, at Oswegatchie, in the northern district of New York, by their certain writing obligatory, sealed with their seals, and to the said District Court for the northern district of New York now here shown, the date whereof is the day and year aforesaid, acknowledged themselves, by the name and description of Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, of the town of Hopkinton, in the county of St. Lawrence, and State of New York, to be held and firmly bound, jointly and severally, unto the said United States of America, in the said sum of five hundred dollars above demanded, to be paid to the said United States when they, the said defendants, should be thereunto afterwards requested, which said writing obligatory was and is subject to a certain condition thereunder written, whereby it is provided that if the said Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, or either of them, did, on or before the fifteenth day of November next ensuing the date of said bond, well and truly pay, or cause to be paid, unto the Collector of the Customs for the district of Oswegatchie, for the time being, the sum of two hundred and seventy-five dollars, or the amount of the duties to be ascertained as due and arising on certain goods, wares, and merchandises, entered by the said Benjamin W. Hopkins as imported in two canoes from Canada, as per entry dated the day of the date of the said obligation, then the said obligation was to be void, otherwise to remain in full force and virtue. And the said attorney, on behalf of the United States, in fact, says that, after the making of the said writing obligatory, to wit, on the first day of December, in the year of our Lord one thousand eight hundred and fifteen, at the district of Oswegatchie, in the northern district of New York aforesaid, the duties due and arising on the said goods, wares, and merchandises, so entered and imported by the said Benjamin W. Hopkins as aforesaid, were ascertained to amount to the sum of two hundred and fifty-four dollars and seventeen cents, current money of the United States, of which the said defendants, on the same day and year, and at the place last aforesaid, then had notice. Nevertheless, the said United States, by their attorney aforesaid, in fact, say, that the said Benjamin W. Hopkins, Roswell Hopkins, and Thaddeus Laughlin, or either of them, did not, on or before the fifteenth day of November next ensuing the date of the said bond, pay, or cause to be paid, nor have they, or either of them, hitherto paid, or caused to be paid, unto the Collector of the Customs for the district of Oswegatchie, the aforesaid sum of two hundred and seventy-five dollars, or the said sum of two hundred and fifty-four dollars and seventeen cents, being the amount of duties ascertained to be due and arising as aforesaid, or either of them, or any part thereof, although often requested so to do, to wit, at the place aforesaid, contrary to the form and effect of the said condition of the said writing obligatory.

By means of which said premises the said United States have sustained damages to a large amount, to wit, to the amount of five hundred dollars; whereby an action hath accrued to the said United States to demand and have of and from the said defendants the said sum of five hundred dollars above demanded. Yet the said defendants, although often requested so to do, have not, nor hath either of them, as yet, paid the said sum of five hundred dollars above demanded, or any part thereof, to the said United States; but to pay the same, or any part thereof, to the said United States have hitherto wholly refused, and still do refuse, to the damage of the said United States of five hundred dollars; and thereof the said attorney, on behalf of the said United States, brings suit, &c.

And now, at this day, that is to say, on the last Tuesday in January, in the term of January, in the year of our Lord one thousand eight hundred and twenty-six, until which day the said defendants had leave to imparl to the declaration aforesaid, and then to answer the same before the said court, at the city of Albany, in the said northern district, come the United States of America, by Samuel Beardsley, their attorney; and the said attorney, on behalf of the said United States of America, suggests and shows unto the court here, that since the exhibition of the bill in this cause, that is to say, on the first day of December, in the year of our Lord one thousand eight hundred and twenty-five, the said Benjamin W. Hopkins, one of the above named defendants, departed this life; but inasmuch as the said action survives against

the said Roswell Hopkins and Thaddeus Laughlin, the said attorney, on behalf of said United States of America, prays that said cause may proceed against said Roswell Hopkins and Thaddeus Laughlin. And said Roswell Hopkins and Thaddeus Laughlin, although solemnly demanded, come not, but make default, by reason whereof the said United States of America remain therein undefended against the said defendants. Wherefore the said United States of America ought to recover against the said defendants so much of said debt as is due, according to equity, &c. And it appearing to the said court now here, by the premises aforesaid, &c., and by due proof, &c., that three hundred and ninety-four dollars and seventy-three cents of the debt aforesaid are due to the said United States of America, according to equity, and that the said United States of America ought to recover the same, &c.; and the United States of America, by their said attorney, freely, here in court, declaring that they will not further prosecute said cause for the recovery of the residue of said debt over and above the sum last aforesaid:

It is considered by the said court that the said United States of America do recover against the said defendants their said debt to the sum of three hundred and ninety-four dollars and seventy-three cents, so due as aforesaid; and also fifty-four dollars and seventy-eight cents for their costs and charges by them laid out and expended in and about the prosecution of their said suit, by the court now here adjudged to the said United States of America, and with their assent. And the said defendants, in mercy, &c.

20TH CONGRESS.] No. 790. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE DECEMBER 17, 1827.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The undersigned, citizens of Boston and its vicinity, respectfully represent: That they have not been inattentive or careless observers of the course of measures hitherto adopted by the Government of the United States at the urgent instance of those concerned in various branches of domestic manufacture to enhance the prices of home manufactured articles to the consumers by the establishment of such high duties as greatly to discourage, if not entirely to prohibit, the use of similar articles of foreign production at reduced prices; and that they have regarded with the deepest anxiety and solicitude the strenuous and combined efforts which have been recently made, and are now making, to influence and control the public opinion, and to give it a direction favorable to the imposition of still higher and more oppressive duties upon the important and essential article of woolen manufactured goods.

Upon the most superficial view of the subject, considering the actual and increasing numbers, the condition and habits of the people of the United States, and the climate in which we live, the manner in which such a people shall be supplied with woolen goods cannot fail of being regarded as a question of the first magnitude. It essentially concerns the comforts, pursuits, and employments of the whole community, more especially of the industrious classes, and in this respect demands the attentive and profound consideration of all those, both rulers and people, who feel an interest in the prosperity of our common country.

We are fully aware of the powerful influence of a strong, decisive, and deliberate public opinion in a popular and representative Government like ours, and of the great weight which the public voice, fully and deliberately expressed, must ever have upon the counsels, the measures, and policy of the Government.

We are also aware that it has frequently been represented, and from the numerous memorials, petitions, addresses, and resolutions of conventions, committees, and other organized bodies, it may appear that the great body of intelligent citizens in this part of the country, notwithstanding the strong expression of adverse opinions a few years since, are now in favor of a further increase of duties. Whereas your memorialists are fully convinced that no essential change of public opinion has taken place—that the great body of intelligent men in this part of the United States, including many of the most discreet and judicious manufacturers, are now, as they were then, fully convinced that moderate duties, a free interchange of commodities, and an open competition in all the pursuits of useful and honest industry should be protected and encouraged as the true and sound policy of the United States.

The apparent loud and general expression of opposite views may, we think, be easily accounted for consistently with the opinion here expressed.

It is undoubtedly true that the amount of capital invested in manufactures since 1820 has greatly increased, and consequently the numbers of those interested in them has also greatly increased, though still constituting a small proportion of the whole community. It is obvious that, under such circumstances, all those who would profit by the prohibitory system have a powerful and immediate interest in the question, whilst the interest of the great body of the community who would suffer by it, though vitally important, is remote and indirect. It is therefore easy to perceive how readily the voice of an active, interested, and organized minority may be mistaken for a general expression of the public will.

Under these circumstances your memorialists have felt it to be their duty, respectfully, but frankly, to express their opinion to the representatives of the people that any further increase of the duties upon imported woolens and other articles would be highly injurious to the great body of the community; their sincere belief that such is the prevalent if not the general opinion of judicious and intelligent persons of this part of the United States, and their earnest hope that Congress will not be induced by interested applications, however urgent or plausible, by further burdensome and prohibitory duties, to build up one interest, and that of a comparatively small minority, at the expense of the great interests of the whole.

In submitting these representations, they beg leave pointedly and strongly to disclaim all party and political views; they regard it as an abstract question of public policy to be considered and decided upon its own merits, and they regret, if such be the fact, that a subject of all others requiring calm and mature deliberation, a free and unbiased judgment, should even accidentally be connected with any subject calculated to excite the prejudices, to awaken the passions, or to strengthen or weaken the hopes or measures of any political party.

In like manner they do expressly disclaim any hostility to the manufacturing system. On the contrary, they believe that this branch of industry, whilst it advances gradually and naturally under the aid and protection of moderate duties, and as the wants and interests of the country require, is highly beneficial. And one strong ground of their apprehension is, that any forced and violent measures of encouragement, unjust in themselves, by which the manufacturing system is placed in manifest hostility to great national interests, must necessarily tend to produce a speedy and violent reaction which may prove most injurious to the system itself. Nothing has a more direct tendency to produce and hasten this disastrous crisis than the alarming pretensions of that class of manufacturers and their advocates who insist upon prohibitory duties upon imported commodities of first necessity, or, what is obviously the same thing, such an exorbitant rate of duties as effectually and avowedly to exclude all competition.

It is contended, on the part of the woolen manufacturers, that the British and other foreign nations, on account of their more abundant capital, low wages, and other advantages, notwithstanding the present high rate of duties, can undersell them in the home market, and, consequently, that further duties are necessary to enable them to realize a profit on their business.

If this, indeed, be true, it affords the strongest argument against the imposition of further duties. Stripped of the fallacious guise in which this proposition is usually put forth to arouse our national prejudices, as if the importing system were designed to promote foreign instead of American interests, what does the proposition really import? Why, that American capital is invested in foreign fabrics; that these fabrics are paid for by American produce, or other fruits of American industry, transported by American labor, in American ships; that they pay a handsome revenue to the Treasury; and are then

afforded to the people at a rate cheaper than that at which the home-made articles can be obtained, and which have paid no revenue into the Treasury.

This proposition, we think, contains the true merits of the question. Its soundness cannot be controverted. It may be denied, perverted, or evaded, but it cannot be shaken. In both cases the fabrics are the produce of American capital and industry. If the foreign fabrics, after paying the cost of their purchase, transportations, and incidental expenses, and a large revenue, cannot undersell the home-made fabrics, then the complaints of the manufacturers are utterly groundless, and no further duties can be of any avail to them. If they can, then, upon the system of importation, the country enjoys the double advantage of low prices and handsome revenue.

It is true that, in one case, the labor and capital of the country are devoted more extensively to agriculture and the various arts and employments connected with ship-building, trade, and navigation, and in the other, more directly to spinning and weaving, and the arts connected with the manufacture of cloth. But your memorialists have yet to learn that there is any national advantage in forcing labor and capital from a more to a less profitable employment, or, indeed, of forcing it at all; since it is obvious that, if left to itself, it will naturally seek and necessarily find that employment which is ultimately the most profitable.

But your memorialists believe that, in the terms and to the extent in which the proposition is advanced, it is not true that high duties are necessary to the growth of this branch of manufacture.

Even when the duty was at the moderate rate of five per cent. a most extensive manufacture of woolen goods was established in this country and carried on in a domestic and household way, and by small companies; and it is believed that if we were now to return to a system of moderate duties, a very large proportion of the woolen goods required for the consumption of the country, especially of the common fabrics, would be manufactured in the country. It seems, indeed, to be conceded that, as a general principle, the forcing of labor and capital into or from any particular channel by bounties or prohibitions, or by any financial regulations designed to produce the same effect, is impolitic and injurious to the public interests. But it is urged, with a vehemence and perseverance worthy of a better cause, that the particular circumstances in which we are placed render our country an exception to the operation of this general principle.

It is, among other things, frequently urged that the tariff of 1824 has been of slight benefit to the manufacturer, because, although the duty on woolen fabrics was greatly increased, yet an increase of the duty on imported wool, laid simultaneously, deprived them, in a great degree, of the benefit which they would otherwise have derived from that measure.

But when it is considered how very small a proportion of foreign wool enters into the manufacture of American goods, we think it will be apparent that the duty on wool, however much it may tend to concilitate the wool-growers and reconcile them to the payment of enormous duties on the woolens they consume, can have very little influence in advancing the price of the manufactured articles. We are aware that the proportion has, in some instances, been stated, even by those who should have been better informed, as high as *a quarter* and even *a half*. It is difficult to account for such exaggerated statements. We are satisfied that, upon the fullest investigation, the cost of foreign to that of domestic wool, used in the home manufacture, will not be found to exceed four or five per cent.

Another consideration, which is urgently pressed upon the notice of Congress as a reason for the increase of duties, is, that the existing duties are extensively evaded, and large quantities of goods are clandestinely and fraudulently introduced. This assertion, whilst it imports a serious charge of extensive frauds on the part of importers, and negligence or unfaithfulness on the part of the revenue officers, should, we think, rest upon some foundation more substantial than vague suspicion or interested representation. If this charge were supported by satisfactory proofs, and if it were sincerely believed to be a cause sufficiently extensive in its operation to affect the present question, would it not be wiser and more patriotic, instead of increasing the temptation to frauds by still higher duties, to devise and call upon Congress to adopt some effectual measures to secure the payment of the existing duties?—a measure quite as important to the nation, in point of *revenue*, as to the manufacturers in point of *protection*.

Your memorialists cannot perceive that, in the bill recently reported for the increase of duties on woolen goods, any measures are proposed for the increased security of the revenue. On the contrary, it seems manifest that, by the increase of duties itself, and the extraordinary and artificial mode of valuation of goods of a certain cost, both temptations and facilities are offered for frauds on the revenue, which, if they exist at all under the present system, must prove quite irresistible under the new one.

But it is asserted with great seriousness that home manufactures give employment to American labor and capital, and thus promote American interests. This is unquestionably true: but it is likewise true that a free importation gives an equal and vastly more beneficial employment to American capital and labor. If we import foreign fabrics, do we not export an equal amount of our own productions, the fruits of American labor and capital, to pay for them? Trade necessarily implies an interchange of commodities; each giving that which, from its climate, soil, and other circumstances, it produces with the greatest facility, and receiving that which it cannot produce at all, or which it can produce only at greater cost. If we will not buy foreign commodities, we cannot sell our own. If we will not import, we cannot export.

These are plain and self-evident rules, which it would seem hardly necessary to repeat were they not often controverted, or the fair and necessary inferences from them denied with a boldness and earnestness calculated to raise a doubt of their reality.

If, as is sometimes asserted, apparently to excite our national prejudices, foreign nations will not take our products—the fruits of American capital and industry—we may save ourselves the trouble of adopting any retaliatory measures in the shape of duties, prohibitions, or otherwise. If our products are not taken by foreign nations, it is quite obvious that we must necessarily cease to take their fabrics; and of course the home manufacturer will have the exclusive enjoyment of the home market, with or without duties. It is manifestly unimportant, in this view, whether the direct interchange of commodities between our own and any particular nation be equal or not. If we export our products to one country and receive their products or their money, and proceed to another for the purchase of our goods, this trade gives as great, and in many instances even a greater amount of employment to American capital and labor than if the exchange were direct.

But we have stated, and we believe it demonstrable, that the importing system gives a more extensive and more beneficial employment to American capital and industry than the manfacturing system, forced by high duties.

It is sufficient to maintain this proposition to state that, whilst manufacturing gives employment to

the capital immediately engaged in the fabrication of goods, the importing system affords equal employment to all those engaged in the production of the exported articles, together with all those engaged in the transportation and exchange of the commodities exported and imported, and all those engaged in the various arts and trades connected with ship-building, navigation, and commerce; in addition to all which, it pays a large revenue to the nation.

But, considering the question upon higher grounds, is it no object of national strength and grandeur to encourage the more improved cultivation of the old and a more extended occupation and settlement of the new lands of this Union? Is it no object of public policy to raise up a numerous and hardy race of seamen? Is it not desirable, upon public grounds, to cherish and maintain a free, liberal, and friendly intercourse with all foreign nations? And is not such an intercourse calculated to promote our own progress in the arts and improvements of advanced civilization? These are considerations which, independently of all pecuniary interests, would seem to recommend the adoption of those enlightened principles of free trade, the growth of modern times, conformable to the spirit of the age, which have met the approbation of the most enlightened statesmen, and which stand so prominently opposed to the restrictive and prohibitory measures which originated in an age of comparative darkness and ignorance.

Your memorialists would respectfully ask leave to examine the soundness of another proposition which is relied upon, apparently, with great confidence by the advocates of protecting duties, and which appears to be considered as decisive of the question, in its application to woolen manufactures which is this: that manufactures protected are cheaper because of that protection.

That with respect to a branch of manufacture not yet introduced into a country, or still in its infancy, where the skill, implements, and machinery necessary for carrying it on are wanting, a high temporary duty may encourage the introduction of artisans and machinery, and thus ultimately reduce the price of the manufacture, may well be admitted. But this surely cannot apply to an established manufacture, like that of woolens, the skill and machinery and all the requisite means and resources of conducting which are understood and possessed here in as high perfection as in any other country. Yet it is of such a branch of manufacture that the proposition is predicated, and that, too, for the purpose of establishing a high, *permanent*, protecting duty.

How, then, does the imposition of a duty upon any article of foreign fabric operate as a protection to the home manufactured article of like kind? Simply by enhancing the price to the consumer. This is not only the natural and necessary consequence, but the avowed and proposed design and purpose. It would not accomplish the object of its advocates—it would not operate as a protection without it. The proposition, then, amounts to this: that a measure designed and intended to enhance the price of goods to the consumer renders them cheaper. No argument can place the fallacy of this proposition in a stronger light than its simple statement.

But it is contended that the proposition is supported by the case of cotton goods, because more and better goods can be obtained now at a given money price than before the advance of duties on cotton goods. The fact is, no doubt, true. But because cottons have fallen since the tariff it by no means follows that that fall was occasioned by the tariff. Other causes, quite adequate to the effect, may be assigned for such a fall, both here and throughout the world; these are improved machinery, increased skill, more abundant capital, and reduced wages, occasioned by general peace; but above all, the reduction of the raw material to about one-third of its former price.

That these are the true and operative causes of the fall of cotton goods, both here and in foreign countries, is sufficiently shown by another fact, which is, that notwithstanding the existing high duties, large quantities of cotton goods are still imported. It is quite manifest, therefore, that cotton goods have fallen, not in consequence, but in spite of the high duty, and but for that duty would have fallen much lower.

The case of cotton goods, then, can have no tendency to support the proposition for which it is cited. If protecting duties render goods cheaper, what ground, we would respectfully ask, have the woolen manufacturers to complain of the duty on imported wool? On their own principles it should be regarded as a benefit, by rendering their raw material cheaper.

We have already alluded to the objection often repeated, that foreign nations will take little of our products, especially those raised north of the Potomac. We have already given one answer to this assertion: we must cease to import, and then the whole system of protecting duties is unnecessary and inoperative. But another, and to some minds perhaps a more satisfactory answer may be given. In point of fact we have had, and, unless paralyzed by our own unwise and impolitic restrictions, may continue to have, a most extensive and beneficial foreign trade, which has furnished the Treasury with by far the largest proportion of its whole receipts since the establishment of the Constitution, and which has given a stimulus to agriculture, to the mechanic arts, and to every department of industry. The benefits it confers have not been limited to a few or to particular classes, but have been diffused through the whole community.

It is true that the amount of productions exported bears but a small proportion to those which supply the home consumption. But this is probably true of every country. It is only the superfluous productions of any country which constitute the subject of its export trade.

It is impracticable in a memorial like this to enter into detailed calculations; but a reference to the custom-house returns will show that when not diminished by war, or by our own restrictive measures, we have had an extensive foreign trade. But of what importance is it, in a national view, whether the articles constituting the bulk of our exports are raised north or south of the Potomac? It is true that the New England and middle States are almost fully peopled, and engaged in various employments other than agriculture, and, especially New England, are rather consumers of the productions of others than exporters of their own. If the southern States enjoy an advantage in the sale of their valuable staples, do not those of the north enjoy a great advantage in the transportation of them, and in the profits on the returns made for the supply of the south? The diversity of clime, soil, habits, and social condition, is a source rather of unity than a diversity of interests. It enables each more effectually to supply the wants of the other, by an interchange of superfluities mutually beneficial. And we think it would be a subject of serious regret, if a question essentially affecting the general policy of the whole community should be discussed and decided with any reference to local prejudices, feelings, or interests. We consider it quite immaterial whether the great staples of our export trade are raised in one or another part of the United States; each and all participate in its benefits according to their respective conditions and means, and all share in the benefits of the liberal revenue which it yields to the nation.

A reference to the trade in the single article of cotton, if pursued in all its details, would manifestly

show to what a wide extent the profits of that trade are diffused, and to what an extent it gives employment to capital and industry beyond the limits of the States where it is produced.

Your memorialists understand that another claim is made for an increase of duties on woolen goods, supported by an appeal to the justice of Congress, which seems to demand more particular attention.

It is urged that, by the duties established by the act of 1824, the Government became pledged to the manufacturers to guaranty to them the protection intended to be extended to them by that act, and that the British Parliament, by a reduction of the duty on foreign wool, has, to a certain extent, diminished the cost of the British fabric, and thereby, in a great measure, deprived the American manufacturer of the benefit expected.

The positions maintained are, that the British Government reduced their duty on foreign wool subsequently to, and in consequence of, our protecting duty; that our Government is bound in good faith to secure to the manufacturer the protection then pledged; and that the reduction of the duty on foreign wool by Great Britain reduced the cost of the British fabrics to the amount of sixteen per cent.

A slight examination will show how utterly unfounded are all these positions. It will appear, by a reference to the debates in Parliament on the subject, that the duty of six pence per pound on foreign wool was a war duty, and its repeal was petitioned for in 1819; and, subsequently, that its reduction had been often recommended, and that the act reducing it passed the House of Commons in May, 1824, on the day after the passing of the American act. It will also appear, by a reference to the debates in Congress on the American act, that it was noticed and stated that this measure of the British Parliament was in progress, and would probably be adopted.

Nor can it be considered that the anticipation of the American act was the ground of the British repeal, when it is considered by how small a majority the duty was adopted by both Houses of Congress, and how far the protecting system was regarded from being a part of the settled policy of the United States.

In no respect, therefore, can the British reduction of duty be considered as made in a hostile or retaliatory spirit; and the supposition, unfounded in fact, seems calculated only to awaken injurious prejudices. Again: the effect of the reduction of the British duty on foreign wool is, in the opinion of your memorialists, greatly overstated. They are convinced that, upon the most careful investigation, considering how small a proportion of foreign wool enters into the composition of British woolens, and how small a proportion the cost of the raw material bears to that of the manufactured article, it will be found that the reduction on the goods, instead of anything like *sixteen*, did not exceed *two* or *three* per cent.

But if it is contended that Congress, by once raising the duty on foreign manufactures, is bound, in good faith, not only to maintain that duty, but to raise it further, with a view to meet any fall of price in the foreign article arising from foreign legislation, from the fall of wages, materials, interest of money, and all other fluctuating causes which can affect prices abroad, your memorialists beg leave earnestly to protest against the admission of so dangerous and extraordinary a doctrine. A duty once levied can never be reduced. A burden once imposed upon the people is fastened on them forever. Our own legislation, instead of being regulated by our own views of policy, is to vary with the legislation, not only of one, but all foreign nations, and not only with foreign legislation, but with the perpetually varying circumstances of foreign countries. The reduction of a poor tax; the repeal of the corn laws; the removal of any burden calculated to improve the condition of the foreign manufacturer is to work a consequent change in our protecting laws. Every burden removed from other nations is to be transferred to our own.

These conclusions are not the forced, but natural and necessary inferences from the principles assumed. If the Government is bound, in good faith, to protect the manufacturer against all competition, why not put an end to all discussion at once by carrying up the measure of protection to absolute and entire prohibition? If, as is contended, the increase of duties in any one instance is to be considered a perpetual pledge, on the part of the Government, to secure to the manufacturer the degree of protection then contemplated against all changes at home and abroad, does it not furnish the strongest argument against the policy and expediency of granting such a pledge, by any further increase of duty, until its beneficial influence in advancing the interests of the whole community can be clearly demonstrated?

But this subject of pledged faith is, by some of the apologists of the "American system," placed upon a different footing; and whilst they admit that the duties are already too high, and that the establishment of them was originally unwise and impolitic, yet that, as the manufacturers have thereby been induced to increase their establishments and to embark large capitals in their concerns, it is better now to carry the system through, and afford them the required protection.

One obvious answer to this objection is, that if an impolitic measure has been adopted, the sooner we return to sound principles the better, and that no measure ought to be sustained in violation of the free principles of our Constitution, which guaranties equal rights to all its citizens. But without urging this consideration, surely one impolitic measure affords no apology for the adoption of another. If the manufacturers have been induced to go beyond the encouragement afforded them by Congress, and to increase their establishments without regard to consequences, surely the losses arising from their improvidence and rashness, or from want of information or mistaken views, are not to be thrown upon the nation.

It is to be borne in mind that the question is not now as to the reduction, but the increase of existing duties. Whatever may be the opinion of your memorialists as to the policy of imposing the duties as they now exist, they do not at present ask for their repeal. If the act of 1816, the first measure adopted for the express purpose of protecting woolen manufactures, is to be considered as a pledge on the part of the National Legislature, surely it must also be regarded as expressing the limits of that pledge. A brief recurrence to the various measures from time to time adopted will show what has been the policy of the nation upon this subject, and what has been the course of the manufacturers.

The duty originally established upon woolen goods, after the adoption of the Constitution, was five per cent.; subsequently raised to seven and a half, to twelve per cent., and, by the act establishing the Mediterranean fund, to fifteen per cent. So it stood at the commencement of the late war, when that and most other duties for revenue only were doubled, making it thirty per cent., and limited to one year after the end of the war. By the operation of this duty, added to the obstructions of commerce occasioned by the war, the woolen manufactures were undoubtedly considerably increased. After the peace it became necessary to put the subject upon a permanent basis. A duty was established for the avowed purpose of protecting manufactures, and fixed at twenty-five per cent., to fall to twenty per cent. in 1820. This act limited the extent to which the nation consented to go. It also established another principle, the reverse of that now insisted on by the manufacturers. It proceeded upon the principle that if high duties are ever proper for the encouragement of manufactures, the occasion being temporary, to enable the manu-

facturer to struggle with the difficulties incident to a new establishment, the duty itself should be temporary, and be speedily reduced to a moderate rate after such temporary difficulties may reasonably be presumed to have been surmounted. Whereas the modern advocates of the restrictive system distinctly propose that the duty shall be, from time to time, advanced, and ultimately settle down at a rate little, if any, short of absolute prohibition as the established basis upon which these great interests are to be fixed.

This principle, which we understand is strongly urged upon the consideration of Congress by the most able and zealous advocates of the system, appears to your memorialists entirely unsound and inconsistent with the obvious dictates of good policy. If, after the home manufacture is established upon its best possible footing, the foreign fabric, after paying a *moderate* duty and yielding a liberal revenue to the National Treasury, can yet be sold cheaper than the home manufacture, as a permanent system of supply, there can seem to be no question of the expediency of purchasing the cheaper article and obtaining the revenue.

If the foreign fabric, thus charged with a moderate duty, cannot be sold cheaper than the home manufactured, then the prospective advance and the ultimate and permanent establishment of the high duties is inoperative and unnecessary.

If the act of 1816 be regarded as in the nature of a compromise, its obligations were reciprocal; if the nation were bound to continue the protection then offered, the manufacturers were equally bound to conform to the system then established. Yet, within a very short period, that provision of the law was repealed, by which the duty was to fall to twenty per cent.; and in 1824 it was further raised to a rate nominally exceeding thirty-three per cent., making, in fact, thirty-eight per cent., and Congress is again called upon for a very great advance.

Is it possible to perceive any limit at which this advance shall cease short of absolute prohibition? During the whole period in question the manufacturers have been increasing their works. Who can or who will give any pledge for them that they will be satisfied with anything short of prohibition? If, indeed, the manufacturers have suffered losses in their concerns, they have suffered in common with most other branches of business. But, at all events, such losses cannot be attributed to the policy of the Government, because, the duty being fixed, they could as safely make their calculations as those engaged in any other department of business. Nor could they justly calculate upon a future increase of duties, because many of the most eminent statesmen, who consented to the rate then established, distinctly declared their determination not to go further.

But it is urged that it is consistent neither with our safety nor dignity to remain dependent on foreign supply for so important and necessary an article as woolen goods. This argument, specious and plausible as it is, and calculated to make an impression on our feelings of patriotism and national pride, would have more weight if it were true in point of fact. But your memorialists submit, with great confidence, that the great supply of the country with woolen goods is, and long has been, derived from the home manufacture; that the permanent establishment of this manufacture within the country, for its principal supply, is placed entirely beyond the reach of any influence which high or low duties can exert; and we confidently appeal to the early history of the country, to the established habits, pursuits, and employments of the people, to the former flourishing condition and extensive establishment of this branch of industry, without the aid of protecting duties, as conclusive arguments in support of this proposition.

We state this proposition strongly, because we think it manifestly true, and highly important to the just decision of the question. The foreign supply, especially of coarse goods, whilst it may serve to regulate and equalize prices, and to supply occasional deficiencies, can constitute only a small part of our whole consumption. And should war, or any other obstruction to our commerce, temporarily diminish, or even entirely stop the importation, the consequent advance of price would, with very little delay, insure a supply proportioned to the increased demand.

The fact that the great supply of the people with woolens must, in the existing state of things, be furnished by the home manufacture, and would be so independently of protecting duties, may also serve to allay the fears of farmers and wool-growers, who are induced to believe that their interests are identified with the restrictive system. Whereas, your memorialists are convinced, and they are satisfied that it can be conclusively shown, by well authenticated facts, to which they beg leave to refer, that the demand for home-raised wool, and for home-manufactured woolens, would be but slightly affected by a free admission of foreign fabrics, even at rates still lower than the existing duties.

There are a variety of other topics connected with this prolific subject to which it was the design of your memorialists to refer, but the apprehension of being tedious prevents it. In the course of this memorial they have sometimes used the term "American system" to designate the system of high duties, with a view to the encouraging, or rather forcing, the introduction of home manufactures. They have done this in deference to those who thus use the term, and as a short and well understood designation, the use of which could scarcely mislead the most superficial. So far from being calculated to protect American interests, they consider it exactly the reverse. Of this they are sincerely convinced themselves, if they are so unfortunate as not to convince others.

They are aware that, by some rash and over zealous persons, all those who entertain opinions adverse to the American system, in the sense in which it is thus used, are stigmatized as opposers of American interests. It is even asserted that this is no longer a question between different American interests, but between Americans and foreigners. Such a suggestion could only have originated in ignorance, or a desire to create and foster unworthy prejudices. Your memorialists are inclined to attribute it to the blindness of an overheated zeal.

Whatever other principle may actuate your memorialists, they yield to none in the ardor and sincerity of their attachment to the true principles of American policy. The whole scope and design of this memorial is to show that the system of bounties, restrictions, and protecting duties is hostile to these principles. If the course they advocate cannot be sustained upon this ground they have no desire that it should prevail.

If, on the contrary, it can be demonstrated that a free interchange of commodities among the several States, and with foreign countries, under moderate, steady, and, as far as practicable, unchangeable duties, is calculated to promote and build up, equally and steadily, all the great interests of the country, regarded as a whole; that the contrary system is calculated to paralyze industry, to retard the general prosperity, to impair the national revenue, and to awaken and cherish feelings of alienation, aversion, and hostility among different sections of the Union, and between our own country and foreign Powers; they earnestly hope and trust that Congress will not be induced to proceed further in the encouragement

of a system so injurious to the general interests by a further increase of the duties on woolen manufactured goods.

Letter from the "citizens of Boston and the vicinity opposed to an increase of duties, &c." to Robert Y. Hayne, Senator from South Carolina.

BOSTON, *December* 12, 1827.

SIR: The committee of the citizens of Boston and the vicinity opposed to an increase of duties on imports have the honor herewith to forward to your care a memorial on this important subject, of which they request an early presentation to the Senate, and such an advocation of its principles as shall seem to you called for by the arguments therein contained, as applied to the interests of the whole nation. There are, sir, among the names of the memorialists those of many of our most enlightened, learned, disinterested citizens, and not a few of the most intelligent, judicious, and reflecting of our manufacturers, both of cotton and woolens. The committee have the most entire conviction that the best interests of the country are involved in this question, and will be promoted by the abandonment of any further prosecution of this system of high duties.

The committee have the honor to be, sir, with great respect, your very humble servants,

NATH. GODDARD,
LEMUEL SHAW,
ISAAC WINSLOW,
WILLIAM GODDARD,
ENOCH SILSBY,
THOMAS W. WARD,
EDWARD CRUFT,
LOT WHEELWRIGHT,
HENRY LEE,
R. D. SHEPHERD,
SAMUEL SWETT,
WILLIAM FOSTER,
DANIEL P. PARKER,
JOSEPH BAKER,
SAMUEL C. GRAY.

Committee.

Hon. ROBERT Y. HAYNE, *Washington.*

20TH CONGRESS.] **No. 791.** [1ST SESSION.

AMOUNT OF REVENUE FROM IMPOSTS AND TONNAGE IN FLORIDA, 1821 TO 1827.

COMMUNICATED TO THE SENATE DECEMBER 20, 1827.

TREASURY DEPARTMENT, *December* 19, 1827.

SIR: In obedience to a resolution of the Senate of the 14th instant directing the Secretary of the Treasury "to report to the Senate what amount of revenue from imposts and tonnage has been collected within the Territory of Florida, since its cession, designating the amount collected at each particular port," I have the honor to submit a statement prepared by the Register of the Treasury, which contains the information requested.

I have the honor to remain, with the highest respect, your most obedient servant.

RICHARD RUSH.

The Hon. the PRESIDENT *of the Senate.*

Statement exhibiting the gross amount of duties on imports and tonnage, &c., and the payments into the Treasury from the Territory of Florida, from the 1st *day of July,* 1821, *to the* 30th *day of September,* 1827.

20TH CONGRESS.] **No. 792.** [1ST SESSION.

AGAINST THE INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 27, 1827.

To the honorable the members of the Senate and House of Representatives in Congress assembled:

The citizens of Barnwell district, in the State of South Carolina, in a general meeting held in the court-house of the said district, on the 6th day of August, 1827, ask leave respectfully to submit their solemn protest against the principles and policy of a bill, commonly called the woolens bill, which has been and will again be brought before your honorable bodies:

Because, in its operation, it will have a direct tendency to enfeeble the union of these States, to strengthen and perfect which was the first object of the Federal Constitution.

Because it is repugnant to justice, which is, or should be, a primary principle in the administration of Republican Governments.

Because it is intended to promote private and sectional interests at the expense of the general welfare.

Because the National Government cannot legitimately impose duties on imports for purposes other than for revenue.

Because the avowed object of the bill in question is virtually to make certain classes of the people tributary to others:

Inasmuch as Government has not the right to encourage the employment of certain classes or to add to their profits at the expense of the community.

Because it will be assuming to Government the right of controlling private property, which is incompatible with the liberty of the citizen. History does not furnish an instance of a Government that long respected the other civil or political rights of the citizen, after it had usurped the power of disposing of private property.

Because exclusive privileges are incompatible with Republican institutions.

Because monopolies and exclusive privileges, conferred on certain favored classes or individuals, have a tendency to aristocracy, and must, ultimately, be destructive to the rights of the people. Monopolies operate oppressively on the people, and equally so, whether assumed by a despot or conferred on a favored few.

Because it will subject the industry of the nation to the avarice of a few moneyed capitalists.

Because it will have a tendency to accumulate wealth in the hands of a few. Wealth is power; and power, in the possession of a few favored persons, is inconsistent with general liberty.

Because it will be taxing the nation to make up the loss or to add to the profits of individual enterprise, which is unreasonable and unjust.

Because it will tend to diminish the revenue, and increase smuggling.

Because it will operate injuriously and oppressively on the interests of agriculture, already depressed, for the benefit of manufactures, who are now realizing a reasonable profit, and who, in their memorials on the subject to your honorable bodies, at the last session, did not ask an increase of duties, but only solicited more security and certainty in the collection of duties already imposed.

Because it is tyrannical and unjust to compel the citizen to purchase in a particular market when he can obtain the same articles on better terms in another. Tyranny, whether exercised by a monarchy, an aristocracy, or democracy, is the same.

Because agriculture, manufactures, commerce, and navigation, the four pillars of our prosperity, are (in the words of Jefferson) the most thriving when left to individual enterprise.

Because it will operate oppressively on the poorer classes of community, while the rich will, in a great measure, be exempt from its influence.

Because it will have the effect of creating and perpetuating geographical distinctions, and of placing local in opposition to general interests. And

Because we regard it as the commencement of a system of legislation (improperly called the American system) which, if persevered in, will, at no distant period, endanger the union of these States.

D. PEEHLES, *Chairman.*

F. J. HAY, *Secretary.*

20TH CONGRESS.] No. 793. [1ST SESSION.

AGAINST THE INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER, 27 1827.

To the honorable the members of the Senate and House of Representatives of the United States of America in Congress assembled:

The memorial of the undersigned, citizens of Edgefield district, in the State of South Carolina, respectfully represents: That, as we deem it to be our duty, so we know it to be our right, to remonstrate to your honorable bodies against both the *principles* and *policy* of the bill introduced at the last session of Congress, commonly called "the woolens bill."

We do this because we are fully aware that the subject will be again presented to your consideration, with all the additional weight that can be thrown on one side of the question by the numerous petitions and meetings of the manufacturers. Urging their peculiar interests with all the energy that *paucity of numbers, magnitude of interest*, and *unity of action* can enforce, we are not at all astonished that this systematized corps have so much tended to swerve our national councils from those fundamental principles of natural justice and equity on which our Government is bottomed.

Seeing these things, and knowing that six of the southern States *now* pay, annually, more than $250,000 as imposts on the importation of the single article of coarse woolens, (the especial object of this bill,) we would deem ourselves indifferent to the vital interests of our rising families and country were we longer to remain silent.

To sacrifice our wealth and our population to the clear necessities of our Government is generous and patriotic; but to suffer the former to be drawn from us, and the latter to be worn down by any means used for the benefit of *a few*, without a murmur, is cowardly.

The operation of things is now peculiarly unfavorable to *us*. Our exports of cotton amount to upwards of twenty millions of dollars, and, of course, we pay a corresponding portion of the expenses of the country in the consumption of the imports; yet almost all the disbursements of the Government take place north of us; and why, in the name of justice, is this bill now to be added to our burdens? If this system is continued, you must force our population westward, or, if they remain here, compel them, according to the natural order of things, to *decline;* for decrease the means of *subsistence*, and you must decrease our *numbers;* and this we complain of as the greatest of political evils. This may be slow and silent in its effects, but it is, nevertheless, *certain* and *deadly*. Draw away the money of our country, no matter in how small quantities, and you drain the circulating blood from our system. But we are told that it is finally to operate for our good, and will enable the poor man to obtain for two dollars that for which he now pays three. When we get an article from England under a duty of 30 or 40 per cent., and that duty is raised to 80 or 100, we cannot, for our lives, understand the logic that we shall then be enabled to get it cheaper than before. We want no set of manufacturers to *force* from us a certain portion of our income for their own use, and then tell us "that we must consent to it, as it is for our good, for really we know not what is our own interests on this subject;" thus adding insult to injury.

If our climate and soil are better adapted to growing the superfluities of life than that of the manufacturing sections, and we, therefore, can command more wealth through our agriculture *if let alone*, and they, from their natural water-power and population, are better suited for manufactures, are *we*, therefore, to bear the burden of establishing them? Justice revolts at the idea. Ours are, in truth, the gifts of Providence, and we recognize no right in Government to alter or equalize the distribution of his Almighty power. The first sources of wealth are from the soil, and we never delegated to our rulers any power to take from the tillers of the earth their income to create a new set of laborers. We need not inform your enlightened bodies that this second class of laborers, in the natural course of things, would be supplied from surplus capital and surplus population; and when they are supported from any other sources it will be the growth of an artificial hot-bed, which must be an expense and a sacrifice to the original and great mass of laborers. When, then, a few combine to aggrandize themselves at our expense, we must unite to counteract their influence.

The information that is received on the subject of manufactures is derived, necessarily, from the manufacturers themselves, and is it not the nature of man to favor himself? If they make 50 per cent. on their capital, would they not desire still more? And as we are agriculturists, spread over a wide surface, and as *they* are, comparatively, few in numbers, however powerful in wealth, with the advantage of union and concert, they can still hope to gain whatever they wish, however unequal or exorbitant; and this is one great reason why they have succeeded thus far.

If your honorable bodies were to offer, as a bounty, twenty dollars for every hundred yards of domestic woolens, and our manufacturers, through this means, were to receive six millions annually, enabling them to line their rivers with thriving villages, the whole country would pronounce it *unconstitutional;* but, really, we can see no practical difference between this and where (in articles we must have) the duties are raised from 30 to 100 per cent., thus producing prohibition, drawing the 30 per cent. from our Treasury, and giving it, with the additional duty, to the manufacturer. If there be a reason why the former should be unconstitutional, the same reason must exist against the latter.

A certain class of our population are clothed as cheaply as possible, say at ten dollars each, and if, by this duty on woolens, (which principally operates on the poor,) anything is added to their expense, we see no difference in the effects between this and a direct tax on each; and this we protest against as unnecessary and unjust.

We believe we have higher duties now, as mere protecting duties, than any other country. In England or France, for example, where the duty may be 60 per cent., yet there is perhaps a direct or internal tax amounting to 40 per cent., making the avowed protecting duty in reality but 20 per cent. Whereas we have no direct taxes, and every duty of 33½ per cent. operates as a protecting duty to that extent. Now, if our manufacturers cannot sustain themselves in competition with foreigners, who have to pay their own taxes together with ours, it is directly against the interests of the nation to sustain them. They then become sores on the body politic, which draw their heated and morbid action from the consumption of other parts of the system, thus paralyzing the natural vigor of the whole.

The manufacturers of wool ask for protection, and say their capital is unproductive without it; and this they allege in the face of the admitted fact that since the tariff of 1824 the capital in the woolen business has risen from $10,000,000 to $40,000,000. But why may not we, on a like principle, ask for a protection when our capital will now produce not more than four per cent? We are all citizens of the Union, entitled to common rights and privileges; and if any are to be assisted on the score of *policy*, why not the *larger* portion? But is it not clear that when the capital of New England continues to be vested in manufactures, and still the owners say they cannot exist, their *words* and *acts* are in direct contradiction? or it is a censure on the natural sagacity and close calculating powers of our northern brethren. It is against common sense to suppose that men of intelligence will *continue* to increase their capital in that which yields no profit, but is an expense, where there are so many new avenues to wealth; to believe this, and then to see the whole eastern section embellished with rising villages where there is nothing to support them but manufactures, is too monstrous for credulity itself. If they had even increased their manufactures to too great an extent and thereby suffer, let them bear it; for we know of no right in Government to pay men for their avarice or want of judgment. We may emphatically ask, what class of men are there that do not now suffer? *None*, we verily believe, *but the moneyed monopolists of the north and east*. But we have seen it recently stated by some distinguished converts to the manufacturing monopoly, that the manufacturers of wool have claims to the protection of Government because Great Britain has decreased her tax on the raw material. This we protest against as arrant sophistry; for it must have been known to those who advance it that that will only protect the manufacturers of *fine* woolens; and it is the second *minimum* of the woolens bill which includes the largest portion of woolens imported into the United States, and which, under a minimum disguise, imposes a duty of from 37½ to 139½ per cent., against which we solemnly raise our protest. Even admitting what is advanced to be true, we do not admit the principle that Government is bound to protect any class of citizens from the irregularities or policy of any foreign Government. As well might we claim protection from the irregularities of any set of men controlling the *cotton* trade in foreign markets. This is, indeed, one of the risks of the manufacturer which he knew before he entered into the business, and of course there is no obligation to sustain him if he loses.

We earnestly solicit the attention of the members to the injurious effects on our common country, where one section MAY vote away six millions to a manufacturing section, in expectation that the latter section may vote with them on the great questions arising on the public lands in the west, involving perhaps the gift of millions. *We* then stand in the position of "hewers of wood and drawers of water." This would be creating a system of patronage which would wear away the substantial landmarks of liberty. We want not freedom *in name* but *in fact*. Abstract liberty, like all other abstractions, has no existence. We want it in something tangible; in the just and equal protection of our rights and property.

We protest against all prohibitions, as diminishing the *revenue* of the Government, as decreasing our imports, and, consequently, the commerce of the country; for it is our vessels principally which bring our imports; decrease the latter, and you diminish the former. This, then, must *weaken* our Navy, that great, safe, and successful arm of our defence; for from whence is it that we draw those practiced seamen, indispensable for our Navy, but from our *commerce?* All history shows that no nation in modern times can sustain herself without a Navy. We protest against England's being held out as an example for us to follow in manufactures; for although almost all her enlightened statesmen and all her scientific writers now condemn the *restrictive system* at which our eastern brethren are now so eagerly grasping, we deprecate the idea of being *forced* into that *artificial* state of existence from which even she is now seeking to disinthrall herself. Derange her trade, and you throw upon her community a miserable, starving mob of manufacturers, moving through the land with the desolation of famine. Ours will not be a poor, unarmed crowd; with the rights of armed freemen, they will sweep onward with the convulsive fury of the living storm. We protest against a system which naturally in its progress brings down the lofty independence of *a man*, and converts him into a mere mechanical engine administering cotton to a spinning jenny.

We protest against the shallow idea of a system forced upon us under the imposing name of "American," and which, whilst it wrings from industry its hardest earnings, we are told in the end it is to make us "independent." We want not the inglorious independence of a nation who, through a mistaken, selfish policy, slumbers within her own borders. We want a free trade and a liberal exchange of everything, with a name known in every land, and a commerce felt on every sea. We are more than willing to pay duties for the support of our Government; but not for the sustenance of a moneyed, speculating aristocracy. We are willing to support manufactures to supply the essentials of a war, when we are involved in such a contest, or about to approach one; but, as to the great pretext advanced in favor of the manufacturing system, that such is the policy of this nation, with a sparse population extending over more than a million of square miles, to be raised into existence and fed at the expense of every other great interest, we most solemnly protest against it.

We are no factionists. We think it is our interest, as we know it to be our desire, to keep in close friendship and union with all parts of our *now* happy country; but we can never feel it to be to our interest or our desire to sacrifice our property, and with it our population and strength, to what we know to be alone the interest of the monopolists of any section. In defence of principle against a petty tax on tea the chivalry of the south was found freely braving the gash of death in the dreadful field of battle. There is now a tax proposed more insupportable; and if its principles are once admitted, what guaranty have we that they will not be pushed to any extent which avarice may claim or usurpation sanction? This would be making us, although not in name, yet, to all intents and purposes, *colonists* to an overbearing majority; and we have not yet so far sunk from the high inheritance of our ancestors as to live in an inglorious bondage. We, therefore, most respectfully, but earnestly, pray and remonstrate that your honorable bodies will, in arresting the contemplated bill, reject a system which cannot but be productive of the most injurious consequences to the true policy and lasting welfare of our happy nation.

[Signed by a number of the inhabitants of Edgefield district.]

20TH CONGRESS.] No. 794. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1827.

At a respectable meeting of agriculturists, manufacturers, and others friendly to the encouragement and protection of American industry, held at the capitol, in the city of Albany, on the 26th day of November, 1827, to take into consideration the propriety of memorializing Congress in favor of further protection to the growers and manufacturers of wool and other domestic productions, the meeting was called to order by Mr. Elisha Dorr, and, on his nomination, Mr. Benjamin Knower was appointed chairman and Gideon Hawley secretary.

Jesse Buell, Esq., having addressed the meeting on the subject for which they had assembled, moved for the appointment of a committee to prepare resolutions expressive of the sense of the meeting on the aforesaid subject; which motion having been adopted, Messrs. Jesse Buell, Elisha Dorr, Samuel A. Foot, James Porter, and William L. Marcy, were thereupon appointed such committee.

The committee having retired for a short time, returned, and reported the following resolutions, in blank as to the names of the committee therein mentioned:

Resolved, That the interests of agriculture are pre-eminently entitled to the fostering care of Government; that those who by their labors feed and enrich the nation, and in times of war are the strongest bulwark of our defence, should be protected and encouraged in those labors by our national guardians.

Resolved, That an increased duty upon foreign wool will tend to relieve the present embarrassments of the farmer, save his flocks from a further diminution, and prevent the recurrence, in the time of war, of a mortifying dependence upon our enemy for the necessary clothing of our citizens and soldiers.

Resolved, That, as the policy of those nations from whom we import most of our foreign manufactures will no longer permit their subjects to exchange their goods with our citizens for their breadstuffs and other provisions, except under circumstances that will rarely occur, prudence admonishes us to have our clothing made at home from our own cotton and wool; whereby a reciprocal benefit will result to the farmer and manufacturer in exchanging clothing for food, national industry will be promoted, and independence and prosperity secured.

Resolved, That the beneficial effects of the tariff of 1816 and 1824, in multiplying our cotton manufactories, in improving the quality of their fabrics, and diminishing their price to the consumers, without lessening our national revenue, affords reasonable grounds for believing that a moderate increase of duties upon woolens, iron, hemp, and such manufactured articles as we possess the materials and skill for making in quantities sufficient for our wants, would be highly conducive to the public good.

Resolved, That we approve of the proceedings of the convention of agriculturists, manufacturers, and others, assembled at Harrisburg on the 31st of July last, in recommending and urging upon Congress to extend an adequate protection and encouragement to the growing of wool, hemp, and flax, to woolens, iron, and steel, and other articles of domestic production and manufacture.

Resolved, That Jesse Buell, Elisha Dorr, Samuel A. Foot, James Porter, and William L. Marcy, be a committee to prepare a memorial to Congress expressing the views of this meeting, and embodying in it such facts, now presented to our consideration, as are calculated to evince the beneficial effects that are expected to arise from giving practical operation to these views; and that the committee cause the memorial to be presented to our fellow-citizens for their signatures, and forward the same to Congress.

Which resolutions having been read and considered, were adopted, and the blank therein filled with the names of the committee who reported the resolutions.

On motion of Mr. William Mayell, seconded by Jabez D. Hammond, Esq., the following resolution was adopted:

Resolved, That it be recommended to the citizens throughout the State to convene together in their several towns, or otherwise, for the purpose of memorializing Congress on the subject of the encouragement of agriculture, wool-growing, and manufactures; and that they solicit Congress to give such encouragement by the passing of a proper tariff bill; and that a committee of correspondence be appointed to further this object.

Messrs. William Mayell, Isaiah Townsend, Samuel M. Hopkins, John S. Van Rensselaer, and Jabez D. Hammond, were appointed a committee of correspondence under the preceding resolution.

The meeting, after ordering their proceedings to be published in all the newspapers in the city, adjourned.

B. KNOWER, *Chairman.*

G. HAWLEY, *Secretary.*

MEMORIAL.

To the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the undersigned, citizens of the city and county of Albany, respectfully shows: That, under a justifiable confidence that governmental protection would be afforded to the wool-growers and woolen manufacturers of our country, arising as well from the reiterated recommendations of several of our National Executives, as from the manifest importance of these branches of industry to the independence and prosperity of the nation, a very large capital has been appropriated to the raising of sheep and the erection of woolen manufactories. That the law of 1824 has failed to afford that protection which was expected from its operation, by reason of countervailing measures on the part of the British Government, the reduced price of wool in the foreign market, and the evasions, in various ways, of the provisions of that law. That both the wool-grower and woolen manufacturer have, in consequence, become seriously embarrassed for want of a fair market for the products of their capital and industry, and are threatened with greater evils, should their hopes of prompt and efficient aid from Congress fail to be realized.

Your memorialists would further represent, that another class of our citizens, comprising more than half of the population of the nation, is deeply interested in the promotion of domestic manufactures. We allude to the grain-growing and grazing farmers. Their flour, beef, pork, &c., are no longer received in Europe in exchange for the foreign goods they buy. The exportation of flour, their great staple to foreign countries, has decreased, in nine years, from eighteen millions to about four millions of dollars. A home market can alone be depended on for remuneration for their labors. This has been already partially created in the numerous manufacturing establishments which have sprung up in our country.

Should Congress give growth and permanency to this market by a moderate increase of duty upon such foreign goods as the nation can furnish within itself, the benefits will be great, your memorialists confidently believe, to every branch of national industry.

Your memorialists forbear to enlarge, presuming that the facts necessary to a right conclusion upon the subject are familiar to your honorable body.

Believing that you will be guided in your deliberations by an ardent zeal to promote the best interests of our country, we content ourselves with soliciting, respectfully, that relief and encouragement may be extended to our agriculturists and manufacturers, particularly to the growers of wool, flax, and hemp, and the manufacturers of woolens and iron.

ALBANY, *December* 4, 1827.

20TH CONGRESS.] **No. 795.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1827.

To the honorable the House of Representatives of the United States:

The petition of the manufacturers of Paterson, New Jersey, and more especially of those engaged in the manufacture of flax and hemp, humbly showeth: That your petitioners have on many other occasions respectfully approached your honorable body on the subject of additional protection to the manufacturers of hemp and flax; but their appeals hitherto have been in vain. On one occasion, when at least they had hoped for some amelioration of their condition by the law regulating the tariff in 1824, they were not only disappointed, but left to deplore that any attempt had been made to solicit your favorable consideration of their interests.

The duty on imported canvas and other coarse fabrics was specific antecedent to the passage of that law. It was therein changed to ad valorem, and by this modification your petitioners lost nearly thirty per cent. of that protection which had existed for years before the establishment of a manufactory in these United States. The specific duty on all canvas amounted to $2 and $2 50 per bolt, then almost the only article manufactured in the country. The ad valorem duty of 15 per cent. on heavy duck, costing as it does about 70 roubles in Russia, amounts to a little more than $1 80; and on light or ravens duck, valued at 20 roubles, the duty will amount to about 60 cents per bolt. Thus it will be remarked, that whilst every other manufacture of the country received the aid of your fostering hand, the situation of your petitioners became much worse, and the consequence has been that the proprietors of many of these establishments for manufacturing flax have not only been compelled to stop their works, but the machinery is offered in the market at a very great and, in many instances, unheard of sacrifice. Such is the present condition of most of them. And that the loss may be partially estimated, we beg to assure your honorable body that not less than half a million of dollars is now expended and must be irrecoverably lost under this depression without the interference of your salutary aid and protection. If manufactories have any claims on account of the employment they afford to laboring population, we may safely say that much more is required in the manufacture of flax than in the production of cloth from any other material; arising out of the greater number and variety of processes, together with the imperfection of the machinery employed to supply the place of manual labor.

Another serious difficulty under which your petitioners are now suffering, in addition to the want of adequate protection, is, that the revenue laws are more frequently violated in the exportation of canvas than in that of any other article. It has been stated, and it is believed with truth, that canvas is taken on board of vessels bound on foreign voyages for the benefit of drawback, and made up on board into sails; the debenture is, notwithstanding, recovered at the custom-house, and the requisite documents presented to cancel the bonds. Your petitioners do not intend to cast obloquy on the officers of the customs; *they* see that the requirements of the law are complied with; the evil lies in the facility with which certificates of landing are procured abroad. How many there are who take advantage of this imperfection of our laws your petitioners cannot pretend to say; but it is not unfrequently practiced, and thus much revenue is lost to the nation.

One other practice occurs which, by the laws of other Governments, is provided against. Our vessels often proceed on their voyages with old sails, with the express intention of procuring new ones at those ports where canvas may be purchased somewhat cheaper; and it has happened that new vessels have gone to Europe with the old sails of other vessels for the same purpose of obtaining an entire new suit on their arrival. Your honorable body will call to mind that this may happen also with cordage and light chains; it actually did occur so frequently with chain cables that it became necessary so to modify the law relating to this article as to prevent these various frauds.

Thus it is that we labor under more impediments to advancement than any other domestic manufacturers, in not having the protection of the Government nor the friendly disposition of the consumer; besides that, we have to contend against the violation of the revenue laws, the prejudice always arising

on the introduction of a new article for consumption, the experience and capital of the foreign manufacturer, and the encouragement of foreign Governments to the industry of their own country.

Under all these difficulties we humbly pray that your honorable body will take into consideration the peculiar hardship of our case, and extend to us that protection which others have received at your hands. If no other can obtain, the demands of common justice seem to require that, at least, we should be placed in the situation we were previously to the passage of the law in 1824 regulating the tariff. But we would most respectfully suggest that such an alteration should take place as would enable us successfully to pursue our occupations without fear from the overwhelming influence of the foreign manufacturer; and the following duties would tend to accomplish that desirable end:

On the importation of heavy duck, manufactured from hemp or flax	10 cents per square yard.
On light or ravens duck, from hemp or flax	11.....do.....
Osnaburgs	8.....do.....
Ticklenburgs	8.....do.....
Burlaps	8.....do.....
Twine, and flax or hemp yarns	6 cents per pound.

This protection, and limiting the debenture to be obtained on not less than one hundred bolts of duck to be exported, would secure to us the home market now, the markets of South America hereafter, and turn the attention of the agriculturists of the country to a new channel, from whence there would arise incalculable benefits.

The finer qualities of flaxen and hempen goods have not as yet been attempted in our country; the manufacturers have devoted their attention almost exclusively to the coarser descriptions, the principal of which has been canvas, as being more of it consumed, and most likely, for a great variety of reasons, to be encouraged by the people and the Government. The number of factories, the quantity and value of goods which might be manufactured, together with the number of acres of land which would probably be brought into cultivation, may be ascertained by a reference to the report of the committee appointed in the convention at Harrisburg on the subject of flax and hemp manufactures, hereunto attached. Of all the establishments therein mentioned, only two are in operation, and these entirely from the demand for canvas for the supply of the Navy of the United States, in which it has long been used to the satisfaction of those experienced and highly competent judges, the Commissioners of the Navy, and the various officers commanding the vessels, who, notwithstanding the objections raised by others, pronounce it to be greatly superior to any foreign canvas ever used on board our national ships.

The present establishments could now manufacture 870,000 pounds of flax, equal to 19,500 bolts of canvas per annum; the cost of the former would be $104,000; the sale of the latter would amount to $273,000, which would yield to the industry of the country a gross sum of $377,000, of which the farmer would have the exclusive benefit of one-third of this amount, whilst the laborer would receive $169,000, and the country would be comparatively independent, with an article in quality every way superior.

The progress to the capability of manufacturing this quantity has been accomplished in the course of five or six years, and an immediate advantage might at once be derived from it. If, then, so much has been done in so short a time without any protection, we have reason to conclude, from a proper encouragement to the manufacturer, that in four years more we should be fully able to supply the entire home demand, and, reasoning from what has been effected in cotton and other fabrics, this article would be afforded cheaper to the consumer at the expiration of that time than he could possibly import a similar quality.

The quantity of canvas and other articles manufactured from hemp and flax imported into the United States on an average of years may be found by a reference to the report made at Harrisburg, already mentioned, to which your petitioners solicit the attention of your honorable body.

Your petitioners have no doubt but that it was contemplated to extend a protection to the manufacturers of hemp and flax by the law of 1824 equally with the manufacturers of every other article; but to ascertain, with some degree of precision, the actual situation in which they were left by that tariff, it becomes necessary to revert to the report of the honorable the Secretary of the Treasury for the year ending September 30, 1826; it will there be found that, of imported articles manufactured from hemp and flax, which are *not* subject to 25 per cent. ad valorem duty, the whole value amounted to the enormous sum of $2,757,080, whilst those paying an ad valorem duty of 25 per cent. only amounted to $229,946, not quite one-tenth of the amount of goods paying less than 25 per cent. duty, and certainly not exceeding in value the operations of a factory of 2,000 spindles, employing 300 hands, for twelve months; whilst those articles, composing the great bulk of the consumption of the country, have met with a reduction of protection, and are, in fact, the only description of goods we either pretend to or can manufacture, although it was unquestionably the intention of Congress in 1824 to have granted further aid and protection.

As a measure of policy, almost every foreign nation has devised means to encourage the manufacture of canvas, and perhaps no other ever possessed the capability to manufacture it which is exhibited all over the United States. England, to equal whose naval strength, at no distant period, we indulge the expectation, has done more perhaps than any other country in enacting such laws as would secure to her maritime interests complete independence. There the importer has the option to pay either the specific duty of 7½*d.* the square yard, or 40 per cent. ad valorem, and "foreign-made sails on board any ship or vessel belonging to any of his Majesty's subjects, whether in use or not, for every one hundred pounds value, thirty pounds" duty. The coarser qualities of goods are rated in a similar proportion; for flaxen or hempen goods, not enumerated, woven twenty threads to the inch, and not exceeding twenty-four threads, pay a duty of 3½*d.* per square yard, to be reduced one-eighth of a half-penny for seven years, and in 1834 the duty is fixed at 3*d.* per square yard; there, goods woven twenty-four threads to the inch, and not exceeding thirty, the duty is 5*d.*, to reduce one-eighth of one penny for seven years, and in 1834 the duty is fixed at 4*d.* per square yard; or linen goods may be imported at an ad valorem duty of forty per cent. at the choice of the importer. In addition to this, the custom-house and dock dues and expenses are considerably more than is paid in any other country—a circumstance which operates materially in favor of the manufacturer.

The duty on imported flax, dressed or undressed, to 1826, is 4*d.* per 112 pounds, to reduce one penny to 1828, and after that it pays one penny per 112 pounds. Thus it appears that the English manufacturer is protected in every possible manner, and directly over the American manufacturer nearly 200 per cent.; whilst foreign flax is there subject to a little less than a mill per pound, and our farmer is protected to the extent of nearly 1½ cent per pound. Not that your petitioners mean to complain of this; the principal

is admitted by them to be correct; they only desire a due proportion of those favors so liberally bestowed upon other members of the community.

Is it not a matter of deep interest to become independent in those articles of consumption without which our comforts are greatly lessened? Few there are who would not have consented to the sacrifice (if so it be) of that protection to coarse flax fabrics which would have secured to them the necessaries they were sorely experiencing the want of, whilst the nation was engaged in war. Let us call to mind the condition in which our Navy would be placed under such circumstances as occurred in our last conflict with Great Britain.

The whole naval force of the United States, as we have seen stated, at present consists of 12 ships-of-the-line, 16 frigates, 13 sloops-of-war, and 6 schooners. The duck which would be required to fit out these vessels would amount to 28,987 bolts, of 40 yards each, according to the estimate of an experienced sailmaker, viz:

12 ships-of-the-line, each 900 bolts	10,800
16 frigates, each 400 bolts	6,400
15 sloops-of-war, each 346 bolts	5,190
6 schooners, each 170 bolts	1,020
Head and top cloths and tarpaulins, about	2,000
17,885 hammocks, 71,540 yards	3,577
Making the aforesaid total of	28,987 bolts,

nearly one-half of the whole importation of heavy duck into the United States in any one year. This being considered, and as high as one dollar per yard was paid for the sails of one of our frigates during the last war, it is of itself almost convincing as respects the policy of protecting manufactures of this article. In addition to the difficulty, indeed, almost impossibility, of procuring any, it would cost the nation to fit out these vessels for sails alone, in time of war, $1,159,440; whereas, were our home manufactures encouraged and protected, the expense of providing the auxiliary means of national defence would not exceed $350,000 under any circumstances. There would then be a saving to the country, at a time too when it would be most desirable, of about $809,440. We, therefore, beg leave to urge this inquiry on the consideration of your honorable body, as manufacturers of an article indispensable equally to the commerce of the country as for its defence and glory.

The importing merchants are convinced themselves of the unequal and unfavorable operation of ad valorem duties: for the manufacturer of other countries can always send forward his supplies at less invoice cost than the individual giving the order to the foreign manufacturer, and through a foreign merchant. It frequently happens that our merchants suffer losses by the foreign manufacturer following on their orders for similar goods with large shipments on his own account, on which various charges and commissions are saved; and these articles are sold at auction, to the entire discomfiture of all the plans and calculations of our importers.

There is a fraud under which the American manufacturer disadvantageously labors; it is seriously deplored by all interested. And if your petitioners suffer under any peculiar hardship, it is, that, when an article, new in its composition or workmanship, is made acceptable in the market, samples are immediately sent by agents to other countries, where the goods are imitated, and the difference in capital, experience, machinery, and bounties allowed on exportation, enable them to inundate the country, to the utter extinction of the domestic article. This has been done this year; and is to occur, during the next, with the manufacturers of hemp and flax. We have extracts from letters addressed by foreign manufacturers to their agents in this country, in which, to use their own expressions, they say "they are determined to put down the manufacturers of canvas," particularly during the year to come. Your petitioners, knowing the power their enemies have, are now dreading this event; nor can they be relieved from this anticipated annihilation but through the interposition of your favorable influence and authority.

This is not a question of sectional or individual interest; the whole country must derive advantage from the protection and encouragement of the manufacturers of flax and hemp. The raw material may be grown in any part of the United States, and millions of acres of land would be brought into cultivation if a demand could be created. It is, however, your petitioners believe, only to be accomplished by securing to ourselves the home market, which views are confirmed in the history of every other raw material used for manufacturing purposes; and, after this effect is once produced, we may look forward to the supply of many other countries where manufactories may be established; thousands of working hands will be excited to healthful employment and new efforts, which must eventuate in their particular independence and good, and the general welfare and independence of the country. In England, where the corn laws are so absorbing in their influence, flax stands, in the reports of their Board of Agriculture, as the next valuable crop to wheat, although without protection. Why is it, then, (fostered as it is by us,) that we are not to become the exporters as well as manufacturers of this material? The reason, to your petitioners, is obvious: there is no immediate, direct demand to cause an excitement of those energies among that class of people who, in our country, are characteristically as enterprising as any other citizens, and more so than the farmers of any other country.

Left, as we are, without any the least aid from your honorable body, even in a more deplorable situation than we were antecedent to the passage of the law in 1824 regulating the customs; threatened with annihilation by the foreign manufacturer, and promising such beneficial results as our industry and ingenuity does to the country, we humbly and earnestly implore your honorable body that you may be pleased in your wisdom and justice to grant us that protection which, as it appears to your petitioners, is absolutely necessary to sustain, not only the manufacturers of hemp and flax, but the best interests of the country.

And, as in duty bound, your petitioners will ever pray.

PATERSON, *New Jersey, December* 22, 1827.

The above petition was adopted at a meeting of the township of Acquahanone, and recommended for the signatures of the people.

WARREN HAIGHT, *Chairman.*

JOSEPH SMITH, *Secretary.*

Extract from the proceedings of the General Convention at Harrisburg.

It appears from the Treasury report of 1827 that in the year ending the 30th September, 1826, the amount of imported articles manufactured out of flax, *not* subject to 25 per cent. duty, was $2,757,080

All other, paying duty of 25 per cent	229,946
Manufactures of hemp	1,738,846
All other, except cordage	48,909
	4,774,781
Of cotton bagging there was imported 2,204,822 yards, valued at	$274,973
Of cordage, twine, pack thread, and seine twine, there was imported, in the same year, 1,949,915 pounds, of which 325,641 pounds was twine, pack thread, and seine twine, valued at $62,827	147,426
Of hemp manufactured there was imported, in the same period, 88,116 cwt	551,757
And of flax imported no return can be found; but, from a pretty correct source, it is estimated at 600,000 pounds, valued at	72,000
Total value of bagging, cordage, twine, &c	1,046,156

The committee cannot state the precise quantity and value of each article imported last year, but, from the Treasury report referred to, it appears that the cost of sail-cloth imported was $856,474; and, estimating the bolt of said cloth at the average cost in Russia, of $15 per bolt, it would give 57,100 bolts as the importations of that year of that single article, which would require 1,884,000 pounds of hemp or flax for the manufacture of it, valued at $226,000.

Take for data the following schedule of the imports from Russia only, in the year 1822, viz:

	Pounds.
40,554 bolts heavy sail-cloth, the average quantity of flax or hemp required to make it would be	1,621,760
45,767 bolts ravens duck	915,340
37,194 pieces sheeting	723,880
151,620 archines broad diaper	575,810
3,983 archines narrow diaper	2,000
20,247 archines broad linen	20,120
92,082 archines narrow linen	21,000
20,981 archines drilling	24,000
492,824 archines crash	280,000
5,864 archines huckaback	2,900
Total amount of pounds required of hemp and flax	4,186,810

Which would cost $523,350, and bring into cultivation at least 13,800 acres of land for its growth.

From the increased importation of sail-cloth since 1822, which is 8 per cent., it would, taking the foregoing estimate, made on the importation from Russia in 1822, as data, require at least 4,521,700 pounds of flax, valued at $542,600, and the use of 15,000 acres of land for the growth of the raw material for the manufacture of those articles from Russia alone. For the manufacture of cotton bagging that was imported in 1826 it would require at least 3,300,000 pounds, or 1,473 tons of hemp; valued at the same rate as in the Treasury report, viz: $125 per ton, would give an amount of $184,125, and would require the cultivation of 8,000 acres of land to produce it.

From the foregoing items the following estimate is made of the quantity and value of the raw material requisite for the manufacture of the hempen and flaxen fabrics imported into the United States last year, together with the quantity and value of hemp and flax, in the raw state, imported in the same period, viz:

	Pounds.	Value.
For sail-cloth, ravens duck, and other coarse articles, imported from Russia alone, it would require, of flax and hemp	4,521,700	$542,600
For cotton bagging, requiring hemp	3,300,000	184,000
For cordage, twine, &c., hemp and flax	1,949,915	147,426
Of hemp, in its raw state, was imported	9,869,000	551,757
Of flax, estimated at	600,000	72,000
Hemp and flax	20,239,915	1,497,783

Requiring the cultivation of nearly 50,000 acres of land for the growth of the raw material, giving employment directly to 7,000 hands to manufacture it, and indirectly to very many more.

In the foregoing estimate the quantity and value of the raw material is not included, which is requisite for the manufacture of various articles of hemp and flax included in the Treasury report. Of the amount of the value of the imported articles manufactured from these materials, the committee have confined themselves in bringing to the notice of this convention nothing but the most prominent articles of the coarser fabrics, and such as can be readily manufactured and the raw material grown in our own country. But though the coarse article is principally alluded to in this report, yet the finer articles of linen manufacture, of sheetings, of shirtings, sewing and shoe thread, and all the articles of finer fabrics of hemp and flax, would be materially promoted, and the manufacture of them encouraged by a judicious protection.

Of the ability of the manufacturers of this country to meet all demands for the manufactured articles of hemp and flax, not only for our own consumption, but also for exportation, there can be no doubt in the mind of any person of common observation, when he looks to what has been done in the manufacture of cotton, iron, nails, glassware, and many other articles.

There are in the United States seven establishments, containing 2,620 spindles, for spinning flax, which, if fully employed in the manufacture of sail-cloth, could make 19,500 bolts of duck annually, requiring 870,000 pounds of flax, (for it is of flax that it is made in this country,) the cost of which would be $104,000, and, when made into canvas, would sell for $273,000, yielding to the industry of the country $169,000, and giving employment to 650 hands, exclusive of those employed in the agricultural branch.

If, within the period of five or six years, we are enabled to make more than half the sail-cloth which is consumed in the United States, surely no fears need obtain that the demand for both the Americas cannot be supplied by our own manufactures; provided that protection which is absolutely necessary for the preservation of the existing establishments, and the encouragement for the establishing of new ones, is afforded.

To show the necessity of further protection to this branch of national industry, or rather, more properly speaking, what ought to constitute a branch of it, it is remarked that sail-cloth, or duck, is only subject to a duty of 15 per cent. ad valorem, the same duty as is imposed on the raw material, flax. Previous to the revision of the tariff in 1824, the duty on a bolt of duck, with custom-house charges, amounted to $2 12½ per bolt. In the bill imposing a new rate of duty, as sent from the House of Representatives to the Senate, a duty of 25 per cent. ad valorem was imposed on all goods manufactured from hemp or flax. The Senate, however, disagreed to this item of the tariff, and, so far as related to cotton bagging and sail-cloth, a compromise took place, the duty on cotton bagging was fixed at 3¾ cents per square yard, and a duty of 15 per cent. ad valorem imposed on sail-cloth, which, with custom-house charges, will only amount to $1 87½ per bolt, even on the best kinds of Russia duck; thus placing the manufacturer in a worse situation than he was in previous to the revision of the tariff, by a reduction of at least 25 cents per bolt.

Small as this protection is, still the manufacturer is in a measure deprived of a portion of it by the evasion of the laws relating to drawback, as sail-cloth is sometimes shipped in vessels bound on long voyages, entered for the benefit of drawback, and a landing certificate procured; but the canvas is made up on board the ship by which it was exported, and the duty on the importation is returned to the shipper, under the idea that the article was landed and left behind in some foreign port.

In England the manufacture of canvas is directly protected, inasmuch as every English ship, whether naval or commercial, is clothed with British manufactured sail-cloth; and if a merchant vessel should, during her voyage, be compelled to use any foreign sail-cloth to replace sails worn out or destroyed, the captain is obliged, on his return to an English port, to enter all sail-cloth so used, and pay the regular import duty on it, even though the duck may have been in use eighteen months, and worth little or nothing. This protection is secured under heavy penalties, and gives to the English manufacturer the opportunity of not only supplying the canvas necessary to navigate the ship, but also what may be necessary to meet the wear during the voyage. But our ships, as it is well known, frequently leave our ports with barely a sufficient stock of sails to carry them across the Atlantic; and, when arrived out, they are supplied with foreign duck, thus depriving the manufacturer of the supply.

Should the old cry of monopoly be raised by the objectors to any further revision of the tariff, and the charge of fostering and pampering overgrown establishments and their proprietors be reiterated, the answer is ready. They are referred to the effect of competition in the manufacture of coarse cottons, window glass, nails, and other articles, which are now furnished to the consumers at lower prices than when they were imported from England under the old tariff. An adequate protection, and one which would not prove injurious to the revenue, would at once give life and activity to the several establishments which are now either wholly suspended, or are only enabled to sustain a precarious existence by the limited orders for the supply of the United States Navy; only two establishments being now engaged in the manufacture of sail-cloth. Give employment even to the existing manufactories, and it would encourage the growth of hemp and flax to a very large extent. Nothing but a steady, certain demand is wanting for the raw material—such a demand as should not be affected and rendered abortive by overwhelming shipments from Europe of the manufactured article—to induce the agriculturist to produce an adequate supply for all the wants of the country; and thus, in a measure, afford some relief to the excess of the wheat, rye, corn, and tobacco crops, by bringing into cultivation a long-neglected product of our soil.

The policy of protecting the manufacturers of sail-cloth and other articles of vital importance will be confessed by all those who have the true interests of their country at heart, and who recollect the exorbitant prices paid for sail-cloth, and other indispensable articles, at the commencement of and during the last war, when duck sold for $40 to $54 per bolt; an article indispensable to the commerce of the country, as also for its defence and glory.

20TH CONGRESS.] No. 796. [1ST SESSION.

AGAINST THE INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1827.

To the honorable the Senate and House of Representatives of the United States:

The citizens of Beaufort district, with the highest respect and attachment, claim the attention of the representatives of the nation to wrongs which we feel we are sustaining, and which are sought to be aggravated by successive tariffs on articles of consumption necessary to our wants and indispensable to our comforts.

The power of Congress to regulate commerce is admitted by all; but we cannot concur in the opinion that this contemplates more than the collection of duties just sufficient for the indispensable support of Government. Taxation, direct or indirect, always odious, has arisen out of civilized society, and is submitted to by a people only to avoid the greater evils of anarchy. Wantonly to press the principle

leads to a corruption of Government, and the consequent impoverishment and wretchedness of the citizen. Justice and economy we have always desired to believe are the great pillars of a Republic; undermine these, the splendid edifice of self-government totters and falls to the ground.

We pray your honorable body to believe that, in this application, we are not influenced by any extraneous feelings or sectional jealousies. Knowing, as we do, that all power emanates from and actually remains with the people, we have no fear but that the temporary errors or wanton misrule of their servants will be speedily corrected. It is the Government, and not the governors, that form the strongest link of our attachment; recognizing, in its fullest extent, the patriotic sentiment of the great English admiral, acting under an usurper.

Neither do we admit that we feel towards other sections of the Union more than an honest rivalry, desiring, by our unrestrained industry, to add to the credit of our native State and the general welfare of the nation.

In our widely-extended surface ample room is afforded to the good people of the United States to prosecute many vocations without trenching on the rights of each other; and we trust and hope that your honorable body, constituted of members from all sections, and so consecrated by your fellow-citizens on account of your wisdom and integrity, will recognize a fact so evident. In the prosperity of all, all will be made happy. Let trade, as far as possible, regulate itself.

In the many intercourses of society men will take care of themselves. The agriculturist will purchase from him who sells the cheapest and best manufactures. The manufacturer will procure his own materials and breadstuffs on the same principles. Commerce, growing out of the other two great classes, and indispensable to both, creates a hardy and valiant class of citizens, necessary to our high standing and pretensions among nations; commerce enlightens, strengthens, and matures a country by bringing among a people the arts, population, and wisdom of other countries. A commercial nation is, in fact, a nation of freemen, or has a strong tendency to become so. Despotism cowers under its magic influence. Looking to the South American States we have seen a motley multitude of benighted beings converted into freemen by bursting asunder the chains of a baneful monoply which interdicted intercourse with foreign nations. A restrictive system is not one natural to the United States of America, or, in our opinion, in any way called for by the exigency of the times. If a portion of our fellow-citizens feel it to their interest to leave the wholesome employment which nerved the limbs of their hardy ancestors to deeds of never-fading glory, and ply their hands to the distaff, let it be so; their genius, their industry, their capital, their many local advantages, and, above all, the freedom of our institutions, fully qualify them to enter into successful competition with any nation on earth, without recourse to Government for protection. The elements of their manufactures grow on their own shores, breathe on their own mountains, and are multiplied in their own meadows.

Already have we seen and felt such singular advantages, and witnessed, with pleasure, the progress of our country to independence and wealth. The immense and increasing call for domestic stuffs on our own shores, while foreign nations are receiving them with preference, sufficiently insures to the capitalist and operator a handsome profit on his investments. If there are exceptions, they must arise from the want of skill or experience in some branches, which a little more time will overcome.

We, of South Carolina, and particularly of our district, are still desirous of prosecuting the habits and vocations of our fathers, and retaining the privilege of purchasing our necessaries where we can be best supplied. The present is an age characterized by liberal principles, and civilization, progressing with them, *pari passu*, is widely extending its march.

Nations have parted with their unprofitable chivalry and feudal usurpations, and are laudably engaged in studying the prosperity and happiness of their people. Industry and enterprise are pursued in every clime, while keen-eyed diplomacy is indefatigable in procuring commercial advantages.

Let not the Government of these United States, by ill-timed measures, lose advantages which have raised our country to unrivalled eminence and prosperity, or weaken the strong attachment of any portion of the Union to our great federal compact.

While we look to Government to repel all aggressions upon national rights, and to secure a just reciprocity from other Powers, we would forbear considering the late acts of some of the Governments other than emanating from the necessity of their situation. Long and wasteful wars, with a host of sinecures necessary to sustain the aristocracy of their system, have involved them irremediably in debt, and driven their statesmen to exhaust their ingenuity in seeking subjects for taxation, from which their own people are not exempt, as we know that the colonies pay an enormous duty on the productions of their own soil.

These United States, we are proud to say, are differently circumstanced. The citizen here is unshackled by a load of taxation; with an ever-accumulating population to divide the national debt and support the reasonable wants of an economical Government, the merchant prosecutes his enterprise, unrestricted, through every clime, with the best possible success; while, with fresh and abundant lands, the agriculturist and manufacturer furnish the materials of commerce. If these are facts, can oppressive tariffs be necessary for the protection of a people with such resources? We believe not. On the other hand, we are confident that articles we have to spare must and will, directly or indirectly, find a profitable market unless hindered by our own acts, the colonial or other prohibitory restrictions to the contrary notwithstanding.

We beg leave to detail to your honorable body some facts of a local nature, and which we feel sufficient to strengthen our aversion to an increased tariff on woolen stuffs, prayed for by the manufacturers of this article, and which we perceive is to be brought before the approaching Congress.

South Carolina, always among the leading States of the Union in the value of her exports, has undergone several revolutions in her staple productions, the chief of which occurred towards the close of the last century, when some public-spirited citizens introducted the cultivation of cotton as a substitute for indigo. Here we encountered all the difficulties incidental to a new and doubtful enterprise. A knowledge of the manner of cultivation, fitness of soil, and, finally, machinery for preparing the article for market, were desiderata only to be obtained by perseverance and much expense.

The Treasury of the State was opened to remunerate the individual whose felicitous genius invented a machine for detaching the green seed from its staple, and which finally has given so much prosperity to the States south of the Potomac and millions to European labor; and all of this without a call on the National Legislature for one cent, or its interposition in any other way. In Beaufort district, where the long staple cotton is chiefly cultivated, we shall feel, in an aggravated degree, the oppressive operation of the system proposed; because, while we are taxed heavily on articles necessary for the comfortable

clothing of our laborers, cotton bagging, &c., indispensable for the shipment of our staple, not one bale of fine cotton is manufactured on our own shores. The foreign capitalist, prohibited selling his merchandise, must buy sparingly, if at all, and ultimately be compelled to seek for the raw material elsewhere. It is in vain to tell us that the manufacturer must have our finest cottons; experience proves that mutual benefit is the life of trade. Already have we suffered a reduction of more than 200 per cent. in the value of the great object of our industry. Further depreciation must inevitably lead to ruin, or to a system of retrenchment which will be felt by our sister States, to whom we have been profitable customers hitherto; buying of them largely all articles of domestic uses, contenting ourselves with the assiduous cultivation of the earth and the improvement of the great staples of the State.

Curtail our income, you reduce the value of property, drive us from our favorite vocation, and compel us to call up those resources abundantly in our reach, but which we would decline, except in times of great necessity.

Persuaded that wise and prudent rulers must anxiously desire to be well acquainted with the feelings and opinions of those for whose benefit they legislate, as being well aware of the powerful influence exerted upon the laws by the character of those to whose regulation they are applied, your memorialists would esteem it highly criminal not to apprise your honorable body of the sentiments by which they are actuated, and the convictions which they entertain with respect to this system of protecting duties, and the power from which it derives its sanction, with that frankness and boldness which it befits the citizens of a Republic to use when they would restrain within the limits of their authority those to whom they have intrusted the administration of their Government.

Being persuaded, also, that paper charters must soon lose their authority unless carefully guarded by the vigilance and intelligence of the people; to preserve the sanctity and usefulness of the Constitution which they revere, they protest against this infringement of its provisions as destructive of the security which it purports to afford to our rights, and as establishing a precedent for further and more dangerous usurpations.

Deeply impressed with these considerations, your memorialists, with the highest respect for your honorable body, would express their firm conviction that the enactment of laws for creating a system of protecting duties transcends the powers committed to you by the Constitution, and that all the laws promulgated to create or sustain this system are without just authority, and impose no moral obligation; and it is submitted to the discretion of your honorable body whether a wise policy would dictate a perseverance in a system which a large portion of the Union feel to be burdensome and believe to be illegal. Your memorialists, therefore, earnestly entreat your honorable body to repeal all laws which have hitherto been passed for the protection of domestic manufactures, and, more especially, to refrain from such enactments in future. And your memorialists will ever pray, &c.

RICHARD B. SCRIVEN, *Chairman.*

WM. F. COLCOCK, *Secretary.*

20TH CONGRESS.] **No. 797.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1827.

At a meeting of wool-growers and manufacturers of the county of Berkshire, convened in pursuance of an extensive and general notice through the medium of the public papers, held at Pittsfield on the 12th instant, Hon. Henry Shaw was called to the chair, and Thomas B. Strong, Esq., appointed secretary.

Resolved, That whereas the interest of the grower and manufacturer of wool are alike in a ruinous situation, beyond our means to retrieve, and only within the power of our Government to redress; and as the only way the American citizen can claim the attention of his Government is by petition:

Therefore resolved, That the chairman and secretary, together with Henry Marsh, Esq., be a committee to report to this meeting a memorial to Congress exhibiting our grievances and claiming their protection.

Whereupon the meeting adjourned, and the following memorial was reported, and unanimously approved by the meeting held after adjournment, and by them directed to be signed by the chairman and secretary, and be transmitted to the representative of this district in Congress, requesting him to present it to that honorable body:

To the honorable the Senate and House of Representatives in Congress assembled:

The memorial of the wool-growers and manufacturers of the county of Berkshire, in the Commonwealth of Massachusetts, respectfully represents that they are extensively engaged in the growing and manufacturing of wool. To these enterprises we have been invited, not more by the local advantages of our county than by the professions of encouragement and protection disclosed by the policy of our Government from its establishment to the present day. And if we have not realized all that our actual wants demanded, we have never doubted that the same spirit which laid the foundation of our independence in 1776 would continue to exert its influence until all the great branches of national industry should become so firmly established as not to be endangered or ruined by foreign competition. The laws devised for the double purpose of revenue and protection to domestic industry have held to us the cheering language of encouragement; and, under the pledge thus given, our confidence was established, our capital invested, and our exertions have been untiring. But we will not conceal the fact, however flattering to our rivals, that foreign policy and legislation, in effect repealing or annulling the laws of an American Congress, has left your memorialists to struggle in a competition destructive of our capital and fatal to our hopes. To the late Congress we sent up our petition for redress. It went the way of all that vast mass of memorials from our fellow-sufferers. Petition is the only form by which the people can address the

Government of our country. We looked with confidence to your predecessors; we saw with delight the exertions of our friends—with anxiety, the mistaken policy of our adversaries. And if, in that protracted struggle, our hopes were deferred, and your interests were suffered still further to languish and decay, still it was consoling to witness the public sympathy and the public sentiment generally and forcibly expressed in favor of our neglected and suffering interests.

Your memorialists consider the protection of their interests as a measure of public policy, demanded alike by a just regard to the present character and future glory of the nation. We therefore forbear the obtrusion of our personal wants, persuaded that considerations of a higher nature must control our destiny. We would respectfully refer your honorable body to the resolutions passed, and to the facts collected and presented by the convention of Harrisburg, in the full belief that they are entitled to the confidence and attention of Congress. To the spirit of the Constitution, to the enlightened patriotism of an American Congress, we appeal; and we confidently trust that no sectional views, no political aims, no jealous suspicions, will intrude their selfish or distrustful counsels to prevent the adoption of the most liberal and efficient protection to the great branches of American industry. In a confederacy like ours, the adoption of measures designed to harmonize different interests must result from compromise; and whilst we ask for liberality in the measures designed for the protection and advancement of our interests, we as cheerfully invoke the same spirit in behalf of the interests of others. Your memorialists respectfully suggest to your honorable body a modification in the revenue laws to the following effect:

1st. A square yard duty on imported woolens, graduated upon minimum prices. 2d. A repeal of the law allowing credits for duties on imported wools and woolen goods. 3d. An auction duty on all imported wools and woolen goods sold at auction. 4th. A specific duty on all imported wool. 5th. A modification of the laws appointing appraisers, in such form as that the value of all cloths and wools imported shall be fixed by appraisement in the port or place at which they are landed.

Your memorialists beg leave to remark that, in regard to the square yard duty, as found by experience in cottons, no more efficient mode of protection could be devised. The necessity of the credit system having long since passed away, the system itself should no longer remain; for what was once designed to benefit the enterprise and supply the want of capital to American merchants, is now mainly used by the foreign merchant and manufacturer as an auxiliary to his plans for the advancement of their interests to the destruction of our own.

A further serious grievance to your memorialists, and the most ruinous to the fair commercial operations of the country, is the auction system as now employed. We are persuaded that, by correcting this existing system, Congress can most efficiently aid both the fair American merchant and manufacturer. The auction system, aided by the credits afforded at the custom-house, enables the foreigner to dispense with capital, and to avoid almost all the risks we are obliged to encounter. Your memorialists respectfully invite the attention of your honorable body particularly to this point. But we will press upon your honorable body no further than respectfully to assure you of our confidence in your wisdom and patriotism.

HENRY SHAW, *Chairman.*

THOMAS B. STRONG, *Secretary.*

20TH CONGRESS.] No. 798. [1ST SESSION.

DRAWBACK OF DUTIES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES DECEMBER 31, 1827.

Mr. CAMBRELENG, from the Committee on Commerce, to whom was referred a resolution of the 12th of December, instructing them to inquire into the expediency of extending the term within which merchandise may be exported with the benefit of drawback, reported:

That the term allowing the privilege of debenture is now limited to twelve months from the date of importation. This limitation operates as an unnecessary restriction on the carrying trade, and prevents us from engaging in it on equal terms with other nations. Nothing tends more to encourage and facilitate this commerce than a liberal debenture system.

The limitation which it is now proposed to abolish was adopted when our commerce was almost confined to the coasting trade. We were then literally at one extremity of the commercial world, and our importations were designed almost exclusively for our own consumption. In our external commerce we were dependent, in a measure, on the navigation of Great Britain. A debenture system of any kind, whether with or without limitation, was not then so urgently necessary; yet its advantages were wisely appreciated by the first Congress, and it was introduced into the act of the 4th of July, 1789, on terms even more liberal than those allowed by existing laws. Since that period our commercial condition has been entirely changed. Our own navigation is now engaged, at least as far as our commerce is concerned, in all those channels of trade which were then occupied by European vessels. Our markets were not then, as they are now, furnished with foreign commodities destined for the consumption of other countries. The nations south of us did not receive their supplies through this country; nor did Europe then depend partially, as she does now, on our navigation for the productions of America, China, and the Indies. This enlargement of our foreign commerce, and the peculiar advantages of our commercial position, naturally attract to our ports the productions of all countries, not only for our own use, but for the consumption of other nations; and this necessarily causes, at all times, a surplus of foreign merchandise in our markets. Consequently, we now begin to feel seriously the inconveniences of the limitation in question. The privilege of debenture on parcels of merchandise not required, and, in some cases, never designed for our own use, owing to this limitation, expires every day. And, as our law now stands, we compel the owner to export his merchandise before the expiration of the twelve months, without the least expectation of a

profit, or to pay the duty, and force it, at an immense loss, upon a market where it is not wanted; and not unfrequently to the injury of those engaged in the production or manufacture of similar merchandise—an evil much complained of by our manufacturers. This limitation has operated so injuriously to our interests that our merchants are now accustomed to ship debenture goods to neighboring islands, to be immediately returned, at an expense of ten, fifteen, or twenty per cent., merely for the purpose of entering them a second time, to enjoy, for another twelve months, the privilege of debenture. It is quite unnecessary further to detail the injuries resulting to our commerce from this restriction. It is manifestly impolitic to compel our own merchants to send their property abroad, at an expense of ten to twenty per cent., for the mere purpose of importing it again, or to oblige them to make a sacrifice at home to the injury of our own interests.

There is another motive for this change arising out of our commercial relations with Southern America. Our markets are daily becoming more and more furnished with European supplies for the consumption of the countries south of us. That commerce, at least with Mexico, Guatemala, and Colombia, is gradually assuming the character of our coasting trade; and by a liberal system we may make our great commercial depots as necessary to these States as they now are to our own. Great Britain, not inattentive to the advantages of this new trade, appears disposed to open a more direct route for it through her own colonies, by establishing in the West Indies free ports where European merchandise may remain free from all but incidental charges. But this commerce is irresistibly attracted to our country, and cannot be forced into any new channel, unless by some very unwise measure on our part. The committee can perceive no reason why the limitation should be continued, nor why we should not enable our own country to engage in competition with other nations on equal terms; and, therefore, recommend for the consideration of the House a measure substantially similar to that adopted by Great Britain in the fourteenth section of her warehousing act, passed July 5, 1825, which allows merchandise to remain three years with the privilege of debenture, and authorizes the Commissioners of the Treasury to extend the term indefinitely.

But another modification of our law is necessary to enable us to contend fairly with other nations. They do not deduct, on exportation, any portion of the duty; whereas we retain two and a half per cent. This rate was not, however, originally contemplated. By the act of 1789 only one per cent. was deducted from the duty on merchandise, "in consideration of the expense which shall have accrued by the entry and safe-keeping thereof." The same rate was continued by the acts of 1792,-'94, -'95, and -'97. In 1800 2½ per cent. was added to the 1¼ existing at that time, "in lieu of stamp duties on debentures," and this accounts for the present high rate. The amount retained by the act of 1789, taking into view the moderate duties of that day, did not exceed, on an average, eight cents on every hundred dollars; that which we now deduct, on the same principle, is equal to eighty cents on the same value. The committee are of opinion that the whole duty ought to be relinquished on exportation. The only motive for retaining any part is "for the expense of entry and safe-keeping;" and as our laws already provide that all incidental charges for warehousing, fees of entry, &c., shall be paid before the merchandise leaves the custody of the custom-house officers, and as the property is never at the risk of the Government, there can be no reason for retaining, for these purposes, any fraction of the duty, however small. As a measure of mere policy, the committee are decidedly opposed to any transit duty whatever. They are, moreover, urged to relinquish the whole duty, by a desire to place our commerce, wherever it may be practicable, on an equal footing with the foreign commerce of other nations. Even if we adopt the measures proposed, the terms upon which we shall contend with Great Britain will still not be equal, for that Government allows merchandise to remain warehoused for three years without even an entry: while with us the duty must be paid within two years, and at the expiration of certain terms limited by our laws. Against this, however, we may venture to oppose the peculiar advantage of our position. The committee, therefore, recommend to the consideration of the House the expediency of allowing the drawback of the duty without deduction.

20TH CONGRESS.] No. 799. [1ST SESSION.

AGAINST THE INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 2, 1828.

The memorial of the citizens of Mecklenburg, Virginia, to the Senate and House of Representatives of the United States:

Deeply impressed with the magnitude of their undertaking, and the dignity of the tribunals to whom they appeal, your memorialists approach your honorable bodies with emotions of mingled diffidence and respect. The stability of Government and the interests of society admonish us of the necessity of subordination, and inculcate the doctrine of an affectionate attachment to the established institutions of our country; yet it is the unquestionable right, if not the bounden duty, of every citizen freely and unreservedly to communicate to Government the real grounds of his serious complaints; never withholding a generous confidence that relief will be administered when the reality of his sufferings is made manifest to those intrusted with the great interests of the community. The right of petitioning, the legacy of our forefathers, is secured by the imperishable provisions of the Constitution. The duty of protecting our absolute rights is laid in the deepest foundations of society; inheres in the very nature of man; constrains him to encounter the most formidable difficulties, and heroically to brave the most perilous emergencies, whenever those rights are despised or assailed. That people must be degenerate, indeed, utterly unworthy the blessings of freedom, utterly unworthy the glorious Government erected to perpetuate the liberties of America, who would tamely and passively surrender their rights, with a mean-

ness of spirit disgraceful to themselves and wholly ruinous to the hopes of their descendants. To secure the satisfaction of self-respect, and to satisfy the just demands of posterity, your memorialists deem it their bounden duty to exert the utmost energies of their nature to preserve their rights, untarnished and undiminished, as secured by the blessed Constitution of their country and prescribed in the eternal principles of justice. If they find, in the conduct of those intrusted with the execution of the laws of the land, a disposition entirely to disregard their interests, to trample on their rights and prostrate their hopes, they will frankly announce their grievances to their country in the confident expectation of prompt relief; or, if they find the Government pursuing a policy destructive of their vital interests and subversive of their dearest rights, they will, with a spirit of respectful firmness, urge their complaint to the guardians of their liberties.

In surveying the operations of the Federal Government, the act of Congress, usually denominated the tariff law, passed on the 22d of May, 1824, rises to the view, and fixes the attention of your memorialists, not less by its baneful effects on commerce and agriculture than the hideous aspect under which it is introduced. Not content to pass a law intended to drain the fountains of our wealth and render us tributary to the mean spirit of monopoly, the advocates of this odious system have blazoned to the world their invidious purpose of protecting domestic manufactures against the competition of foreign fabrics, so as, in a great degree, to secure to the American manufacturer a monopoly of the home trade for consumption. That such a purpose should have been avowed is scarcely less astonishing than that such a system should have been adopted. There is not, perhaps, in the whole Confederation, a State which has not denounced the principle of monopoly; and it was confidently hoped that it was without an advocate among the politicians of America. The theory of Government, as inculcated in this country, is based on the equal rights of man, and practically established in all the Constitutions adopted by the people of the Confederated States. The Constitution of the Federal Government itself has recognized the validity of this theory, and, with much solicitude, attempted its reduction to the practical operation of governmental affairs. The absolute right of private property is regarded, too, with peculiar tenderness, and perpetually established by constitutional provisions. Not content with the safeguards in the Constitution, as originally recommended by the convention, our ancestors thought it of sufficient importance to justify the adoption of a special amendment specifically establishing the sanctity of the right, and declaring that private property should not be taken, even for public use, without just compensation to its owner. Yet, regardless of the operation of this great principle, universally recognized by the American people, the Congress of the United States has passed an act avowedly for the purpose of protecting domestic manufactures, which, by securing to them a monopoly of the home market, constrains the consumer to purchase their commodities at a price far exceeding their natural value—a price exceeding that for which they would be purchased if brought into fair competition with the fabrics of foreign manufactures; thus enabling the American manufacturer to demand of the American consumer a portion of his property greater than the value of the goods given in return, or above what would be demanded for the same, or goods of equal value, were the freedom of trade judiciously restored; which is to enable one class of society to take the property of another without rendering just compensation—a regulation regarded by your memorialists as a gross violation of the right of property, and a palpable infraction of the sacred principle of universal equality of rights among men.

Your memorialists are inspired with alarm and concern by the pretexts under which it is claimed for the Government to violate their just and natural rights. To effect certain specific, specified purposes, contemplated and enumerated by the framers of the Constitution, Congress was vested with "power to lay and collect taxes, duties, imposts, and excises," together with several other enumerated powers, none of which, except, perhaps, the "power to regulate commerce," are supposed, in any manner, to refer to the subject of protecting domestic manufactures, and none of which are claimed to have such reference. The objects of the framers of the Federal Constitution are enumerated in the preamble to that instrument; and the powers granted by the instrument are delegated to accomplish those specific purposes. There was an express enumeration of the purposes for which the Federal Government was organized, and an express enumeration of the powers granted as necessary to effectuate those specific purposes; and these powers cannot be rightfully exercised to accomplish an object not embraced in the enumeration; but in that enumeration no allusion is made to the subject of protecting domestic manufactures, nor, indeed, is such an allusion to be found in any part of the sacred instrument. Hence Congress have no right to "lay and collect taxes, duties, imposts, and excises," for the purpose of protecting domestic manufactures. The concern of your memorialists is converted into consternation by the pretence that this power is derived to Congress by the introduction of the clause "to provide for the common defence and general welfare." A clause intended to limit the exercise of the power "to lay and collect taxes, duties, imposts, and excises," to subjects of general interest to all the States is seized on as a distinct, substantive grant of power, conveying to Congress an unlimited commission to see that the Commonwealth sustain no harm. The arduous efforts of our patriotic forefathers to establish a limited, responsible Government, composed of confederated, independent, neighboring nations, vanish into mere illusive phantoms of the imagination; and we have, in its stead, an unmixed, unlimited despotism, vested with full and boundless authority to exercise its ample, infallible discretion in promoting the general welfare of the *grand consolidated Republic of America.* Your memorialists deem it their bounden duty to protest, in the most earnest, solemn manner, against any other interpretation of the terms "general welfare," as introduced in the first article and eighth section of the Constitution of the United States, than as a limitation of the power "to lay and collect taxes, duties, imposts, and excises," fixing the exercise of such power to objects of general interest to the States, reserving all local, particular interest to the jurisdiction of "the States respectively, or to the people."

The right of protecting domestic manufactures has been claimed under the clause which gives to Congress "the power to regulate commerce with foreign nations, and among the several States, and with the Indian tribes;" but your memorialists are at a loss to determine how "the power to regulate commerce" conveys that of protecting domestic manufactures. Phrases so entirely dissimilar cannot, by any fair construction, be interpreted as synonymous, and the powers themselves being substantive and determinate, cannot both have been conveyed by the use of either phrase; commerce, being the interchange of commodities, implies only the *exchange* of one thing for another between different individuals or nations; domestic manufactures are local establishments, founded for the *production* of commodities, and the phrase implies no *exchange* at all. The term "commerce" associates a general idea of *trade.* The term "manufactures" associates the idea of permanent *local foundations.* Yet the argument which would derive the power "to protect domestic manufactures" from the clause "to regulate commerce" renders those phrases

substantially synonymous. The power, too, to regulate commerce was granted with a view to its perfection. Yet the policy of the American system is by no means the advancement of commercial interests; its object is to stifle foreign trade; and to derive the power to protect domestic manufactures from the clause "to regulate commerce," is to establish the paradoxical proposition, that it is the same thing to perfect and to destroy.

Your memorialists are aware that beneficial results are said to be anticipated by the friends of this system; that it is said to be expected that the American fabric will, in time, come to the consumer at a rate cheaper than could be afforded by the manufacturers of Europe; and that this is said already to have occurred in relation to several of the coarse articles. They are likewise aware of several circumstances which conspire to secure to the American manufacturer some advantages over those of Europe, engaged in producing several species of manufactures. In rearing the coarse and simple fabrics, which require neither a great accumulation of capital nor a great extent of complicated machinery, and in which the raw material constitutes a considerable portion of the price of the commodity, the American manufacturer, who can procure the raw material at home, saves its freights from some distant port, avoids the payment of heavy European duties, and must enjoy a considerable advantage over those who have to incur those expenses in addition to the freight of the manufactured commodity from the ports of Europe to those of America, besides those legitimate American duties, imposed for the legitimate purposes of revenue, which will ever be borne with the greatest alacrity by the liberal and magnanimous people of America.

These are natural, legitimate advantages, rightfully enjoyed by the American manufacturer, having their full and natural effect independent of the interposition of the Government, and the full and natural effect of which cannot be augmented by the governmental interference. True, that additional, unnatural, and arbitrary advantages may be secured by unnatural and arbitrary legislation; but the effect of these circumstances remains the same, unaltered and unalterable. These circumstances, too, can affect but a portion of the articles of American consumption; and even as relates to that portion, your memorialists entertain considerable apprehension that the anticipations of the friends of the system are founded in the most fallacious reasonings. The vast accumulation of European capital, the vast extension of European machinery, the great density of European population, and consequent cheapness of European labor, are circumstances which, in the apprehensions of your memorialists, are likely to preponderate over all the natural advantages of America. And your memorialists candidly confess that their apprehensions are confirmed by the fact that the American manufacturers, with all the adventitious advantages resulting from the law entitled "An act to regulate commerce," far from ease in their present situation, are seeking an augmentation of duties in the ports of the Union. Why ask protection against those whom they profess to be able to meet in a market of fair competition? Why not hush the clamors of the malcontents by repealing the system, so far at least as it is useless to the manufacturers themselves?

But suppose the American manufacturers may, in time, furnish their fabrics cheaper than they could be imported from Europe, it does not hence necessarily follow that the ultimate advantage will compensate the consumer for his present and certain loss; for none can accurately calculate the proportion which the future benefit is to bear to the immediate loss. Nor does it hence necessarily follow that the aggregate interests of society will be advanced by the greatest success to which the manufacturers may attain. True that, by the operation of this system, the particular interests of the manufacturing class may be most naturally advanced; or perhaps the expression may be rendered more just if made to refer exclusively to the art, without allusion to the pecuniary interests of the class. But to whatever eminence they may reach, it must be at the expense of all other classes of American citizens, who, for the elevation of the manufacturing class, are doomed to contribute an inordinate proportion of the proceeds of their labor in return for the domestic fabric. The object of the act of May, 1824, is to secure to the manufacturing class inordinate profits, to be paid by their countrymen, and thus to induce American capital to flow in a channel in which it would not otherwise be employed. If the natural advantages of the manufacturing class were sufficient to induce this investment of capital, the act of 1824 would be unnecessary, since that would be done independently of the act which it proposes to effect; and the necessity of passing such an act demonstrates the insufficiency of the natural advantages of American manufacturers. The obvious and intended effect of the law is to enable the manufacturers to demand of the American consumer greater profits than could otherwise be obtained. The profit secured by the act is paid entirely by American citizens, and it is for the sake of this profit that such an investment of capital is made. The elevation, then, of the manufacturing class is effected by a contribution from all other classes of American citizens, extorted by means of the monopoly of the home market established by the act of 1824. And should the American supply, in future, cheaply furnish the American market, it will be by means of the wealth of all other classes accumulated in the hands of the manufacturers. The American consumer will be cheaply supplied by means of his own wealth previously confiscated and transferred to another. It would seem to your memorialists to be difficult to demonstrate that the general wealth of the nation is advanced by forcing all other classes of society to support the manufacturers in such a state of affluence as to enable them to sell their commodities cheap.

But is not the general wealth of society impaired by the operation of this system? It occasions capital to be invested in manufactures for the sake of the profit derived from the monopoly of the home market. This profit is entirely unnatural, not secured by any effort of industry, but by the arbitrary operation of law. It is extorted, too, from American citizens. It is not proposed by the system to secure to the domestic manufacturer any advantage derived from foreign sources. Foreign labor or foreign capital is not expected to pay the profits of his stock. They are to be derived from the advanced price which he may demand for his commodities in the home market, in consequence of the monopoly established in his favor against all other classes of his countrymen. But for the profits thus enjoyed exclusively at the cost of American citizens, he could not afford thus to employ his capital. It would be employed, as it was before the passage of the law, in some other more profitable branch of trade. The effect of the law is to divert capital from those branches of trade where it was profitably employed to the support of domestic industry in those branches of trade where it must be sustained by reluctant contributions from all other classes of American citizens. By this system the interests of society have no other resource than domestic industry. No reliance is placed on foreign trade, foreign labor, or foreign capital. These sources of wealth, so precious to other nations, are wholly valueless to America. The countless variety of American products may be more advantageously consumed at home than bartered for the products of distant climes. The whitening sail of American navigation shall no more gladden the distant port. The expiring wake of American commerce shall be no more traced on the trackless main. Domestic industry is the source of our wealth and happiness. Yet the capital of the nation is to be

withdrawn from the support of profitable domestic industry to the support of unprofitable domestic industry. And the national wealth is to be augmented by the magical operation of a monopoly granted the American manufacturers against all other classes of their countrymen, compelling all other classes of domestic industry to support the manufacturing class of domestic industry. To your memorialists it would seem to be nearly self-evident that the aggregate interests of society are impaired by compelling all other classes to support, in a situation in which it could not support itself, a class which might be otherwise advantageously employed.

Your memorialists feel more solicitude on the subject of the tariff, from the settled conviction of their minds that the expectations of the manufacturers can only be satisfied by a frequent recurrence to the miserable expedient of increasing the duties on imported fabrics—each instance bringing additional calamity, and steeping us more deeply in the miseries of taxation. The profits of stock, in process of time, must be accommodated to the existing state of things, and will approximate to something like equality in despite of the arbitrary operation of law. The general revenue of society may be seriously affected, but time will effect a proportionate distribution among the several classes of society. The advantages of any particular class, whether natural or arbitrary, if sufficient to secure disproportionate emoluments, must soon attract other capitalists from the vocations in which their destinies may have thrown them. They will abandon those vocations which afford a moderate revenue, and betake themselves to such as are more lucrative, without examining whether those are natural or artificial advantages of which they are about to avail themselves. Each recruit increases the competition, and reduces the profits of his adopted class till it finds the general level of the profits of stock. Those accustomed to large profits are not easily reconciled to moderate. Those accustomed to artificial advantages will recur to the fatal artifice, and the sinking profit of the manufacturing class must be sustained by the "American system," as the sinking pulse of the dying toper is supported by the poison which has brought him low. But the fatal moment must at last arrive when artificial excitements can no longer sustain the vital principle, and all must mingle in the general ruin. Even the manufacturers must be consumed by the desolation which overwhelms their countrymen.

But should the reflections of your memorialists be wholly delusive; should Congress be truly authorized to oppress one portion of the citizens of the Union for the aggrandizement of another; should they undeniably possess the right to control the local affairs of each State; or should the manufacturers prosper on the misery of their fellow-citizens, and derive a fetid luxuriance from the ruin of their country; or should even the national wealth be augmented by the operation of the "American system," yet your memorialists feel amply justified in their solemn remonstrance against the crying and cruel injustice of a reckless and ruthless sacrifice of themselves to the sordid, insatiable avarice of others. The generous spirit of an American citizen can but illy brook the degrading reflection—and we most earnestly conjure your honorable bodies not to confirm us in the maddening apprehension—that we are to be retained as mere tributaries to the Government. Far, far be it from us to assume an attitude of menace; we mean rather to suffer whilst evils are sufferable. We are devoted to the union of these States, and forever dedicated to our country's good. But the fulcrums of Government are the *affections* of the people. The stability of Government must rest on the *heart* of the citizen. Even patriotism should not be abused, as the strongest affections, at the dissolution of the charm, are converted into the bitterest hate. No Government may lightly disregard individual rights, nor safely despise the eternal principle of universal justice.

So far, then, from recommending or assenting to the passage of the bill offered to Congress at its last session, usually denominated the "woolens bill," your memorialists hope to be sustained in the respectful expression of their wishes that the whole system may be judiciously abandoned, and every freeman of the land left to the full and untrammelled exercise of his sagacity in determining on the most advantageous employment of his labor and his capital. Let invidious distinctions be done away—let justice prevail, and your memorialists will mingle their ceaseless prayers for the blessings of Heaven on the perpetuity of the Union.

20TH CONGRESS.] **No. 800.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 2, 1828.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

When a large portion of the community are in danger of irretrievable ruin, unless the protecting arm of the Government is extended to their relief, we, the undersigned, inhabitants of Vermont, should deem it a failure of the duty which we owe to our common country, to ourselves, and to our posterity, did we neglect to represent the fact, and the causes which have tended, and are tending, to produce such an effect.

In a memorial, dated December 13, 1826, laid before your honorable body by the delegation in Congress from this State, we took the liberty of representing, at some length, the distressed situation into which the wool-growing business and the woolen manufactures have fallen, owing to the rivalry of foreigners and the facilities which the existing laws of our country give them to undermine these valuable branches of national industry. As that memorial is doubtless on the files of Congress, we shall not take up the time of your honorable body by repeating the statements therein made, but must beg leave to call your attention again to that document; the time that has since elapsed, and the further

examination of the question, having tended more fully to demonstrate the soundness of the views which we then took of the subject.

We regret, however, to find that the claims we honestly set up, and which we did not, and do not, perceive are calculated permanently, or even temporarily, to injure any portion of the community, and which we then believed, and still do believe, would promote the most solid advantage to our common country, should have been met with a spirit of hostility and animosity, both against the general principle of our individual claim, not warranted by the policy of the measure, nor by the friendly feelings and spirit of conciliation which has ever marked our conduct toward our southern brethren; for whatever difference of opinion we might entertain as to the policy of any measure, we, as members of the same great family, have been disposed to discuss the expediency of the question with manly frankness, but with a spirit of conciliation calculated to promote the harmony of the Republic.

It is not the interest of a few capitalists, as has been so often asserted, nor the narrow sectional or local interests of a few individuals which we wish to urge upon your honorable body, but we venture fearlessly to assert that it is the general interest of the Republic at large, and the immediate interests of nearly three-fourths of the population of the Union, which we solicit your honorable body to take into consideration.

Extensive manufactures will be the source of an active intercourse between man and man, between State and State, between the north with the south, and the east with the west, affording a wholesome interchange of the surplus products of each portion of the community to supply the wants of the other; thus giving an active circulation to the products and medium of the country, highly beneficial to all; which intercommunication would greatly tend to efface local and sectional prejudices, promote good will and harmony, strengthen the bonds of the Union, and render our happy institutions permanent. They would also greatly enlarge our foreign commerce, and enable us to supply domestic, instead of being the consumers of foreign fabrics; change the current of trade in our favor, which, for the last ten years, has been setting against us; and cause an influx of the precious metals into the Republic, instead of their exportation, together with some millions of the United States funded and bank stock, to pay the annual balance of our trade in favor of England.

Your memorialists are aware that it has been gravely urged that the Constitution does not authorize the passage of laws for the promotion of American industry; but, although we do not pretend to be profound jurists, yet we take the liberty to say that the common sense of mankind must be opposed to such a construction.

We apprehend that the foundation of the social compact is the welfare of the community; and to form a Government with powers too limited to attain this end, would defeat the very object which the people had in view in its formation. Such a compact would truly be a shadow without a substance; a solecism in the science of Government. But, with deference to your honorable body, we must be allowed to remark that, after the decisions of eighteen Congresses, beginning with the first, under the Presidency of the Father of his Country, we should have supposed that the power of that body to promote American industry by protective duties was so completely established as not to have admitted of a question at this time. Can it be believed that the patriots and sages of the Revolution, who had hazarded their lives and fortunes in defence of the liberties of their country, should have deliberately violated that Constitution which the people had empowered them to form? Or will it be believed that, after having formed this national charter, they were ignorant of the powers which it conferred upon the Legislature of the Union? It is evident that one or the other of these positions must be assumed if the modern doctrine, denying this power, is correct. Is it probable that so able a statesman, so patriotic a citizen, and so honest a man, as is the venerable Madison, should not know the meaning of an instrument which, it is understood, he drafted? Yet his honesty, or his knowledge of the extent of its powers, must be impugned if the new construction of that instrument is right. Your memorialists are persuaded that there ought not to be a doubt on this head.

Admitting the power, the only question that can arise will be as to the expediency of the required protection. Upon this point we are aware that much difference of opinion exists; but we explicitly declare, that in zealously urging our claims to protection we are not actuated by any unfriendly disposition towards any section of our country, and totally disclaim the most distant idea of hostility towards any portion of our fellow-citizens; and, in pursuing an object which we consider identified with the best and permanent interests of our country, should it excite any feelings of animosity or sectional prejudice, it will be to us a source of serious regret. To adopt the vague theories of several ingenious European writers on political economy, who, in many of the most important principles which they attempt to establish, disagree with each other, or of a naturalized Englishman who has composed a work to enlighten our seminaries on this subject, but whose later writings are at variance with his former, in opposition to the experience of the nations of Europe as well as that of our own country, would literally be sacrificing the reality to the visions of fancy.

It is not soil or climate which constitutes the wealth of nations; it is knowledge, wisely directing the industry of the inhabitants. Industry is the source of wealth, and knowledge that of power. The idle, ignorant, and bigoted Italians, Spaniards, and Portuguese, although enjoying a fine climate and most fertile soil, are the poorest and most feeble people in the civilized world. Their neglect of home industry, and consequent dependence upon foreigners for the supply of their wants, have reduced them to a state of individual and governmental poverty, and of national weakness, which must excite our sympathy for the people, although we cannot extend our pity to the Governments who have reduced those nations to such a state of degradation, by neglecting to encourage their industry and cherish their resources. But what a different picture does England, does France, Holland, Prussia, and Germany present! Public and private wealth, power, and consequence have followed from the encouragement and protection of the industry of those nations, and their relative prosperity has been in proportion to the encouragement which their respective Governments have given to manufactures.

Whatever doubt may remain in the minds of some of the utility of similar protection, we should suppose that the experience of those nations, as well as the beneficial effects that have arisen from the experiments we have already made, would absolutely remove it.

We therefore trust that Congress, in its great wisdom, will see the propriety of affording the protection solicited by the Harrisburg convention in behalf of a numerous body of agriculturists, who, in the aggregate, have vested an immense capital in the wool-growing business, as well as to the manufacturers of this staple, upon an ample home supply of the various fabrics of which the well-being of the

country essentially depends in a time of war, and which is, at all times, so necessary to the comfort of the community.

Your memorialists are also of opinion that there are various other articles which require the fostering care of Government, and beg leave likewise to refer to the recommendation of the Harrisburg convention in favor of the all-important articles of iron, of hemp, and flax, of the distillation of spirits from American grain, of glass, and the finer kinds of cotton goods; which selections we think judicious and highly worthy of attention.

CRAFTSBURY, *Vermont, December* 3, 1827.

20TH CONGRESS.] **No. 801.** [1ST SESSION.

TO REGULATE TAX ON DOMESTIC SPIRITS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 2, 1828.

Mr. MCDUFFIE, from the Committee of Ways and Means, to whom was referred the resolution of the House directing them to "inquire into the expediency of refunding the amount of tax laid by Congress on domestic spirits by the act of July, 1813, to such contractors as were bound to furnish supplies of that article to the United States, by contract, made prior to that date, and which supplies were to be delivered to the United States subsequently to the passage of the said act, and liable to be affected by the tax or duty above alluded to," submitted the following report:

The claim which the resolution seems to imply, on the part of the contractors, could not be admitted without introducing into the financial and disbursing operations of the Government an uncertainty and confusion, the extent of which it is difficult to realize. If every act of the Government that tended to enhance the value of property should give a claim to contractors to have a corresponding allowance upon their contracts, it would not be too much to say that the Government would have to refund six per cent. of the amount of disbursements made to contractors in a state of war; a period during which the taxes of the country are necessarily increased by successive acts, according to the increasing emergencies of the public service. It is fair to presume that every contractor took into his estimate the probability that the article which he stipulated to deliver might be the subject of increased taxation, and regulated its terms accordingly. If, in particular cases, the law should operate severely, the pressure must be borne as the unavoidable incident of every general system. The particular hardship is nothing when compared with the importance of adhering rigorously to those general rules which are essential to guard the Treasury against the frauds and impositions to which it would be exposed if Congress were to attempt to administer the principles of abstract justice to every person who supposes himself aggrieved.

The committee are, therefore, of opinion that it would be inexpedient to refund the tax referred to in the resolution, and ask to be discharged from its further consideration.

20TH CONGRESS.] **No. 802.** [1ST SESSION.

REMISSION OF DUTIES ON GOODS DESTROYED BY FIRE.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 2, 1828.

Mr. DWIGHT, from the Committee of Ways and Means, to whom was referred the petition of George and William Bangs & Co., reported:

That the said George and William Bangs & Co., had for several years been importers of dry goods from England and France into the city of Boston; that on the 7th of April, 1825, an extensive and destructive fire in Boston consumed their store and goods therein, to the value of $52,400, upon which they had effected an insurance to the amount only of $20,000, leaving a loss to the petitioners of $32,400.

That of the goods so destroyed by fire, a portion, amounting to $24,500, was in entire and unbroken packages, in the same state in which they had been imported, the duties on the same having been secured, in part, by bonds, which had not at that time become due, and the duties upon the residue not having been ascertained at the custom-house, in consequence of the then recent landing of said goods.

The facts above recited, and on which the petitioners rely, are proved by the certificates of the Collector and naval officer of the district of Boston and Charlestown, and by the deposition of Harvey Spalding, then, and for a long time previous, the principal clerk of the petitioners, as well as by the depositions of Daniel C. Bacon, W. B. Bradford, jr., William Reed, and N. Freeman, jr., who were present at said fire.

The petitioners ask that the duties on the said goods in entire and unbroken packages, valued at the above sum of $24,500, may be remitted to them.

The committee are of opinion that, inasmuch as the portion of the goods last named was consumed by fire in the bales and packages in which they were originally imported, and therefore easily identified in the hands of the original importers, and as there are numerous precedents for relief in such cases, the prayer of the petition to this extent ought to be granted.

They therefore ask leave to report a bill for that purpose.

20TH CONGRESS.] No. 803. [1ST SESSION.

DRAWBACK ON REFINED SUGAR.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1828.

MR. CAMBRELENG, from the Committee on Commerce, to whom the petitions of the sugar refiners of Philadelphia and Baltimore were referred, reported:

The petitioners pray for a drawback of six cents on refined sugar, instead of four cents now allowed by law. They state that, in the early legislation of the country, it was assumed that two pounds of raw sugar were consumed in refining one, and that, as the duty on brown sugar is now established at three, the drawback ought to be six cents.

The duty imposed on brown sugar in 1789 was one cent per pound. It was increased in 1790, 1797, and 1800, and continued after that at two and a half cents. A drawback of three cents was first allowed in 1794, the duty then being one and a half. With the duty, the drawback was subsequently increased to five cents. In 1794 an excise of two cents was imposed, and allowed to be drawn back on exportation, which, with the five cents drawback of duty, made altogether seven cents. In 1802 the internal taxes and the drawback on refined sugar were repealed. In 1813 an excise of four cents was imposed, and a drawback of the same allowed, and to this four cents were added in 1816, making in all eight cents. The duty on brown sugar was fixed at three cents in 1816. The internal excise and the drawback were repealed in 1817; but the act of 20th April, 1818, revived the drawback of four cents on refined sugar, and this is the act by which it is now regulated.

In considering the propriety of extending the drawback on refined sugar to six cents, the committee think it a proper occasion to offer a very few remarks on this class of debentures generally, to show the expediency of allowing drawbacks on some of our manufactures to the extent of the duty on such raw materials as may be consumed in the manufacture. We adopted this policy as early as 1794, but we have made very little progress since. As our population has increased almost as fast as our manufactures, thereby affording us an ample market at home, we have felt little inconvenience from the want of such debentures as would have enabled our own citizens to send our manufactures abroad. While a nation is without this class of debentures, and whether wise or not, it is her policy, as it appears to have been ours, to impose heavy duties upon raw materials, the inevitable consequence is, that her manufactures are by her own laws restricted to her own market. Nations adopting this policy can never export their manufactures to foreign countries, while they are charged not only with the duties of consumption abroad, but also with those which they must carry with them—the taxes levied upon consumption at home. Every such duty not drawn back operates as a tax upon exportation. We are now in a condition when this becomes an important question of public policy, as we have sufficient of many manufactures for our own supply and for the partial consumption of the countries near us. Our manufactures of this class cannot go thither until we relieve them from the duties which we impose upon them, and give them an equal chance with foreign manufactures in these markets.

Debentures of this class have been resisted most strenuously when the foreign raw material is in its nature similar to some production of our own country. As some may suppose that Louisiana sugar might be used by our refiners, and as the committee are of opinion that no injury would be sustained by the revenue or the country, even if it were substituted for the foreign material, they will submit their views of the operation of a debenture under such circumstances. To illustrate principles which the committee believe to be sound, they will instance the manufacture of cordage, upon which a drawback on exportation to the extent of the duty on the raw material has hitherto been solicited in vain. The supply of our own hemp is yet small; but let us suppose that our market were equally supplied with Russian and American hemp of equal quality, and that the same quantity of each were manufactured into cordage. In allowing a debenture, ought it to be confined to cordage made of foreign hemp? This restriction is contended for, because the duty is collected specifically on foreign and not on American hemp; and because, without limitation, the latter would be fraudulently substituted for the former, and the amount of drawbacks would be unlawfully increased. Those who entertain such apprehensions suppose that the limitation in our law would regulate the amount of debentures. If our law could regulate the extent of our supply and of the foreign demand, then there would be some foundation for such an opinion; but the limitation in question would affect neither the one nor the other. It is not our law but the foreign demand which regulates the quantity of cordage exported, and the debentures are increased or diminished according to the fluctuations of that demand and our ability to supply it. So long, therefore, as we permitted cordage to go out of the country with debenture, the quantity required in foreign markets, as far as we are able to supply it, whatever it might be, would be exported, whether the law authorized the drawback on one or both descriptions. The revenue could not be increased or diminished in any manner by the limitation, unless the exportations were restricted in quantity as well as in kind. It would be perfectly immaterial then to the foreign consumer, to the carrier, and to the revenue, whether the cordage consumed, transported, or on which the drawback might be paid, were manufactured of hemp grown in Russia or America. It would be equally valuable to the consumer, the same freight would be paid to the

navigator, and the same amount of debenture would be issued in either case. The revenue never could be affected by the limitation until the debentures issued exceeded in amount the whole duty collected. It is true that no duty is imposed on American hemp; but we must not overlook the effect of our impost. When we levy a duty on a foreign raw material similar to one of domestic growth, we at the same time impose an equal indirect tax on the produce of our own soil which is consumed in the same manufacture, and the price of the latter is augmented in an equal ratio. This addition which our impost makes to the price of the manufacture is substantially nothing but a tax upon consumption, and should be drawn back if exported; for, if it be exported, it merely occupies the place of that upon which the duty has been paid; the latter exchanging uses with the former, and remaining in its place for consumption.

There are, moreover, very important considerations why no such discrimination should ever be made in our laws. Such a policy would give a privilege to foreign raw materials which we deny to the produce of our own soil, and would produce consequences far more serious than any of the imaginary injuries anticipated from an allowance of the drawback without discrimination. By adopting the discrimination, we should make it the interest of our manufacturers to consume foreign hemp; for the cordage made of that description could not only be sold in our own market, but it would be entitled to debenture, and would consequently bear a higher price. The foreign raw material would be sought for, while the American, even though of equal quality, would be neglected. By giving a preference to a foreign raw material we should increase the price permanently to our consumers. Cordage made of American hemp, if made at all, would be confined to our own market, while that manufactured of the foreign raw material would enjoy the privilege of our own and of every other market. By extending our debentures to cordage, whether the hemp be of American or foreign growth, we should encourage our own agriculture without one cent additional tax on the nation; for it would be of no more consequence to the revenue whether the debenture were allowed on the one or the other, than an inquiry as to the degree of latitude which produced the hemp. It is not probable that, for some time, any cordage of American hemp would be exported in place of that made of the foreign material; but it is probable that, both enjoying equal legal advantages, our American hemp would silently occupy the place of the foreign; that the importation of foreign hemp would slowly decline, and with that the duty; and that the manufacture and exportation of cordage would increase till the debentures on the latter gradually approximated the duty on the former. Whenever the revenue and the debentures were equal, the duty and drawback should be abolished; for the foreign raw material is naturally excluded by the produce of our own soil, and as the duty yields no revenue, it is no longer necessary. At all events, the drawback on both should be abolished; for when the debenture exceeds the revenue, then, and not till then, it substantially changes its character from a drawback to a bounty, and never, till the debentures exceed the revenue, can they become a tax upon the country.

These objections, however, whether substantial or not, do not apply to refined sugar. No refiner can, with any profit, use Louisiana sugar in refining. Indeed, only certain descriptions of foreign sugar can be consumed to advantage. The qualities usually refined are white and clayed. As the policy of allowing a drawback on refined sugar was adopted long since, the only question for the committee to determine is, what the rate of drawback ought to be. It is difficult to ascertain this rate with precision, depending as it does on the descriptions as well as qualities of the raw sugar consumed, on the proportions of each description and quality, and of brown and white, which not only yield a different result, but are charged with a different duty. Various qualities and descriptions, in unequal proportions, are mixed up by the refiner, and something also depends on his skill in refining. A refiner of experience is of opinion that—

100 pounds white Havana sugar will yield 60 pounds loaf sugar, 18 pounds bastard sugar, and 2¼ gallons molasses.

100 pounds good brown Havana sugar will yield 50 pounds lump sugar, 23 pounds bastard sugar, and 2⅞ gallons molasses.

100 pounds good Muscovado sugar will yield 45 pounds lump sugar, 21 pounds bastard sugar, and 3¾ gallons molasses.

From an account of sugar manufactured by him, seven-eighths brown and one-eighth white, he calculates the produce to be, for every 100 pounds, 51 pounds of loaf sugar, 21 pounds bastard or Muscovado sugar, and three gallons of molasses.

If the sugar consumed were considered merely as a raw material, and the refined sugar the only product, the whole drawback should be allowed upon its exportation, and the rates, according to the above results, would be 6⅔, 6, 6⅔, and 6⅛ cents on every pound exported. On the principle contended for by the refiners, that two pounds are required in refining one, our duty being three cents on brown sugar, the drawback would be six cents. The committee are of opinion that neither of these is the true rule for adjusting this question between the refiner and the Treasury. Were either rule adopted, the Muscovado sugar and molasses produced in refining would escape the consumption duties, which form a part of the price of every other description of sugar and molasses consumed in the country. Charging consumption duties upon these products, and making a calculation similar to that which follows below, the drawbacks on the above should be 5 6-10, 4⅛, 4 83-100, and 4 6-10.

The committee have been put in possession of a very accurate account of the entire operations of a refiner for two years, who consumed in that time 1,189,300 pounds of raw sugar, principally white, which yielded him 698,854 pounds of refined loaf and lump, 222,494 pounds of bastard or Muscovado sugar, and 23,799 gallons of molasses. Assuming three-quarters to have been white and one-quarter brown, the following statement exhibits the effect upon our revenue:

Duty paid on 891,975 pounds white sugar imported at four cents		$35,679 00
Duty paid on 297,325 pounds brown sugar imported at three cents		8,919 75
		44,598 75
The drawback on 698,854 pounds refined sugar, if the whole had been exported at a debenture of five and a quarter cents	$36,689 84	
The duty on 222,494 pounds of Muscovado consumed at home, no drawback being allowed, three cents	6,674 82	
The duty on 23,799 gallons of molasses, also consumed, at five cents	1,189 95	
		44,554 61
		44 14

Thus, if all the sugar refined at this establishment had been exported with the benefit of a drawback of five cents and a quarter per pound, there would have still been a fraction left after paying into the Treasury $7,864 77.

By reference to the allowances made by Great Britain, it appears that the whole duty is allowed back on the exportation of the bastard or Muscovado, and that, assuming our duty of three cents as a basis for the calculation, and taking their ratio between raw and refined sugar, the drawback on refined would be four and six-tenths, and on double refined, with all allowances, five cents and four-tenths, making an average of five cents. This was the case antecedent to 1824, and, although the duty has been since altered, it is probable the ratio of the drawback to the duty has been preserved.

The committee are of opinion that the drawback now allowed is not sufficient. If a general revision of our debentures were now under consideration, they would recommend one rate for refined, another rate for double refined, and the extension of the drawback to the bastard or Muscovado sugar when exported. But our exportations of refined sugar are for the present very limited; the whole amount of drawbacks paid for the years 1824, 1825, and 1826, appear to have been only $5,278 81, while the revenue accruing on raw sugar for the same term amounted to $6,126,269 25. Still, our exportations of refined sugar to South America are increasing, and the committee believe that under a fair drawback the business of our refiners would be increased, and that this commerce would assume a more important character. From all the information before them, the committee are of opinion that five cents drawback may, with perfect security and justice to the revenue, be allowed on refined sugar exported; and they report a bill accordingly.

20TH CONGRESS.] No. 804. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1828.

At a very numerous and highly respectable meeting of agriculturists, manufacturers, and others friendly to the encouragement and protection of American industry, held, pursuant to public notice, at the house of William Germond, in the town of Pleasant Valley, in the county of Dutchess, General James Tallmadge was appointed chairman, and Jonathan Haight, Esq., secretary.

After some remarks from the chairman explanatory of the objects of the meeting, on motion of Nathaniel P. Tallmadge, Esq., it was

Resolved, That a committee of nine be appointed to prepare and submit resolutions expressive of the sense of the meeting.

Whereupon, Nathaniel P. Tallmadge, Thomas L. Davies, Obadiah Titus, Bartow White, Abraham H. Schenck, William E. Rapalje, Daniel Merritt, Leonard Thompson, and Isaac Sutherland were appointed such committee.

The committee having retired for a short time, returned and reported the following resolutions; which, being duly considered, were unanimously adopted:

Resolved, That we deem it a constitutional right to assemble on this occasion and freely express our opinions on the important subject of protecting American industry; and we deem it no less the constitutional right of Congress to grant such protection, a right which has been exercised by that body from the first organization of our Government, and supported by the opinions of the most eminent men in the nation.

Resolved, That the interest of the farmer and manufacturer are intimately connected, and that they must stand or fall together; and that great pecuniary loss and serious embarrassment have arisen from the delay of the National Legislature to grant them relief; and that equal and adequate protection can alone save them from impending ruin.

Resolved, That the embarrassment experienced by our country and Government during the late war, for the necessary articles of clothing for our people and Army, and for the want of proper means of defence, ought to teach us the necessity of husbanding our own resources, and of giving full and ample protection to our manufactures.

Resolved, That, as other nations have afforded every protection to their own industry, and have, in a great measure, cut off from their markets our breadstuffs and other domestic productions, it is of vital importance to the agriculturists of this country to establish for themselves a *home* market by means of our manufactures.

Resolved, That, as far as our experience goes, the protection heretofore given to cotton and other articles has afforded a fair profit to those engaged in the business, a cheaper article to the consumer, and a vast benefit to the country; we cannot, therefore, doubt that the same will be the result in regard to the protection of wool and woolens.

Resolved, That we approve of the proceedings of the Harrisburg convention, assembled in July last and, in general, of the rates of duties there recommended, but respectfully suggest to the consideration of Congress an increase of duty on the finest grades of foreign wool beyond that recommended by said convention.

Resolved, That the members from this county be respectfully requested to bring the subject of protecting our national industry before the Legislature, and that they take all proper means to procure the adoption of a resolution instructing our Senators and requesting our Representatives in Congress to use their best exertions to obtain the passage of a law which shall afford the protection asked for.

Resolved, That the Hon. Abraham H. Schenck be appointed by this meeting to proceed to Washington as the bearer of our proceedings to our Representative there, and to enforce our claims upon the consideration of the representatives of the people.

Resolved, That this meeting, confiding in the ability and readiness of the Hon. Thomas J. Oakley,

member of Congress from this district, to aid and sustain the important interests of the agriculturists and manufacturers of this county, do respectfully and earnestly request him to use his utmost endeavors to procure the passage of a law corresponding with the views of this meeting as above expressed.

Resolved, That James Tallmadge, Bartow White, Thomas L. Davies, Henry Swift, and John B. Van Wyck, be a committee to prepare a memorial to Congress in conformity to the above resolutions.

Resolved, That, in consideration of the important services of H. Niles, editor of the Weekly Register, in sustaining the great cause of domestic industry, we recommend his paper to the liberal patronage of the citizens of this county, and as a means of disseminating correct information on a subject so deeply interesting to every true American.

Resolved, That Nathaniel P. Tallmadge, Thomas L. Davies, Walter Cunningham, James Hooker, and Charles P. Barnum, be a central corresponding committee to further the objects of this meeting.

Resolved, That committees be appointed in the several towns in this county to correspond with the central committee, and to adopt such other measures in their respective towns as shall be deemed expedient to carry into effect the great and paramount objects of this meeting.

Under the preceding resolution the following committees were appointed, to wit:

Amenia.—Joel Benton, Taber Belding, Elijah B. Park, John Reade, Philip Flint.

Beekman.—Wheeler Gilbert, James Delong, Gabriel L. Vanderburgh, Benjamin Haxtun, Cornelius H. Cornell.

Clinton.—Theodorus Wing, John Dodge, Jared Lyon, Thomas Sands, Abraham Golder.

Dover.—James Grant, Thomas Taber, 2d, Henry Ward, William C. Freeman, Isaac Vincent.

Fishkill.—Bartow White, John C. Van Wyck, William E. Rapalje, James Givan, A. L. Ulric.

Freedom.—John De Lavergne, Elijah Townsend, Stephen Titus, Silas Pettit, John Klapp.

Hyde Park.—Edmund H. Pendleton, John Johnston, Hunting Sherrill, William Allen, John Purdy.

Milan.—Stephen Thorne, Jacob Shook, Jonathan Deuel, John I. Rowe, George N. Martin.

Northeast.—Abraham Bockee, Enos Hopkins, William Pugsly, Douglas Clarke, George Brown.

Pawling.—Daniel Merritt, William Taber, Albro Akin, Benjamin Burr, James Peckham.

Pine Plains.—Israel Harris, Robert Hoag, Allen Thompson, Henry Hoffman, Justus Booth.

Pleasant Valley.—William Germond, James Odell, John H. Newcomb, Joseph C. Dean, William Thorn.

Poughkeepsie.—William Davies, George B. Evertson, John Townsend, Robert Wilkinson, Stephen Cleveland.

Red Hook.—Nathan Beckwith, George Shook, Henry Staats, John C. Montgomery, Philip N. Bonesteel.

Rhinebeck.—John T. Schryver, Francis A. Livingston, John Armstrong, jr., Garret Van Keuren, Freeborn Garretson.

Stanford.—Gilbert Thorne, Leonard Thompson, Isaac Sutherland, Joseph Gildersleeve, Morgan Carpenter.

Union Vale.—Stoddard Judd, Israel Fowler, Thomas Andrews, William D. Williams, John Wilkinson.

Washington.—John Titus, Stephen B. Trowbridge, Samuel M. Sweet, Isaac Merritt, Platt Sutherland.

Resolved, That the proceedings of this meeting be signed by the chairman and secretary and published.

JAMES TALLMADGE, *Chairman.*

JONATHAN HAIGHT, *Secretary.*

To the Congress of the United States:

The memorial of the farmers and manufacturers of the county of Dutchess, in the State of New York, respectfully represents: That the agricultural interest of this portion of the country is greatly depressed for the want of a sufficient market for its surplus products. The establishment of a home market for breadstuffs and the supply of new objects for agricultural enterprise seem indispensably necessary to develop the resources of our country and secure a continuance of our prosperity. A proper encouragement of the domestic labor of the country and an adequate protection of manufactures promises to accomplish those desirable results. Agriculture and manufactures are so intimately interwoven and inseparably connected that they have one common interest, and unite to ask encouragement and protection. The wisdom of your honorable body exerted for their benefit will give new vigor to their energies, diffuse blessings, and add to the resources and strength of our common country.

Your memorialists, while they forbear to dwell upon particulars, believe that a few suggestions and a summary review will sufficiently demonstrate the propriety and the justice of their petition.

More than one-half of the population of these United States are growers of grain, flax, and hemp, the raisers of wool, the makers of iron, or the manufacturers of woolen goods, and are in a state of great depression. From the formation of our Government until within the last few years farming was almost universally as profitable as it is an honorable and useful occupation. Brisk markets and liberal and fair prices stimulated and rewarded the industry of the farmer. From the value and abundance of products *lands* attained to high prices, and individuals and our nation experienced the blessings of general affluence. In November, 1817, the British ports were closed against our breadstuffs. They were opened for a short time in 1818. From this latter year our breadstuffs have been almost wholly excluded from foreign markets, whereby the prospects of our farmers have been from that time extremely depressed.

	Barrels.	Value.
The average export of flour in 1811, 1812, and 1813, was.....	1,383,139	$13,980,000
In 1817 and 1818.....	1,118,437	14,664,173
In 1819, 1820, 1821, 1822, 1823, 1824, 1825, 1826.....	867,044	4,882,053

These facts show at one view the amazing depression of above ten millions of value in the single article of flour, although with an increasing population and the consequent sacrifice sustained by the farming interest. But to appreciate the extent of the depression of former markets, it must be remarked that Mexico and South America have recently afforded a new market, and to which nearly one-half of the flour above stated in the latter years was shipped. A corresponding depression of other articles of home production has also taken place. To alleviate the distresses from those causes, and employ the labor of the country, resort has been had to raising of flax, hemp, wool, and the manufacture of iron and woolens. Millions of capital have been allotted to these new pursuits. But, from the peace in Europe, the subjects

of those Governments, encouraged by a zeal for importation, have brought from abroad immoderate quantities of rival articles into our market; and, although much sacrifice has been sustained by their foreign owners, yet the effect has been to overstock and render our markets unstable; to prostrate almost every man engaged in the business; dissipate capital, reduce many to poverty, and put thousands of manufacturers and laborers out of employment. Lands purchased at fair prices when their products had value and market have been reduced in utility and worth. Many farms, upon which several instalments have been paid, have been sacrificed, and, on a sale, found inadequate to satisfy the sums remaining due. *Bankruptcy* has overwhelmed many who were industrious, prudent, and upright; and it yet threatens greater and continued ravages. The nation is placed nearly in the same state of dependence on foreign supplies as before the war of the Revolution.

Encouragement and *protection* from Government can alone avert this disastrous and ruinous state of things, now pressing so severely, so unjustly, and so unnecessarily, upon nearly one-half of the people of this nation.

Against adequate provision for relief from such a state of things it has been objected that Congress have not the right to legislate for the encouragement and protection of agriculture and manufactures, but that its lawful powers are restricted solely to levying duties for necessary revenue.

The Constitution certainly furnishes no such restriction or limitation of powers; while its whole object and express delegation of power authorizes Congress "to provide for the general welfare." But a reference to the exposition of the Constitution given by its framers in their early and continued practice will most effectually put at rest all doubts on this head.

The *second act* of the *first Congress*, passed on the 4th of July, 1789, was an act to provide revenue and to *encourage manufactures*, and contains this remarkable and explicit preamble: "Whereas it is necessary for the support of Government, for the discharge of the debts of the United States, and *for the encouragement and protection of manufactures*, that duties be laid on goods, wares, and merchandises imported."

General Washington, in his message to Congress in the subsequent year, recommends the subject anew to their notice: "Their safety and interest require that they should *promote such manufactures* as tend to render them independent of others for essential, particularly military, supplies."

Again, in 1796, he says: "*The encouragement of manufactures* is of too much importance not to receive a continuance of their efforts in every way that shall appear eligible."

Mr. Jefferson, in his message in 1802, says: "To cultivate peace and maintain commerce and navigation, to foster our fisheries and *protect manufactures* adapted to our circumstances, &c., are the landmarks by which to guide ourselves in all our relations."

Mr. Madison, when a member of Congress, in debate, said: "There may be some manufactures which, being once formed, can advance towards perfection without any adventitious aid, while others, for want of the fostering hand of Government, will be unable to go on at all. Legislative attention will therefore be necessary to collect the proper objects for this purpose." "The States that are most advanced and ripe for manufactures ought to have their particular interests attended to in some degree. While these retained the power of making regulations of trade, they had the power to protect and cherish such institutions; by adopting the present Constitution they have thrown the exercise of this power into other hands; they must have done this under an expectation that those *interests would not be neglected* here."

We might add the names of Hamilton, and many other of the worthies of the Revolution, and set forth their sentiments in favor of the expediency and the right of those powers which we now ask Congress to exercise. But it will be sufficient that a Washington, a Jefferson, a Madison, and a Monroe, did not fear nor fail, in succession, to press this all-important and now engrossing subject of agriculture and manufactures on the consideration of Congress. In conformity to such sentiments, and in pursuance of such recommendations, Congress, from the organization of this Government to 1826, have steadily pursued a system of encouragement and protection to agriculture and manufactures, intending to advance the interests of the whole by cherishing manufactures generally, and protecting, in just succession, the staples and peculiar products of the different States. Till this system was begun and carried into effect, Virginia and Maryland, with their abundance of tobacco, languished without an adequate market. The Carolinas and Georgia, with their cotton, felt the severities of poverty and even apprehended ruin. The sugar cane was unknown to the south, and the fisheries of the east afforded no adequate compensation for its perilous and arduous pursuit. Under this system of encouragement and protection we have seen the sickly staples and languishing people of the several districts suddenly rise to health and enterprise, and to the possession of wealth and the enjoyment of prosperity.

The agriculture of the south is supplied with a new staple in the article of sugar, the cotton product has experienced an almost boundless increase, the tobacco is scarcely adequate to supply the demand, and the fisheries now afford abundance and an ample reward to its enterprising followers. We do not complain that our brethren of those favored districts have been thus encouraged and protected, and rendered prosperous and happy by the friendly care and bounty of Government, but we do urge that, while they have been made rich and are in the actual and full enjoyment of so many blessings, springing from such a source and from such causes, it ill becomes them to set up a constitutional objection and remonstrate against the object of our petition.

If it is right that they should continue under the protection, and in the enjoyment of their advantages and favors bestowed by Government, it is also right and just that equivalent favors and benefits be extended to us. If the Constitution forbids the one, it also prohibits the other. We have borne our share of "the burdens alleged to be imposed on the many for the benefit of the few," in the protection given to the staples of their districts. If this objection is to prevail against a like protection to us, it is time a general repeal should take place of all laws for encouragement and protection; and the Constitution be thus restored, and "the many no longer continue to be burdened for the benefit and protection of the few."

The agriculture of the grain districts, with a growing population and increased ability to produce, has sustained a *depression* in the single article of *flour* of more than ten millions of dollars annually, even after the aid derived from the new market to South America. The *cotton exported* has *increased* from about two millions value to $25,025,214 in 1826. The *sugar*, which was not raised in this country until encouraged, now produces a supply of one-third of the consumption of this nation. The duty of three cents per pound upon the quantity produced if imported would give a revenue of $1,500,000. Yet, under circumstances of such a contrast between the grain and the cotton, and sugar districts, Louisiana and

the south declaim against "monopolies" and the tariff, and remonstrate against adequate encouragement to the staples and the agriculture of the Middle and Western States.

If the domestic labor of the growers of wool, flax, and hemp, and the makers of iron, cannot be protected, but must be left to be supplanted by the products of the Spanish peasantry, the feudal slaves of Germany, and the serfs of Russia, why should the cotton, sugar, and tobacco of the south, be exempted from a like competition from the cotton of Egypt and the Brazils, and the cotton, sugar, and tobacco produced by the labor of the miserable slaves of the East and West Indies? Under such competition, the domestic labor of the south would soon perish, and the disastrous prospects which awaited those staples in 1789 would be reinstated.

But your memorialists repose as little confidence in the solidity as in the fairness of this class of arguments. They believe experience has demonstrated that the system of protecting the domestic labor of the country, so far from burdening the many for the benefit of the few, has elicited new sources of wealth and enterprise, has made labor productive and certain in its rewards, augmented the national wealth, promoted the general welfare, and in no instance ultimately increased the price of commodities to the consumer.

A reference to the article of cotton will suffice to elucidate this whole subject. In 1791 we exported 189,316 pounds of cotton. The manufacture of cotton was then scarcely begun in this country. The production and transportation of that amount were the only benefits derived from that article to agriculture and the shipping interest. The production and manufacture of cotton was subsequently encouraged by adequate protection, and against which the shipping interest were opposed, and even, we also feared, that the many were to be burdened for the benefit of the few. But mark the results. From small beginnings we have risen to the exportation of 205,000,000 of pounds in 1826; manufactures have arisen, and, in a great degree, supply the demand for domestic consumption at about one-third of the former costs, and furnish between five and six millions value of cotton fabrics for exportation, principally to the South American market. The agriculture which formerly furnished 189,316 pounds of cotton, supplied about 205,000,000 of pounds in 1826. The shipping interest, which opposed this protection to cotton, then transported 189,316 pounds, now transport to foreign markets 205,000,000 of pounds, and also coastwise to the New England manufactories a quantity sufficient to be manufactured for the domestic consumption of the country; and for six millions in value of cotton fabrics also, to be transported to the South American market. The agricultural interests have, in return, found a market for its breadstuffs in supplying the manufacturers; for, it is a known fact, more flour passes eastward up the sound from New York, for home consumption, than was shipped from her port to foreign markets in the boasted days of our commercial prosperity.

Without the benefit of this market, a consequence of protection to the manufacture of cotton, the farmers of this State would now have been in a most ruinous condition.

Your memorialists urge, with great confidence, that encouragement to the productive industry of the country, and complete protection to the growth and manufacture of wool, flax, hemp, and iron, will, as in the case of cotton, give value to our lands, new springs to agriculture, diffuse universal joy and happiness over every class of society, and increase in a million fold the aggregate wealth and strength of our nation.

It will not escape the observation of every reflecting individual, that the same spirit, and the same system of policy which would have retained us as colonies of Great Britain, although subdued on the question of our independence as a nation, yet seeks to continue our dependence for all necessary supplies on British labor and English manufactures. From the organization of our Government to the present day it has been their unceasing endeavor to monopolize our trade and continue us in a state of colonial dependence as mere consumers of British products and British manufactures. They refuse to receive our breadstuffs, and yet urge upon us their manufactures. In 1825 we purchased upwards of $42,000,000 of her merchandise, of which $10,682,000 was wool and woolens; while they received in return not $200 of the agricultural products of this country north of the Potomac and Ohio. Yet we have men among us at this enlightened day, and after the experience in the effect of protection in the articles of cotton, sugar, and tobacco, who still urge the continuance of such a state of things; unequal and impolitic as between nations; and unequal and unjust as between ourselves and different sections of our own country.

It has been stated, in recent British publications, that the labor-saving machinery used in Great Britain is estimated to be equal to twenty-two millions of laborers. Ought the American manufacturer and agriculturist to be left unprotected to compete with such an accumulated and prodigious power? And, above all, ought our Government to allow Great Britain the profit of such mighty power in labor, to be used in manufactures for our consumption, and against us as individuals, and as a nation, when it might as well be used by ourselves and for our own benefit?

It is admitted "that nations cannot permanently and profitably trade together unless it is by the reciprocal interchange of their respective productions." In conformity to this admitted principle, it has been the declared and unvarying policy of our Government to proffer and invite a reciprocity of trade. All their continued and protracted negotiations with other Governments, and especially with Great Britain, have rested upon this just and equal basis; but have been uniformly resisted and rejected by Great Britain. Why, then, should we continue to receive on favored terms their products, while ours are prohibited and rejected from their markets? They refuse to put our plough on a footing with their looms. Shall our farmers submit to have their breadstuffs refused a foreign market, and they remain rival competitors in raising grain without consumers? Ought they to be required, with their surplus and decaying grain on hand, to purchase foreign cloth, to the employment or profit of the Spanish and German farmer, and the British manufacturer, and thereby furnish British agriculture with a home market in supplying breadstuffs to the manufacturers of cloth for American consumption? Ought we not rather to protect the productive labor of our own citizens, encourage the growth and manufacture of wool, flax, hemp, and iron, in our own country; divert to other channels a portion of our labor; create consumers by maintaining our own manufacturers; and relieve agriculture by lessening competition and giving a market to the grain-growing interests? Such a system of measures would make us as independent in fact as we are in form, and coerce and secure that reciprocity in trade which has been so continually proffered by us and so often refused by Great Britain.

The shipping and commercial interests have, in various ways, been most expensively encouraged and cherished. It should be remembered by those interests, because the farmers often feel the force and effect of the truth that, in this collision and contest for reciprocity of trade and protection to the American

merchant and American ship owner, the agricultural interest of the country is the club of Hercules, to which resort is constantly had to maintain the strife and fight this commercial battle. But for the just protection given to American bottoms over other vessels, foreign ships would gladly receive and transport our agricultural products at reduced freights, and bring back an abundant return. To maintain a pending commercial contest the West India market is now lost to our products, and the principal sacrifice falls on the agricultural interest. We ask not any relinquishment of this system of commercial protection and encouragement. But we do urge that the vehement opposition of those in the enjoyment of the advantages of this commercial and shipping protection should not avail to prevent the granting the object of this petition in favor of the depressed agriculturists and manufacturers, and the productive labor of the country.

The memorialists are sensible that the previously granted tariffs have afforded reasonable protection to very many of the articles of domestic growth and home consumption. Cabinet furniture, workers in leather, hats, and such like articles, yet enjoy the protection afforded, and are prospering under its auspices. Although the agriculturist had, as was deemed, a proportionate share of protection, yet, by means of the prohibition to receive the breadstuffs of this country in the foreign markets, and the want of a home market, the encouragement and protection before given to agriculture is inoperative and of little or no practical effect. The system of internal improvements in roads and canals, which is justly the pride of this State and of this nation, has in vain afforded facilities of communication, and brought out the surplus productions from the Western States, only to be added to the previous surplus of like products from the Middle States, and all to remain without a home demand, and prohibited as an article of foreign trade. It is essential to the prosperity of this part of the country that this state of things should be varied. A foreign market or home consumption must be provided for our agricultural products. The one depends upon foreign nations; the other is within ourselves, and depends alone on the wisdom and the energy of Congress. Agriculture, as circumstances are, can only be reached and advanced by encouragement to manufactures and the establishment of a home market, and the creation of new objects for the use of our lands, and the employment of industry. A protection of wool, woolens, flax, hemp, and iron will accomplish and secure all those results, so desirable to individuals and so important to the general welfare. The encouragement afforded to malt liquors established breweries, provided consumers of breadstuffs, called for the production of the raw material, and thus gave to the farmer, in the article of barley, a new and one of the most advantageous and profitable crops. It is by such means that the agriculturists can only be directly reached and benefitted. Protection to wool, woolens, flax, hemp, and iron will secure augmented benefits to this, we trust, most useful portion of the community.

The proposed rate of duty of twenty cents per pound on wool, with an increase on fine wool, and with an annual rise till fifty cents, will give to the farmer the immediate market on his mixed blood and merino wool. This protection seems due to this class of citizens, and we cannot see any good reason why, to their exclusion, the Spanish, German, and English farmer should be favored and employed. The admission into the country of wool costing less than eight cents per pound, without the proposed increase of duties, will leave the Smyrna and South American wool, taken in exchange for our cotton fabrics, and principally used for hats, carpets, and very coarse cloths, unaffected by the desired protection. We raise no such wool in this country; and its exemption for the clothing of a class of the laborers of the south appears just and reasonable, and, it would seem, ought to have moderated the keenness of opposition from that source.

Your memorialists beg leave to refer to the preceding resolutions, and humbly pray that the object of the same may be carried into effect, or that such other effectual protection and relief may be granted as to your honorable body shall seem meet and proper.

By order of the meeting.

20TH CONGRESS.] No. 805. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the subscribers, citizens of Pennsylvania, respectfully showeth: That a very large and important portion of your constituents, embracing probably half the population of the United States—the growers of grain, the raisers of sheep, and the manufacturers of woolen goods—are at present in a state of great depression, owing to a combination of untoward circumstances.

In inviting the attention of your honorable bodies to the subject of the present memorial, we find it necessary to take a retrospective view of the state of the farming interest from a remote period, for which we hope the importance of the object in view will sufficiently apologize. We shall be as brief as the nature of the case will admit.

For nearly thirty years after the establishment of our present form of Government, farming was almost uniformly as profitable as it is an honorable and useful occupation. The industry of the farmer was stimulated and rewarded by brisk markets and highly liberal prices. It was, however, apprehended by our wisest statesmen that a severe reverse would take place as soon as, by the cessation of war in Europe,

the swords of myriads of warlike men, who had been wasteful consumers, would be converted into reaping hooks, and those who had wielded them into producers. But dearth in that quarter for two or three years arrested the stroke. In November, 1817, the British ports were closed against our breadstuffs, but opened for a short time in 1818. From the latter year the agriculture of Europe has sufficed to feed her population; and our breadstuffs have accordingly been almost wholly excluded; whereby the prospects of our farmers have been, from that time, extremely depressed.

It cannot be improper to present a comparative view of the average of our exports of flour, the leading article of the farming States, for three several periods, which will fully explain the causes, and shed light on the great extent of the depression of the great farming interest:

	Barrels.	Value.
Average of 1811, '12, '13	1,383,149	$13,980,000
Average of 1817, '18	1,318,437	14,664,173
Average of 1819, '20, '21, '22, '23, '24, '25, '26	867,044	*4,882,053

So very extraordinary a diminution of demand for the surplus of the labors of our farmers, and of the value of that surplus, while their numbers in the interim had increased probably forty per cent., and their agricultural skill in nearly an equal ratio, could not fail to produce intense distress. The proceeds of the domestic sales, amounting at least to 10,000,000 of barrels of flour per annum, partook of the same fate. Other farming productions fell in value and demand in a similar degree. The annual reduction, therefore, of the income of the farmers, by the operation of the European system of exclusion, could not have fallen short of $30,000,000. It may be said that the prices in the first two periods were too high. This we freely admit. But this circumstance affords no alleviation of the distress resulting from the diminution of demand, and the great depreciation below a price affording an adequate remuneration for labor and the employment of capital. We cannot forbear lamenting that no attempt was made to provide a domestic market as a substitute for the foreign one thus ruinously cut off; or any new channel for the employment of the capital and industry thus bereft of their usual occupation and remuneration.

It is scarcely possible duly to appreciate the distress and ruin produced by this state of things among our farmers. Bankruptcy swallowed up a large proportion of them. Lands purchased at fair prices, when the European ports were open, and on which two and three instalments were paid, have been since sacrificed to pay the balance, and found inadequate for the purpose. It has been calculated, by men of inquiry, that one-third part of the landed property in the grain-growing States has changed owners within the last ten years, through the instrumentality of sheriffs and marshals; thousands of our citizens, bereft of large patrimonial estates, have been exiled from home to encounter the discomforts and privations of new settlements in the wilderness. Our lands produce far less than they might do; for, the stimulus of certain markets and remunerating prices being wanting, husbandry languishes Numerous cases occur, occasionally, of crops remaining unthreshed for a year after the harvest for want of demand.

From this brief view of the depression of the growers of grain, we wish to call your attention to a sketch of the situation of the growers of wool and the manufacturers of woolen goods.

The restrictive system which began in 1807, and the war of 1812, so far diminished foreign supplies of all kinds of manufactures, and threw out of employment so large a portion of our commercial capital, that many of our enterprising citizens entered with ardor into the pursuit of manufactures, and, among the rest, that of woolens. The demand for wool, of course, greatly increased. Flocks of merino sheep were purchased, and in many cases at very high prices. Before the close of the war the supply of woolen goods was nearly equal to the demand; whereby were secured moderate prices which, but for that circumstance, would have risen exorbitantly, as foreign woolens were scarce, and supplies precarious. Had the fostering care of the Government been extended to this manufacture after the war for a few years, it would have arrived at a maturity that might have enabled it to stand the shock of foreign competition. But the want of adequate protection, the mania for importation, the immoderate quantities of rival articles brought into our markets from abroad, prostrated almost every man engaged in the business, reduced hundreds to poverty, threw thousands of operatives out of employment, consigned probably three-fourths of the invaluable breed of merino sheep to the slaughter house, and placed the nation in nearly the same state of dependence on foreign supplies as before the war.

Within the last ten years the farmers have been several times flattered, through the enterprise of the manufacturers of woolen goods, with the hope of a revival of the demand for wool, which would greatly tend to alleviate their sufferings. Large flocks of sheep have been accordingly collected at different periods, at great expense; remunerating sales have been made for a year or two; but they have been succeeded by a blight and blast, in consequence of the market for domestic cloth being destroyed by inundations of foreign woolens sold at the risk and to the loss of the exporters, many times for less than cost, and sometimes for little more than the cost of the raw material. Thus the demand for wool having nearly ceased, the sheep have been destroyed by thousands, as their support became a burden to the proprietors.

The tariff of 1824 afforded a clear demonstration of two important facts: one, that the protection of American manufactures, and building up an American system are clearly recognized as substantial portions of the policy of our National Legislature; and the other, that that body seriously intended to protect and foster the important branches—wool-growing and the manufacture of woolen goods. This encouraged our capitalists to enter into both. Investments were made in the latter in buildings, machinery, and materials, to the amount, it is believed, of $50,000,000, and for some time the prospects were truly flattering. The number of sheep in the United States has been estimated at 15,000,000, which, at two dollars each, amount to $30,000,000, making an aggregate of $80,000,000 invested in these two collateral branches. The fleeces of the sheep, at three pounds each and at 30 cents per pound, would amount, annually, to $13,500,000.

But it proved in this case, as in many others, that our citizens held their prosperity by the very uncertain tenure of foreign legislation and foreign fluctuations. In the midst of their prosperous career, a tornado burst on both the growers and manufacturers of wool. In consequence of the calamitous scenes in Great Britain in 1825, immense exportations of woolen goods to this country took place, which were, as formerly, sacrificed frequently below cost and charges. With such competition all struggle is

	Barrels.	Value.
© 1826	857,820	$4,121,466
To Mexico and South America	285,563	1,431,178
Former markets	572,275	2,690,288

unavailing. The American manufacturer is expelled from his own market; his industry prostrated, and he and his family are doomed to ruin unless the extent of his capital may enable him to survive the shock, with the sacrifice of all his profits and part of that capital.

The distress in Great Britain, and the excessive exportations of woolens from that country to this, would have been sufficient to produce a great depression in the woolen branch here. But another cause of depression has been brought into operation. The British Government, ever wide awake to foster and protect its manufactures, reduced the duty on wool from six pence per pound to one penny, and to a half-penny on wool below 1s. per pound. Thus, while the American manufacturer pays, in some instances, a duty of 20 and 25 cents per pound, the British pays but a penny or a halfpenny; whereby nearly the whole benefit intended for the American in 1824 is done away.

It is a melancholy truth, which cannot fail to make a deep impression on your honorable bodies, that the great capital invested in the breed of sheep and in the establishments for woolen manufactures has, in consequence of the depression of these branches of industry, depreciated 30, 40, and, in many cases, 50 per cent.

The following facts may enable your honorable bodies to form some estimate of the importance of the woolen branch. A factory employing 160 hands (and there are probably fifty or sixty such factories in the United States) would consume 100,000 pounds of wool per annum. To produce this quantity of wool would require 35,000 sheep. These would occupy 23,000 acres of land, divided into 115 farms of two hundred acres each; every farm supporting 300 sheep and a family of six persons, almost entirely devoted to sheep husbandry. It therefore follows that 50 factories, each with 160 operatives, give employment to 5,750 families, and a population of 34,500 persons, who cultivate 1,150,000 acres of land; and it is important to observe that land of inferior quality answers well for sheep grazing.

It is hardly necessary to make any addition to these facts. Yet it may be proper to state, that but for this employment, most of those 34,500 persons, and of the 1,150,000 acres of land, would probably be employed in raising breadstuffs of various kinds; thus increasing production and the glut of the markets, and depreciating the price of those articles, already too low to remunerate the capital they employ.

Some imperfect idea may be formed of the beneficial effects of this manufacture on commerce, from the fact that a single woolen manufacturer in Massachusetts consumed last year, notwithstanding the depression of that branch—

100,000 pounds of wool, equal to 50 tons, of which 40 were imported.
27 tons of dye-wood.
13 tons of oil.
2 tons of foreign soap.

A multiplication of this amount by the number of factories in the United States would produce a most interesting result as regards the mercantile portion of our citizens. In fact, there cannot be a doubt that the freights of the raw materials for this and other manufactures give full employment to more tonnage than all the dry goods imported into this country.

Your memorialists have learned, with great surprise and regret, that associations of their fellow-citizens have taken place in different parts of the southern States, by which the power to impose duties on imports is attempted to be confined to the mere purposes of revenue; the exercise of that power for the protection of manufactures is denounced as unconstitutional; the operation of such duties is declared to be oppressive and unequal, and, of course, unjust; and gloomy predictions are hazarded of retaliation, by restrictions and heavy duties on our cotton and tobacco, on the part of Great Britain, in the event of any increase of duties on manufactures.

The limits of a memorial forbid much discussion on these assumptions, which, we respectfully state, have been so often and so fully disproved that we could not have expected to be called on at this late period to offer any arguments against them. We yield, however, to the necessity of the case, although it is but repeating arguments already hackneyed. We shall be very brief, and therefore we barely state that, in the first Congress, presided over by the illustrious Washington, and embracing a number of the members of the convention which framed the Constitution, who were certainly as well qualified to judge of its intent and meaning as any persons of the present day—in that Congress, we say, there was not a single exception alleged to the measure in question on the ground of unconstitutionality. The most highly gifted members of that body not only admitted the right, but, in a variety of cases, powerfully advocated the exercise of it as far as the interests of their particular constituents were concerned. Fortunately the debates of that Congress are still extant, and the speeches of Mr. Madison, Mr. Ames, Mr. Clymer, Mr. Fitzsimons, Mr. Carroll, Mr. Wadsworth, Mr. Boudinot, &c., may be consulted on the subject. To this, let us respectfully add, that the preamble of the law for imposing duties on imports, the second passed by that Congress, runs, "Whereas it is necessary for the support of Government, for the discharge of the debts of the United States, and the ENCOURAGEMENT AND PROTECTION OF MANUFACTURES, that duties be laid on goods, wares, and merchandise imported."

We beg leave, with all due respect, to state that these facts alone ought to settle this important question forever. But it is to be observed that other facts, affording unequivocal corroboration of this construction of the Constitution, remain to be stated. This system was distinctly recommended by General Washington, in his speech to Congress, at an early period of his career as President, and in his last speech to that body in 1796. Mr. Jefferson, Mr. Madison, and Mr. Monroe held the same language in their messages. And, so late an 1816, Mr. Lowndes, one of the most zealous, intrepid, and enlightened advocates of the rights and interests of the southern States, asserted the same principle clearly and distinctly. We conclude with the fact, of equal force with all the rest, that the practice of the Government, from 1789 until 1820, has been uniform on the subject, and never, to our knowledge, once questioned until 1820—a period of thirty-one years. And what is now to overrule this vast testimony? The very strained construction that *bounties* and *protecting duties*, producing the same result of fostering manufactures, are identically the same; and that the power of Congress to grant bounties having been proposed and rejected in convention, protecting duties were, by implication, likewise rejected. This, we beg leave to state, is fully as illogical as to assert that gypsum, marl, lime, and wood ashes are all the same substance because they all serve to manure the soil.

Duties absolutely prohibitory were, in 1789, imposed on manufactured tobacco and snuff; six cents per pound on the former and ten cents on the latter. But even these high duties were not deemed sufficient to guard the interests of the tobacco planter. They were raised, in 1794, *to twenty-two cents on snuff, and ten cents on manufactured tobacco.* Of these exorbitant duties, imposed, not for the sake of revenue, but avowedly for the exclusion of the articles, and to secure to the tobacco planter the entire

market of his own country, to the consequent injury of the revenue, the manufacturing portion of the nation never harbored a thought of complaining. We beg leave further to state, that a duty was, in 1789, laid on raw cotton, 150 per cent. higher than the duty on cotton goods, to encourage the culture of that raw material; that a duty was, at the same time, laid on indigo, to encourage its culture, 200 per cent. higher than on the great mass of manufactured goods; that the duty on brown sugar, an article of great bulk, heavy freight, and, in some degree, a necessary of life to the poorer classes of society, is from 75 to 100 per cent., which is far higher than any duty on manufactured goods, except coarse cottons; and, finally, that, for the encouragement of our navigation, the duty on teas imported in foreign vessels was, by the tariff of 1789, 125 per cent. higher than on those imported in American vessels. Various other duties for the protection of agriculture and commerce have been imposed at different times during the progress of our Government, for the details of which we refer to the statute books, and which, we repeat, have never been murmured against or complained of by the manufacturing portion of the nation.

We respectfully state that the objection to the imposition of duties for the protection of manufacturers, on the ground of their oppressive tendency, and "taxing the many for the benefit of the few," is equally ill-founded. In every case, without a single exception, in which efficient protection has been afforded to American manufactures, the result has been to produce an article superior in point of utility, and at a lower price than the imported one. American nails, for instance, subject to a duty of 70 per cent., are sold 40 per cent. cheaper in Philadelphia than in Liverpool. American canvas and window glass are cheaper and better than the imported. The same observation applies to chemical articles generally. Cotton goods are 50 per cent. cheaper and 60 per cent. better than were the imported articles for which they were substituted when the imposition of the square yard duty took place. The enumeration might be extended to a great variety of other articles, but we deem it unnecessary to enter into further detail.

On the subject of retaliation, we beg leave to observe that, as the nations of Europe, because they can supply themselves with breadstuffs, do actually, in order to protect their agriculturists, prohibit ours altogether, the cultivation of which forms the chief dependence of five or six millions of our population, the threat of retaliation on their part, held out by our own citizens, should we judge it proper not to meet positive exclusion by exclusion, but merely to impose additional duties on such articles as our industry can supply, is truly preposterous. Foreign nations are the aggressors. The aggression began and has been continued for years on their part, without an attempt at retaliation on ours. So far as Great Britain is concerned, it is to be observed that there is a regular annual balance in her favor of from four to eight millions of dollars. Last year we exported to her only $21,209,054, and imported $25,458,975. With respect to tobacco, her entire consumption of the article from all the world is only 14,000 hogsheads per annum; and our cotton is almost as indispensably necessary to her as food for her population. The whole amount of our domestic exports to Great Britain and France last year, cotton and tobacco excepted, was to the former Kingdom $1,709,122, and to the latter $276,797. The tobacco exported to both nations amounted to only $3,602,356.

There are important considerations connected with this subject deeply interesting to such members of your honorable bodies as are engaged in agriculture; more especially, for a reason which will appear in the sequel, to those devoted to the culture of cotton. There is too great a proportion of our citizens employed in agricultural pursuits. At the last census the agriculturists formed 83 per cent. of the entire population. The proportion has not decreased since; hence the demands of the markets, foreign and domestic, do not keep pace with the increase of production. While our means of producing a suplus for exportation are constantly increasing, the foreign markets have been diminishing. So completely and unprecedentedly have they fallen off, that of most of our staples, except cotton, we export less in quantity than we did in 1790, even before the flames of war spread throughout Europe, though our population has nearly trebled since that time; (see table A.) Notwithstanding this reduction of exports, all the markets in the world, into which our produce is received, are almost constantly glutted with it; the demand is slow, the prices reduced, our merchants suffer heavy losses, agriculture languishes, and the resources of our country are blighted by our policy. The average for two years, 1800 and 1801, of the domestic exports of those of our citizens not engaged in the culture of cotton, (about 5,000,000 souls,) was $35,787,043. The domestic exports of the same description of citizens in 1826 (about 10,000,000) were $28,030,448. Thus the melancholy fact appears, that while our population increases in an unexampled ratio, the quantity and value of our exports generally, cotton excepted, decrease. This sufficiently accounts for the occasional depressions of the prosperity of a country possessed of unexampled advantages, and proves the pernicious nature of our policy. A retrospect of a few years will shed strong light on the results of that policy. The extreme depression of manufactures from 1816 to 1822 drove thousands and tens of thousands of manufacturers to farming. Thus was that branch of industry overstocked by the conversion of so many customers into rivals. Hence thousands of acres, where the climate and soil permitted, were converted, from tillage and pasturage, into cotton and tobacco plantations. The planting of tobacco was soon overstocked, and cotton was substituted for that article; hence the enormous increase of the export of cotton, notwithstanding the great and steady increase of the domestic consumption. The export of Upland cotton was more than doubled in four years, from 1819 to 1823. In the former year it was 80,013,843 pounds, and in the latter 161,586,582 pounds; and the proceeds of the latter quantity fell short of those of the former. Nothing can more incontrovertibly prove the utter impolicy of our system, as regards the southern States, than this obvious and pernicious result of depressing manufactures and farming, and thus unduly increasing the production of cotton. To this source may be fairly traced the ruinous reduction of the price of that valuable staple, and all the depression that has prevailed for years in the cotton-growing States.

Total export and proceeds of Sea Island and Upland cotton for 1819 *and* 1823.

	Pounds.	Value.
1819	87,997,045	$21,081,763
1823	173,723,270	20,445,520

A candid view of the preceding facts will satisfy every unbiased mind that the conversion of 150,000 cultivators of cotton into farmers, and of double the number of farmers into mechanics and manufacturers, would produce the most salutary effects on the general prosperity of the country to an incalculable extent.

Here we respectfully close the arguments in favor of the system we advocate, with the hope that

our facts and inductions will irresistibly prove the soundness of the maxim of Adam Smith, that "*whatever tends to diminish, in any country, the number of artificers and manufacturers, tends to diminish the home market, the most important of all markets for the rude produce of the land, and thereby still further to discourage agriculture.*" And hence it clearly follows that it is the interest of the agriculturists to increase the number of artificers and manufacturers, in order "to increase the home market."

Besides the growers of wool and the manufacturers of woolen goods, there are various other descriptions of our fellow-citizens whose case requires further legislative protection. Instead of any enumeration on our part, we respectfully refer to the recommendations of the Harrisburg convention, which will be submitted to your consideration, and which we fully approve.

Submitting the premises to the serious consideration of your honorable bodies, your memorialists pray you will afford such relief as the pressing necessity of the case requires.

SEPTEMBER 20, 1827.

20TH CONGRESS.] No. 806. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 3, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the subscribers, on behalf of the Pittsburg Manufacturing Association, humbly showeth: That the said association has been established and organized principally with a view to the encouragement and assistance of such manufactures of domestic production as might be fostered for the common benefit of our mechanics and the country at large. That they have, in the prosecution of this design, been enabled to ascertain what description of fabrics, by a small pecuniary assistance, by loans and advances, have been able to struggle into competition with the capital, experience, and skill of European artists. That for these, and such as these, they have nothing to ask, although convinced that, if the manufacturers who are now straining every nerve in this contest were more amply protected, it would afford the public immediate advantages, whose enjoyment under the present system is postponed. For, their observation from results the most indisputable, occurring under their own eyes, regards this position as established truth: *That when the country can supply an article, the higher the duty the sooner it can be afforded better and cheaper than any furnished from abroad.* When factories are suffered to obtain full operation, domestic ingenuity and rivalry never have failed to effect this result.

There are, however, some branches of manufacture that, notwithstanding steady application and labor, the best skill and industry that could be enlisted, and all the capital that could be brought to the task, have failed in competition with British power and wealth. With that enterprise which distinguishes our artisans, they have returned to the task, and redoubled their efforts, but have again been beaten down by temporary sacrifices, by inferior articles made for sale, and by evasions of the tariff. To these, and for such as these, they would ask the kind and liberal hand of Government to protect and rear them to that strength and maturity that may enable them to return tenfold any benefits now extended to them.

The relation this association bears to the manufacturers and mechanics of the country affords them but that indirect and general benefit which every citizen has in the prosperity of his fellows, and their representations are therefore entitled to as much praise for disinterestedness as those emanating from any eastern Chamber of Commerce.

We can scarce flatter ourselves that the time of Congress will be appropriated to a general revision of the tariff. Before proceeding to set forth our special purpose, we would, however, respectfully suggest, that for the improvement of the revenue, and its effect upon our domestic exertions, the time of credit on the duties should be reduced, or, if deemed more eligible, they should be made payable in cash; thus diminishing the expenses and risk of collection, while obtaining the immediate advantage of prompt payment. The manufacturing interest of the country can scarce view with complacency their own Government lending capital to operate directly against our home industry.

We would further represent the expediency of a general provision that the ad valorem duties should be regulated upon an assessment of value made in our own ports. This would operate as an effectual check upon fraudulent invoices; particularly when the value of the goods is but little higher than the minimums, it would remove the temptation of placing them lower. In adopting this regulation, we should but follow the example of those nations whose rivalry presses hardest upon the exertions of our own citizens.

The tariff of 1824 has enumerated certain articles of *iron manufacture*, and subjected them to specific duties. Having experienced the general benefit and efficiency of this mode of protection, our more especial object, on this occasion, has been to pray the attention of your honorable bodies to the insertion in any bill regulating imposts sundry similar articles, subjecting them to the following, or such other specific duty as you may deem expedient. We have endeavored, in suggesting the following, to adopt the scale of duty furnished by the act of 1824; the variation requested being not so much in the amount of duty as in the alteration of the mode of assessing it.

Axes, 50 cents each; adzes, 33 cents each; drawing knives, 25 cents each; cutting knives, 33 cents each; scythes, 33 cents each; sickles or reaping hooks, 20 cents each; spades or shovels, (of iron or steel,) 25 cents each; squares, (of iron or steel,) 25 cents each; steelyards, drawing less than 100 lbs., 33 cents each; steelyards, drawing over 100 lbs. and under 300 lbs., 50 cents each; steelyards, drawing over 300 lbs., 66 cents each; scale beams, from 12 to 18 inches long, 50 cents each; scale beams, from 18 to 24 inches long, 100 cents each; scale beams, from 24 to 36 inches long, 200 cents each; scale beams, all over 36 inches, 300 cents each; screws of iron, weighing 25 lbs. or more, 5 cents per pound; handsaws, 50 cents each; socket chisels, 5 cents per pound; vises, 3 cents per pound; bridle bits, of cast or wrought iron, unfinished, 50 cents per dozen; bridle bits, of cast or wrought iron, finished or tinned, 50 cents per dozen; bridle bits, of cast or wrought iron half plated, 100 cents per dozen; bridle bits, of cast or wrought iron, full plate, 200 cents per dozen.

In common with a large portion of our fellow-citizens, both east and west, we have regretted the injury sustained by the manufacturing interest by the loss of the "woolens bill" of the last session, and would anxiously hope that such an act, embracing provisions for the protection of all connected interests, so as to obviate all objection in the minds of the friends of the system, may be passed at an early period. The features of the bill, as suggested by the Harrisburg convention, have been examined and approved by your petitioners. The immediate operation of such an act would, we believe, serve to animate and enliven many languishing establishments, to restore to our farmers markets they have lost, and generally to invigorate the industry of the country.

The experience of the United States, north, south, and west, uniting in opinion as to the advantages bestowed by the high duties on coarse cottons, we shall conclude by respectfully requesting the prosecution of this species of duty, so widely beneficial, and the extension of it to the finer kinds of cotton goods, including those dyed, stained, or printed, raising the minimum square yard duty on these articles to fifty cents. From the progress and present state of the cotton factories, we are satisfied they are prepared to deserve this further encouragement, &c.

And we would respectfully pray, &c.

JAMES S. CRAFT,
THOMAS HAZELTON,
JAMES ARTHURS,
ALEXANDER MILLER,
JOHN SHERIFF,
Committee, &c.

20TH CONGRESS.] **No. 807.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 3, 1828.

To the honorable the Senate of the United States:

The memorial of the citizens, inhabitants of Richland district, in the State of South Carolina, respectfully showeth: "That your memorialists have observed, with great and reasonable apprehension, the dangerous and never-ending encroachments of persons who claim as a right from your honorable body an universal *system of protecting duties* in favor of all articles that any speculator may think proper to manufacture in these United States, greatly increasing thereby the price of the article upon the purchaser who needs it, to the manifest detriment of the whole class of purchasers and consumers who constitute, in fact, the PUBLIC.

Your memorialists, deeply suffering under this system of protecting duties, so far as it hath already proceeded, and neither feeling nor expecting any benefit to themselves in return, desire to express their deliberate conviction that Congress possesses no power under the Constitution to enact any such system of peculiar protection, or to favor, in any manner, one class of citizens at the expense of the rest; that such a system has been long felt in this State as equally unjust in its principle and in its operation; that it arrays the pursuits and the interests of one section of the Union against those of another, conferring advantages and privileges arbitrarily, unequally, and in no degree sanctioned by the Constitution or by justice; and that it is liable to great abuse, as a political engine, by bribing one section of the Union with the plunder of another.

Your memorialists are willing to pay toward the necessary REVENUE of the country whatever sums Congress may think it right to call for; but they utterly deny that Congress possesses any constitutional

authority to impose taxes for any other purpose. They consider the laws of this kind, already passed, as encroachments on the common compact between the States of this Confederacy. Such laws have been submitted to from feelings of generosity, and from motives of peace and good neighborhood, although their injustice has been most manifest, and their oppression severely felt. Your memorialists, therefore, are fully of opinion that it is advisable to retrace the steps that have been taken, and to undo the mischief that has been done, rather than to add any further strength to a system in every way so objectionable and so revolting.

But your memorialists now see, with profound regret, that they are doomed to suffer without any hope of termination to these impositions and encroachments; that their honest earnings are legislated out of their pockets, to be bestowed gratuitously on citizens of a distant part of the Union, or to be expended in operations in which a part only of the Union is interested, and from which your memorialists have no reasonable expectation of benefit; that the tax laws to be enacted are in future to be, as for many years they have been, not national but sectional, so that the benefit of the Union to this State is becoming daily more dubious and disputable.

Your memorialists cannot help dwelling a moment longer on this branch of their just complaints. The duties laid by Congress, of whatever description, are levied, in great part, on articles purchased by southern industry and consumed by the south; but these duties are expended almost exclusively for the benefit of other sections of the Union. All the taxes that support the expenditures of the Army, of the Navy, of the various fortifications, of roads and canals, in whatever proportion we pay them, return to us no more. All that is taken from us is disposed of elsewhere. We are benefitted in the south by those expenditures in no way that we can perceive or feel. All that we pay is accumulated in defending and improving distant sections of the Union, and the prosperity of the north is built upon the impoverishment of the south. Although we have long submitted without complaint, the inequality and injustice of this state of things is becoming too glaring to remain unnoticed, and the burdens it imposes on us too heavy to be borne in silence any longer.

Deeply impressed with these considerations, your memorialists do earnestly, with the highest respect for your honorable body, entreat that all laws heretofore passed under the influence of, and with a view to a *tariff of protection*, may be repealed; that no laws be hereafter passed imposing duties or taxes of any description but what the real wants of a necessary REVENUE may require; and that the principle and practice of *protecting duties*, by which the industry of one class of citizens is fostered and rewarded at the expense of the rest, be forever abandoned.

And your memorialists, with all respect, submit to the wisdom of your honorable body the aforesaid request, and earnestly pray that the relief called for by this memorial may be granted.

20TH CONGRESS.] **No. 808.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 4, 1828.

To the honorable the President and members of the Senate of the United States in Congress assembled:

The memorial of the Chamber of Commerce of Charleston, South Carolina, and of other citizens of Charleston, respectfully showeth: That your memorialists approach your honorable body to offer their solemn remonstrance on a subject in which they cannot but take the deepest interest and feel the liveliest solicitude. Your memorialists allude to the late bill for an increase of the duty on woolens, and which they have reason to believe will be again brought to the view of Congress at the approaching session. It is against the provisions, not less than the principle, of that bill that your memorialists would most earnestly remonstrate, and implore your honorable body to pause before the doctrine of commercial restrictions is so incorporated in our legislation as to constitute a part of our permanent policy. The danger of all legal restraints on foreign commercial intercourse consists in their *commencement*—the difficulty in their *removal*. The general views on this subject do not admit of further illustration from argument, nor can they be strengthened by any additional appeal to experience. If the lessons of history fail to enlighten and forewarn on this subject, the struggle now in progress on the other side of the Atlantic, between rival interests established by law afford a solemn admonition to States who have not yet encumbered their onward course with restrictive regulations.

Your memorialists do not rest their opposition to the contemplated act on any exclusively sectional considerations or local views. They apprehend that the people of this country have a common interest in preserving their commercial code from the complexity and contradictions which deform those of Europe, and from the introduction into that code of any principle that, in its results, would place them in a hostile position to each other, that would arm the agriculturist of one section of the country against the manufacturer of a different section. If these interests will not harmonize by the slow and natural operation of circumstances, they can never be forced into an alliance by law.

There are two leading aspects in which the subject presents itself to your memorialists:

1. As the duties contemplated in the bill must constitute an aggravation of an already unequal and burdensome tax on the consumption of the southern States; and,

2. As they must have an increasing tendency to limit the foreign market for their staples.

On the first of these points the allegation of your memorialists is susceptible of the readiest proof; the evidence is accessible to all who will seek it in the spirit of impartiality. The duty on that class of woolens consumed by the slave constitutes an impost on capital under the guise of a tax on consumption. The slave of the southern planter must be clothed according to that standard of comfort which both interest and feeling prescribe. This is an inevitable tax on his owner, under all circumstances imagina-

ble—in periods of adversity as well as seasons of prosperity—in all conditions of the market for the produce of the labor of the slave. There is this peculiarity, then, which attaches to a tax on the consumption of the slave: it is one that cannot be got rid of, even under the most adverse state of things; nor does the burden admit of diminution, as in other taxes on consumption, by a reduction of expenditure; the expense of clothing the slave is brought within the narrowest limits of an economy that is consistent with humanity. All duties, therefore, which enhance the cost of clothing the slave fall with unmitigated pressure on his owner. In this view of their effects they partake of the essential features of a direct assessment; and the distinction between an impost in this form and a capitation tax on the slave is one more in name than in substance. The slaves of the southern cultivator constitute the greater portion of his capital; his land forms but a small part of his productive means. The entire southern region, which affords in the produce of its soil the means of maintenance to thousands, north as well as south, would become a barren waste without that species of labor by which it is now rendered productive. To assess the cultivator in the only means at his command to effect the most profitable results from cultivation, from the unfettered use of his whole capital, is to impose a *penalty*, in the form of a *duty*, on southern improvements.

Your memorialists are persuaded that the burden, in this form, borne by the southern States since the tariff of 1816 would, in its aggregate, constitute a great deduction from their productive means, and, in its annual amount, a heavy per centage on individual capital. They believe that accurate calculation would show that, on that portion invested and held in slaves, the present duty on woolens is equal to an assessment of three-sixteenths per cent. on such capital, and that South Carolina, assuming that one-half only of her slave population is clothed in foreign woolens, now pays, and has paid since 1816, an annual tax of between sixty and seventy thousand dollars on that portion only of her consumption of the article of woolens which is limited to her slaves.

It will be obvious, on the least consideration, that this is a duty distinct in its effects from that paid by the free portion of the population in general. The latter is a part of that contingent to the general fund which the southern planter contributes in common with all other orders of American society; the duty on the coarser description of woolens is an additional burden on him, in the ratio of the number of slaves he employs in cultivation. In cases of hired services the burden of taxes on consumption is borne in part by the employer when labor is high; but that burden is sustained exclusively by the laborer, in the diminution of his comforts, when such labor is low. But the price of maintenance, however high, for involuntary services, being paid without the possibility of relief or mitigation, as the burden admits of being neither shifted nor divided, it constitutes, in the opinion of your memorialists, an unanswerable argument against the policy (not to say anything of the justice) of aggravating by law this very unequal pressure. It will be recollected that this reasoning applies to the very coarsest description of woolens, which forms scarcely any part of the consumption of the laboring and poorer classes of the other States, and as relates to the existing duty.

Nor would your memorialists omit to urge those views (if they had not been already stated with great force and truth) which go to show that the proposed increase of duties must bear with a very unequal pressure on the different classes of American society, as burdening the poor in proportion to their poverty, and as exempting the wealthy in the ratio of their riches. Such duties are widely variant from the true intent and generous scope of our institutions, which look to the equal distribution of public burdens as the cardinal rule of legislation, whether as relates to the imposition of duties or the apportionment of taxes. Your memorialists are willing to admit that the home has, to a great extent, supplanted the foreign manufacture, but the policy of building up an interest on such a basis as high duties, which nearly amount to exclusion of the foreign article, becomes here again the interesting problem which the National Legislature, having a paternal regard to all the interests involved in the issue, is called upon to solve. It may be alleged that the domestic fabric has, by the process of high duties, been greatly reduced in price as well as improved in quality; but the true question for the consumer, in the apprehension of your memorialists, is the comparative price of the home and foreign article at the present, and not at any antecedent period.

On the other branch of the subject alluded to by your memorialists, to wit: the tendency of additional duties to limit the foreign market for the southern staples, they could open no views that are not familiar to the intelligence of the Legislature of the Union. There is no principle better established in commercial intercourse than that if nations will not buy they cannot sell. The effect of our national legislation is to deprive us gradually of our steadiest and wealthiest customers. There is no magic or mystery in the pursuits of trade; its laws are as simple as its ends are beneficent. The exchanges which mutually enrich nations are those of barter, and the great dictate of nature, with the law of human wants and human necessities, teach this truth, that legislators cannot create the elements of individual wealth and public prosperity, but they may prevent their full development and healthy action by artificial combinations and unnatural arrangements. It is impossible to foretell to what precise extent we may be deprived of the foreign demand for our staples by our persistence in the fatal policy of high duties. The depression from a contracted market is reached by successive steps in this artificial career. The connexions of business are not suddenly dissolved; the arrangements of commerce are not without some difficulty broken up; but nations will not, any more than individuals, continue to trade on unequal terms. We may profit for the moment by our prohibitory policy; we may sell without purchasing until fresh markets are sought out and opened; but the law is not more certain that brings fluids to their level than that nations cannot permanently and profitably trade together unless it is by the reciprocal interchange of their respective productions.

Your memorialists are of opinion that if the principle of legislation lately set up as the rule of conduct on this subject for Congress is to be acted on and carried out in practice to its full extent, a general depression and deterioration of property in the cotton-growing States may be predicted as the positive results. That principle is that Congress possesses the power of effecting a new distribution of the national capital, and, by forcing it into channels different from those into which it would naturally flow, to produce a corresponding change in the industrious pursuits of the citizen. Against such an exercise of power your memorialists solemnly protest. Commercial retaliation has been limited in the previous practice of the National Government to the vindication of the dignity or honor of the country, or with the view to produce the relaxation of foreign edicts or statutes that did violence to some principle of commercial reciprocity. But the exercise of the right to retaliate, as relates to countries which may choose to close their markets against a certain description of our produce, would involve the power to reduce to a common evel of poverty or misfortune those who still preserve the foreign market for their

productions, and those who, by the revolutions of trade, originating in the accidents of politics or the changes of foreign legislation, have unfortunately lost that market. It would be to make a portion of the people of this Union bear the burden, to a certain extent, of the British corn laws; to visit, in short, on a large division of our population, the pains and penalties of British legislation. If such a sacrifice were necessary to assert or vindicate the national honor, or to sustain any interest intimately connected with national defence, it would be submitted to by your memorialists, with the rest of their fellow-citizens, as a common burden for a common benefit. They cannot, therefore, conceive the propriety or justice of the plea which is employed to justify an interference that will lead to the depression of one interest for the relief of another. The southern agriculturist had no agency in producing that state of law or of circumstances abroad which, changing the channels of trade, left the western and northern cultivator to struggle with contracted markets and reduced prices. But it is a fact which does not admit of denial, that when the farmer of the Middle and Western States was in the enjoyment of open markets and profitable prices, the planter of the south had almost reached the last ebb of his fortunes, from the closing of the ordinary vents for his produce. He claimed no protection when he saw himself at the brink of ruin, his estates mortgaged, and the produce of his plantations perishing on his hands from the severe visitation of the accidents of war, as felt in those changes of the channels of trade which invariably follow in their train.

Your memorialists would beg leave to suggest, whether it would not be within the proper province and legitimate purposes of State legislation to effect that more equal division of capital and employment between agriculture and manufactures within those States which are desirous of producing such a result. This might be effected by a bounty or premium on manufactured produce within the local jurisdiction, and the subsisting arrangements in the other States would not be exposed to disturbance. These arrangements having their origin in that master principle of improvement—the sagacity of self interest in descrying the true path to riches—claim for the future as for the past, to be left to the voluntary and unfettered action of the same principle.

Your memorialists would also entreat your honorable body to pause, having already entered on a war of commercial restrictions, before we are too deeply committed in that false and fatal policy. They feel convinced that the British want only the colorable pretext of retaliation, to impose countervailing duties, which will alike reach the eastern ship owner and the southern agriculturist. The bill against which your memorialists protest will most amply afford this pretext. The commercial convention of 1818, between this country and Great Britain, expires by its own limitation in October, 1828. Is it not to be apprehended, if we pass this bill, and it becomes a law, that the British Government will refuse to renew that convention? The leading principle of that treaty, your honorable body knows, is the mutual abolition of discriminating duties, as regards the intercourse with British ports in Europe, on the ships and commodities of the parties, respectively, to that compact. We, however, possess the largest share of advantage from that arrangement. The carrying trade between the ports of Great Britain and those of the United States is enjoyed principally by American shipping. A higher duty on American cotton imported into British ports in Europe in American than in British ships will be in effect a discriminating duty in favor of British navigation, under the justifiable plea of retaliation, which would leave us without the power of inflicting a corresponding injury. Such a discrimination could not place the British ship owner in a worse position than he now occupies, as regards his share of the carrying trade between the two countries. It might improve that position. It would preserve a resemblance in the form merely of duties, which profess to countervail by inflicting an equivalent evil; but, in substance and effect, it would operate a double injury to us. It would, in the face of an abundant growth among ourselves, and the increasing competition of other countries, depress the price of our cotton in proportion to the British duty imposed on it; whilst, by lessening the employment for our shipping, it would contract our mercantile marine, and thus weaken our principal arm of national defence. Holding out a boon to the shipping interest of Great Britain, it would be deemed some compensation for the supposed pressure on that interest of Mr. Huskisson's free trade acts. That to this result our restrictive and prohibitory policy is likely to lead your memorialists feel assured, from an attentive observation of recent events and the state of public opinion in that country. Your memorialists feel the strongest assurance, therefore, that the persistence in our burdensome duties must lead, through countervailing and retaliatory acts, to the depreciation of the produce and property of the Southern States in a far greater degree than it will benefit any considerable class or portion of the United States.

Your memorialists have not adverted to the effect of excessive duties on the imports in the future diminution of the national revenue. But it requires no argument to convince the National Legislature that the experiment of direct taxes cannot be hazarded but in support of a popular war. The inability of the southern States to pay their contingent to a general contribution in this form will increase with the augmentation of the foreign duties; the power to pay will, under such circumstances, be in the inverse ratio of the demands of Government. Nothing short of an armed power could collect a direct impost in such a state of things. It remains for the National Legislature to say whether the revenue laws of the country shall be enforced with resort to so dreadful an alternative, and in the face of so imminent a peril to the Republic.

Your memorialists also feel it their duty to express their dissent to the assertion of the constitutional power of Congress to impose duties ostensibly for revenue, but virtually for protection. They feel confident that such is not the correct interpretation of this part of our national charter. Construing that instrument in conformity with its obvious purposes, and in the spirit which pervades the whole compact, your memorialists feel impressed with the truth that the power to impose duties for revenue would have been expressly limited to this single object if the framers of the instrument could have anticipated the course of our national policy. The right to raise a revenue by imposts is unqualified; because, your memorialists conceive, that being a branch of the taxing power, it would have been unwise to have limited it; like the other branches of the same power, it was judiciously left in the sound discretion of responsible agents. They therefore protest, in the absence of any express limitation, and in the general silence of the instrument on the subject, against the assumption that the power can be taken in any other and larger sense than as a means to a single end, and that end revenue. Is not this construction strengthened by the fact of the omission of any right of employing other legislative measures for purposes of protection? Is it not familiar to the knowledge of your enlightened body that there is a choice of expedients for this object? And that the favorers of domestic industry throughout Europe, in former days, employed bounties on exportation, in addition to duties on importation, to afford a similar protection to that claimed for the domestic industry of our own day and country? Why is the Federal Charter silent also

as to bounties on productions which are more directly promotive of the same end? But we find a positive prohibition in that instrument, both on Congress and the States, to impose duties on exportation; for fear, evidently, that the power might be used to trammel commerce in too great a degree from excessive taxation; whilst such prohibition forms the only restriction on the taxing power to be found in the whole instrument. The framers of our National Charter conceived that it was sufficient to confer the power to raise supplies in the mode by which revenue is most easily collected; but as they wisely thought there could not be importation without exportation, they would not give the power of taxing the exports. If the right to protect certain branches of industry is to be impliedly taken from the power to impose duties, your memorialists cannot conceive what can invalidate the plea for protection of the other branches, by claiming a premium or bounty, either on exportation or on production, for any article which may be grown or manufactured in our widely extended country.

There remains but one other view of the subject to which your memorialists would ask leave to call the earnest attention of the National Legislature; and which if they did not press on the deep consideration of your body they would conceive their duty but imperfectly executed. Your memorialists allude to the effect of high duties in placing the self-interest of the citizen in opposition to his social obligations. To respect the laws is one of the highest of our moral engagements; but there are limits to legal obedience, as well as political attachment, which daily experience admonishes statesmen are but too easily passed. The attachment, in fact, which constitutes patriotism is not a blind devotion, but an enlightened moral sentiment. It does not consist in a contracted and bigoted love for the soil on which our lot is cast, but in an intelligent and cultivated affection for the institutions which afford impartial protection to property as well as person, and for the laws which look to the rule of equality in the distribution of the burdens (pecuniary and personal) of the State. If in the delicate relation in which the citizen stands to his Government is found the source of some of his highest virtues and most disinterested exertions, so, also, in that relation will be discovered the origin of some of the greatest mistakes ever committed by statesmen; and none have been more conspicuous and remarkable than presuming to too great an extent on the undiminished strength of that affection which the citizen yields to his Government, in the unbought homage of his voluntary respect and liberal confidence.

All history proves that the spirit of opposition to laws which have their origin in partial and narrow considerations, which depress one class of citizens whilst they elevate another, first begins in expressions of discontent and disapprobation merely; but the frequent repetition of the wrong produces at last the sense of slighted interests, and the allegiance of the citizen is from that moment held by a very frail and insecure tie. Obedience to the law is then no longer voluntary, and veneration for compacts ceases to be a cherished and hallowed feeling. The general sense of injury gathers force in the progress of that legislation which is partial and deaf to the voice of remonstrance and entreaty. Laws incur the hazard, in such circumstances, of remaining a dead letter, from the odium attached to their execution; those who are appointed to the trusts of administration may find it a harsh, as well as painful duty to discharge, under the popular exasperation. These topics are not adverted to by your memorialists, and thus pressed on the attention of Congress, to inflame, to menace, or to alarm. The cautions they furnish are among the striking lessons of history and the familiar truths of daily experience. Your memorialists look with some apprehension to the growth of a spirit of disaffection that may come to regard the Federal Charter with alienated feelings, and in any, even the most remote sense, as the source of unequal burdens. They hope it may be long among the boasts of the parties to that compact that affection for the instrument itself is so bound up in the sentiment of patriotism as to be inseparable from it. But your memorialists would be wanting in one of the highest of the obligations which their present office imposes on them if they did not forewarn the Legislature of the Union against a too confident dependence on the unimpaired strength of that affection, whilst there continues to be neither pause nor rest to the spirit which has dictated our prohibitory and exclusive policy.

In behalf of the Charleston Chamber of Commerce.

DAVID ALEXANDER, *President.*

Attest:

R. HERIOT, *Secretary to the Charleston Chamber of Commerce.*

In behalf of a general meeting of the citizens of Charleston.

HENRY N. CRUGER, *Secretary.*

CHARLESTON, S. C., *June* 15, 1827.

20TH CONGRESS.] **No. 809.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 9, 1828.

To the honorable the Senate and House of Representatives of the United States:

The memorial of the subscribers, residents of the city and county of Philadelphia, respectfully showeth: That your memorialists are deeply sensible of the great importance to the true interests of the United States of an extended support to the agriculture and manufactures of the country. They therefore respectfully pray that you will be pleased to give your earliest attention to this great national object, by imposing such salutary additional duties on the leading important articles made from our great domestic staples as your wisdom shall direct, which will protect from imminent danger a large capital already embarked, and, as your memorialists fully believe, produce the most prosperous results to the community at large.

Your memorialists respectfully represent, that no interest of this community suffers at this time more for want of the home market than that of the farmer. Deprived, as he is, of a foreign demand for his produce, the annual importation of upwards of twenty millions of dollars in manufactures from Great Britain, it is obvious, must be of great injury to him. The value of every commodity for the comfort and luxury of life is mainly drawn from agriculture; hence the large importations made from England have the tendency at once to deprive the farmer of a sale for his productions in his own market, while they are entirely excluded from that country by the existing acts of the British Government.

Your memorialists beg leave further to state to your honorable bodies that the ability of our manufacturers to supply for the consumption of the United States most of the articles made of cotton and wool, and many of those of iron, flax, and hemp, which may be required, is now no longer matter of doubt, experience having established the fact that nothing is wanting to insure success to the American manufacturers, permanency to their establishments, and reduction of prices to the consumers, but a market at home for the sale of their various fabrics.

Your memorialists deem it unnecessary to go into much detail, or to enlarge upon the subject. It may not, however, be improper for them to state that the State of Pennsylvania in general, and this city and county in particular, are deeply interested in the growth and manufacture of wool, and in the manufacture of cotton and iron.

It is estimated, and your memorialists believe accurately, that at least ten thousand persons are now employed or supported in the city and county of Philadelphia in the manufacture of cotton; and they do not hesitate to declare that an additional duty on imported cottons, raising the minimum square yard duty on dyed, stained, and printed cotton goods to fifty cents, would give employment in a short time to double the number of operatives, not only here, but throughout the Union, and produce the same important results that have already taken place by the square yard duty of 1824, which has caused a reduction in price of thirty-three per cent. on all low-priced cottons, while the consumer is furnished with a more durable article

A considerable, a valuable, and an increasing portion of the export trade of Philadelphia now consists of cotton goods, glass ware, and others, manufactured in and near this city.

Your memorialists forbear to state to your honorable body further detail on the subject; they fully believe that it is expedient to increase the duty on the foreign manufactures of cotton, wool, iron, hemp, and other articles recommended by the memorial from the respectable body forming the convention held at Harrisburg in July last, which will claim from Congress the attention to which it is entitled; and they respectfully, but earnestly, beg leave cordially to unite with the said memorialists in making an appeal to the Councils of the nation on behalf of what they believe to be the vital interests of the country.

20TH CONGRESS.] No. 810. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 9, 1828.

The memorial of the citizens of Georgetown and its vicinity, to the Congress of the United States, respectfully showeth:

That your memorialists approach the Legislative Councils of the General Government with that respect for the constituted authorities that has invariably marked their course from the first efforts of the American nation in the great cause of independence to the present hour. Whatever may have been the difficulties in which our beloved country has been involved, we have, in the true spirit of the language that in part composes our State escutcheon, "*Animis opibus que parati*," lent our unceasing support to the advancement of the great and just principles of the charter of our independence; we have borne without a murmur all the restrictive measures that have been imposed upon commercial intercourse, whilst the product of our labor was perishing in our granaries; we have cheerfully paid whatever has been demanded of us for the prosecution of the late war, although we were utterly deprived of a market for the staple commodities of our country. We have witnessed the various acts of your honorable body for the encouragement of domestic manufactures without complaint, trusting to that wisdom and patriotism which have heretofore so signally advanced the real interests, happiness, and glory of the country. It is therefore with feelings of unfeigned regret that we now appear before you remonstrating against any course of public policy which may be agitated in your councils. But when we can no longer be insensible to the evils with which we are likely to be visited by the passage of a law, lately under your consideration, usually denominated the "woolens bill," it becomes our duty calmly and dispassionately to state those objections to the measure which we are compelled to make in consequence of the unequal and heavy burdens that will, by its enactment, be thrown upon our citizens. We hold this truth to be self-evident, that the charter of our liberties secures to every citizen a perfect equality. There is no office so high to which all may not aspire, no rule of conduct so oppressive but all shall share alike the inconvenience. The law cannot throw its protecting mantle around one, but must contain within its ample folds the whole national family. No privilege can be extended to any from which the many are excluded; and *all* burdens for the support of Government are to be borne alike by *all*, according to the revenue of each. To prevent the collision that might arise between the several States the framers of the Constitution very wisely gave to the General Government the power of regulating foreign and domestic commerce, to lay and collect imposts for the purposes of revenue. From the adoption of the Federal Constitution, various enactments of Congress, laying duties upon imports for the purposes of revenue, were made until the year 1816. At this period the applications for protecting duties were made by those who had invested their capital in manufactures during the late war, and the question, for the first time, was seriously agitated, whether

Congress had the power to protect and foster one species of industry at the expense of any other. We were not insensible to the fact that every increase of duty upon imports operated as a bounty to those who had engaged in manufactures; but, so long as we believed the assessments were made for the purposes of revenue, we submitted without reluctance, conceiving it to be dishonorable to oppose the constituted authorities of the country in any measure which they might adopt for the general welfare and prosperity, so long as the principles of the Constitution, under which we had confederated, remained inviolably sacred. It is now no longer a matter of speculation that Congress have seriously entertained the opinion that it possesses the power to lay protecting or prohibitory duties at pleasure. That the questions whether the burdens will be borne *equally* by the citizens of the United States; whether the rights and interests of all be *equally* consulted; whether all are *equally* protected, are of little consequence; they have the power to will, and we are bound to obey. The power is now claimed under the general provisions of the Federal compact, and we believe that a surrender of the principle by us would be an abandonment of that beautiful feature in our Government, *equality*.

Power, like the lights of science, is always progressive. Those who are clothed with great authority are always ready to extend their privileges. *That* is now done almost without complaint or resistance, the bare proposal of which shocked the nerves of almost every man in the convention. The convention refused to give to Congress the right to grant incorporations, and the right to incorporate a bank was expressly negatived. But we see how ineffectual were the efforts of a host of patriots upon the subject of incorporating the present company of money dealers, most incorrectly called a National Bank. This fact is only adverted to as an illustration of the general principle that an assumed power in the hands of rulers seldom ceases with the first exercise of it. The progress of the protecting acts is a more apt illustration, as it is connected with the very subject which your memorialists are now compelled to protest against. The acts of Congress of 1818, 1820, and 1824, increased the burdens upon the agriculturists to so great an extent that the whole country was convulsed at the passage of the last act in 1824. Your memorialists became greatly alarmed when they discovered the principle maintained that Congress possessed the right to protect or prohibit at pleasure. The unequally increased duty upon cotton bagging, an article of absolute necessity to the southern planters, so entirely developed the views of the majority, who paid not one cent of the increased duty, that your memorialists became justly alarmed. The imposition of a much lighter assessment upon our revenue by an English Parliament, where we were not represented, caused that glorious revolution which established our liberties. It is true that we were represented in the American Congress in 1824, and ably represented, but how idle was every recurrence to the principles of the Constitution; how visionary the hope to avert the evil by showing the unequal bearing of the duty upon our citizens; how frail the appeal to the human heart where interest and political ambition hold undivided sway! The southern representatives were a minority, they were voted down, but not vanquished, and to their Spartan valor we feel ourselves greatly indebted.

Your memorialists consider the tariff lately proposed upon coarse woolens as an entire prohibition of the foreign article; and why not prohibit the article in express terms, and say to the southern planters, you shall buy solely from the northern manufacturers? The northern farmer grows the wool, the northern manufacturer makes the fabric, and the southern planter has no other alternative than to pay the price demanded. Is there any equality in this? Does not such a state of things serve to enrich one part of the nation at the expense of the other? And in what manner does it enrich the country? The taking of the money of A to give to B leaves the sum of individual, and, consequently, of national wealth, the same. There are no corresponding protecting duties in favor of the growers of the raw material. It is true there is a trifling duty upon cotton imported into the United States, laid originally for the purposes of revenue, when not a pound of cotton was exported from this country. This duty is so small that the manufacturers of cotton goods import large quantities of this staple from the West India Islands and from South America. We have never applied for an increase of this duty to favor one of the principal and most important staples. When our planters found it impossible to grow indigo for exportation, they did not call upon Congress to protect them in any manner whatsoever. They changed the staple of the country, and sought a different channel to make their labor productive. This is the true policy of the Government, in the opinion of your memorialists, to permit industry and capital to seek their own employment. The sum of national wealth is increased in the same ratio with individual prosperity; and your memorialists are of opinion that individual sagacity and enterprise are the safest depositaries of industry and capital.

Your memorialists have yet to be convinced of the fact that the manufacturers of coarse woolens have any claims to further protecting duties. The sales of woolens of domestic manufacture in the fall of 1825, at Boston, produced from 30 to 70 per centum upon the capital invested; taking the minimum of per centage stated, and it will be then at least five times MORE than is made by the agriculturist of the south upon their capital. If the manufacturers of coarse woolens do make less upon their capital than those who are engaged in the making of cotton fabrics, your memorialists can see no good reasons why it should form a subject of your deliberation to devise ways and means by which they may amass the enormous profits now received by the latter. It would better comport with the interest of the agriculturists, and those concerned in commerce, to reduce the tariff upon cotton goods. So long as the revenue, made upon any particular branch of industry, yields a fair interest, so long will it flourish without the assistance of Government; and, whenever it ceases to do this, it only proves an unsuccessful enterprise and investment of capital, and the true policy of wise statesmen will be to let the incautious speculator feel alone the ill effects of his own errors. Your memorialists cannot perceive how it can be in the powers of governors to make a losing investment of capital profitable to the country, when it is a losing concern to the individuals therein engaged. It is true that protection and bounties may give relief, but all interference of this kind adds nothing to the weath of the nation; it will only impoverish one branch of industry to enrich another. To do this is a violation of that equality of rights which is the basis of our confederation. It is a violation of justice to take the proceeds of productive labor to reward the unsuccessful efforts of the incautious speculator.

Your memorialists are of opinion that capital should be left free to find its own employment. The sagacity and self-interest of individuals will soon discover their true interests, and in doing that, the best interests of the country will be advanced, for the wealth of Government is but the aggregate wealth of the individuals who compose it. If one branch of industry be entitled to your consideration, certainly every other should become equally an object of attention. In the autumn of 1825 the woolen manufacturers realized 30 per centum upon their investment. At the last sales in Boston the papers of that city announce that the fabrics of wool were sold at fair prices. If every manufacturer has the right to call upon you for legislative enactments whenever his investments of capital shall fall below his expecta-

tions, why have not the ship-builder, the exporting and importing merchant, and the agriculturist, the same right? We did not call upon you for legislative aid during the existence of embargoes, non-intercourse acts, and war, when our cotton was selling at six cents per pound, and our rice at one dollar per hundred. We formed no peace societies; had no conventions to drive the Government into such measures as would have sullied the national honor. We bore the inconvenience, and submitted to the evil without a murmur. At the present time, when the whole civilized world is at peace, when the receipts of the Treasury are not only sufficient for the current exigencies of the Government, but enables us to discharge a part of the war debt, any branch of industry that is unable to protect itself, with the present high tariff to support it, ought not to be further protected, but abandoned.

Your memorialists are most gratified, and, as Americans, are proud to see the improvements that are daily made in American manufactures. We hope the time may come when we shall be entirely independent of foreign supplies; but it is the part of wisdom to let this state of things arrive by those ordinary gradations which will give them strength and permanence. Let the agriculturist proceed in his employment and enrich the country by his labor. Let the merchant pursue his present profitable occupation; and, whenever the proper season shall arrive to disinthrall ourselves from foreign supplies, there will be a greater capital to invest in manufactures, the country will be flourishing and the nation prosperous. But by forced means and improvident legislation to bring forward prematurely any particular branch of industry at the expense of all the rest, produces a situation by which nothing is gained, but much is lost.

With these views and convictions your memorialists most respectfully remonstrate against any increase of the present duty on coarse woolens, believing the measure not sanctioned by the Constitution, not called for by the present state of that class of manufactures, unequal in the burdens which it will impose upon other more important branches of industry, and calculated to produce such feelings and excitements as may endanger our political safety and impede us in the rapid march we are now making to the most elevated stand in the rank of nations.

ABRAM MYERS, *Intendant of Georgetown,*
in behalf of the Town Council and citizens of the town and its vicinity.

SOLOMON COHEN, *Secretary.*

20TH CONGRESS.] No. 811. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 9, 1827.

CHARLESTON, *August* 24, 1827.

The anniversary meeting of the Agricultural Society of South Carolina was held on the 21st instant, when the following preamble and resolutions were unanimously adopted, viz:

That the agriculturists of the south have ever reposed confidence in the National Government, and given it their decided support while acting within the scope of its constitutional powers; but the recent proposition before Congress for protecting duties on certain articles of domestic manufacture (which they deem a partial legislation for local advantage, and subversive of their interest) induces them to remonstrate, temperately, yet firmly, against the exercise of powers not delegated by the Constitution. During the discussion of the tariff of 1824 they were assured that it was intended as a revenue, and not as a protective measure, and no further attempt would be made to increase it for many years; yet in 1827 the woolens bill (than which none of more pernicious tendency could have been framed) was suddenly introduced and passed through the House of Representatives in Congress, and but for peculiar circumstances would have passed the Senate. From the concentrating efforts of the manufacturers they have unequivocal reasons for believing that the proposition will again be brought forward at the next session of Congress, and, should it be passed, will bear with peculiar severity on the southern States. Commerce, agriculture, and manufactures are equally entitled to the protection of the Government, and reciprocally beneficial to every section of the Union; but that system of policy which tends to the restriction of either for the protecting patronage of the other is in direct hostility to the principles of the federal compact, and to the coequal immunities guaranteed by the Constitution. All that the agriculturists of the south demand is the unrestricted benefit of their industry; nor do they feel disposed to withhold coextensive privileges from the manufacturers. But as they did not force the manufacturers into their speculations, if any of *them* are embarrassed they cannot submit to extricate *them* at such a vast expense. They are, therefore, constrained most solemnly to protest against this partial legislation as unconstitutional, and fraught with direful, inviduous consequences. They would not be just to themselves were they to be silent on the subject while the manufacturers in the Middle and Eastern States are uniting their efforts to effect their purpose. The opinions advocated on the discussion of the Missouri question, on the tariff of 1824, and on the woolens bill of 1827, they deem contrary to the letter and spirit of the Constitution, and unjust in principle. While, therefore, they respect and revere the Constitution, and are disposed to adhere to and maintain it in all its primitive virtue and equal operation, they cannot consent to have their rights legislated away, and that sacred charter violated. With these views the *Agricultural Society of South Carolina* submit the following resolutions:

Resolved, That any system of measures adopted by the General Government subversive of the equality of every branch of industry is repugnant to the letter and spirit of the Constitution.

Resolved, That protecting duties in favor of domestic manufactures at the expense of agriculture are unequal in operation, invidious in principle, and of despotic policy.

Resolved, That the woolens bill is a measure pregnant with evil to southern interests, and should be resisted with decision and energy.

Resolved, That the corresponding secretary be instructed to transmit a copy of the foregoing preamble and resolutions to each of the Senators and Representatives in Congress from this State, with a request to the delegate from this district to bring the resolutions to the view of Congress at an early period of its session.

Resolved, That the corresponding secretary be likewise directed to furnish to the Senators and each of the Representatives in the Legislature from this district a copy of these resolutions, with the wish of this society that they should be submitted to the Legislature at the ensuing session. Also, to forward a copy to every agricultural society of the State for its consideration.

JOHN HUME, *President.*

20TH CONGRESS.] **No. 812.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 10, 1828.

At a meeting of the citizens of Laurens district, held at Laurens Court-House, on the 22d of September, for the purpose of expressing their sentiments on the tariff and the now proposed "woolens bill," Dr. Abner Crenshaw was called to the chair, and John G. Klink, Esq., appointed secretary. The chairman having explained the object of the meeting, among other resolutions that were submitted by Henry C. Young, Esq., the following was adopted:

Resolved, That Archibald Young, Dr. Samuel Farrow, Samuel Downs, and John F. Kern, jr., constitute a committee to carry into effect the objects of the meeting, whose duty it shall be to prepare suitable resolutions, with a memorial addressed to the National Legislature, expressive of the sentiments of this district on the above subject, at a meeting to be held at Laurens Court-House on the first Monday in October ensuing.

In conformity with the above resolution, an adjourned meeting of the citizens of Laurens district took place at Laurens Court-House on the first Monday in October, when a large number of citizens attended, and the following memorial and resolutions were read by Dr. Samuel Farrow, and unanimously adopted.

To the honorable the Senators and Representatives of the United States in Congress assembled:

Your memorialists, citizens of Laurens district, in the State of South Carolina, with all due respect for your honorable body, beg leave to enter their solemn protest against all impost duties laid or collected for any other purpose than that of revenue. We believe the Constitution of the United States nowhere gives to Congress the right to lay or collect duties on importations for any other purposes than those above stated. We believe that the States, in forming the federal compact, granted to Congress specific powers for specific purposes, and all other powers and rights not so granted were retained by the States with jealous care as their own. We deny that the Constitution anywhere, either by express grant or implication, gives to your honorable body the right to levy impost duties for the protection of domestic manufactures; as such we look on the present tariff as an infringement on the Constitution of these United States, and the prohibitory system contemplated as being at war with the best interests of this country.

But we more particularly and more solemnly protest against the bill before Congress at its last session, and which actually passed one house, denominated the woolens bill. For, we believe, if it should be passed into a law, that it would operate as an enormous tax on agriculture, that it would be a measure destructive of our revenue, and, perhaps, in the end, be fatal to the rights, morals, and happiness of our country. "Its principle is avarice—its victim, patriotism."

It needs no labored calculation to show your honorable body that where a large ad valorem duty exists on certain classes of manufactured goods, which articles form the greater amount of those consumed by the farming part of the community, that it must act as a burdensome tax on them, and, at the same time, result in a premium to the manufacturing interest. We ask, is the principle founded in justice or sound policy to tax one part of the community for the benefit of another, or one section of our common country for the benefit of another section? The present impost duty not only falls with unequal force on different sections of the country, but it bears unequally on different classes in the same section. The poor man, who is the consumer of the coarser quality of cloths, is taxed in proportion to his poverty; while the rich is, in a great degree, exempt from its burdens. Equal taxes and equal benefits, equal rights and equal liberties, is the eternal birthright of every American.

Believing, as we do, that the stability and permanency of Government depend, in a great degree, on the virtue and intelligence of its citizens, we consider it as forming an important part of the duty of those who legislate for us to guard with the utmost care the morals of the people. To do which, all temptations to fraud and vice should be kept as much out of sight and as much out of reach as possible. Hence the necessity of leaving commerce and industry as little fettered by laws as the nature of government will admit.

It cannot be necessary to remind your honorable body that the strength of a people is increased in proportion to their unanimity; and, as such, that it is the duty of a Government so to impose duties and so to distribute favors as to harmonize, as much as possible, the different pursuits and different interests of all sections. But, we would ask you, is the present tariff system calculated to do this? On the contrary, is it not rather calculated to engender sectional partialities and sectional prejudices? To array the farming interest against the manufacturing interest? In a word, to array the south against the north, and the north against the south?

We believe your present tariff will rob the Government of a large portion of its revenue, and will

fail to afford to our manufacturing brethren that support and protection which they anticipate. Under the present impost duties direct importation will take place to a very limited extent; it is impossible for the foreign manufacturer to pay those enormous duties and live by his merchandise. Hence thousands, may we not say millions, will be cut off from our former source of revenue. Pause, legislators, for a moment, and say from whence will you replenish the deficit. But is it believed, at the same time, that the British merchant will not find his way through the Canadas into the United States, evade your high duties, destroy your shipping, and inundate your country with foreign merchandise? We solemnly protest against a system of legislation so opposite to the interest of the country, and destructive of the rights and happiness of all classes of the community.

We also enter our protest against the policy of forcing manufactories into existence; for we believe them to be the legitimate offspring of circumstances, and that the fitness of circumstances necessary for their growth and prosperity must take place before they can flourish in any country. And until this does occur they are premature in their birth, and in their existence ricketty bantlings that must depend upon Government for their support. It must not be supposed, so long as we possess such vast uncultivated tracts of country, where every man may so easily call himself lord of a home, though ever so humble, that he will readily abandon the more profitable, the agreeable, and the more healthful pursuit of agriculture in the open air, for the dull, monotonous, sickly walls of a manufacturing establishment. We have not time to dwell on the tendency of these establishments, while they enrich a few individuals, to increase pauperism among us; nor to show their tendency in bending the minds of men into a channel of subjection, and consequently paving the way for despotism.

We are unwilling to be reckoned among those politicians of the day who can so lightly and on trivial circumstances speak of a dissolution of these United States; on the contrary, we are fond to cherish a love to our Government, and, as far as we can, to its measures. But when we have so many just grounds of complaint, it would be no less than a tacit surrender of our rights and interest longer to remain silent. Longer to delay would be to invite aggression from all those who might be disposed to lord it over us.

It therefore becomes us to speak, and to speak in the firm tone of freemen. And as a portion of that State which, during the late embargo, bore a full proportion of suffering, and that, too, with the proud recollection that they were suffering for the general good, and to this day have cheerfully acquiesced in all the requisitions of the Government of our common country, we have a right to be heard.

We therefore ask of your honorable body an immediate repeal of all impost duties which have been laid with a view to protection, and that you abstain from any further legislation on the subject of the woolens bill.

We demand that what has been taken from us by power be restored to us in justice.

ARCHIBALD YOUNG, *Chairman.*

1. *Resolved*, That any duty laid on foreign manufactures further than is necessary to raise a revenue for the support of Government is an unauthorized and unconstitutional exercise of power on the part of Congress.

2. *Resolved*, That the impost duties, as contemplated by the woolens bill before Congress at its last session, whilst it would operate unequally on different sections of our country, would, at the same time, operate unequally on different individuals in the same section of country, and would thus far be at variance with the genius and spirit of our free and liberal institutions, which have, or ought to have, nothing in view but the welfare, prosperity, and happiness of the great body of the American people.

3. *Resolved*, That we recognize the long and well-established principle that in the best regulated Governments it sometimes becomes necessary that partial evils must for a time be borne for the general good; yet, when an attempt is made to legislate for one section of country to the exclusion of another, or for one class of citizens in preference to another class of citizens, it becomes a crying sin, which freemen ought not, cannot, will not endure.

4. *Resolved*, That we witness with painful sensations the insatiable thirst and untiring zeal of our northern brethren; for they are not satisfied with having the proceeds of our honest earnings made theirs, but they appear determined to stop nothing short of making our fetters so sure that future resistance will be worse than fruitless.

5. *Resolved*, That we will ward off, by all the constitutional means in our power, the effect of the woolens bill on us if it should become a law; and for this purpose—

6. *Resolved*, That a committee of four be appointed by this meeting, whose duty it shall be to correspond with such like committees as may be appointed throughout the United States, and shall devise, and from time to time make public, whatever may have a tendency to enable our fellow-citizens to resist most effectually the effect of the said contemplated bill.

7. *Resolved*, That Archibald Young, Colonel Robert Ward, Samuel Cunningham, Esq., and Captain William Moore, be appointed a committee to carry into effect the sixth resolution.

8. *Resolved*, That a copy of this day's proceedings be laid before our State Legislature, and that a copy be furnished each of the Senators from this State in Congress, and also our Representative in Congress from this election district.

9. *Resolved*, That the memorial and resolutions be published in the *Columbia Telescope*, and that the same be signed by the chairman and secretary.

ABNER CRENSHAW, *Chairman.*

JOHN G. KLINCK, *Secretary.*

20TH CONGRESS.] No. 813. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 11, 1828.

The joint select committee, to whom was referred the following resolution, to wit:

"*Resolved*, That so much of the Governor's message as relates to the alteration of the tariff contemplated by the 'woolens bill' be referred to a joint select committee," report:

That they have bestowed as much attention to the subject referred to them as the time not necessarily devoted to other subjects of public importance would permit, though they are willing to admit not as much as the importance of the matter would seem to demand. The committee, in examining the subject referred to them, were not disposed to enter into any refined speculations in political economy; for they are sensible that the object of the resolution submitted to the consideration of the Legislature and referred to them may very easily be obtained by a brief examination of the subject addressed to the reason of the country and the sound understanding of that body under whose authority they act.

The committee are aware that there is no portion of the American people more attached to the Union and more deeply sensible of the great benefits which might be expected to flow from it, conducted upon the principles upon which it was first formed, than the people of North Carolina; they have never, at any period of our history, even under the strongest political excitement, endeavored to embarrass the Government, or the administration of those to whom it was intrusted, otherwise than by the right of suffrage. They have seldom expressed a legislative opinion upon the measures of the General Government, being at all times willing to give a full and fair opportunity to those charged with the management of public affairs of being "judged by their measures." But a crisis has arisen in the political affairs of our country which demands a prompt and decisive expression of public opinion. Under such circumstances silence would be injustice to ourselves and a want of candor to the other States of the Union.

The committee are of opinion that interest, either pecuniary or political, is the great point of union, from the smallest association up to the confederacy of these United States, and that whenever a system of policy is pursued by the General Government which strikes at the very foundation of the Union it is the right of every member of the Confederacy to call their attention to the fundamental principles upon which the Government was formed; and if they persist in measures ruinous in themselves the question may fairly be discussed, whether the checks and balances of the Government have not been overthrown; whether they have been instrumental in producing so onerous an effect, and whether the benefits of the Union are not more than counterbalanced by the evils.

The committee will not assert that Congress have no power under the Constitution to lay duties on imports which are intended to operate as a *protection* to manufactures: they maintain, however, that the *exercise* of such a power as contemplated by the woolens bill is a direct violation of the spirit of that instrument and repugnant to the objects for which it was formed.

The Constitution gives to Congress the power "to lay and collect taxes, duties, imposts, and excises; to pay the debts and provide for the common defence and general welfare of the United States; and provides that all duties, imposts, and excises, shall be uniform throughout the United States." The clear object of "laying impost," therefore, was, like laying taxes and other duties, to pay the debts and provide for the common defence and general welfare of the Union. That this is the clear and obvious meaning of the power to lay impost is abundantly proven by the proceedings of the convention which formed the Constitution, and the cotemporaneous exposition which it received from its friends. It is conceded that Congress have the express power to lay impost; but it is maintained that *that* power was given for the purpose of revenue, and revenue alone, and that any other use of the power is usurpation on the part of Congress. There is nowhere to be found in the Constitution an express power given to Congress to encourage science, agriculture, or manufactures; the first two are objects of the highest importance to all the States and of general interest; and yet we hear of no attempts on the part of the General Government to afford them encouragement.

Manufactures in the United States are not an object of *general* but of *local* interest; and yet they have received from the Government not only a moderate and just encouragement, under the operation of a tariff of duties on imports for purposes of revenue, but a protection by an enormous duty upon importations, which palsies every effort of the agriculturist, withers the product of his industry, and greatly impairs foreign commerce.

The committee are of opinion that the woolens bill which received in the Congress of the United States at its last session so full and fair an investigation, is a measure, above all others which has ever occupied the attention of that enlightened body, calculated to produce an enormous tax on the agriculture of the south and to be destructive of revenue. They believe it to be a bill artfully designed for the advancement of the incorporated companies of New England, and admirably adapted to its end. They believe it fatal to the happiness, the morals, and the rights of a large portion of our common country; for it has its foundation in avarice, and consumes every patriotic feeling.

If such is the character and the operation of this measure, who can tell how long this Union can exist under it, and how soon may be realized the soul-chilling prediction that "it is a rope of sand."

The committee are of opinion that the passage of the "woolens bill," contemplating prohibitory duties of from thirty-seven and an half per cent. to one hundred and thirty-nine and a half per cent., would be nearly if not quite equivalent to a non-importation act, and most certainly would it produce a tax of millions annually on the agricultural, the laboring, and the mechanic arts of our country; and this tax on the consumer would be in reciprocal ratio with his wealth; for while it contemplates no increase of duty on the finer woolen fabrics, in an artful disguise it imposes a duty very frequently on the poor man and the laborer of one hundred and thirty-nine and a half per cent. on the raiment which protects him from the inclemencies of the season; and this destructive mystery is hidden under that minimum of the bill which provides that all woolens over forty cents the square yard and under one hundred and fifty cents should be valued at one hundred and fifty cents; and the committee are advised that much the largest portion of woolens, both in quantity and value, are included in the minimum price.

The committee are of opinion that if such a duty on woolens does not amount to an entire prohibition, it will so far diminish the revenue on this valuable portion of importations as to render it necessary in a few years to resort to the odious system of internal taxation and of direct tax on the people of these United States.

Impressed with the importance of this subject, particularly as it affects the people of the southern and western States, the committee believe that the subject calls loudly for an expression of legislative opinion, and they therefore recommend the following resolutions:

Resolved, (as the opinion of the Legislature of North Carolina,) That it is inexpedient for the Congress of the United States to increase the duties on imports.

Resolved, further, That the Governor of this State be requested to transmit copies of this report and resolutions to each of the Senators and Representatives of this State in the Congress of the United States, with a request that they be laid before that body.

20TH CONGRESS.] No. 814. [1ST SESSION.

IN FAVOR OF AN INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 11, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the subscribers, citizens of Alleghany county, in the State of Pennsylvania, respectfully showeth: That a very large and important portion of your constituents, embracing probably half the population of the United States—the growers of grain, the raisers of sheep, and the manufacturers of woolen goods—are at present in a state of great depression, owing to a combination of untoward circumstances.

In inviting the attention of your honorable bodies to the subject of the present memorial, we find it necessary to take a retrospective view of the state of the farming interest from a remote period, for which we hope the importance of the object in view will sufficiently apologize. We shall be as brief as the nature of the case will admit.

For nearly thirty years after the establishment of our present form of Government, farming was almost uniformly as profitable as it is an honorable and useful occupation. The industry of the farmer was stimulated and rewarded by brisk markets and highly liberal prices. It was, however, apprehended by our wisest statesmen that a severe reverse would take place as soon as, by the cessation of war in Europe, the swords of myriads of warlike men, who had been wasteful consumers, would be converted into reaping hooks, and those who had wielded them into producers. But dearth in that quarter for two or three years arrested the stroke. In November, 1817, the British ports were closed against our breadstuffs, but opened for a short time in 1818. From the latter year the agriculture of Europe has sufficed to feed her population; and our breadstuffs have accordingly been almost wholly excluded, whereby the prospects of our farmers have been, from that time, extremely depressed.

It cannot be improper to present a comparative view of the average of our exports of flour, the leading article of the farming States, for three several periods, which will fully explain the causes, and shed light on the great extent of the depression of the great farming interest.

	Barrels.	Value.
Average of 1811–'12–'13	1,383,149	$13,980,000
Average of 1817 and 1818	1,318,437	14,664,173
Average of 1819–'20–'21–'22–'23–'24–'25–'26	867,044	*4,882,053

So very extraordinary a diminution of demand for the surplus of the labors of our farmers, and of the value of that surplus, while their numbers in the interim had increased probably forty per cent., and their agricultural skill in nearly an equal ratio, could not fail to produce intense distress. The proceeds of the domestic sales, amounting at least to 10,000,000 of barrels of flour per annum, partook of the same fate. Other farming productions fell in value and demand in a similar degree. The annual reduction, therefore, of the income of the farmers, by the operation of the European system of exclusion, could not have fallen short of $30,000,000. It may be said that the prices in the first two periods were too high. This we freely admit. But this circumstance affords no alleviation of the distress resulting from the diminution of demand, and the great depreciation below a price affording an adequate remuneration for labor and the employment of capital. We cannot forbear lamenting that no attempt was made to provide a domestic market as a substitute for the foreign one thus ruinously cut off, or any new channel for the employment of the capital and industry thus bereft of their usual occupation and remuneration.

It is scarcely possible duly to appreciate the distress and ruin produced by this state of things among our farmers. Bankruptcy swallowed up a large proportion of them. Lands purchased at fair prices when the European ports were open, and on which two and three instalments were paid, have been since sacrificed to pay the balance, and found inadequate for the purpose. It has been calculated by men of

	Barrels.	*Value.*
* 1826	857,820	$4,121,466
To Mexico and South America	285,563	1,431,178
Former markets	572,257	2,690,288

inquiry that one-third part of the landed property in the grain-growing States has changed owners within the last ten years through the instrumentality of sheriffs and marshals; thousands of our citizens, bereft of large patrimonial estates, have been exiled from home to encounter the discomforts and privations of new settlements in the wilderness. Our lands produce far less than they might do; for, the stimulus of certain markets and remunerating prices being wanting, husbandry languishes. Numerous cases occur, occasionally, of crops remaining unthreshed for a year after the harvest for want of demand.

From this brief view of the depression of the growers of grain we wish to call your attention to a sketch of the situation of the growers of wool and the manufacturers of woolen goods.

The restrictive system which began in 1807, and the war of 1812, so far diminished foreign supplies of all kinds of manufactures, and threw out of employment so large a portion of our commercial capital, that many of our enterprising citizens entered with ardor into the pursuit of manufactures, and, among the rest, that of woolens. The demand for wool, of course, greatly increased. Flocks of merino sheep were purchased, and in many cases at very high prices. Before the close of the war the supply of woolen goods was nearly equal to the demand; whereby were secured moderate prices, which, but for that circumstance, would have risen exorbitantly, as foreign woolens were scarce and supplies precarious. Had the fostering care of the Government been extended to this manufacture after the war, for a few years, it would have arrived at a maturity that might have enabled it to stand the shock of foreign competition. But the want of adequate protection, the mania for importation, the immoderate quantities of rival articles brought into our markets from abroad, prostrated almost every man engaged in the business, reduced hundreds to poverty, threw thousands of operatives out of employment, consigned probably three-fourths of the invaluable breed of merino sheep to the slaughter-house, and placed the nation in nearly the same state of dependence on foreign supplies as before the war.

Within the last ten years the farmers have been several times flattered, through the enterprise of the manufacturers of woolen goods, with the hope of a revival of the demand for wool, which would greatly tend to alleviate their sufferings. Large flocks of sheep have been accordingly collected at different periods, at great expense; remunerating sales have been made for a year or two, but they have been succeeded by a blight and blast, in consequence of the market for domestic cloth being destroyed by inundations of foreign woolens, sold at the risk and to the loss of the exporters, many times for less than cost, and sometimes for little more than the cost of the raw material. Thus, the demand for wool having nearly ceased, the sheep have been destroyd by thousands, as their support became a burden to the proprietors.

The tariff of 1824 afforded a clear demonstration of two important facts: one, that the protection of American manufactures and building up an American system are clearly recognized as substantial portions of the policy of our National Legislature; and the other, that that body seriously intended to protect and foster the important branches—wool-growing and the manufacture of woolen goods. This encouraged our capitalists to enter into both. Investments were made in the latter, in buildings, machinery, and materials, to the amount, it is believed, of $50,000,000, and for some time the prospects were truly flattering. The number of sheep in the United States has been estimated at 15,000,000, which, at $2 each, amount to $30,000,000, making an aggregate of $80,000,000 invested in those two collateral branches. The fleeces of the sheep, at three pounds each, and at thirty cents a pound, would amount, annually, to $13,500,000.

But it proved in this case, as in many others, that our citizens held their prosperity by the very uncertain tenure of foreign legislation and foreign fluctuations. In the midst of this prosperous career a tornado burst on both the growers and manufacturers of wool. In consequence of the calamitous scenes in Great Britain in 1825, immense exportations of woolen goods to this country took place, which were, as formerly, sacrificed frequently below cost and charges. With such competition all struggle is unavailing. The American manufacturer is expelled from his own market, his industry prostrated, and he and his family are doomed to ruin, unless the extent of his capital may enable him to survive the shock, with the sacrifice of all his profits and part of that capital.

The distress in Great Britain, and the excessive exportations of woolens from that country to this, would have been sufficient to produce a great depression in the woolen branch here. But another cause of depression has been brought into operation. The British Government, ever wide awake to foster and protect its manufactures, reduced the duty on wool from six pence per pound to one penny, and to a half-penny on wool below one shilling per pound. Thus, while the American manufacturer pays, in some instances, a duty of twenty and twenty-five cents per pound, the British pays but a penny or a halfpenny; whereby nearly the whole benefit intended for the American in 1824 is done away.

It is a melancholy truth, which cannot fail to make a deep impression on your honorable bodies, that the great capital invested in the breed of sheep and in the establishments for woolen manufactures has, in consequence of the depression of these branches of industry, depreciated thirty, forty, and in many cases fifty per cent.

The following facts may enable your honorable bodies to form some estimate of the importance of the woolen branch: A factory employing 160 hands (and there are probably fifty or sixty such factories in the United States) would consume 100,000 pounds of wool per annum. To produce this quantity of wool would require 35,000 sheep. These would occupy 23,000 acres of land, divided into 115 farms of 200 acres each, every farm supporting 300 sheep, and a family of six persons almost entirely devoted to sheep husbandry. It therefore follows that fifty factories, each with 160 operatives, give employment to 5,750 families, and a population of 34,500 persons, who cultivate 1,150,000 acres of land; and it is important to observe, that land of inferior quality answers well for sheep grazing.

It is hardly necessary to make any addition to these facts. Yet it may be proper to state that, but for this employment, most of those 34,500 persons, and of the 1,150,000 acres of land, would probably be employed in raising breadstuffs of various kinds; thus increasing production and the glut of the markets, and depreciating the price of those articles, already too low to remunerate the capital they employ.

Some imperfect idea may be formed of the beneficial effects of this manufacture on commerce, from the fact that a single woolen manufacturer in Massachusetts consumed last year, notwithstanding the depression of that branch—

100,000 pounds of wool, equal to fifty tons, of which forty were imported.

27 tons of dye-wood.

13 tons of oil.

2 tons of foreign soap.

A multiplication of this amount by the number of factories in the United States would produce a most interesting result as regards the mercantile portion of our citizens. In fact, there cannot be a doubt that the freights of the raw materials for this and other manufactures give full employment to more tonnage than all the dry goods imported into this country.

Your memorialists have learned, with great surprise and regret, that associations of their fellow-citizens have taken place in different parts of the southern States, by which the power to impose duties on imports is attempted to be confined to the mere purposes of revenue; the exercise of that power for the protection of manufactures is denounced as unconstitutional; the operation of such duties is declared to be oppressive and unequal, and of course unjust; and gloomy predictions are hazarded of retaliation, by restrictions and heavy duties on our cotton and tobacco, on the part of Great Britain, in the event of any increase of duties on manufactures.

The limits of a memorial forbid much discussion on these assumptions, which, we respectfully state, have been so often and so fully disproved that we could not have expected to be called on at this late period to offer any arguments against them. We yield, however, to the necessity of the case, although it is but repeating arguments already hackneyed. We shall be very brief, and therefore we barely state, that in the first Congress, presided over by the illustrious Washington, and embracing a number of the members of the convention which framed the Constitution, who were certainly as well qualified to judge of its intent and meaning as any persons of the present day—in that Congress, we say, there was not a single exception alleged to the measure in question on the ground of unconstitutionality. The most highly gifted members of that body not only admitted the right, but, in a variety of cases, powerfully advocated the exercise of it as far as the interests of their particular constituents were concerned. Fortunately the debates of that Congress are still extant, and the speeches of Mr. Madison, Mr. Ames, Mr. Clymer, Mr. Fitzsimons, Mr. Carroll, Mr. Wadsworth, Mr. Boudinot, &c., may be consulted on the subject. To this let us respectfully add, that the preamble of the law for imposing duties on imports, the second passed by that Congress, runs, "Whereas it is necessary for the support of Government, for the discharge of the debts of the United States, and the encouragement and protection of manufactures, that duties be laid on goods, wares, and merchandise imported."

We beg leave, with due respect, to state that these facts alone ought to settle this important question forever. But it is to be observed that other facts affording unequivocal corroboration of this construction of the Constitution remain to be stated. This system was distinctly recommended by General Washington in his speech to Congress at an early period of his career as President, and in his last speech to that body in 1796. Mr. Jefferson, Mr. Madison, and Mr. Monroe, held the same language in their messages. And so late as 1816 Mr. Lowndes, one of the most zealous, intrepid, and enlightened advocates of the rights and interests of the southern States, asserted the same principle clearly and distinctly. We conclude with the fact, of equal force with all the rest, that the practice of the Government from 1789 till 1820, has been uniform on the subject, and never, to our knowledge, once questioned till 1820, a period of thirty-one years. And what is now to overrule this mass of testimony? The very strained construction, that *bounties* and *protecting duties*, producing the same result of fostering manufactures, are identically the same; and that the power of Congress to grant bounties having been proposed and rejected in convention, protecting duties were by implication likewise rejected! This, we beg leave to state, is fully as illogical as to assert that gypsum, marl, lime, and wood ashes are all the same substance, because they all serve to manure the soil.

Duties absolutely prohibitory were, in 1789, imposed on manufactured tobacco and snuff; six cents per pound on the former, and ten cents on the latter. But even these high duties were not deemed sufficient to guard the interests of the tobacco planter. They were raised in 1794 *to twenty-two cents on snuff, and ten cents on manufactured tobacco.* Of these exorbitant duties imposed, not for the sake of revenue, but avowedly for the exclusion of those articles, and to secure to the tobacco planter the entire market of his own country to the consequent injury of the revenue, the manufacturing portion of the nation never harbored a thought of complaining. We beg leave further to state, that a duty was, in 1789, laid on raw cotton 150 per cent. higher than the duty on cotton goods, to encourage the culture of that raw material; that a duty was at the same time laid on indigo to encourage its culture, 200 per cent. higher than on the great mass of manufactured goods; that the duty on brown sugar, an article of great bulk, heavy freight, and in some degree a necessary of life to the poorer classes of society, is from 75 to 100 per cent., which is far higher than any duty on manufactured goods except coarse cottons; and, finally, that for the encouragement of our navigation, the duty on teas imported in foreign vessels was, by the tariff of 1789, 125 per cent. higher than on those imported in American vessels. Various other duties for the protection of agriculture and commerce have been imposed at different times during the progress of our Government, for the details of which we refer to the statute books, and which, we repeat, have never been murmured against or complained of by the manufacturing portion of the nation.

We respectfully state, that the objection to the imposition of duties for the protection of manufactures on the ground of their oppressive tendency, and "taxing the many for the benefit of the few," is equally ill-founded. In every case, without a single exception, in which efficient protection has been afforded to American manufactures, the result has been to produce an article superior in point of utility, and at a lower price than the imported one. American nails, for instance, subject to a duty of 70 per cent., are sold 40 per cent. cheaper in Philadelphia than in Liverpool. American canvas and window glass are cheaper and better than the imported. The same observation applies to chemical articles generally. Cotton goods are 50 per cent. cheaper and 60 per cent. better than were the imported articles for which they were substituted when the imposition of the square yard duty took place. The enumeration might be extended to a great variety of other articles, but we deem it unnecessary to enter into further detail.

On the subject of retaliation we beg leave to observe, that as the nations of Europe, because they can supply themselves with breadstuffs, do actually, in order to protect their agriculturists, prohibit ours altogether, the cultivation of which forms the chief dependence of 5,000,000 or 6,000,000 of our population, the threat of retaliation on their part held out by our own citizens, should we judge it proper not to meet positive exclusion by exclusion, but merely to impose additional duties on such articles as our industry can supply, is truly preposterous. Foreign nations are the aggressors. The aggression began and has been continued for years on their part without an attempt at retaliation on ours. So far as Great Britain is concerned, it is to be observed that there is a regular annual balance in her favor of from $4,000,000 to $8,000,000. Last year we exported to her only $21,209,054 and imported $25,458,975. With respect to tobacco, her entire consumption of the article from all the world is only 14,000 hogsheads per annum, and our cotton is almost as indispensably necessary to her as food for her population. The

whole amount of our domestic exports to Great Britain and France last year, cotton and tobacco excepted, was, to the former Kingdom, $1,709,122, and to the latter, $276,797. The tobacco exported to both nations amounted to only $3,602,356.

There are important considerations connected with this subject deeply interesting to such members of your honorable bodies as are engaged in agriculture, more especially, for a reason which will appear in the sequel, to those devoted to the culture of cotton. There is too great a proportion of our citizens employed in agricultural pursuits. At the last census the agriculturists formed 83 per cent. of the entire population. The proportion has not decreased since. Hence the demands of the markets, foreign and domestic, do not keep pace with the increase of production. While our means of producing a surplus for exportation are constantly increasing, the foreign markets have been diminishing. So completely and unprecedentedly have they fallen off, that of most of our staples, except cotton, we export less in quantity than we did in 1790, even before the flames of war spread throughout Europe, though our population has nearly trebled since that time.—(See table A.) Notwithstanding this reduction of exports, all the markets in the world into which our produce is received are almost constantly glutted with it, the demand is slow, the prices reduced, our merchants suffer heavy losses, agriculture languishes, and the resources of the country are blighted by our policy. The average for two years, 1800 and 1801, of the domestic exports of those of our citizens not engaged in the culture of cotton (about 5,000,000 souls) were $35,787,043. The domestic exports of the same description of citizens in 1826 (about 10,000,000) was $28,030,448. Thus the melancholy fact appears, that while our population increases in an unexampled ratio, the quantity and value of our exports generally, cotton excepted, decrease. This sufficiently accounts for the occasional depressions of the prosperity of a country possessed of unexampled advantages, and proves the pernicious nature of our policy. A retrospect of a few years will shed strong light on the results of that policy. The extreme depression of manufactures from 1816 to 1822 drove thousands and tens of thousands of manufacturers to farming. Thus was that branch of industry overstocked by the conversion of so many customers into rivals.

Hence thousands of acres, where the climate and soil permitted, were converted from tillage and pasturage into cotton and tobacco plantations. The planting of tobacco was soon overstocked, and cotton was substituted for that article. Hence the enormous increase of the export of cotton, notwithstanding the great and steady increase of the domestic consumption. The export of Upland cotton was more than doubled in four years from 1819 to 1823. In the former year it was 80,013,843 pounds, and in the latter 161,586,582 pounds. And the proceeds of the latter quantity fell short of those of the former. Nothing can more incontrovertibly prove the utter impolicy of our system, as regards the southern States, than this obvious and pernicious result of depressing manufactures and farming, and thus unduly increasing the production of cotton. To this source may be fairly traced the ruinous reduction of the price of that valuable staple and all the depression that has prevailed for years in the cotton-growing States.

Total export and proceeds of Sea Island and Upland cotton for 1819 *and* 1823.

1819.....	87,997,045 pounds.....	$21,081,763
1823.....	173,723,270 pounds.....	20,445,520

A candid view of the preceding facts will satisfy every unbiased mind that the conversion of 150,000 cultivators of cotton into farmers, and of double the number of farmers into mechanics and manufacturers, would produce the most salutary effects on the general prosperity of the country to an incalculable extent.

Here we respectfully close the arguments in favor of the system we advocate, with the hope that our facts and inductions will irresistibly prove the soundness of the maxim of Adam Smith, that "*whatever tends to diminish in any country the number of artificers and manufacturers, tends to diminish the home market, the most important of all markets for the rude produce of the land, and thereby still further to discourage agriculture.*" And hence it clearly follows that it is the interest of the agriculturists to increase the number of artificers and manufacturers in order "to increase the home market."

Besides the growers of wool and the manufacturers of woolen goods, there are various other descriptions of our fellow-citizens whose case requires further legislative protection. Instead of any enumeration on our part, we respectfully refer to the recommendations of the Harrisburg convention, which will be submitted to your consideration, and which we fully approve.

Submitting the premises to the serious consideration of your honorable bodies, your memorialists pray you will afford such relief as the pressing necessity of the case requires.

SEPTEMBER 20, 1827.

20TH CONGRESS.] No. 815. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 14, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

Your memorialists, citizens of Orangeburg district, in the State of South Carolina, believing that the proposed woolens bill will, if passed into a law, not only violate the Constitution, but in its operation be highly oppressive, and may in its consequences endanger the harmony of the Union, respectfully submit the reasons of their objections to the said bill.

The power to lay and collect duties and imposts was vested in Congress, your memorialists apprehend, to raise a revenue to meet, in part, the expenses incident to the wholesome administration of the Government, and thereby avoid modes of taxation less burdensome and obnoxious; and in the constitutional exercise of this power no laws can be enacted expressly prohibitory in their character. The operation of all such laws will be partial and oppressive, and, by encouraging monopoly, give an undue preference to one section of the Union. In all our commercial regulations the general welfare and permanent harmony of our Confederacy should be consulted.

A power to lay and collect prohibitory duties on all articles will enable Congress, under the pretext of encouraging national industry, not only to exercise a control over and give a direction to our capital, but to the various occupations and pursuits of life—a power which would paralyze individual enterprise, prevent a free and full development of the intellectual and physical resources of the country, and introduce in the place of equal laws a system of favoritism and oppression.

The tariff of 1824 has already rendered the great agricultural interest of the country in some measure tributary, by excluding it from the advantages of a cheaper market; and the proposed duty on woolens, your memorialists fear, is but an insidious revision of said tariff, which, if extended to every other article, must diminish the most profitable branch of the revenue, and completely subject the consumer to all the exactions of legalized monopolists. A tax on foreign commerce is felt less rigorously by the consumer, and is admitted to be most compatible with the sound policy of free States; but where such a tax is avowedly imposed to force into existence new employments, by excluding all competition, the consumer will be burdened with a direct tax by Government to meet a deficit of revenue, and doubly burdened by his fellow-citizens with the payment of a high premium on the necessaries of life to support manufactories which should follow the progress and share the protection of all other occupations. A diversified and successful employment of the industry and capital of our fellow citizens your memorialists regard as the foundation of national wealth and independence. When spontaneously flourishing and enjoying together the protection of equal laws, we will always extend a fostering support to their advancement and prosperity; but your memorialists do protest against that policy which would, contrary to the true spirit of our free institutions and the natural progress of improvement, promote one employment by laying a tribute and imposing fetters on all others. The patriot must look forward with fearful apprehensions to the jealous feelings which would be excited, and the dangerous consequences which may result from the adoption of a system so unequal and harsasing in its operations. A choice between the surrender of their constitutional rights and the dismemberment of the Union your memorialists sincerely hope will never be forced on the American people. Your memorialists, with much confidence and hope of redress, submit to the wisdom and justice of Congress their grievances under the present tariff, and pray that they may not be required to make still greater sacrifices by an increase of duties on wool or any other articles.

WM. ROWE, *Chairman.*

EDM. J. FELDER, *Secretary pro tem.*

20TH CONGRESS.] No. 816. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1828.

EXECUTIVE DEPARTMENT, NORTH CAROLINA, *Raleigh, January* 7, 1828.

SIR: In obedience to the wishes of the Legislature of this State, I have the honor to transmit to you a copy of a report and of certain resolutions passed by them at their present session.

I am, with sentiments of great respect, your obedient, humble servant,

JAMES IREDELL.

Hon. SAMUEL P. CARSON.

Report on the alteration of the tariff, contemplated by the woolens bill.

The joint select committee, to whom was referred the following resolution, to wit: "*Resolved,* That so much of the Governor's message as relates to the alteration of the tariff, contemplated by the 'woolens bill,' be referred to a joint select committee," report:

That they have bestowed as much attention to the subject referred to them as the time not necessarily devoted to other subjects of public importance would permit, though, they are willing to admit, not

as much as the importance of the matter would seem to demand. The committee, in examining the subject referred to them, were not disposed to enter into any refined speculations in political economy, for they are sensible that the object of the resolution submitted to the consideration of the Legislature, and referred to them, may very easily be obtained by a brief examination of the subject, addressed to the reason of the country, and the sound understanding of that body under whose authority they act.

The committee are aware that there is no portion of the American people more attached to the Union, and more deeply sensible of the great benefits which might be expected to flow from it, conducted upon the principles upon which it was first formed, than the people of North Carolina; they have never, at any period of our history, even under the strongest political excitement, endeavored to embarrass the Government, or the administration of those to whose it was intrusted, otherwise than by the right of suffrage. They have seldom expressed a legislative opinion upon the measures of the General Government, being, at all times, willing to give a full and fair opportunity to those charged with the management of public affairs of being "judged by their measures." But a crisis has arisen in the political affairs of our country which demands a prompt and decisive expression of public opinion. Under such circumstances, silence would be injustice to ourselves, and a want of candor to the other States of the Union.

The committee are of opinion that interest, either pecuniary or political, is the great point of union, from the smallest association up to the Confederacy of these United States; and that whenever a system of policy is pursued by the General Government which strikes at the very foundation of the Union, it is the right of every member of the Confederacy to call their attention to the fundamental principles upon which the Government was formed, and, if they persist in measures ruinous to themselves, the question may fairly be discussed whether the checks and balances of the Government have not been overthrown; whether they have been instrumental in producing so onerous an effect; and whether the benefits of the Union are not more than counterbalanced by the evils.

The committee will not assert that Congress have no power under the Constitution to lay duties on imports, which are intended to operate as a *protection* to manufactures; they maintain, however, that the *exercise* of such a power, as contemplated by the woolens bill, is a direct violation of the spirit of that instrument, and repugnant to the objects for which it was formed.

The Constitution gives to Congress the power "to lay and collect taxes, duties, imposts, and excises; to pay the debts and provide for the common defence and general welfare of the United States;" and provides that all duties, imposts, and excises shall be uniform throughout the United States. The clear object of "laying impost," therefore, was like laying taxes and other duties to pay the debts and provide for the common defence and general welfare of the Union. That this is the clear and obvious meaning of the power to lay impost is abundantly proven by the proceedings of the convention who formed the Constitution, and the cotemporaneous exposition which it received from its friends. It is conceded that Congress have the express power to lay impost, but it is maintained that *that* power was given for the purpose of revenue, and revenue alone, and that any other use of the power is usurpation on the part of Congress. There is nowhere to be found in the Constitution an express power given to Congress to encourage science, agriculture, or manufactures. The first two are objects of the highest importance to all the States, and of general interest; and yet we hear of no attempts on the part of the General Government to afford them encouragement.

Manufactures in the United States are not an object of *general* but of *local* interest, and yet they have received from the Government not only a moderate and just encouragement under the operation of a tariff of duties on imports for purposes of revenue, but a protection by an enormous duty upon importations, which palsies every effort of the agriculturist, withers the product of his industry, and greatly impairs foreign commerce.

The committee are of opinion that the woolens bill, which received in the Congress of the United States, at its last session, so full and fair an investigation, is a measure, above all others which has ever occupied the attention of that enlightened body, calculated to produce an enormous tax on the agriculture of the south, and to be destructive of revenue. They believe it to be a bill artfully designed for the advancement of the incorporated companies of New England, and admirably adapted to its end. They believe it fatal to the happiness, the morals, and the rights of a large portion of our common country, for it has its foundation in avarice, and consumes every patriotic feeling.

If such is the character and the operation of this measure, who can tell how long this Union can exist under it, and how soon may be realized the soul-chilling prediction that "it is a rope of sand?"

The committee are of opinion that the passage of the "woolens bill," contemplating prohibitory duties of from thirty-seven and a half per cent. to one hundred and thirty-nine and a half per cent., would be nearly, if not quite, equivalent to a non-importation act, and most certainly would it produce a tax of millions annually on the agricultural, the laboring, and the mechanic arts of our country; and this tax on the consumer would be in reciprocal ratio with his wealth, for, while it contemplates no increase of duty on the finer woolen fabrics, in an artful disguise it imposes a duty, very frequently, on the poor man and the laborer of one hundred and thirty-nine and a half per cent. on the raiment which protects him from the inclemencies of the season; and this destructive mystery is hidden under that minimum of the bill which provides that all woolens over forty cents the square yard, and under one hundred and fifty cents, should be valued at one hundred and fifty cents; and the committee are advised that much the largest portion of woolens, both in quantity and value, are included in the minimum price.

The committee are of opinion that if such a duty on woolens does not amount to an entire prohibition, it will so far diminish the revenue on this valuable portion of importations as to render it necessary, in a few years, to resort to the odious system of internal taxation, and of direct tax on the people of these United States.

Impressed with the importance of this subject, particularly as it affects the people of the southern and western States, the committee believe that the subject calls loudly for an expression of legislative opinion, and they therefore recommend the following resolutions:

Resolved, as the opinion of the Legislature of North Carolina, That it is inexpedient for the Congress of the United States to increase the duties on imports.

Resolved further, That the Governor of this State be requested to transmit copies of this report and resolution to each of the Senators and Representatives of this State in the Congress of the United States, with a request that they be laid before that body.

20TH CONGRESS.] No. 817. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the Ontario Agricultural Society respectfully represents: That your memorialists are, many of them, engaged in the growing of wool, for which article they have, latterly, scarcely been able to obtain market or remunerating price; that after having for many years attended, with great care and expense, to the obtaining of the finest wooled breeds of sheep, and the multiplication of their flocks, they now find them greatly depreciated in value; that they attribute this depreciation to the insufficiency of the laws intended to protect our woolen manufacture, and the inadequacy of the duties on foreign wool.

Your memorialists view the interests of agriculture, manufactures, and commerce as inseparably blended and dependent on one another. The extensive establishment of manufactures creates the best and most stable demand for all the products of the soil. Agriculture and manufactures, therefore, must flourish or decline together. When mutually flourishing, they are inexhaustible sources of national wealth, and increase both the ability and inclination of our fellow-citizens for foreign commerce.

Your memorialists believe that if adequate protection to our manufacturers and wool-growers should not be granted, many of the former must be ruined in their business, and the latter be compelled to sacrifice their fine Merino and Saxon flocks to the knife of the butcher. The evil to our country of such results cannot be too earnestly deprecated.

Your memorialists, therefore, respectfully pray that your honorable bodies will give this important subject early consideration, and extend such remedies in the alteration and increase of duties on foreign cloths, and the increase of duties on foreign wool, as you in your wisdom shall deem necessary for the interests of those concerned, and the welfare of our common country.

JOHN GREIG, *President.*

FR. GRANGER, *Secretary.*

CANANDAIGUA, *Ontario County, N. Y., October* 2, 1827.

This memorial having been presented at the annual meeting of the society by Z. Barton Stout, seconded by Jared Willson, was adopted by a unanimous vote of the society.

Z. BARTON STOUT, *Second Vice President.*

20TH CONGRESS.] No. 818. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1828.

At a numerous meeting of farmers and manufacturers of the county of Kent, interested in the success of American industry, holden, pursuant to public notice, at the inn of Oliver Johnson, in Centreville, (Warwich,) on Saturday, the 5th day of January, 1828, for the purpose of adopting such measures as may be thought proper in expressing their opinion on the necessity of extending further protection to the grower and manufacturer of wool, Charles Eldridge, Esq., was appointed chairman, and Stephen Harris secretary.

Resolved, That Christopher Rhodes, John B. Francis, Thomas Holden, John R. Waterman, Charles Brayton, Joseph Manchester, and William Anthony, Esqs., be appointed a committee for the purpose of preparing and reporting to this meeting a memorial to Congress embracing the foregoing object. The committee having returned, subsequently reported the following memorial:

To the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the undersigned, in behalf of a meeting of citizens, the wool-growers and manufacturers of wool, in the county of Kent, State of Rhode Island, convened by public notice in said county on the 5th day of January, 1828, respectfully represents: That the growth and manufacture of wool, involving one of the most important branches of American industry, has long been laboring under a depression and gradual depreciation, which, without the further intervention of the General Government, must ultimately and speedily produce a total inability on the part of the farmer to furnish his wool, or the manufacturer his cloth, in competition with the foreign article. They view the question presented to Congress from nearly every agricultural and from every manufacturing district in the Union as of more importance to the nation than to themselves, though involving their present best interests; for, in this country, where there are so many resources for the application of labor and capital, a ruinous business, for the improvement of which there can be no reasonable expectation, will not long continue to be pursued. If, therefore, it is for the interest of the United States to encourage the productive labor of her own citizens rather than that of the citizens of a foreign Power, which furnishes no market in return for our agricultural products, it appears plain to your memorialists that the true policy of the Government dictates a sufficient encouragement to all branches of domestic industry requiring such aid, to enable those engaged therein to supply our own market at as reduced prices, and with as valuable an article as can be furnished through the medium of importation.

Your memorialists do not consider, merely because a great amount of capital is already invested in the growth and manufacture of wool, the farmer ought to be protected from sending his sheep to the shambles, and the manufacturer from letting his machinery rust; but that the protection should be extended because it is for the interest of the country to encourage the diposal of capital, skill, and labor to this branch of industry. Aware that this subject, in all its relations, has been presented to Congress, and all the arguments in favor of an extension of protection to domestic industry repeatedly urged, it would not become your memorialists to enter into an enumeration of those reasons which, in their opinion, so clearly indicate the justice and policy of affording present relief to the growers and manufacturers of wool. They would, therefore, respectfully represent that they unanimously approve of the proceedings of the convention holden at Harrisburg, in Pennsylvania, on the 30th of July last, and fully accord with the general views and statements presented in the memorial from that convention to the respective Houses of Congress and further pray that the same may meet with their prompt and deliberate attention.

CHRISTOPHER RHODES,
THOMAS HOLDEN,
JOS. MANCHESTER,
CHARLES BRAYTON,
WM. ANTHONY,
JNO. R. WATERMAN,
JOHN BROWN FRANCIS,
Committee.

WARWICH, *January* 5, 1828.

After reading the above memorial, it was resolved unanimously that this meeting approve of the same, and that copies thereof be forwarded by the secretary to the Senators and Representatives of this State in the Congress of the United States.

Resolved, That the proceedings of this meeting be signed by the chairman and secretary, and published in the different newspapers in this State.

CHARLES ELDRIDGE, *Chairman.*

STEPHEN HARRIS, *Secretary.*

20TH CONGRESS.] No. 819. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1828.

Report of a special committee of the Senate of South Carolina on the resolutions submitted by Mr. Ramsay on the subject of State rights.

The following resolutions were submitted by Mr. Ramsay and referred to a special committee consisting of Messrs. John Ramsay, S. D. Miller, H. Deas, Alfred Huger, D. R. Evans, W. D. Seabrook, and Catlett Conner:

1. *Resolved*, That a committee be appointed to inquire into the origin and nature of the Federal Government, so far as to ascertain whether it emanates from the people of the United States at large, or whether it be a compact between the people of the different States with each other, as composing separate and independent communities.

2. That they do also inquire whether, in the event of abuse of power, or violation in the letter or spirit of the said compact on the part of the Congress of the United States, it belongs to the people, as its constituents, or to the State Legislatures, to remonstrate; and, if to the State Legislatures, what measures ought to be adopted by South Carolina for the preservation of her sovereignty.

3. That they do also inquire whether there be any clause in the Constitution of the United States which can authorize Congress so to legislate as to protect the local interests of particular States at the expense of all the United States, and whether domestic manufactures be a general or a local interest.

4. That they do also inquire whether Congress can construct roads and canals within the limits of a State, with or without the assent of the Legislature of such State.

5. That they do also inquire whether Congress, under a power to appropriate money "to promote the general welfare," can appropriate the same to any purposes not immediately referable to the enumerated objects of the Constitution.

6. That they do also inquire whether Congress can legislate, directly or indirectly, upon the subject of slavery, by promoting the object of any society which contemplates the melioration of the condition of any portion of the free colored or slave population of the United States.

JOB JOHNSTON, *C. S.*

The committee, to whom were referred certain resolutions directing an inquiry into the nature and origin of the Federal Government, and whether certain measures of Congress are or are not a violation of the letter and spirit of the federal compact, report:

That they have maturely weighed and considered the subject intrusted to them, and are of opinion—

First. That the Constitution of the United States is not a compact between the people of the United States at large with each other, but is the result of a compact originally formed between the people of thirteen separate and independent sovereignties to produce and constitute a new form of Government,

as will abundantly appear by a reference to the journals of the old Congress, and of the general convention which framed the Constitution.

The first Congress of the United States was that formed by the colonies in 1774 and 1775. It possessed, as is well known, no authority but what arose from *common consent*. The Declaration of Independence having absolved the colonies from all allegiance to the Crown of Great Britain, it became necessary that the powers of Congress should be accurately defined, and hence arose the CONFEDERATION of 1781. This Confederacy not producing the blessings which had been anticipated, and the war of the Revolution having entailed upon the States a large public debt, and the States, at the same time, becoming careless or indifferent in furnishing their *quotas* of this burden, and many of them, indeed, unable so to do from the distresses incident to the want of a common head to regulate commerce, the necessity of new-modelling the existing Government became evident to all. The old Congress, taking advantage of this state of the public sentiment, wisely recommended that a convocation of the States should be held for the purpose of framing a Constitution better suited to the exigencies of the Union. This Constitution, when finished, was to be submitted, in the shape of a proposal, for the adoption or rejection of the different States. Deputies from all the States were accordingly assembled in general Convention, and a Constitution having been finally agreed upon, it was ordered to be published for the information of the people, and each State Legislature was solicited to call a convention for the purpose of ratifying or rejecting it. State conventions were accordingly assembed under the authority of the State Legislatures, and, as soon as the ratifications of nine States were transmitted to the old Congress, arrangements were made to put the new Constitution into operation, and the old Government expired as a matter of course.

If attention be given to the rise, progress, and completion of the new Government, as above stated, it will be seen that the Government of the Union does not emanate from the people of the United States at large, but from the people of the *different States*, as composing so many *distinct and independent sovereignties*.

First. The general convention was recommended by the old Congress, which was a pure *confederacy* of States.

Secondly. The deputies to that convention were elected by the *State* Legislatures.

Thirdly. In all the deliberations of the convention, as to the best form of government for the Union, the votes were taken by *States*, and no measure agreed upon which was not approved of by a majority of the States represented; and,

Lastly. The ratifications of such States as were willing to accede to the new Government were transmitted as the ratifications of so many sovereign States, the assent of each State counting as one vote in making up the majority of *three-fourths* of the States; such an assent of three-fourths of the States being deemed a prerequisite to the Constitution's going into operation. The mere fact of the Constitution "not wholly resulting from a *majority of all the people* of the Union, nor from that of a *majority of the States*, but from the unanimous consent of the several States who were to be parties to it, proves, beyond the probability of doubt, that the act establishing the Constitution, and giving it its binding efficacy, was purely the act of the people of the different States, as STATES, and not of the people at large. The Constitution was thus clearly FEDERAL in its conception and in its CREATION.

It is with great pain that your committee are constrained to observe that this does not appear to be the view of the Supreme Court of the United States. By the reasoning of the court in the case of *McCulloch* vs. *The State of Maryland*, it would appear that the Constitution is regarded by that tribunal as emanating from the *people*, and not from the *State sovereignties;* but it is evident that this opinion is founded on a misconstruction of the term State sovereignty, the Supreme Court contemplating the *State Legislatures* as the only State *sovereignties;* and seeing that the ratifications of the instrument did not proceed from the State Legislatures, but from State conventions of the people, it was natural, under such a view, that the court should deny the doctrine of the government of the Union as proceeding from the States. It is scarcely necessary to remind the legislative body that it is an incontrovertible axiom in Republican politics, and founded on the inherent and natural RIGHTS OF MAN, that the *people* alone, in a State convention, constitute the *true sovereignty* of that particular State; their power, at such a period, being without limits and without control. The ratification of the compact thus proceeding from the State conventions, they necessarily become acts of more binding efficacy, and, consequently, of more complete sovereignty than if they had been done by the State Legislatures. It is not competent for any State Legislature to associate its constituents, the people, in any new form of government with the people of other States. No legislative body can pretend to a power of this kind. A Legislature might have bound its constituents in a league or confederacy. In a confederacy of States the acts of the common council are not exercised directly on the people, but, in practice, go forth with no better authority than as recommendations to the different sovereignties who are parties to the league. It is the people alone, *in convention*, who can enter into a compact associating themselves in a new political relation with the people of other States; and, when they do enter into such compacts, their acts become the acts of sovereign States, and the compact is a compact of States with each other, and not of the people of those States as if they had constituted an entire people. In the formation of the Constitution of the United States it might have been ordered, had the convention willed it, that its ratification was to be derived from the people of the United States, considered aggregately; in which case the will of the majority of all the people of the United States would have been necessary before it should go into operation. But no such rule was adopted, or even proposed in the general convention. "Though the assent of the people was required to be given by deputies selected for the purpose, the assent was nevertheless given by the people, not as *individuals* composing one *entire nation*, but as composing the separate and *independent communities* to which they severally belonged." The vote of each particular State convention was transmitted as the vote of the State as a SOVEREIGN BODY, and not as the act of individuals of that State, as forming its proportion of the aggregate of all the inhabitants of the United States. If there be a fact which determines beyond all dispute the clear intention of the convention that the Government of the Union was to emanate from the State sovereignties, it is that provision in the instrument which regards the ratification as complete as soon as the people of nine States should assent to the Constitution. Such a provision as this would be utterly inconsistent with the opposite plan of making the consent of the people at large prerequisite to its operation; because it might have happened, under such a plan, that *four large States*, rejecting the Constitution, might have composed the majority of all the inhabitants in the different States. It would be a reproach to the sagacity and foresight of the convention to imagine that, if it was the intention of that body that the Government should be *national* and not *federal* in its creation, that it would set forth a proposal, or adopt a plan, by which it was possible that the then

existing Government should cease, and a new Government should go into operation, with the assent of such nine States as might form a *minority* of the people of the United States.

The doctrine of the Constitution of the United States emanating from the people, and not from the States, is, in the opinion of your committee, one of the most dangerous doctrines that can be promulgated; for by it is established the principle that the Federal Government is not responsible for any violation of the compact excepting to the people at large as its constituents. This would be CONSOLIDATION in its *very essence;* it would be to break down the lines which separate the powers of Congress from the powers of the States. It would, at any time, enable a combination of the people of such States as might constitute a majority of all the inhabitants of the Unitsd States, and who have particular local views or State interests to promote, to carry any measure whatever in Congress; and to the people of such of the States as might form the minority there would be no hope of redress. Congress, with the most unfair intentions to the smaller States, might even keep within the letter of the Constitution by assigning, for its acts of oppression to those States, such constitutional motives and reasons as to defy all efforts to counteract its career of injustice by a resort to the tribunals of justice. On the other hand, the doctrine that the Constitution is a compact between the States as so many separate and distinct sovereignties is a doctrine full of comfort and security to every real friend of the Union and of the liberties of the people. The necessary consequence of such doctrine is, that, if the social compact be violated in its spirit or its letter, and that the States have the right to remonstrate and to call back the parties to the original covenant, the remonstrance, coming from such a quarter, will be promptly attended to, and the redress will be comparatively easy and certain, which never can be the case where the people, as a minority, are left to seek their remedy.

It is most fortunate for the people of the southern States that the truth of a doctrine so indispensable to their safety is so immovably founded on the inherent, unalienable rights of man. All legitimate government is in the nature of a trust, and is the result either of a compact between the people with one another, as is the case with a simple consolidated Government, or of States with each other, under a compound or mixed Government: there is no reasoning which can impair a truth so evident. The Constitution of the United States, according to all our ideas of the origin of Governments, is strictly and emphatically a form of government emanating from the States, and the manner in which its powers are to be exercised is matter of convention between those States. The Federal Government has no rights; it has certain duties to perform, and to this end is invested with certain powers. If it exercises any powers not delegated, there must be a responsibility somewhere. And this brings your committee—

Secondly, to the inquiry, whether, in the event of any abuse of power or violation of the letter or spirit of the Constitution, it belongs to the people at large or to the State Legislature to remonstrate. In the opinion of your committee, the responsibility of the Federal Government is of a *two-fold* character. First, it is responsible in certain cases to the people at large, upon whom, by the Constitution, *its power is wholly to operate.* Secondly, it is amenable to the State Legislatures, as representing the same people distributed in separate sovereignties, by whom alone *the Government was created.* In its CREATION, the Government is thus as entirely FEDERAL as, in its operation, it is strictly *national.* The first responsibility accrues whenever the Government abuses any of its delegated powers, or rather injudiciously exercises them to the injury of the people at large, as its constituents. The *second* can only occur when power not delegated is *assumed* to the injury of the people in their separate sovereignties. This distinction, as to the responsibility of the national rulers, results from the mixed nature of our Government. In a simple Government, the only "safeguards for arresting usurpation and preserving the liberties of the people are the *positive restrictions* on power, and the political *responsibility* of those who exercise power to the people on whom it operates." In that state of affairs where the people are held together as one political society, and, as regards civil and political rights, have but one common interest, and have it equally in their power to change their rulers, it is difficult to conceive how power, abused or usurped, can operate beyond its responsibility. But in the anomalous scheme of the mixed Government of the United States, where many representative Governments are bound together in one comprehensive whole, and where it becomes essential that precise limits should be assigned to the jurisdiction of the supreme and the subordinate legislative authorities, it becomes indispensable that the responsibility should be *as well to the people* in their State Governments as to the people considered as one *entire* nation. For maladministration, therefore, in the affairs of the Government, which is neither more nor less than an abuse of the people's trust, it belongs to the people alone, as a nation, to call their rulers to account. This can only be effected at the periods prescribed by the Constitution, when all power returning again at those periods to the people, they may thereafter commit it into other and safer hands. But to the people of the different States, through their organs, the State Legislature, it equally appertains to remonstrate, and to restrain Congress when it would pass the boundary line of its powers, and usurp those which were reserved to the States.

To abuse power and to usurp power are two things, in their nature, totally distinct. Congress, in exercising the discretion with which it is unavoidably intrusted on many subjects, may so abuse that discretion as not only to impair the prosperity, but actually to endanger the safety of the nation: for wrongs of this nature there is no remedy but in a change of rulers. There ought to be no other remedy. There is here no violation of the terms of the social compact of Government between the confederated members, so as to alter the relations in which they stand to each other and to the Federal Government. But when Congress assumes to itself a power unknown to the Constitution, and thus encroaches upon what is reserved to the States, here is an interference which goes to *the destruction of the compact itself;* and to the parties to that compact it solely belongs to insist upon a fulfilment of that compact. Those parties being the people of each different State, it not only is their right, but it becomes a high duty of their local Legislatures to interfere. To consider the right to be in the people at large, and not in the State Legislature, is, as has been already observed, to place the smaller States in the power of the larger; for it is not to be concealed, that the usurpations most likely to take place under the Federal Government will not be such as will endanger any principle of public liberty, or the rights expressly reserved to the States, because there would be but one feeling amongst the people to resist them, and the remedy would be in the hands of the people; but the usurpations to be apprehended will be such as are calculated to promote the interests of such States as form the majority, at the expense of others, which must always be in the minority; to the will of a majority of Congress, when it is in the exercise of its legitimate powers, it is the duty of the minority to submit. At such a time the Government assumes its consolidated form, and obedience is as strictly due to its measures, however injuriously they may operate against the minority, as if it were a simple and not a mixed Government. Not so, however, is it when under a compact between two States. The question presents itself

whether the convention between those States has been adhered to in good faith or not. In a case of this kind *majority* and *minority* are relations which can have no existence. Each State having entered into the compact as a *sovereign body*, and not in conjunction with any other State, must judge for itself whether the compact has been broken or not. The committee here take occasion to observe, that though, under the Constitution, a tribunal is appointed to decide controversies to which the United States shall be a party, and the States may often be willing to leave to such a tribunal many controversies, yet it must be evident that collisions will sometimes arise between the States and Congress, when it would not only be unwise but even unsafe to submit questions of disputed sovereignty to any judicial tribunal. In theory it may be delightful "to contemplate the spectacle of a Supreme Court sitting in solemn judgment upon the conflicting claims of national and State sovereignty, and tranquillizing all angry and jealous passions, and binding this great Confederacy in peace and harmony by the ability, moderation, and equity of its decisions." But our own experience has already satisfied us that it belongs not to mortals to erect a tribunal that shall feel itself wholly impartial on a question between the State and the National Government, and least of all ought the States to consent to make the Supreme Court of the United States the arbiter finally to decide points of vital importance to the States. The conduct of this court, as far as your committee can judge of it, has inspired an universal and a justly merited confidence in the equity of its decisions, in general, where the suit is substantially, and in fact, between the citizens of one State and citizens of another State; nor can they, for a moment, doubt its competency to decide, with the utmost impartiality, all conflicting claims between one State and another State. But it is due to truth to declare that, whenever constitutionality of any act of the Federal Government has been called in question, this court has not so conducted itself as to be entitled to be esteemed a sufficiently impartial tribunal. The court which can confer, by *implication*, on the Congress of the United States a *power to create a corporation* when there exists on the journals of the convention, published under the authority of Congress, the irrefragable evidence that such a power was *proposed* to be *invested* in Congress but *rejected by the vote of that body*, is not more likely to do justice to the State sovereignties than the tribunal which would regard the Federal Constitution as emanating from the people at large, and not from the States, in the face of history and well attested fact. Into both of these errors has the Supreme Court unhappily fallen; but there is a peculiar propriety in a State Legislature undertaking to decide for itself when the Constitution shall be violated in its *spirit* and not in its letter, these being cases in which no court, however well disposed, can be expected to give relief. Three memorable instances of this species of usurpation occurred in the years 1816, 1820, and 1824, where Congress, under every appearance of adhering to the letter of the compact, substantially has violated its spirit. A fourth instance may probably soon occur, which leads your committee to consider—

Thirdly. Whether Congress can so legislate as to protect the local interest of particular States at the expense of all the people of the United States, and whether domestic manufactures be a local or a general interest? On the first part of this inquiry it is believed that there exists no difference of opinion, it being admitted, in and out of Congress, that local interest cannot be protected by the National Government. It is, however, insisted that domestic manufactures must be considered as a general interest. Your committee do not feel themselves bound to enter at large into reasons to show the little foundation there is for such an opinion; and the less disposed are they to urge the question when they recollect that, from every quarter of the State, there has been an almost unanimous expression of the public opinion that manufactures are not a general interest, and that Congress has no power to foster and cherish them. But it certainly belongs to the subject to state that your committee have examined the Constitution with the greatest care, and they can find in no part of it any grant of power to promote any branch of internal industry, or any of the useful arts, by any other means than by the conferring of patent rights for new inventions. That the convention designedly withheld such a general power abundantly appears from the journals of that body already referred to. Two distinct propositions were, at different periods, made to amend the reported draught of the Constitution by conferring on Congress the power in question, but these propositions, together with others relating to *science* and *agriculture*, were not adopted, the convention finally coming to the conclusion that Congress should "promote the progress of science and useful arts by securing, for limited times, to authors and inventors the exclusive right to their respective writings and discoveries"—a clause so exclusive in its mode of expression as to leave no doubt in the minds of your committee that all other modes of encouraging the useful arts, excepting by patents, were to be prohibited.

This view coincides with, and is considerably enforced by, a power reserved to the States "to lay imposts, *with the consent of Congress*, for *other* purposes than the execution of their inspection laws"—a clause which, in the opinion of your committee, is not susceptible of any other explanation than as a provision to enable such States as might be desirous of protecting their domestic manufactures against foreign rivalry to do so by imposing, in their own ports, imposts on the imported fabrics, with the consent of Congress. By referring to the secret debates of the convention it clearly appears that the insertion of this clause was for this purpose alone.

In addition, it may be urged that no interest can be recognized as a general interest within the meaning of the Constitution which each State does not possess in COMMON WITH EVERY OTHER STATE. The design of union amongst the States was, not that Congress should legislate in cases to which the States were separately competent, but simply to regulate such general concerns as would have suffered by the exercise of individual or State legislation. Amongst those general concerns which the States were incompetent to regulate with any advantage, on account of conflicting interest, the most prominent was COMMERCE. To the necessity of a general controlling power to regulate foreign trade, and to no other motive, does the Constitution OWE ITS EXISTENCE. This power the old Congress did not possess. The States had repeatedly refused to grant such a power, because each State thought itself competent to regulate its own trade. But the experience of the first four years which succeeded the war of the Revolution having taught them their error, the people afterwards entreated their local Assemblies to grant such a power to the common head of the Confederacy. In the meantime propositions were made for a convention to frame a new Constitution. Thus it is plain that it was not until the States were reminded, by their own dear-bought experience, that commerce was a general interest that they were disposed to unite even for this so great and so common a blessing to all.

The convention having been convened to form a Constitution, it adopted, as the basis upon which were to be built the powers of the new Government, the PRINCIPLE that all such interests as the States could not separately manage should be transferred to the federal head. It is to be observed that neither in the *old* nor in the *new* compact is there a single subject specified for the legislation of the General Council, in which EVERY State has not an immediate and a very important interest. All the enumerated

powers in these two memorable instruments are referable to WAR, PEACE, INDIAN TRADE, COMMERCE, and FOREIGN NEGOTIATION. The present Constitution was designed to supply all the deficiencies of the Confederation; and by the unanimous vote of the convention it was early decided, as appears by its journals, that the enumerated powers of the new Government should extend to EVERY subject of GENERAL interest. It results, then, as a fair and conclusive argument, that whatever subject was *purposely* excluded from the enumerated powers of Congress by the vote of the convention as an unfit subject for the care of the General Government, could not have been regarded as a general interest. A general power to promote manufactures, agriculture, and science, and to construct roads and canals, was positively and peremptorily excluded; and this, in the opinion of your committee, is an unanswerable reason why these subjects ought to be deemed LOCAL and not general, if it were not already demonstrable to our senses that any particular pursuit of human industry followed by the people of some States, and in which those of other States are not at all engaged, must be a local interest of such States.

Fourthly. Your committee are of opinion that Congress has no power to construct roads and canals within the limits of a State, without a violation of the Constitution. The power of making roads and canals is not an incidental, but is as primary and as original a power as any that Government can possibly exercise. That must be a substantive power, in the strongest acceptation of the term, which involves a right of *jurisdiction* over *soil* and *territory*. From this species of jurisdiction Congress is clearly prohibited by those clauses in the Constitution which confine their jurisdiction to their forts, magazines, dock-yards, &c. But, independent of the plain intent of the instrument itself, as collected from its language, the journals of the convention afford the evidence that it was deemed unadvisable to intrust Congress with any such power. All the *propositions* to include roads and canals amongst the enumerated subjects for the National Legislation were *rejected*. There existed a reason for the refusal of such a power to Congress, which your committee must ever regard as conclusive; which is, that such a power in Congress, as well as in the States, would have been repugnant to the whole scheme and theory of the Constitution. The design of the convention was so to *discriminate* the *objects* which were to appertain to the different departments of power, that what was committed to the charge of one Government should not be interfered with by the other. The great difficulty in distributing power was to adjust the *quantity* with which the General Government should be invested. That point once arranged, each Government was then to be supreme in legislation as to the particular objects intrusted to its care. As the States had been in the habit of making roads, and were fully competent to exercise such a power, and to the greatest advantage, it was not to be expected that they would be willing to yield this, their power over internal improvements. To have admitted, therefore, that a similar power ought to have been invested in Congress, would involve the absurdity of causing the same object of legislation and government to belong to the Federal and the State authorities. There is no such hideous feature as this in the federal compact. If the Constitution be examined with accuracy it will be found that, with the exception of the first two enumerated powers of Congress, (which are *means* and not the *ends* of Government, or rather the power of the Government, coupled with the trusts of the Government,) that Congress must be regarded as supreme in legislation for all the objects intrusted to its management; and upon the same principle that Congress is supreme within its prescribed sphere of action, are the States equally supreme as to all objects reserved to them. If Congress, therefore, can legislate on the subject of roads and canals, the States cannot interfere by exercising a similar power, (for both cannot have jurisdiction,) and *vice versa*. The subject of internal improvements is either a general or a local interest, in the view of the Constitution. It cannot be both. If it be a general interest, Congress must either be supreme in its jurisdiction, by extending its laws to such roads and canals, to the exclusion of State authority, or it cannot act at all. There can be no concurrence of legislation, except as to the means of executing the different trusts for which each Government was created. The bare admission that a State can lawfully exercise sovereignty on any particular object of civil government, deprives Congress of any power over the same object; the States having already exercised the power over roads and canals, and there being no specific grant of any such power to Congress, the right is in the States and not in Congress. Nor can your committee conceive that the assent of a State Legislature to internal improvements made by Congress within its limits can confer on that body the power in question. Congress has no right to exercise any power whatever but what it receives by special grant from the States. If a State were to give to another State a power to construct a road or a canal within its limits, this would amount to a transfer to that State of a portion of its sovereignty. Were Congress to be permitted to receive such a power as a gift from any particular State, it would be to say that Congress can exercise a new sovereign power unknown to the Constitution, with the consent of or by the act of one State. This principle will hardly be contended for. It is too clear that Congress can exercise no power but what it receives from the States by the terms of the Constitution. If the better to promote union it needs additional powers, the mode prescribed is an amendment to the Constitution. If a State can part with the smallest portion of its sovereignty to Congress, it can part with the whole; and if Congress could receive an accession of power in this way, it would be to put it in the power of one State to amend the Constitution, when the instrument requires the assent of three-fourths, and that assent to be given in another way. There are other views of this subject, but they have been so often taken, and are so familiar to our citizens, that your committee forbear to dwell longer on this head, but proceed to that part of their inquiry which asks—

Fifthly. Whether, under the power "to promote the general welfare," Congress can expend money on internal improvements, or for any purposes not connected with the enumerated objects in the Constitution? What has been already urged in the preceding inquiry will be equally applicable to this. If Congress has not the power to construct roads and canals in the States, it cannot appropriate money for such purposes. Congress has either all power over certain trusts, or it has no power at all; there can be no such operation in either Government as *indirect* legislation. In order to arrive at any particular object, each Government is fully invested with complete authority to approach the legitimate objects of its own special or general care, *honestly*, *fairly*, and *openly*. If, in the desire to attain any particular object, either Government discovers that it cannot reach that object otherwise than circuitously, this is conclusive to show that it belongs not to itself, but to the opposite Government. The term "general welfare," in the opinion of your Committee, means nothing more than the national welfare. That can only be deemed an appropriation for national purposes, which can be referred to objects of general interest in all the States. These objects being all specified in the federal compact, it follows that, if any appropriation of money has not a direct and natural relation to some one or other of those objects, it cannot constitutionally be made. The enumerated objects in the Constitution (with the exception of the power to levy and appropriate money) are the trusts which Congress is to execute. The power to appropriate money to the

general welfare, is not a *naked* power. It is the power *coupled* with the trusts, to execute which the Government was created.

Sixthly. As to that part of the duty of the committee which solicits an inquiry whether Congress can extend its legislation to the means of meliorating the condition of the free colored or slave population of the United States, your committee have no hesitation in saying that this is a subject in which there can be no reasoning between South Carolina and any other Government. It is a question altogether of feeling. Should Congress claim a power to discuss and take any vote upon any question connected with the domestic slavery of the southern States, (excepting it be to devise the means of prohibiting the slave trade, the only power which it has by the terms of the Constitution,) it is not for your committee to prescribe what course ought to be adopted to counteract the evil and the dangerous tendency of public discussions of this nature. The minds of our citizens are already made up, that if such discussion appertain as a matter of right to Congress, it will be neither more nor less than the commencement of a system by which the peculiar policy of South Carolina, upon which is predicated her resources and her prosperity, will be shaken to its very foundations. In the opinion of your committee, there is nothing in the catalogue of human evils which may not be preferred to that state of affairs in which the slaves of our State shall be encouraged to look for any melioration in their condition to any other body than the Legislature of South Carolina. Your committee forbear to dwell on this subject. It is a subject on which no citizen of South Carolina needs instruction. One common feeling inspires us all with a firm determination not to submit to a species of legislation which would light up such fires of intestine commotion in our borders as ultimately to consume our country.

Lastly. It remains for your committee to report what measures, in their judgment, the Legislature ought to take in order to preserve the State sovereignty. This is an inquiry of awful importance, and the committee are not disposed to shrink from the duty thus devolved on them.

That the Congress of the United States has been in the exercise of powers not warranted by the Constitution, and that the tendency of some of their measures is calculated seriously to impair the vital interests of South Carolina by diminishing her foreign commerce, whilst the effect of other measures is to augment the patronage of the General Government, and thus to diminish that necessary *State* influence which is essential to the preservation of the State sovereignties, and which State influence can only exist when the States are to manage all internal concerns, are truths daily becoming more and more evident to all our citizens. South Carolina has uniformly exhibited, as your committee believe, an illustrious example of a steady and an unalterable devotion to the Constitution of the United States. She has never, at any time, arrayed herself against the Government of the Union, but has discharged all her duties as a member of the great American family with fidelity and cheerfulness. When the National Treasury was exhausted, and the enemy pressing us at every point of our long-extended coast; when it became necessary to relieve the embarrassments of the General Government by a direct tax upon our citizens, this State, in anticipation of the assessment by Congress, threw open her Treasury and subjected it to the national demands, and actually appropriated her funds for the general welfare before the passage of the law. If she has not hitherto carried her complaints to the great Council of the Nation, it was not because she had no cause of dissatisfaction, but because she always cherished the hope that some reaction in public sentiment throughout the United States might take place, and that the people themselves would, in time, be made sensible of the danger of a limited body, like that of Congress, being permitted to transcend its powers, and would apply the remedy. But these hopes, your committee regret to state, are all dissipated, and they too plainly perceive that to submit longer to the evils of misrule, founded on usurpation, can have no other tendency than to invite such assumptions of power, from time to time, as must inevitably merge all power and all influence in one consolidated Government. It is fortunate for South Carolina that she has hitherto endured, with so much patience, and certainly with not less patriotism, the aggressions of Congress upon her sovereign rights. If, after all her efforts to dissuade the National Councils from persisting in claims which, if pursued further, must inevitably cut us off, limb by limb, from the great body politic, Congress shall, contrary to the hopes of your committee, still persevere in its claims to exercise extensive powers by construction, and thus drive into alienated feelings a portion of the Union hitherto so devoted to union, South Carolina, in such an event, will have at least the consolation to know that the fault will not be hers.

But, in the opinion of your committee, it is all important that whatever is to be done by South Carolina ought to be so done as to impress upon the minds of the Congress of the United States that she does not at this conjuncture approach the National Legislature as a suppliant or as a memorialist, but as a SOVEREIGN and an EQUAL. When Congress acts within the sphere of its expressly delegated powers, the supremacy of its laws and its power must be acknowledged by all the States; and from no State in the Union will obedience to the decrees of the Supreme Council be more cheerfully rendered than by South Carolina. But when the ground of complaint is a violation of that great covenant which binds together the Confederacy, each member is as sovereign, when it demands a fulfilment of that compact in its spirit as well as in its letter, as it was when it originally ratified that agreement. In all communications, therefore, which may be necessary between a member of the Confederacy and the common head, it behooves that member not to forget her *rank* as a *sovereign*. She must cause her sentiments to be conveyed to Congress in a manner so imposing as to evince that she could have the intercourse regulated as is proper between one sovereign and another; and that whilst she would earnestly solicit a continuance of that friendship and good feeling which has so long been characteristic of the American family, she is yet unwilling to yield rights of vital importance. To the safety of States it is indispensable that Congress should be in perpetual remembrance that it is a sovereign and supreme body only when it extends its authority to legitimate objects of government; and that, at *all other* periods, the States are equally supreme, and never so supreme as when they are about to demand the fulfilment of the original compact. If there be one feature in our well-contrived and complicated system of government which justly demands the admiration of the world, upon which the eye of the patriot loves to gaze, and the hopes of millions of freemen in both hemispheres seem to be suspended, it is that contrivance in the great work of the Constitution by which one general and so many subordinate and local sovereignties, all of them so many orbs, differing from each other in magnitude and splendor, most wonderfully move together in "concerted and harmonious action," diffusing the blessings of the light of knowledge and of civil and religious liberty over a portion of the globe made up of a people dissimilar and heterogeneous in their habits, and differing from each other in almost everything but in their innate love of liberty. Let not, then, the harmony, order, and connexion by which our comprehensive scheme of representative Governments has been hitherto preserved be interrupted by the falling of any of the orbs from their

spheres; but let "their motions and their influences be all so regulated and exercised that, whilst they shall in a very intelligible and striking manner declare the wisdom" of their great author, the convention, and forever "constitute the magnificent heralds of a praise" which belongs to that body, to which neither speech nor language is adequate, they shall at the same time distribute all that is necessary for the political health, comfort, and security of all the inhabitants of the United States.

In the opinion, however, of your committee, this harmony of the several State Governments can only be preserved by the promptest notice by the State Legislatures of any infraction of the Constitution, however unimportant it may appear at the time in its effects upon the general community. In a system by which so many political bodies are to be in constant motion, the most trifling aberration of any one from the circuit in which it is designed to move breaks up the great design. It thus becomes a high duty in every State Legislature to use its best exertions to bring back the Government to its first principles whenever it departs from the compact; and this it may always do with calmness, with moderation, and yet with becoming firmness. If the United States Government can construct one road or canal within the body of a State, it may construct a thousand, and thus draw within the vortex of its influence what properly belongs to the States. If Congress can expend one thousand dollars to purposes not enumerated in the Constitution, it may expend a hundred millions; and in this way so increase its patronage, by jobs and contracts, as to leave little or nothing for the subordinate authorities to do. If Congress can promote the domestic manufactures of some States, it can, with the same propriety, encourage, at its caprice, northern or southern agriculture, or other branches of internal industry, and thus constantly *impinge* upon the local concerns of the States. If it can legislate in one way on the colored population of the United States, it may legislate in various other ways. If, in a word, the General Government is to use constructive powers, or can pass any laws but such as are *necessary and proper* to the execution of its enumerated powers, then is the object of the enumeration of powers in the instrument defeated. In stepping across the boundaries of power presented by the Constitution there are no degrees in the guilt of that Government which is the trespasser, whether the trespass be committed by the State or the Federal authorities. It is the intention which accompanies the act which constitutes the crime; and this intention is as much embodied into the guilt of usurpation if one dollar be taken out of the pockets of our citizens to encourage a monopoly as if Congress by one "fell swoop" were to prostrate all the powers of the State Legislatures.

If there be an evil in our country the anticipation of which we ought to dread, and which, if it ever were to take place, would destroy civil freedom itself, it is that which would consolidate all the influence which is now distributed between so many States into the hands of the Federal Government. From the consolidation of all *influence*, the transition is natural and easy to the consolidation also of all *power*. Such a Government, in a country where the interests of its different sections must be more or less dissimilar, would be the worst species of tyranny which a minority of some States could possibly endure by the oppression of others. The only remedy, as your committee have already observed, is for the State Legislatures to be watchful, and to remonstrate with Congress when necessary. That the period has arrived when remonstrance is not only proper, but its neglect would be a crime, seems to be the voice of South Carolina.

The committee, in conformity with the above report, recommend the adoption of the following resolutions:

1. *Resolved*, That the Constitution of the United States is a compact between the people of the different States with each other, as separate independent sovereignties; and that, for any violation of the letter or spirit of that compact by the Congress of the United States, it is not only the right of the people, but of the Legislatures who represent them to every extent not limited, to remonstrate against violations of the fundamental compact.

2. *Resolved*, That the acts of Congress known by the name of the tariff laws, the object of which is not the raising of revenue or the regulation of foreign commerce, but the promotion of domestic manufactures, are violations of the Constitution in its spirit, and ought to be repealed.

3. *Resolved*, That Congress has no power to construct roads and canals in the States for the purposes of internal improvements, with or without the assent of the States in whose limits those internal improvements are made; the authority of Congress extending no further than to pass the "*necessary* and *proper* laws" to carry into execution their enumeratud powers.

4. *Resolved*, That the American Colonization Society is not an object of national interest, and that Congress has no power, in any way, to patronize or direct appropriations for the benefit of this or any other society.

5. *Resolved*, That our Senators in Congress be instructed, and our Representatives requested, to continue to oppose every increase of the tariff with a view to protect domestic manufactures, and all appropriations to the purposes of internal improvements of the United States, and all appropriations in favor of the Colonization Society, or the patronage of the same, either directly or indirectly, by the General Government.

6. *Resolved*, That the Governor be requested to transmit copies of this preamble and resolutions to the Governors of the several States, with a request that the same be laid before the Legislatures of their respective States; and also to our Senators and Representatives in Congress, to be by them laid before Congress for consideration.

SENATE, *Wednesday, December* 12, 1827.

Resolved, That the Senate agree to the report. Ordered that it be sent to the House of Representatives.

JOB JOHNSON, *C. S.*

IN THE HOUSE OF REPRESENTATIVES, *December* 19, 1827.

Resolved, That the House do concur with the Senate in the foregoing resolutions. Ordered that they be returned.

By order of the House:

R. ANDERSON, *C. H. R.*

The State of South Carolina, by his excellency John Taylor, Governor and Commander-in-chief in and over the State aforesaid, to all to whom these presents shall come:

Whereas I have diligently and carefully compared the preamble and resolutions (in writing) hereunto annexed and appended with the original of said preamble and resolutions as contained in the archives of

the Senate of the State of South Carolina, as well as with the minutes of the proceedings had on the same in the House of Representatives of the said State:

Now know ye that the said writing hereunto annexed and appended, containing thirty pages, is a true and perfect copy of the preamble and resolutions adopted by the Senate and House of Representatives of the State of South Carolina in December last, and that the extracts from the minutes of the proceedings had thereon are also true; and that Job Johnson is clerk of the Senate aforesaid, and that R. Anderson is clerk of the House of Representatives aforesaid.

Given under my hand and the seal of the State, in Columbia, this first day of January, in the year of our Lord one thousand eight hundred and twenty-eight, and in the fifty-second year of the Independence of the United States of America.

JOHN TAYLOR.

By the Governor:
R. H. WARING, *Deputy Secretary of State,*
For ROBERT STARK, *Secretary of State.*

20TH CONGRESS.] No. 820. [1ST SESSION.

REGULATIONS FOR GOODS TRANSPORTED COASTWISE FOR DRAWBACK.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 14, 1828.

Mr. CAMBRELING, from the Committee on Commerce, to whom was referred a resolution of the 7th instant, instructing them to inquire into the expediency of repealing the 37th section of an act passed March 1, 1823, and of extending one of the provisions of that act to merchandise transported by land and water for debenture, reported:

The 37th section of the collection law of March 1, 1823, was originally introduced into the act of April 20, 1818. It requires that all merchandise transported coastwise, whether for drawback or consumption, if in the packages in which it may have been imported, shall be accompanied by an extract from the invoice, verified by the oath of the importer, and certified under the official seal of the Collector. This provision was found to be very inconvenient in practice and utterly useless as an additional guard to the revenue; and the committee which revised this act in 1823, with the approbation of the Treasury, omitted it in the bill reported. It was afterwards added upon motion of a member, and now forms the last section of the act. Further experience proves that it answers no useful purpose and affords no additional security to the revenue. Such a provision is very properly applied to merchandise transported for the benefit of drawback, because in issuing debentures it is necessary to identify the merchandise on which the duty may have been paid or secured; and these cases are accordingly provided for in the 80th section of the act of March 2, 1799, and in the 29th section of the act of March 1, 1823. The 37th section of the latter act was designed to be applied to other merchandise than that which was transported for debenture. It is probable this provision was intended to enable our revenue officers to discriminate between merchandise which had been regularly entered and that which had been smuggled. But to accomplish that object the provision should be extended to millions of packages which are constantly in transportation throughout the country, and for which our laws require no certificate whatever. If the provision was designed to detect packages which had been smuggled into the country, it should rather follow those which travel into the interior; for it is not at all probable that such merchandise would be transported coastwise to invite the inspection of our custom-house officers. As a guard against smuggling, the provision is a mere nullity, from the facility with which it may be evaded. If the merchandise be changed from one package to another, or if even a piece be taken out, the provision does not apply to the case. It is impossible for any custom-house officer to know or to ascertain whether merchandise be in the packages in which it was originally imported, and the owner's oath to the contrary places it beyond the reach of the provision. Before the introduction of this section all merchandise, whether in foreign packages or not, was liable to seizure upon suspicion of having been illicitly introduced into the country, and it is so still, without the provision in question.

If it was practicable to enforce this section it would give infinite trouble. A merchant who may import 500 packages of merchandise might be obliged to visit the custom-house 500 times, give 500 extracts from his invoice, and take 500 oaths; and the Collector might be obliged to issue 500 certificates under his official seal. The House can judge of the extent of the operation of this section if executed, and of the time and expense which would be uselessly wasted in certifying that the duty had been paid or secured on merchandise which, from the very nature of the case, must have been regularly entered. To avoid all this unnecessary trouble, those who understand the law are obliged to break their packages or to transfer the merchandise into other packages. There are many, however, who know nothing about this provision, and who are obliged to go through all its forms. But the greatest injury resulting from it falls on merchants from our interior, who are, from their residence, presumed to be less acquainted with our revenue laws. They make their purchases generally in New York; their merchandise is shipped coastwise, and they return home through some inland route. A month after their return, and perhaps at the moment when they are expecting to receive their merchandise for the annual sales of the season, they are informed by their correspondent at some one of the ports, as the case may be, on the Atlantic, that some of the packages are detained because they were not accompanied by the certificate requirrd in the 37th section of the act of March 1, 1823; and there they must remain until the owner can write to New York for the necessary certificate, and transmit it perhaps to New Orleans. If this provision afforded substantially any additional security to the revenue, the committee would be cautious in recommending

its repeal, notwithstanding all its inconvenience; but they are satisfied that it is injurious to commerce and unnecessary to the revenue.

The 28th section of the same act allows merchandise for drawback to be transported coastwise from the district into which it was imported to two other districts. By the use of the word *coastwise*, the section has been construed, and no doubt properly, to embrace only such merchandise as may be transported by sea, and not to that transported by land, or by land and water. It was no doubt intended to extend the privilege to all merchandise transported for debenture upon such routes as were authorized by law, whether coastwise or inland, and such a modification of the act is recommended.

The committee accordingly submit for the consideration of the House a bill repealing the 37th section of the act of March 1, 1823, and to amend the 28th section of that act.

20TH CONGRESS.] No. 821. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 15, 1828.

Anti-tariff meeting of the citizens of Lancaster district, S. C.

At a very numerous and respectable adjourned meeting of the citizens of Lancaster district, S. C., Colonel John Montgomery was called to the chair, and John Sims appointed secretary. The committee, to wit, A. Perry, Colonel N. Barber, Dr. B. Jones, Captain Wm. McKenna, L. R. Gibson, R. W. Gill, and John Montgomery, appointed at a former meeting for that purpose, presented the following memorial, which was read, and unanimously adopted:

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the citizens of Lancaster district, South Carolina, respectfully showeth: That your memorialists, in common with their southern brethren, have viewed with reasonable apprehension the oppressive and unequal effect of the system of protecting duties, almost amounting to prohibition of trade and fair exchange with foreign Powers, necessarily increasing the price of articles the southern States are compelled to consume, and in the same proportion diminishing the price of the raw material which they have for barter or exchange. Thus the proceeds of the husbandman's honest industry is sacrificed, without a sufficient equivalent, to the avarice and interest of the manufacturer.

Your memorialists most cheerfully acquiesce in the imposition of any duties, however oppressive, that are necessary to the support of Government; but such as are designed for the purpose of protecting one part of the community to the manifest injury of all others, they most solemnly, yet respectfully, remonstrate against, as unjust, unequal, and iniquitous.

Your memorialists beg leave to submit to your honorable body that, on the most careful investigation and correct estimate, founded on experiment, they have ascertained that no southern farmer, however attentive and successful, clears more than three per cent. on his capital, and a large majority do not average one per cent. at the present price of produce.

Your memorialists will not descant on the constitutionality of the tariff, but respectfully submit, whether Government, after ten years of protection extended to the manufacturers by the repeated increase of duties on imports, should not only withhold further protection, but, in their wisdom, deliberate on the justice and propriety of decreasing the duties at present imposed on many articles of foreign growth and manufacture.

Your memorialists will ever pray.

JOHN MONTGOMERY, *Chairman.*

On motion of L. R. Gibson, it was

Resolved, That the memorial be printed, and that the member to Congress from this election district be furnished with a copy thereof; and that the members to the State Legislature from this district be furnished with copies thereof; also,

Resolved, That the proceedings of this meeting be published in the Camden Journal, Columbia Telescope, Cheraw Spectator, and Carolina Gazette.

JOHN MONTGOMERY, *Chairman*

JOHN SIMS, *Secretary.*

20TH CONGRESS.] No. 822. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 21, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The undersigned, citizens of Boston and its vicinity, respectfully represent: That after all that has been laid before Congress and the public on the subject of a further protection and encouragement of the

domestic growth of wool and manufacture of woolen fabrics, they should have submitted the subject to the wisdom of the Legislature, without any further representations respecting it, had it not been intimated to Congress, in a memorial of their fellow-citizens of this city and its vicinity, that the former memorials to Congress from this part of the country, in favor of a further encouragement of this branch of production, expressed only the opinions of an "interested and organized minority;" that any further increase of duties upon imported woolens and other articles would be highly injurious to the great body of the community; and that such is believed to be the "prevalent, if not the general, opinion of judicious and intelligent persons of this part of the United States."

In reply to these representations, the undersigned respectfully state it as their "sincere belief" that a very large majority of the people of this city and vicinity, after repeated and most mature examination of this subject, are decidedly of opinion that a further protection to the domestic production of the raw material and the manufacture of woolens is called for by the great and permanent interest of the whole country; and they think they may safely say that among those who entertain this opinion there are, at at least, some who may be considered "judicious and intelligent persons."

It has been intimated that many of the most discreet manufacturers are opposed to an increase of these duties. There may be some persons concerned in some of the various branches of domestic manufacture who are thus opposed; but, upon the most diligent inquiry, we have not been able to find any persons, among those within our knowledge, practically acquainted with the state of this branch of manufacture, who are opposed to the increase of these duties.

In some of the publications upon this subject it has been urged upon Congress that the advantages of England for carrying on this manufacture are so superior that it is greatly for the interest of the United States to depend on foreign supply, and that this country would thereby annually save many millions of dollars. The measure thus virtually proposed, and gravely and strenuously urged upon Congress and the country, therefore, is, that the duties on imports should be reduced, and the whole flood of goods, of all descriptions, from all parts of the world, be freely admitted, especially from those countries which admit a very small list of our raw products in return. We are told that in this way clothing and other articles of convenience and necessity will come very low to the consumers, the poor and middling classes will be greatly relieved of their present burdens, and the country, by thus annually saving we know not how many millions, will make rapid progress in national and individual wealth.

It is acknowledged by these very persons who thus urge the great advantages of depending upon foreign supply that this policy would be attended with some temporary "inconvenience" to the American manufacturers and artists; that is, their establishments would be broken up, their property annihilated, and themselves thrown out of employment and ruined. And then the consolatory suggestion is made that "there is a never-failing resource in agriculture," and they are kindly reminded of the happy condition of farmers. This mode of argument has been used more particularly in relation to the woolen manufacturers; it is, however, equally applicable to the whole body of artists and manufacturers; for there is no principle in our political system whereby those concerned in the production of wool or woolens are denationalized and outlawed; on the contrary, the very persons who undertake to convince the nation how much it would augment our wealth and resources to import our clothing, at the same time disclaim anything like "hostility to manufactures," and especially they "deem the manufacture of woolens the most advantageous."

When it is asked how we are to pay abroad for the immense additional importation, to save the nation these incalculable millions, no satisfactory reply is given. Our only resource for this purpose, after the exportation of all our bank stock and specie, is our raw products; when every man in the nation knows that the foreign markets will hardly bear the quantities we now send, and that any considerable additional quantities would depress the prices so as to diminish instead of increasing the whole aggregate value in foreign ports; and we might, with economy, in such case, follow the example of those Dutch who destroyed a part of their pepper to sustain the price of the rest. Those persons who recommend to the manufacturers to go and cultivate the wild lands point out no new market for the additional raw products thus to be supplied. It is too evident that no such market can be found; and they therefore conclude with the position, that if we cannot find a foreign market for our products to pay for additional importations "we shall cease to import." The undeniable and irresistible facts lead to this conclusion: The country, then, is to save these many millions by additional importations, which it has no means to pay for, and which it therefore cannot make.

It is unnecessary to dwell upon the common-place maxims on the subject of open competition and free trade. Whatever might be the effect of a policy founded on these maxims in some imaginary state of the world, it is too evident to be disputed that, in the actual state of things, no nation of the civilized world can act upon these maxims without bringing upon itself inevitable and total ruin. Though it should be demonstrated that if all the combatants were to throw away their shields the combat would be just as equal and much more economical, it would be preposterous magnanimity in one of them to act singly upon this notion.

We are told, however, that moderate duties afford the best and surest encouragement. If those who use this argument admit that we are to give encouragement to useful manufactures, and especially those of woolen, which are acknowledged to be the most useful and important, then the whole general argument is at an end, and the only question is, what mode and degree of encouragement are the most suitable, economical, and effectual for this purpose; but if the meaning is that a hesitating, trivial encouragement tends the most effectually to establish a business and bring it to perfection, or is the most economical to the community, the proposition will not prove to be sound. The very object of encouragement is to induce people to undertake or continue to pursue a business. It certainly will not be said that a trifling encouragement will induce as many persons to go into a business, and to so great an extent, as a more liberal one. The only meaning of this proposition, then, is, that if too liberal encouragement is given, it will render a business too profitable to those concerned in it, and so too expensive to the community, until the number of competitors in production is increased sufficiently to meet the demand. And this has not, to our knowledge, ever been denied; and we do not believe that any manufacturer or grower of wool in the United States will dissent from this doctrine.

The question, after all, then, will relate to the degree of encouragement commensurate with the particular case under consideration. To say, in general, that a moderate degree is the right one, is evidently as erroneous as to fix upon an excessive degree. The degree sought is the one adapted to the case, and neither moderate nor excessive. When the nation declares it to be for the general advantage that a certain branch of production should be pursued or continued in the country, and offers it protection for this purpose, it does mean, undoubtedly, to put the business upon such a footing that those who embark

their property, industry, skill, and prospects in it shall stand an equal and fair chance in comparison with the industry, capital, and skill of the community generally. And if, from any error in calculation or unforeseen event, it proves that the business has not been put upon such a footing, it follows that the intended and supposed degree of encouragement has not been given.

This is precisely the case with the woolen business; and the question is, whether the additional encouragement necessary to sustain and perfect it shall be given, or whether, by leaving it to struggle with obstacles too great to be overcome, it is to be prostrated, and the parties interested and the community subjected to the loss of the immense amount of property invested in it, and the immense amount of industry dependent upon it, together with all the skill and arts that have been accumulated in the country, at an incalculable expenditure, for its prosecution. With the destruction of this branch of industry must be annihilated the capital invested in innumerable flocks of sheep, the collection of which, from great distances in this country, and from Spain, Germany, and other countries abroad, has cost the agriculturists and the country a vast outlay.

Some persons treat this whole interest as quite an inconsiderable matter, and seem to think that the temporary importation of cloths at a lower price is an adequate compensation to the country for this vast waste and destruction of the national capital and resources. But we cannot believe this to be the prevailing public opinion; there is, indeed, sufficient evidence that it is not so. If the interest and welfare of the country call for this sacrifice, we have no doubt that our fellow-citizens interested in the growing or manufacture of wool will be as ready to make it as any body of men in the community. We do not, however, believe that the public welfare calls for this devastation; but, on the contrary, we are well convinced that the public interest is the same with their interest.

We know it has been said that a great part, as much as three-quarters, of our woolens were of domestic manufacture, out of domestic wool, when the duties were only five per cent.; and it is asserted at the same time that as great or a greater proportion will be so supplied, though no alteration should be made in the tariff. In this estimate the domestic household manufacture is included, which is well known to have constituted our only resource until the late war, with the exception, we believe, of one small establishment near Hartford, mentioned in Mr. Hamilton's well known report on the subject of domestic industry. We are told, also, that a large part of our consumption is now supplied in the same way; and the same persons who make this statement estimate that the country loses, in consequence of the present duties, 38, 58, 74, or 80 per cent. upon its *whole* amount of the domestic production of woolen cloths. For ourselves, we are at a loss to see how those who make their cloths out of their own wool in their own houses are in any way affected by the tariff. It costs them no more days' labor to make their cloths now than it did in 1792. The great improvements in manufacture, introduced into the country at the expense of the woolen manufacturers, and the great improvements in the breed of sheep, introduced at the expense of the extensive wool-growers, have enabled them to make better cloth with the same labor. What confidence, then, can be placed in the estimates by which it would appear that the country is now losing some millions, more or less, by these very household manufactures?

But it is the very persons who used formerly to carry on household manufactures, and who have ceased to do so, that apply to Congress, from all parts of the country, to raise the duty on imported woolens; and for the reason, that if the duty is low they shall be compelled to go back to the household manufacture. While the manufactures of wool, as well as other branches of useful manufacture, are sustained and continue to be scattered throughout the country, the farmers can clothe the families better and cheaper by the exchange of their agricultural products in the domestic markets thus created for them. They do not ask the Government for a regulation to make cloths cheap, which will, at the same time, strip them of the means of buying those cheap cloths.

As to the question whether the establishments can be supported at the present rate of duties, there is but one opinion amongst those acquainted with the subject. They all agree that it is impracticable. Many persons not personally interested in the question, but having a good knowledge of the circumstances, concur in this opinion, and if we had no other evidence we should put some confidence in their statements. But the facts are stated upon which this opinion is founded. The best investments in the broadcloth establishments cannot be now sold for over fifty or sixty per cent. of the actual cost. The most material facts, however, appear in the tariff itself.

The advantage given to our manufacturers over foreign competitors in our market has been stated by some at 58, by others at 74, and by others at even 80 per cent.; and they proceed to say that a business which cannot be sustained by such encouragement deserves to be broken up; as if there was anything like such encouragement given by the tariff of 1824 to the domestic woolens. The duty upon these goods is thirty-three per cent.; that upon wool thirty. The expense of the wool is, on an average, over one-half of the cost of the cloth to our manufacturers, though, from statements recently laid before the public, it would appear to be but two-thirteenths. The preference given to the domestic over foreign cloth is thus reduced at once to about eighteen per cent. of the foreign price, and between twelve and fourteen per cent. of the price in our own market. This appears from the inspection of the tariff. The advantage in favor of our manufacturers is still less than this, since the freight of imported wool is about four times that of the quantity of cloth it would make, and the domestic manufacturer has to pay the freight on the wool, or a price sufficient to cover it; whereas the foreign manufacturer is only subjected to freight on the cloth. The operation of the tariff is, therefore, to make the wool in our markets fifty per cent. higher than in the English, and such have been the actual sales, by one house in Boston, of more than 360,000 pounds of wool imported from Europe during the past year. The comparative cost of the material, then, to the domestic and foreign manufacturer, instead of being as 13 to 10, as the tariff would show it, is, in fact, as 15 to 10. It is evident, then, what a very small advantage the present tariff gives to our own manufacturers over foreign competitors, and this in a business which, to be carried on to any advantage to the public, requires very large investments in the commencement, and which, as yet, is comparatively new, for industry and capital have been extensively turned to this channel only a few years, and it would be asking too much of American industry and skill so soon to bring to perfection and reduce to the most economical system of production a manufacture requiring so numerous a body of skilful workmen and so long a train of auxiliary arts. The advantage thus possessed by our manufacturers does not amount to one-half of the difference in the value of money in this country and England. These are not facts lying merely within the knowledge of manufacturers, and for which we have only their authority; the evidence of them is accessible to every member of the community. Where, then, are those many millions which are represented to be annually paid by the country for the benefit of the

woolen manufacturers? The wonder is, not that this business is depressed, but that the skill and industry of the country has been able to sustain it at all under these disadvantages.

It is said, however, that we import but a small portion of the wool manufactured in the country. This proportion has been represented not to be over four or five per cent. This estimate is considered to be much too low. There has been imported from Europe, in the single port of Boston, within the past five weeks, 450,000 pounds, in addition to the previous importations and sales. But it is immaterial to the present question whether this proportion is four or forty per cent. Is the operation of the present tariff such as to bring the material to our manufacturers fifty per cent. above its cost to their foreign competitors? Of this there is no doubt. Whether this is effected by the importation of a twentieth or tenth part, or any other proportion, it will have the same effect in relation to the manufacture.

When this operation of the tariff is stated by the manufacturers to show what is the actual advantage given to them in our market, they are reproached for complaining of the encouragement given to the wool-growers. We do not understand them to make any such complaint. They state that as long as we import wool the tariff has the effect of making it dearer in our markets; and that, in giving encouragement to the manufacture, regard should be had to the effect of the duty upon the price of the raw material in our market. They say that the encouragement given to the two branches of business should not be so apportioned as to defeat one, and thus ruin both. If the manufacturers are asked whether the wool growing shall be protected, or the farmers whether the manufacture shall be protected, they will make the same reply. They have joined in their applications from all parts of the country; they know that their interests are the same, and we believe that those of the whole community are the same with theirs.

They have also asserted that it is the most economical to the country to give these branches *effectual* protection; for as soon as individuals know that they have a decided and permanent advantage over foreign competition, they turn their industry and capital more readily and extensively into these channels, and the sooner the domestic products will be reduced to the lowest prices at which the domestic resources, skill, industry, and improvements, can afford them. This proposition, so far from involving the absurdity which some persons seem to imagine, appears to us so evident as to admit of no dispute or doubt.

It has been said that all parts of the country are not engaged in the growing or manufacture of wool, and therefore the protection given to these branches is partial and unequal. Is it, then, a principle that no art, industry, or improvement is to be introduced or favored by the Government unless it is to be found in every State and every county? Those who ask protection to any kind of industry ask it for every part of the country where the people are disposed to introduce it. There could be found no country in the world into every part of which every particular branch of business will be introduced. Does it follow from this that a country must stand still and make no improvement or progress?

But whatever might be the case in respect to other employments of capital and industry, the experience of the last w demonstrates it to be of incalculable importance to the WHOLE country that we should be able to supply ourselves with the ordinary articles of clothing from domestic resources. We do not think there are many persons in any part of the country, whether east, west, north, or south, who would wish to see the nation under the necessity of making a truce or granting a license, in time of war, to procure a supply of clothing. And at whatever rate we may estimate American skill and resources for this kind of production and manufacture, the experience of the last war does, we believe, fully prove that, for periods of peace and hostility taken together, our most economical supply is to be obtained from our own resources.

Besides the difficulties, embarrassments, and distress occasioned by a want of clothing and blankets in time of war, we believe that the mere pecuniary losses and sacrifices brought upon the country during the last war, from our poverty and destitution of resources for this supply, will far exceed the whole expenditure to the community for establishing and perfecting these branches of production, so that we shall be able to export woolens as we now do cottons, and thus gain another resource for paying off those foreign balances which are already beginning again to accumulate against the country.

The undersigned, therefore, respectfully represent that a regard to the national industry, resources, wealth, and safety, requires a further protection to these branches of production; and they earnestly recommend the subject to the consideration of Congress as one in which, more than any other, the national welfare and prosperity is concerned.

20TH CONGRESS.] **No. 823.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 21, 1828.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The undersigned, citizens of Plymouth and Kingston, Mass., respectfully represent:

That, inhabiting a district of country where the interests of agriculture, commerce, and manufactures are practically blended, we feel towards each that favor with which men regard their means of subsist-

ence. We have, therefore, never been unmindful of the general policy of our Government in respect to these sources of national prosperity. We are now more than ever anxious, because, as it seems to us, your honorable body is summoned, in a manner unusual and imposing, to extraordinary legislation.

The manufacturers of woolens now ask for an impost on woolen goods, not for the purpose of *revenue*, but *prohibition*. The charges of importation, with the present duty, (which is 38 per cent.,) are calculated to amount to 57 per cent. on these fabrics. This is not considered adequate protection; and it seems to be allowed that adequate protection is nothing short of an impost which shall tell, not in the books of the Treasury Department, but in the profit and loss account of the manufacturers. Your memorialists cannot consider such legislation otherwise than as impolitic and unjust.

There have been four general revisals of the tariff, viz: in 1789, 1816, 1820, and 1824. Every such revisal we have viewed as the result of mutual compromise between the various interests of this extensive Confederacy. To break in upon this adjustment, in any one particular, naturally creates dissatisfaction and jealousy; as in every case, more or less, it must be attended with some change of property. It becomes, indeed, a just cause of serious alarm when any one class, acting with combined effort, under pretence of a special case for favorable interference, are promoting schemes which, in their operation, must impair the revenue and cripple the industry of others.

Your memorialists question the soundness of the principles assumed, and the equity of their proposed application, and cannot feel confidence in the visions that foretell the prosperity that will follow. The manufacturers have pressed so hard on the public favor as to force the other interests of the nation into an attitude of defence. The burden of the tax will be severely felt, because, as it is more particularly the object to exclude the coarse fabrics, those who are least able will pay most.

In the present state of this country, the effect will not be manifested in the supply of labor to a redundant population, but in diverting people from employments in which they are satisfactorily engaged to another which the Government prefers. If this be the effect, as your memorialists believe, the legislation proposed is instituting a control over the lawful private pursuits of the citizens which had better be left, as heretofore, to themselves. The undue favor to one employment is made up, directly or indirectly, of restrictions upon others. Our country's history shows what impatience the people have always felt under laws restraining their individual enterprise. There has been a time when they were not permitted to make their own hats; and it is now proposed to check their accustomed business to oblige them to make their whole apparel. We are aware of some essential points of difference in the two cases, but, as respects the principle just referred to, they are liable to the same objection.

In other countries avarice has craved the monopoly, and been successful in obtaining it; or an ignorant and indolent people may have needed the stimulant which the direct exclusion of foreign fabrics gives to the manufacturer of their own. When once such an artificial system is erected, the demolition of it is fearful, as it would bring in jeopardy every other interest of the State. The fall may be more disastrous than the evil of its continuance. But in a country and population like our own, where there is no monopoly of the soil, and no want of intelligence, where lives an ever-wakeful spirit of enterprise, your memorialists feel the deepest conviction that the lawful occupations of the people, which in the aggregate constitute the wealth and prosperity of the Republic, will be best promoted by a freedom from legislative restraints, as far as is consistent with those principles which the Government at the beginning adopted and acted upon. There is no department of industry which has not passed its days of trials. These trials have been surmounted, and have left, as straitened circumstances always will in a wholesome state of morals, the impress of increased diligence, ingenuity, and economy.

Your memorialists appreciate, with sincere gratitude, the principle that the laws are but the emanation of the people's will. But it is not to be disguised that our own is precisely that form of government under which a forcing, artificial system can be fixed on a secure foundation. The burden would create discontent, and discontent will have a remedy, unappalled by the consequences it would involve. Even if the principles against which we protest are abstractly and constitutionally correct, it would be the part of wisdom to apply them with great caution.

Your memorialists would respectfully press on the attention of your honorable body a due consideration of the weighty objections to a frequent alteration of the tariff, or to an interference with it on partial grounds. We forbear a detail. It is unnecessary. When men, in order to carry on advantageously their private concerns, are laid under the necessity of constantly speculating on financial changes, industry suffers, because its attention is divided and its results are uncertain.

We therefore request your honorable body to resist all attempts to procure an increase of the duties on woolens, or on any other article of foreign importation.

JANUARY, 1828.

NATHANIEL CARVER,
JOSEPH BARTLETT, Jr.,
NATHANIEL M. DAVIS,
and 288 other persons.

20TH CONGRESS.] **No 824.** [1ST SESSION.

IN FAVOR OF DUTIES ON IMPORTS OF SALT.

COMMUNICATED TO THE SENATE JANUARY 21, 1828.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The manufacturers of salt in the county of Kanawha, in the Commonwealth of Virginia, respectfully beg leave to represent: That they have witnessed, with deep solicitude, the disposition which has been

manifested in the present as well as in the last Congress, to repeal, in whole or in part, the present duty on imported salt. A measure threatening such serious injury to the home manufactories generally, and which so alarmingly involves the fortunes of your memorialists, will, they hope, render an apology unnecessary for offering to the consideration of your honorable body such facts and reflections as may tend to illustrate the question under consideration, and show the disastrous consequences which must follow its adoption. In performing this duty to themselves, your memorialists beg leave to advert, in the first place, to the more prominent facts connected with their own establishments.

It, perhaps, ought to be premised that the salt district extends along the Great Kanawha for a distance of about ten miles, commencing about two miles above the mouth of Elk river, and extending up the Kanawha to near the mouth of Witcher's creek. Within this distance, no instance is known of a failure to obtain good water on either side of the river by boring the necessary and usual depth; nor have any experiments (and there have been many) been attended with success, either above or below these limits, unless the water obtained near the mouth of Cole river, with which the experiment in the manufacture of salt is now making, should form an exception. The hills which bound the valley of the river throughout the salt district, as well above as below, are the depositories of rich, and apparently inexhaustible bodies of coal. In these two important materials—water strongly impregnated with salt, and fuel for its evaporation—we find all that is necessary for giving an abundant and cheap supply to any desirable extent.

During the first settlement of the western country, salt, which had been scarcely attainable at any price, and which for some time thereafter commanded, on the Ohio river and its navigable branches, a price as high as five dollars per bushel, and fluctuated from two to three dollars for several years before the commencement of the Kanawha salt works, was reduced, from the supply early furnished from this quarter, to one dollar per bushel. And at the commencement of the last war with Great Britain, notwithstanding the increase of price in the foreign article, from the embargo and other interruptions to our foreign trade, the salt establishments on the Kanawha had so multiplied as to furnish a supply as low as from fifty to sixty-two and a half cents per bushel.

In November, 1814, when salt was selling at from five to six dollars per bushel in many of the Atlantic towns, and when the exchange between the merchant and the farmer was two barrels of flour for a bushel of salt, the Kanawha manufactories, keeping pace with the increased demand occasioned by the loss of our commerce abroad, produced weekly 12,000 bushels of salt, and supplied the wants of the country at seventy-five and eighty-seven and a half cents per bushel.* During the whole of that second struggle for independence, so important were the Kanawha supplies, that the price never rose beyond a dollar per bushel, except in a very few instances, at the manufactories; while much the larger proportion made during this period was sold at from seventy-five to eighty-seven and a half cents per bushel. The army of the northwest was, in a great measure, dependent for salted provisions on the Kanawha manufactories; and although contractors and speculators may, in some instances, have received exorbitant prices for the article, it is confidently believed that the operations of that army could not have been conducted to the brilliant close of its campaign on the river Thames without this source of supply.

Shortly after the war it was found necessary to discontinue many of the wells previously in use, as the only means of keeping the quantity manufactured within the limits of the demand for the article, at prices defraying the expense of production. This precautionary measure did not, however, long secure the manufacturer from a depression in price below what would reimburse his expenditure and leave a moderate profit on the capital employed. The depression of the salt business on the Kanawha was owing to two causes:

First. The establishment of other works, in the western country, which although not as favorably situated in relation to the strength of water and facilities of fuel, yet were, from their local situation, enabled to supply districts of country which before had received Kanawha salt, at much less expense in the transportation.

Secondly, and mainly. The want of return cargoes for our shipping engaged in foreign commerce induced their lading with salt, either as ballast, or at a very small freight. The disproportion between the outward and inward bound cargoes of the vessels engaged in the Orleans trade occasioned a very sensible increase in the quantity of salt brought into that port, and a consequent diminution in the price. The steamboats, multiplying on our western waters, found, in the bulky products of our extensive and fruitful country, abundant employment in their descending voyages; but the return cargo, although perhaps equal in value, occupied much less of the tonnage of the vessel, and salt became the general article with which the cargo was made up. A very small freight, or the prospect of a small profit on the price at New Orleans, was preferable to returning empty, or nearly so. So strongly did these causes, and particularly the latter, operate upon the Kanawha manufactories, that, during the year 1825, salt frequently sold at the salt works as low as from fifteen to twenty cents a bushel, in casks well nailed and ready for shipping; and, in the year 1826, the article further depreciated, and was sometimes sold as low as twelve cents per bushel. So ruinous had the business become, that in the beginning of the year 1827 many of the furnaces were discontinued, and the business reduced in extent. The diminished operation now carrying on is shown by the table appended, marked A, from which it will be perceived that the number of furnaces in operation during the past year was fifty-six. The same table shows that nine furnaces remained idle throughout the year. It ought here to be remarked, that the entire number of salt wells is sixty-one—of capacity sufficient to furnish a supply of water for near 100 furnaces; and that the restricted demand *alone* prevents the profitable employment of this excess of water already obtained, and the creation of new supplies by sinking new wells. The quantity of salt manufactured within the year is shown to be 787,000 bushels. The cost of manufacturing, barrelling, &c., is ascertained to be nineteen and a half cents per bushel; that it is sold by the manufacturers at prices averaging twenty-five cents per bushel; that, in the production of this quantity of salt, employment is given to four hundred and seventy-one regular laborers; and if those employed in cooking, washing, &c., be added, the number will exceed five hundred; that one million six hundred and ninety-five thousand bushels of coal are annually drawn from the bowels of the earth, and consumed in the evaporation of near sixty-four millions of gallons of water. The difference between the cost of production and the selling price will be found to be five and a half cents per bushel, producing an aggregate of profit equal to forty-three thousand two hundred and eighty-five dollars. This sum, when applied to the capital employed, amounting, as shown by the same table, to $548,000, gives an annual interest of less than eight per cent., without any allowance for the coal and water annually consumed.

It may not be uninteresting to examine this branch of industry with reference to its influence on other pursuits. It gives employment, as has been seen, to more than five hundred persons, who are

* Niles' Weekly Register, vol. 7, November 19, 1814.

principally drawn from agriculture, a pursuit which evinces the excess to which it is carried by the low prices of every article which it produces, and converts that number from growers into consumers of the products of the soil. It also confers more direct and important advantages on this very general pursuit, by creating a market for $47,600 worth of agricultural produce. The mechanic arts are not less invigorated by these establishments. One hundred and thirty thousand barrels are annually wanted, in which salt is packed for exportation, and which cost about $32,000. This item of expenditure gives activity and comfort to a great number of families near the shores of the Ohio and Kanawha rivers, and confers value on the timber of our forests, which, but for this demand, would be entirely useless. Arks, or flat-bottomed boats, are required in considerable numbers, and to about the same amount, for the transportation of the salt; the building of which gives profitable employment to the owners of saw-mills, as well as to the mechanics whose skill and industry are engaged in their formation. Less extensive, but not less useful, are the employments given to the blacksmith, the wagon-maker, and various other artisans, whose annual bills amount to near $8,000.

That important branch of industry, the manufacture of iron, derives, perhaps, more aid from the capital employed in salt making, than from an equal amount devoted to any other pursuit. Each salt furnace requires, in its erection, about sixty tons of cast iron, in kettles, pans, grates, bars, &c., costing from sixty to seventy dollars per ton; about half a ton of bar iron, which now commands in the markets on the Ohio river one hundred and twenty dollars per ton, and to which is to be added between twenty-four and twenty-five tons of wrought iron, and near one hundred and twenty tons of castings, annually required by the aggregate of the furnaces for repairs and for replacing worn out and damaged articles.

It is a matter of regret that more accurate knowledge is not possessed of the various quantities of salt made in the different parts of the United States. By the reports of the marshals, made in the year 1810, it appears that the quantity manufactured annually was then 1,238,365 bushels, worth $1,149,725.* But the quantity has evidently greatly increased since that period. In attempting an estimate of the quantities now annually produced by the home manufacturers, in addition to those that are ascertained, entire certainty cannot be arrived at, but the following will be, probably, found reasonably correct:

	Bushels.
At the Kanawha salt works, (A)	787,000
At the salt works in the county of Washington, Va., (supposed)	300,000
At Kiskaminitas, Penn., near Pittsburg, (supposed)	300,000
In the State of Ohio, Muskingum, (supposed)	150,000
In the State of Ohio, Chickamauga, (supposed)	15,000
In the State of Ohio, Yellow creek, (B)	60,000
At Bulltown Salines, Lewis county, Va., (C)	16,000
At Big Sandy, Cabell county, Va	10,000
At Conimaugh, Penn., (supposed)	20,000
At Illinois Salines, (D)	100,000
At Montezuma, Ky., (E)	115,000
At Goose creek, Ky	100,000
At Little Sandy, Ky., (supposed)	20,000
At Ohio Salines, (supposed)	20,000
The extensive works of New York, (supposed to produce upwards of)	1,000,000
Along the coast of the eastern States, from sea water, from recent (supposed) estimates, (F)	600,000
From the various small manufactories in the United States, not included in the above, (supposed) at least	500,000
Total	4,113,000

From the Treasury Report of the 26th of February, 1827, the importations of the year ending 30th September, 1826, amounted to	4,564,000
Domestic	4,113,000
Total	8,677,000

If the capital employed at the other domestic works bears the same relation to the quantity of salt produced by them which is found to exist at the Kanawha Salines, the entire investment can be but little short of three millions of dollars; and if the employment of labor is in the same ratio, the persons engaged in salt making must be upwards of four thousand.

The very heavy importations of salt, which will be disclosed by the following table, (compiled from the Treasury Reports,) while the domestic as well as the foreign article has depreciated in price in every quarter of the country, very clearly evinces the inadequacy of the present duty as a protection to the home manufacturer, and must so continue while the want of profitable return cargoes for our shipping engaged in foreign commerce, and a like want of upward-bound freight for our carrying vessels on the rivers connecting the interior with the maritime ports, continue to exist.

* Niles' Weekly Register, vol. 6, p. 330.

Abstract showing the quantity of salt imported into the United States from the commencement of the Government to the 30th of September, 1826.

Do.....do.....1809	360	42			

During the period embraced by the above table, the bounty on pickled fish and salted provisions exported from the United States amounted to $542,555. The allowance to vessels employed in the fisheries, to the close of the year 1819, amounted to $2,330,517. The meaus of ascertaining the subsequent allowances are not at hand.*

From the year 1800 to 1807, inclusive, a period of eight years, when our commerce and agriculture were in the most flourishing condition, and when but little salt was produced in the United States, the average importation was 3,817,825 bushels; and from 1823 to 1826, inclusive, when the home supply had risen to upwards of 4,000,000 of bushels, the average import of these four years is found to be 4,171,272 bushels.

The foreign trade in salt is presented in another aspect by the following abstract, formed from the Treasury Report of the 20th of February, 1816.

Salt imported into the United States from the 1st of October, 1825, to the 30th of September, 1826.

From whence imported.	Quantity.	Value.	Cost per bushel.	
	Bushels.	*Dollars.*	*Cents.*	*Mills.*
Swedish West Indies	6,482	1,227	18	6
Danish West Indies	4,658	481	10	3

Total	4,564,720	667,058

* Niles' Weekly Register, Vol. 20, p. 54, vol. 32, p. 202, and Annual Treasury Report, February 25, 1827.

It will be perceived that of the salt imported into the United States upwards of three-fourths of the entire quantity is from Great Britain and her dependencies, and that more than four-fifths of the amount paid for salt in foreign countries is expended in the invigoration of the industry of a people who close their markets upon our breadstuffs and almost the whole of our other agricultural productions; who tax our tobacco so as greatly to limit its consumption among them; and whose whole system of legislation is calculated to sap the foundations of our manufactories, and to render us dependent on them for the most important articles demanded by our wants.

The importance of cherishing the manufacturing industry of our country; of preserving the capital invested in manufactures which rely for their success on the continuance of the uniform principles of past legislation; the importance of this policy to our home trade, and its effects on our foreign commerce, with the influence which it may have over the destinies of the nation, whether we enjoy the blessings of peace or endure the calamities of war, are so ably and so justly considered in the luminous report recently received by Congress from the head of the Treasury Department that it would be supererogation in your memorialists to do more than refer to this document.

In examining the effect which must be produced by a repeal of the duty on salt, or any serious reduction in that part of the revenue, we are naturally brought to inquire, what influence will this measure exercise over our fisheries, that nursery of American seamen and important source of national wealth? But, as this view of the subject will be examined with the aid of better lights and more intimate knowledge elsewhere, it will suffice to refer to the able and interesting report made by Mr. Jefferson, in 1791, which gave rise and permanency to the protection since received by this important branch of marine industry,* and to the amount of drawbacks and bounties with which the fisheries have since been encouraged and sustained, an encouragement which seems to depend upon the continuance of the duty on salt.

It is objected to the duty on salt that it is a *war* tax, and ought to have terminated with the necessity to which its origin was owing. Whatever may have been the occasion which gave rise to the reimposition of the duty on foreign salt, the subsequent course of the country and of the Government seems clearly to have recognized it as a permanent part of the revenue, and to have given it a permanency of character by which the citizens were encouraged to invest large sums of money in the production of a home supply. In support of these conclusions, your memorialists beg leave to refer to the attempt which was made in 1817 to reduce the duty on salt. The most serious consideration was then given to the proposition by Mr. Crawford, at that time at the head of the Treasury, and by a committee of the House of Representatives, over which that able and distinguished statesman, Mr. Lowndes, presided. On the 5th of January, 1818, Mr. Crawford reported against the proposition, and on the 3d of March, in the same year, Mr. Lowndes reported, concurring in the inexpediency of the measure.

From this period, at least, the policy of the Government was considered as settled, on the fullest advisement, and investments were made with the most perfect confidence in the continuance of that protection by which the domestic manufacture of salt was invited.

The discussions of last winter seemed to proceed on the ground that the western manufacturers would be but slightly, if at all, affected by this repeal. The fallacy of this impression must yield to the facts which have been disclosed, and could never have been adopted had the revolution in the internal trade of the country, occasioned by the introduction of steam as a propelling power, been fully adverted to. Illustrative of the effect produced by steam navigation, and of the extent to which foreign salt now enters into the supply of the markets of the interior, the following facts are furnished:

On the first day of June last there were in store at Nashville two thousand two hundred and seventy-six sacks of imported salt, containing upwards of four bushels each; at Louisville there were above two thousand sacks of the same kind; and at Cincinnati three thousand bags of coarse salt, containing two bushels each. Maysville and the towns above, on the Ohio river, had generally received supplies proportionably large, but the quantities were not ascertained with equal certainty; and it is a fact of general notoriety that the Ohio river continued in good boating order until near the middle of July, and that the steamboats returning from New Orleans in June and July brought up unusually large quantities of salt from the then scarcity of upward-bound cargoes.

That foreign salt will continue to be distributed through the western country in large quantities, under the operations of the present impost, cannot be doubted when it is known that the present rate of freight on heavy articles from New Orleans to Louisville is *fifty cents* per hundred, and that in the spring months, when freight is scarce, much is brought up at *thirty-seven and a half cents*. From Louisville to Pittsburg the rate of transportation is usually the same as from New Orleans to the Falls; and should salt be cheapened, as anticipated by the friends of the repeal, to fifteen cents in our maritime ports, we may reasonably expect a foreign supply on the whole extent of the Ohio river at from twenty-five to thirty cents per bushel, until the domestic competition is put down, and whenever the revival of the home supply may be again attempted.

The exorbitancy of the impost, the oppressive burden which it imposes on agriculture, and its unequal operations upon the country, are urged with apparent effect in favor of the repeal. If the present duty is regarded as a protection and encouragement of this branch of our national industry, the facts disclosed show that it is inadequate. That it has not increased the burdens of agriculture will be evidenced by a comparison of the present prices in our seaports with the rates at which it sold during the years when no duty was imposed. Then scarcely any domestic competition was encountered by the importer, and the price was regulated by mercantile avidity for profit. The home supply, now equalling one-half of the entire consumption, entering strongly into competition with the imported, is found to have cheapened the article to the consumer more effectually than the entire abolition of this impost. That particular and small districts of our country have not equally enjoyed the benefits of the home supply is ascribable to the imperfect state of our commercial intercourse with those districts; but those barriers to free and cheap communication are rapidly disappearing. The New York canals, now completed; the Ohio and Erie canal, now in a successful course of execution; the Pennsylvania connexion of the trade of the Alleghany and Monongahela with that of the Delaware; the Chesapeake and Ohio canal, apparently about to be commenced under very favorable auspices; the Baltimore railroad, designed to connect the northern end of the Chesapeake bay with the Ohio river; the improvements commenced by Virginia, with a view to commercial lines of intercourse between her western navigable waters and Hampton Roads; and the multiplication of vessels propelled by steam on all our navigable rivers, give the most ample

* Niles' Register, vol. 6, p. 283.

assurance of the general diffusion of domestic salt; and should we be again visited with the calamities of war, seriously affecting our foreign intercourse, the eastern country as well as the west may safely rely upon an adequate quantity of this essential article from home production, provided the existing manufactories are not destroyed by repealing the duties by which they are now sustained; and that, too, of quality and price securing the consumer against any serious inconvenience from the loss of the foreign supply.

That the western country must be deeply and injuriously affected by the repeal of the salt duty will, it is believed, be evident from a slight examination of the subject. At present the supply is abundant and the quality so improved by rigorous inspection that no difference is understood to be made between the foreign and domestic article by the consumer. The price nowhere exceeds fifty cents per bushel on the Ohio river from Pittsburg to Louisville, and on the lower Ohio and its large tributary branches it is believed to vary only between this sum and seventy-five cents, showing that the advance on the first cost barely covers the expense and risk of transportation, wharfage, drayage, storage, commissions, cooperage, loss on the quantity of the commodity, and a small profit to those who deal in the article. If a repeal of the duty enables the importer to supply the country on cheaper terms, the prostration of the home produce must inevitably follow, and this formidable competition once overcome, no barrier will be found to an elevation of price far beyond the present rate. To rely on mercantile patriotism for a supply, on the terms to which the price of salt might be, in the first instance, reduced, would be as vain as to expect the revival of manufactories which foreign production might crush as soon as erected. These considerations apply to a period of peace and of uninterrupted foreign commerce. But what would be the condition of this important quarter of the country in the event of a war by which our commercial marine should become inactive? Stripped of a home supply of this indispensable article, great inconvenience, if not distress, must be experienced in the first instance, and although the pressure of such a calamity might reanimate the abandoned manufactories at home, that very pressure, with the uncertainty of continuance, must give birth to exorbitant prices.

Ohio and Kentucky have peculiar interests which must suffer by a repeal of this duty. They have each salt establishments, furnishing, in exchange for other productions, extensive supplies to their people, and which must experience the blightening effect of unrestrained importations; and, so far as the people of those States are constrained to look abroad for additional quantities, Virginia is their natural and beneficial market. If mistaken views should induce a preference for foreign salt, money alone is the exchangeable commodity with which it can be obtained. On the other hand, the Kanawha manufactories receive annually from Kentucky and Ohio, in iron, bacon, flour, leather, corn, corn meal, barrels, furniture, and merchandise, an amount more than four-fold as great as the entire profits on the Virginia salt vended in these States. So extensive and advantageous is the intercourse between the Kanawha salt works and Cincinnati that the workshops of the latter furnish most of the implements and machinery required by the former; and could the extent of the annual supplies of merchandise from thence be ascertained, they would abundantly verify the importance of the Kanawha trade to that city.

Virginia is deeply concerned in the proposed measure; and it is hoped that her able and vigilant statesmen will not be inattentive to the interests which she has at stake. The production of salt is among the few manufactures in which she has been particularly successful. She furnishes at this time more than one-fourth of the whole domestic supply, and possesses, on the Holstein and on the Great Kanawha, facilities for the manufacture of salt to an extent equal to the entire quantity which may be demanded by the southern and western States. To develop these sources of wealth by opening lines of commercial communication for the distribution of the products of her salt works has for some time been a prominent point in her policy. She, cannot therefore, fail to see with regret an attempt to arrest their progress and destroy their usefulness.

Upon a review of the whole subject, your memorialists cannot but be satisfied that, however it may be disguised, this is really a question between the shipping interest on the one hand, and the home manufacturers on the other; and that, whatever may be the extraneous but plausible considerations urged in favor of the measure, this great and absorbing interest is mainly consulted in the efforts to reduce the impost upon salt. And although your memorialists have, in common with their fellow citizens throughout the Union, regarded, with pride and pleasure, the salutary influence of the protection and favor by which this portion of the national wealth has been enlarged and employed, they can but hope that this branch will not be further enriched by the spoils of the entire interest now invested in the home manufacture of salt; and they most respectfully but earnestly pray that the present duty on imported salt may *not* be reduced.

Signed by order and on behalf of the manufacturers of salt, at the Kanawha Salines, the 9th day of January, 1828.

Abstract showing the present state and condition of the salt business in the county of Kanawha and Commonwealth of Virginia.

Proprietors' names.	Number of furnaces.	Capital in lands, wells, coal beds, furnaces, machinery, &c.	No. of laborers employed in salt making, coal digging, &c.	No. of bushels annually manufactured, of 50 lbs. each.	Cost per bushel for manufacturing barrels, and packing.	Average price per bushel at the manufactories.	Quantity of water required to produce 50 lbs. of salt.	Quantity of coal annually consumed.	Quantity of wrought iron used annually.	Quantity of cast iron used annually.	Amount of agricultural products annually consumed.	Annual amount of mechanics' bills.	Remarks.

We do hereby certify that the foregoing abstract has been carefully compiled, and with as much accuracy as the nature of the subject admits of
Given under our hands this 4th of January, 1828.

JOSEPH LOVELL,
LEWIS RUFFNER.

B.

Extract of a letter from Peter Yarnall, Esq., of Wheeling, Va., dated August 31, 1827.

"I returned two days ago from the salt works on Yellow creek, in Ohio. There are at that place thirty-nine wells furnishing salt water. The amount of capital invested in the salt business is estimated at $124,800. The cost of manufacturing averages from two dollars to two dollars and twelve cents per barrel containing five bushels. The quantity manufactured is between eleven and twelve thousand barrels, which is sold at from two dollars and twenty-five cents to two dollars and fifty cents per barrel. It takes four to six hundred gallons of water to make fifty-six pounds of salt, with the exception of one well, of which one hundred and ten gallons of water furnish a bushel of salt."

C.

Extract of a letter from Colonel John Haymond, of Louis county, Va., to Judge Summers, dated

BULLTOWN SALINE, *October* 13, 1827.

"Not having attended to the salt business myself for several years past, I am not able correctly to answer your inquiries, but the following may be considered as nearly correct as the nature of the case will permit. Only one salt furnace is now in operation on the Little Kanawha. The quantity of salt made is from 8,000 to 10,000 bushels per annum. Another furnace is erecting, which will probably make 6,000 or 8,000 bushels. This, however, must depend very much on the quantity of water which can be drawn from the well. The amount of capital invested in the salt business on this river, including lands, wells, fixtures, machinery, &c., may be estimated at $15,000, and the money necessary to conduct a furnace for one year at $2,000. The number of persons employed in making salt at one furnace is from eight to ten. The cost of making salt per bushel, computing interest on the capital invested, may be 40 or 45 cents. The quantity of water required to produce a bushel of salt is not correctly ascertained; but it has sometimes been estimated that sixty-four gallons would make a bushel, and, if the water could always be obtained in its purity, my impression is that sixty-four gallons would be the correct calculation; but the difficulty (at least with us) of always getting the water in its purity makes it proper to say about ninety gallons.

"From the 1st October, 1825, until 1st June last, the price of salt here was 50 cents per bushel, and since that time it has been 75 cents. Salt, however, has been so cheap elsewhere, and money so scarce in this part of the country, that very little can be obtained for salt at any price. It is but a little more than two years since the salt works here have been in successful operation, although salt has been made for many years on a small scale. The average price of salt in this country when we first commenced making was $4 per bushel, and the average price for a number of years previous to 1825 was $2."

D.

Answers to certain questions submitted to the manufacturers of salt at the Illinois Saline.

"*Question* 1. What amount of capital is invested in the manufactories of salt at the Illinois Saline, near Shawneetown, including the real and personal estate as well as the money used in carrying on the business?

"*Answer.* Fifty thousand dollars.

"*Question* 2. To what number of persons do these manufactories give employment?

"*Answer.* Three hundred.

"*Question* 3. What is the aggregate quantity of salt manufactured per annum?

"*Answer.* One hundred thousand bushels.

"*Question* 4. What does it cost the manufacturers to produce it ready for market?

"*Answer.* Thirty-seven and a half cents.

"*Question* 5. At what price is it sold per bushel at the manufactory?

"*Answer.* From thirty-one and a fourth to thirty-seven and a half cents.

"*Question* 6. What quantity of water is required to produce fifty pounds or one bushel of salt?

"*Answer.* One hundred and twenty gallons.

"*Question* 7. What quantity of iron is annually consumed, distinguishing the malleable from the cast iron?

"*Answer.* Forty-five tons cast iron and five tons malleable iron.

"We, the undersigned, residing at the Illinois Saline, near Shawneetown, being acquainted with the manufacturing of salt at said Saline, have examined the foregoing seven interrogatories, and affixed the answers separately to each query, to the best of our knowledge and information.

"Given under our hands, at the Illinois Saline, near Shawneetown, this 13th day of November, 1827."

E.

Extract of a letter from Marcus Huling, Esq., of Montezuma, Kentucky, to James A. Lewis, Esq., of Kanawha, Virginia, dated November 6, 1827.

"In reply to the seven inquiries found in the preceding communication:

"1st. There is vested here, in real and personal property, and in money to carry on the manufactory of salt, about one hundred and sixty thousand dollars.

"2d. The salt works here give employment to about one hundred and fifty laboring hands.

"3d. There were about one hundred and fifteen thousand five hundred bushels manufactured the last twelve months; and there will be a third more manufactured next year, from the improvements making at this time.

"4th. The cost, per bushel, of manufacturing, varies from twenty to forty cents, according to the quality of the water used, and conveniency of the fuel.

"5th. The price of salt at the works has varied, in the course of the year, from fifty to sixty-two and a half cents.

"6th. The water afforded by the several wells in use is not all of the same kind or quality. There are four wells that from 75 to 80 gallons of the water will produce a bushel of salt; and there are six wells which require from 100 to 125 gallons of the water to produce a bushel of salt. There are also five wells in use that take from 150 to 250 gallons of the water to make one bushel of salt.

"7th. There are about forty-five tons of cast metal used annually to keep up the furnaces, owing to the lime which blocks on and breaks the kettles. About twenty tons of Juniatta wrought iron is annually used by the manufacturers of salt, because it is the softest and best; and but little imported iron is used.

"There has been no importation of foreign salt in this section for the last two years. We now supply the country south of us 100 miles, or near the Tennessee river, where our article is met by the salt from Goose Creek and King's salt works; on the east 35 to 40 miles, where it is met by the salt from Goose Creek and the Red Bird works; on the north for from forty to fifty miles, it is there met by the salt from Kanawha, and by imported salt; on the west from fifty to sixty miles, where it is met by the Kanawha and imported salt.

"It is but three years since the first well was opened on Green river, and there are now fifteen wells in successful operation. There are also several others opened, and the owners putting up furnaces, which will soon be manufacturing salt. The water is struck at from 60 to 190 feet from the surface of low bottoms. The wells in use extend twenty miles on the river. The water afforded by the upper wells is impregnated with lime, which forms a cement on the boilers as hard as rock; the lower wells have no lime. The Goose Creek salt works are east of us, in a mountainous part of the country; they have, and do, from information, for several years past, manufactured from 90,000 to 100,000 bushels per annum. The capital there invested is, I suppose, $150,000. Red Bird salt works lay north of Goose creek about thirty miles; the state of the works is unknown to me. The quantity of salt water obtained on Green river, for the time they have been sinking for it, surpasses any place in my knowledge."

F.

Extract from a communication from a highly intelligent and respectable gentleman of Massachusetts, on the subject of salt making, made in December last.

"Salt is manufactured in New England wholly from sea water, by solar evaporation. The manufactory, like most others, arose from necessity; the distress during the revolutionary war, for the want of salt, led the inhabitants upon the seacoast to make the attempt. At first it was commenced upon a very small scale, and in a very imperfect manner, but there was abundant opportunity for all to engage in the enterprise who lived upon the seacost, more especially as it is a manufactory (and there are but few of the character) where a small capital can be as profitably invested as a large one. One neighbor improved upon another, until the manufactories were quite perfect; and, in the end, being the joint inventions of many, no patent was ever taken. These improvements and discoveries were applied to pumping the water, erecting the vats, and covering them to protect them from rain and dew; these works have much increased until within a few years. It is estimated that there are now in Massachusetts and Rhode Island about twenty millions of square feet of vats, or, as they who own them estimate, two millions, as they were originally built ten feet wide, every ten feet were called one foot. It is estimated that every foot costs ten cents, or one dollar per foot as estimated by the manufacturer; amount, say twenty millions square feet of vats, and roofs, or covering for them, value, or cost, two millions dollars. It is estimated that every 10,000 feet of the vats will produce 300 bushels of salt; new works will do more, but covered with boards continually exposed to the sun, they soon become cracked and injured, and do not exclude the rain. Then it may fairly be estimated that the salt manufactories above mentioned manufacture yearly six hundred thousand bushels of salt of good quality.

"The value of the salt for a number of years past, perhaps, may be estimated at the manufactories at about thirty-seven cents per bushel measured, weighing about seventy-three pounds; the yearly income would amount to about $220,000; amounting to about ten per cent. income, including interest on the capital, repairs of the works, and labor in the manufacturing the salt. Being on the seacost, it is very convenient to transport it to every part of the United States. The income is moderate, but it is a business in which, as I have before observed, a small capital can be invested, and requires but little skill in the management; and seamen, too old to pursue their employment, are much inclined to engage in it.

"Probably there are seven hundred distinct manufactories. The salt when manufactured is sent in small vessels to market in the various ports of the United States, and meeting the foreign salt in the market has produced a severe competition, the necessary effect of which is to reduce the price. It has reduced the price. In the revolutionary war salt sold for three or four dollars a bushel; during the last war it was never so high as one dollar, or never exceeded that price at the works where the salt was manufactured.

"The farmers of the Atlantic States are made to complain of the duty, but if I am not greatly mistaken the real and moving complaints are from another source, viz: the merchants. They wish to import it from Liverpool and elsewhere as ballast. Let them import it, and if the duty be continued, and the manufactories continued, the competition will always secure to the consumer an abundance of the article at a low price. Repeal the duty, and the manufactories must be abandoned, and leave the merchant to fix his own price."

20TH CONGRESS.] No. 825. [1ST SESSION.

IN FAVOR OF DUTIES ON IMPORTS OF SALT.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1828.

To the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the undersigned manufacturers and others interested in the manufacture of salt, in the town of Salina, respectfully represents: That your memorialists, in confident expectation of the continuance of the duty on foreign salt, as established for the last fifteen years by the laws of the United States, have expended on their works, and the establishments in immediate connexion therewith, a sum exceeding half a million of dollars, and if the capital employed in the business be included, the amount would be upwards of one million; and that your memorialists have learned that a bill has been introduced at the present session of Congress for a reduction of said duty, which, if carried into effect, they have the most lively apprehensions will operate severely to the injury, if it do not prostrate the interests of your memorialists, many of whom have their whole property invested in that business.

It is a manufacture, your memorialists conceive, of primary importance to our country, as an increasing and valuable branch of industry, furnishing at home one of the indispensable necessaries of life, the cost of which to the consumer has been rapidly diminishing in consequence of the reduction of price produced in our markets by competition with the imported article. Should that competition be destroyed, as in the opinion of your memorialists it must be, if a reduction of the existing duty take place, the article will again advance almost exclusively to the benefit of the foreign manufacturer. Another consequence would follow, a dependence on foreigners for our principal supplies, affording, too, the greatest facilities for monopoly among the importers and speculators on the seaboard, as exemplified at the commencement of the late war, when it is well known the price was quadrupled in a few days. Such an occurrence would have been prevented or counteracted, in a great measure, had extensive manufactories, as at the present day, existed along our seaboard and in the interior of the United States.

The most effectual means, your memorialists venture to suggest, to insure a certain and regular supply at the lowest rates to the consumer, is to foster within our territories the works for its production, which, by collision in the same markets that obtain salt from foreign sources, would check the fluctuations and prevent any extravagant rise to which at times they would otherwise be liable.

An extension of the establishments in this country for the making of salt would present, on pressing emergencies, an excellent resource for national revenue. Your memorialists are, therefore, anxiously desirous that the question, in which they have the deepest interest, may, in coincidence with their views, be determined for the lasting benefit and security of our common country, and that the contemplated reduction of duty will by Congress be deemed inexpedient.

SALINA, *January* 1, 1828.

20TH CONGRESS.] No. 826. [1ST SESSION.

DISTRIBUTION OF THE SURPLUS REVENUE AMONG THE STATES—PUBLIC DEBT, &c.

COMMUNICATED TO THE SENATE JANUARY 21, 1828.

Mr. DICKERSON made the following report:

The committee to whom was referred the bill to provide for the distribution of a part of the revenues of the United States among the several States of the Union beg leave to report the same with the following amendment: Strike out from the word "taxation," in the sixth line, to the word "which," in the twelfth line, and insert "the sum of five millions of dollars on the first day of January, one thousand eight hundred and thirty; five millions of dollars on the first day of January, one thousand eight hundred and thirty-one; five millions of dollars on the first day of January, one thousand eight hundred and thirty-two; and five millions of dollars on the first day of January, one thousand eight hundred and thirty-three;" and the committee beg leave to submit the following calculation, showing the operation of the Sinking Fund of ten millions of dollars annually in paying the interest and principal of the public debt.

Besides the appropriation of ten millions of dollars each year, the Sinking Fund consists of any surplus in the Treasury at the end of any year, above all appropriations for the year, and leaving in the Treasury two millions of dollars; but as these surpluses are uncertain in their amount, and depend upon the disposition of Congress to appropriate our funds to other objects, they are not included in this calculation.

The five per cent. United States Bank loan of seven millions of dollars, for which the United States hold stock in that bank of an equal amount, yielding an interest of six per cent., is not brought into the calculation, not being considered as chargeable to the Sinking Fund.

The principal of the three per cent. stock, which will not be discharged until provided for by law at some distant period, is omitted in this calculation.

The payments by the calculation are to be made yearly; but if made quarterly, the reduction of the debt would be more rapid.

By this calculation it appears that the whole of the debt, except the United States Bank loan and the three per cent. stock, may be extinguished in the year 1833, and leaving on the 1st day of January, 1834, a balance in favor of the Sinking Fund of $1,964,248 35.

The public debt, according to the report of the Secretary of the Treasury of the 10th of December, 1827, amounted on the 1st of October, 1827, to	$68,913,541 08
Paid in the last quarter of that year	1,500,263 16
Debt on the 1st January, 1828	67,413,277 92
Consisting of—	
Six per cent. stock	$25,330,965 91
Five per cent. stock	12,792,000 20
Four and a half per cent. stock	15,994,064 11
Three per cent. stock	13,296,247 70
	67,413,277 92
Deduct the bank loan and three per cent. stock, amounting to	20,296,247 70
It will leave on the 1st January, 1828, a debt of	47,117,030 22
Consisting of—	
Six per cent. stock	$25,330,965 91
Five per cent. stock	5,792,000 20
Four and a half per cent. stock	15,994,064 11
	47,117,023 20
Annual interest on this debt and on the three per cent. stock:	
On the six per cent. stock	$1,519,857 95
On five per cent. stock	289,600 01
On four and a half per cent. stock	719,732 88
On three per cent. stock	398,887 43
	2,928,078 27

The amounts of six per cent., five per cent., and four and a half per cent. debt in succession.

The amount of six per cent. debt, 1st January, 1828	$25,330,965 91
One year's interest on the whole debt	2,928,078 27
	28,259,044 18
Deduct one year's amount of Sinking Fund	10,000,000 00
1st January, 1829	18,259,044 18
Interest	2,503,762 97
	20,762,807 15
Deduct	10,000,000 00
1st January, 1830	10,762,807 15
Interest	2,053,988 74
	12,816,795 89
Deduct	10,000,000 00
1st January, 1831	2,816,795 89
Interest	1,577,228 07
	4,394,023 96
Add 5 per cent. stock	5,792,000 20
	10,186,024 16
Deduct	10,000,000 00
1st January, 1832	186,024 16
Interest	1,127,921 51
	1,313,945 67
Add the 4½ per cent. debt	15,994,064 11
	17,308,009 78
Deduct	10,000,000 00
1st January, 1833	7,308,009 78
Interest	727,741 87
Debt and interest on the 1st January, 1834	8,035,751 65
Which, deducted from the amount of the Sinking Fund that day, leaves a balance in favor of that fund of $1,964,248 35.	
Amount of Sinking Fund 1st January, 1834	10,000,000 00
Deduct debt and interest due that day	8,035,751 65
Balance in favor of the Sinking Fund, 1st January, 1834	1,964,248 35

Payments under the foregoing calculation:

	Interest.	Principal.
January 1, 1829	$2,928,078 27	$7,071,921 73
1830	2,503,762 97	7,496,237 03
1831	2,053,988 74	7,946,011 26
1832	1,577,228 07	8,422,771 93
1833	1,127,921 51	8,872,078 49
1834	727,741 87	7,308,009 78
	10,918,721 43	47,117,030 22
		10,918,721 43
Payments of interest and principal		58,035,751 65
Amount of Sinking Fund for six years		60,000,000 00
Deduct debt and interest paid		58,035,751 65
Balance 1st January, 1834		1,964,248 35

20TH CONGRESS.] No. 827. [1ST SESSION.

OPERATIONS OF THE MINT IN 1827.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 21, 1828.

To the Senate and House of Representatives of the United States:

A report from the Director of the Mint, together with a statement of the operations of that institution during the year 1827, is herewith transmitted to Congress.

JOHN QUINCY ADAMS.

WASHINGTON, *January* 21, 1828.

MINT OF THE UNITED STATES, *Philadelphia, January* 1, 1828.

SIR: I have the honor to submit a report on the general transactions of the Mint during the past year.

The coinage effected within that period, as appears from the Treasurer's statement, herewith transmitted, amounts to $3,024,342 32, consisting of 9,097,845 pieces of coin, viz:

Of gold	27,713 pieces, making	$131,565 00
Of silver	6,712,400 pieces, making	2,869,200 00
Of copper	2,357,732 pieces, making	23,577 32
	9,097,845 pieces, making	3,024,342 32

Of the gold bullion deposited at the Mint within the past year the proportion received from Mexico, South America, and the West Indies, may be stated at $76,000; that from North Carolina at $21,000 and that from Africa at $15,000; leaving about $20,000 derived from sources not ascertained. The whole amount received from North Carolina to the present time is nearly $110,000. This gold has generally been found to exceed in fineness the standard of our gold coins.

The supply of silver, under various forms of unwrought bullion, and in foreign coins, has been unusually abundant, especially during the first three quarters of the year. The heavier deposits have been received generally through the Bank of the United States. Of the amount of silver coined within the last year, more than $2,000,000 consisted of deposits received from that institution.

The amount of copper coins distributed within the last year is $21,910. They are forwarded, as heretofore, at the expense and risk of the Government, to all parts of the United States accessible by regular means of transportation, on receiving the value thereof here, or a certificate of deposit to the credit of the Treasurer of the United States for the requisite amount, in any of the banks authorized to receive deposits of public money.

A general view of the operations of the Mint from its first commencement will not, it is believed, be found destitute of interest, and is, therefore, respectfully presented.

The whole coinage executed since the establishment of the Mint amounts to $30,465,444 14½, consisting of 103,081,178 pieces of coin, viz:

Of gold	1,538,161 pieces, making	$8,255,667 50
Of silver	47,389,086 pieces, making	21,695,899 90
Of copper	54,153,931 pieces, making	513,876 74½
	103,081,178 pieces, making	30,465,444 14½

Within the first fifteen years of the operations of this establishment, beginning with the year 1793,

and ending with 1807, the amount coined was $6,482,613 68½; in the succeeding ten years, ending with 1817, the amount coined was $7,715,979 85; and in the last ten years it has been $16,266,850 61.

The average annual coinage of the first period above designated, it will be found, was $432,174 24; that of the second, $771,597 98; and that of the last period, $1,626,685 06. The coinage of the last year exceeds by nearly a million of dollars that of any year preceding, and is nearly two-fold the average amount of the period to which it belongs.

I have the honor to be, with great respect, your obedient servant,

SAM. MOORE.

The PRESIDENT *of the United States.*

A statement of the coins struck at the Mint of the United States from January 1 *to December* 31, 1827.

Silver coins.	Dimes.	Quarter dollars.	Half dollars.	Amount.
Quarter ending 31st March	205,000	.....	1,203,400	$622,200 00
Quarter ending 30th June	350,000	.....	1,513,000	791,500 00
Quarter ending 30th September	360,000	.....	1,342,000	707,000 00
Quarter ending 31st December	300,000	4,000	1,435,000	748,500 00
Total	1,215,000	4,000	5,493,400	2,869,200 00

RECAPITULATION.

6,712,400 pieces of silver coin, amounting to	$2,869,200 00
27,713 pieces of gold coins, amounting to	131,565 00
2,357,732 pieces of copper coins, amounting to	23,577 32
9,097,845 pieces of coins, amounting to	3,024,342 32

MINT OF THE UNITED STATES, *Treasurer's Office, Philadelphia, December* 31, 1827.

JAMES RUSH.

20TH CONGRESS.] **No. 828.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 22, 1828.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

In a country like this, embracing nearly every variety of climate and soil, affording peculiar natural advantages, and presenting inducements to every species of useful industry, one of the most important as well as delicate duties of the Government is to protect and foster the true interests of the different sections of the country, and of the various classes of its citizens, in such a manner as to combine the utmost individual advantage with the general safety and welfare:

We, therefore, the undersigned, inhabitants of New Hampshire, would respectfully present, for the wise consideration of Congress, our views and most earnest wishes upon a subject which we deem to be of pressing and vital interest to a very large portion of this great country, and more especially so to that part of it which we inhabit; and we doubt not that our prayer, and the almost unanimous prayer of the immense population of the wool-growing and manufacturing States of this Union, will receive

that early and deliberate attention which their present embarrassments and imminent ruin so urgently demand. We appeal with confidence to the magnanimity and comprehensive policy of our brethren of the south, and are assured that when this subject shall come up in its true light and important bearings upon our national wealth and prosperity, no unkindly feeling, no sectional interest, no illiberal political considerations will for a moment induce them to refuse any constitutional and wise protection to the interests of a State which bore so manly and honorable a part in the great struggle for our common liberty, and which, as it has never since shrunk from its portion of the public burdens and public dangers, is still resolved to pursue the great interests of the whole country, at every hazard and every sacrifice.

Your memorialists would not enter into the argument upon the constitutionality or the expediency of further legislative protection of their interests. They would, however, presume to suggest their astonishment that, after all the legislation upon similar subjects, in eighteen successive Congresses, guided in their deliberations by the best wisdom in the land—from that which framed the Constitution down to that which has distinguished the ablest statesmen that have grown up under its influence—it should now be made a solemn question whether it be consistent with the fundamental laws of the State to preserve the products of national industry and national genius from the destructive influence of foreign commercial policy.

We beg leave also to represent that we, in general, assent to the received doctrines of political philosophy on this subject. Abstractly, they may be just and salutary. But they may be also, and your memorialists confidently believe they in fact are, utterly impracticable by a single nation, while the other great commercial communities with whom that nation interchanges commodities refuse to acknowledge those doctrines in their own regulations. Facts, abundant and conclusive, we doubt not, will occur to your honorable body to prove the truth of this assertion.

We deem it worthy of remark, also, that, though the principle may be abstractly sound, trade if left free will regulate itself, it is a principle no less sound, and no less important to be kept in view by every wise Legislature, that it may be desirable for a people to put themselves to temporary and partial inconvenience and expense for the purpose of *improving their own skill*. Suppose the immediate effect of protective duties should be to raise in some degree the market value of our woolen fabrics, the encouragement thus afforded to the manufacturer will bring into the business a vastly augmented amount of capital, of talent, and of enterprise. And the result of the active competition which must inevitably ensue cannot but be to perfect our machinery, to improve our skill in the various processes of manufactures, and thus, in no long time, to enable us, with the natural and civil advantages we enjoy, to exclude foreign fabrics altogether from our markets, even without the aid of prohibitory duties. On the other hand, if we suffer other nations to supply us, as they must do while allowed to hold competition with us in the unequal contest of experience and perfect art against inexperience and infantile skill, our capital and our invenvention will be directed into other channels or left unemployed, and the principal sources of wealth and prosperity, which nature has prepared for the great northern and western sections of our country, will remain unopened and unapproached.

On this subject we must be permitted to be urgent, for it involves all that is dear to us in the prosperity of this ancient State. Of our climate and the fertility of our soil we have little to boast. The hard-earned products of the hoe and the plough we may indeed consume, but we cannot sell. Our granite mountains and rugged hills may be tilled to preserve our present population in its scattered and distressed condition; but the great meadows of the west, and the rich and mild tracts of the Middle States, already to a great extent supply our seaboard and inland towns, and the day must be at hand when, with their increasing facilities of transportation, they may exclude our agricultural products altogether, even from our own markets.

But, unkindly as our soil is, we are blessed with streams which afford a water power inferior to that of no State in the Union. On these streams we have already erected manufactories to an immense extent. Our hills, too, may be covered with flocks to their summits; and our cold marshes, natural grass lands, though susceptible of scarcely any other culture, promise an adequate supply of winter food.

In these circumstances can we mistake the intentions of Providence or the course of duty? And, these circumstances being known, can we but believe that the Government of our choice, placed over us to dispense the blessings which a free people have put into their hands, will hasten to relieve us from present distress, and from the prospect of poverty and wretchedness, by such wise and beneficent enactments as are called for by the united voices of this great agricultural and manufacturing community?

Your memorialists would not presume to suggest to your honorable body the detail of a system of duties to meet the present exigencies of the country; but they venture, with all respect and deference to the superior wisdom of Congress, to allude to the measures recommended for your consideration by the respectable convention at Harrisburg, Pennsylvania, in July, 1827, as substantially expressing their views on the important subject upon which they have deemed it their duty thus to address the National Legislature.

ORFORD, N. H., *December* 21, 1827.

20TH CONGRESS.] No. 829. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 22, 1828.

BALTIMORE CHAMBER OF COMMERCE, *January* 14, 1828.

A memorial of the inhabitants of the city of Boston and its vicinity adverse to an increase of duty on imported woolen goods was this day laid before the chamber; and, upon its being read, the following resolutions were offered and unanimously adopted:

Resolved, That the Chamber of Commerce of the city of Baltimore highly approve the reasoning and principles contained in the memorial of the inhabitants of Boston and its vicinity adverse to an increase

of duty on imported woolen goods, which has been forwarded to Congress, and printed, by order of the Senate, on the 17th December, 1827.

Resolved, That the president of the chamber furnish our Senators and Representatives in Congress with a copy of these proceedings, and request their co-operation on the subject, and also their aid in making known the views of the chamber to the Senate and House of Representatives.

WM. LORMAN, *President C. C.*

WILLIAM COOKE, *Secretary C. C.*

20TH CONGRESS.] **No. 830.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 22, 1828.

To the honorable the Senate and House of Representatives:

The memorial of the New York Chamber of Commerce represents that your memorialists, having heretofore expressed their opinions in opposition to an increase of duties on imported woolens for the purpose of protecting those manufactured in the United States, would not now obtrude themselves on the attention of the National Legislature did they not deem it to be an imperious duty to renew their testimony against the attempt which is now making to fasten on the American people the principle that to promote the interest of some parts of our country at the expense of other parts is wise and just, is consistent with our national compact, and the impartial kindness which ought to be exercised towards every member of the Union. This attempt is not new. It has already been made with too much success by interested parties; and the result unhappily has been to produce irritation and digust, and violence and animosity, into every part of our land, to array one section of the country against another, and to withdraw the affection of the States from the Union, so important to all.

Imported woolens now pay, in duties to the Government and charges of importation, 56 per cent. on the first cost. This protection to the woolen fabrics of the country, enormous as it is, does not satisfy the manufacturers; they claim a further protection from your honorable body, and to encourage the "American system," and to promote the "national industry," they importunately demand that an average of forty per cent. of new duties on woolens should be added to the already overloaded tariff, and the consumption of the whole nation be charged with this enormous addition for the benefit of that favored class.

To effect this object they have called to their aid a portion of our agriculturists, the growers of wool, many of whom have been induced to believe that an increased duty on imported wool ought to be imposed to protect wool of an American growth. This appears to your memorialists a mistaken opinion; the imported wool is either of a lower or higher quality than the wool which is raised in the United States, and the whole quantity imported is found, by a reference to the Treasurer's returns, to be but a small proportion of what is used in the American manufactures, not to exceed, perhaps, a twentieth part; and it is well known that the capacity of our country to produce wool or any other staple to which the attention of our farmers is directed is equal to any demand and nearly illimitable.

If the project of increased duties on foreign wool is not intended to bring the wool-growers to make common cause with the woolen manufacturers, and thereby produce an influence on the question pending in the National Legislature, your memorialists cannot understand its meaning. To promote manufactures by taxing the raw material is a paradox which common sense cannot comprehend, and it is equally opposed to sound principles of political economy; and the inference is irresistible that it is a combination of two classes for their own benefit against the rest of the community. If the raw material is cheap, the manufactured article will also be cheap, and have the benefit of a foreign as well as a home market; the demand for both will be permanent, and require an abundant supply; but, if it is taxed, the manufactured article cannot compete in a foreign market, and cannot enter into the operations of foreign commerce; the demand for the raw material will of course be limited and uncertain, and the contracted nature of the system will more than counterbalance any benefit which can accrue to the growers of the raw material from the tax which is imposed for its protection.

Your memorialists sincerely believe that the woolen manufacturers of the United States are as much protected as their own interests, and more than the interests of the other classes of the community allow. The existing encouragement is enormously great and bears heavily on every person in the United States whose habits and residence require the use of woolen cloths, inasmuch as every such person pays an *enhanced* price for his necessary supplies, which goes to benefit the manufacturer. But we do not ask to have the present system disturbed, partial and oppressive as it is, but we deprecate any additional protection to manufacturers of woolen goods. They now receive a protection equal to 56 per cent., and, if this will not enable them to compete in the home market with foreign fabrics, it is evident that their business is injurious to the interests of the nation and had better be abandoned.

In every point of view in which your memorialists have considered the application of the manufacturers, additional duties appear to them irreconcileable with the true interests of the nation. If, however, such duties are imposed, and twelve millions of people are made to pay an enhanced price for articles necessary to their comfort, in order to protect the interests of the very small number who make woolen cloths, your memorialists will have the satisfaction to know that they have remonstrated against a system so partial and impolitic, and that, if the revenue should be decreased, smuggling promoted, commerce and navigation discouraged, and discord and feud introduced, others, and not your memorialists, are answerable for these deplorable consequences.

And your memorialists, as in duty bound, will ever pray.

ROBT LENOX, *President.*

Attest: JOHN AUSTIN STEVENS, *Secretary.*

NEW YORK, *January* 18, 1828.

20TH CONGRESS.] No. 831. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1828.

At a large and respectable meeting of merchants and others, opposed to a further increase of the protection to manufactures, held, pursuant to public notice, at the Merchants' Coffee House, on the evening of the 22d of January, Thomas P. Cope, Esq., was called to the chair, and Matthew L. Bevan and John S. Henry appointed secretaries.

The following preamble and resolutions were unanimously adopted:

Whereas the question of a further increase of duties upon importations, now under discussion in Congress, is one of great magnitude and importance to the best interests of the country: and whereas the advocates of an increased tariff have been assiduously circulating statements and calculations which are believed to be erroneous and exaggerated, it has become a duty which the friends of free and unrestricted commerce owe to themselves and their fellow-citizens to remonstrate against a policy which their own experience, and the opinions of the most enlightened political economists of the day, demonstrate to be unsound and injurious: Therefore,

1. *Resolved*, That it is the opinion of this meeting that any further increase of duties upon imported goods is entirely uncalled for and unnecessary, either for the purposes of revenue or for the encouragement of domestic manufactures; that the existing tariff fully and amply accomplishes these ends; and that any increase of duty on foreign fabrics, and especially the prohibitory policy recommended by the manufacturers of woolens, would only tend to impair the revenue of the country, to bring distress upon the farmers, greatly to injure the merchants, and to produce no permanent benefit to the manufacturers themselves.

2. *Resolved*, That the woolen manufacturers, already enjoying a protection by duty amounting to 37 per cent., and by the addition of the various charges incident to the importation of foreign goods, amounting, in total, to near 60 per cent., have no just claim upon the nation for further protection, by a tax on consumers, equal, in some instances, to 200 per cent. And it is the opinion of this meeting that an investigation of the data furnished by the manufacturers themselves will show that the woolen business has increased to an extent, and with a rapidity, which indicate either a rash and improvident extension of trade, against which no Government protection can or ought to provide; or that, when reasonable skill, capital, and economy, have been employed, the manufacture has been, and is, as profitable as any other species of industry in the country.

3. *Resolved*, That the tariff of 1824 contained a full, ample, and generous protection to all manufactures which the skill and experience of the country render expedient; that, at the time of its passage, it was professed to satisfy the hopes and wishes of the high tariff party, and the country was solemnly promised an exemption from a perpetually varying and increasing scale of duties. Believing this to be the case, this meeting views the demands now made by the high tariff party as fully demonstrating that nothing short of the total destruction of the import, and, consequently, in time, of the export trade of the country, will be considered as affording adequate protection to their interests.

4. *Resolved*, That the assertion that, by the reduction of the British duty on wool, and other articles used in the manufacture of woolens, the American duty of 37 per cent. has been virtually reduced nearly one-half, is entirely fallacious and destitute of foundation; as calculations, based upon official documents, completely demonstrate the whole of the aforesaid reduction to amount to no more, on the most liberal estimate, than 2½ per cent., leaving the present protective duty 34½ per cent.; which, added to expenses of importation, oblige the consumer to pay above $54 upon every $100 worth of woolen goods for the benefit of the domestic manufacturer.

5. *Resolved*, That the high tariff policy, so far from being allied to the best interests of the farmer, is highly injurious to the agricultural prosperity of the country. According to a favorite maxim of the manufacturers, if foreign nations will not purchase our products, we cannot buy theirs in return. By reciprocity, then, if we refuse to purchase the manufactures of foreign nations, the whole of our export to them, of cotton, tobacco, grain, and lumber, amounting annually to between fifty and sixty millions of dollars, must cease and determine. To the planters of the southern States the cessation of the export of their productions would be totally ruinous; and it is the opinion of this meeting that the most serious detriment would as certainly result to the agriculturists of the northern States.

Near six millions worth of northern produce, chiefly that of the soil, have been exported within the year 1826, besides the large amount consumed by the merchants, sailors, and various artisans, dependent on foreign commerce, and exclusive to the export to the southern States, for the consumption of cultivators of cotton, tobacco, &c.; and when this meeting considers that one million, or even five hundred thousand barrels of flour (and the latter a moderate estimate, even of our present restricted annual exportation,) raises the value of the whole national production of that article from 20 to 50 per cent., they are constrained to believe that the most distressing effects will result to the whole agriculture of our country by a further advance and adoption of a short-sighted, exclusive policy: and it is further the opinion of this meeting, that, by a reduction of duty on many species of foreign articles, a great addition might be made to the export of agricultural productions from the northern States, and that the effect of the very restrictive system which it is proposed to render more onerous has been to deprive the country of a large export of agricultural productions which we formerly enjoyed.

In corroboration of this idea, a single reference to our Spanish and Portuguese trade will be sufficient. In 1792 salt, brandy, wines, and fruit, the staple imports from those countries, paid the respective duties of six cents per bushel, eight to ten cents per gallon, ten to eighteen cents per gallon, and five per centum; at the present rates the correspondent articles pay twenty-five cents per bushel, thirty-eight to forty-two cents per gallon, forty to one hundred cents per gallon, and thirty to forty per centum.

Although this meeting is aware that other causes have operated to lessen our trade with Spain, Portugal, and their dependencies, yet it is our settled opinion that by means of the American system, falsely so called, a market has been lost annually to the Middle and Eastern States for several millions of

dollars of their productions, and the introduction of cheap and wholesome wines has been prevented to the moral injury and detriment of the country.

6. *Resolved*, That the doctrine that a high tariff system produces an increase of productive labor in the country is entirely deceptive and untrue.

As regards manufacturing labor itself, official documents show that its really productive and advantageous employment existed at a time when we had a duty on woolen goods amounting to only five per cent., and increased, for purposes of revenue, afterwards to two and a half per cent.

To manufactures of this kind this meeting, so far from being hostile, is entirely friendly—a manufacture which takes its rise in the natural wants, "grows with the growth and strengthens with the strength" of the other interests of the country, and is not the mere creature of hot-bed culture and of undue and exaggerated impulse.

From 1790 to 1794 the average cost of the annual consumption of foreign woolens amounted to, including duty, &c., about seven and a half millions of dollars; the population of the country to about four and a half millions of persons. Allowing the consumption to have been six dollars per head, the whole amount annually consumed would be worth twenty-seven millions of dollars, of which seven and a half millions only were of foreign produce; so that small manufacturers and farmers, in their families, above twenty years ago, and without the enormous protecting duties which are now asked for, actually manufactured three-fourths of all the woolens used in the country. From data furnished by the manufacturers themselves it appears that a return even to the five per cent. duty would not displace from employment more than twenty-five thousand persons and twenty millions of dollars of capital. If, then, a return to the five per cent. duty from the present one of thirty-seven per cent. should destroy the employment of these twenty-five thousand persons, and if the business, as they represent themselves, which they carry on under the thirty-seven per cent. duty affords them no profit, the case stands thus: that the nation is annually taxed (which tax the woolen bill proposes to double) twenty-four millions of dollars in duties to give twenty-five thousand persons and twenty millions of capital unprofitable employment. The number of persons—merchants, sailors, artisans, and others—dependent upon foreign commerce for a subsistence, and who would be thrown out of employment by its destruction, would amount to more than the whole number alleged by the restrictionists to find employment in all the cotton and woolen manufactures of the United States.

7. *Resolved*, That the restrictive system, so far from producing an increase and extension of the coasting trade of the United States sufficient to counterbalance the loss of foreign commerce, actually injures the prosperity of this as well as of all other branches of industry which come under its withering influence. The prohibitory system began to operate in 1817, at which time official documents show the coasting tonnage to have been about five hundred and ninety thousand tons; at the commencement of 1826 it had increased to about seven hundred and twenty-two thousand tons, making an advance of about twenty-two and a half per cent. in nine years. During the same term of years immediately preceding the war, and including the two years of embargo, the coasting trade increased from about three hundred and seventeen to four hundred and seventy-seven thousand tons, making an advance of about fifty and a half per cent.; the inference from which is, that the restrictive system is equally paralyzing to every interest which it touches. As regards the loss of tonnage employed in the importation of foreign woolens that the manufacturers say is to be supplied by the importation of the articles used by the domestic manufacturer, even under the present onerous duty of thirty-seven and a half per cent., sixty-five thousand tons must be employed in the export and import occasioned by our use of foreign woolens; and by calculation the amount of tonnage which the twenty-five thousand manufacturers produced by the stoppage of this trade would employ could not amount to more than about fourteen thousand tons, so that the alleged gain is a positive loss to the country of forty-one thousand tons of shipping annually.

8. *Resolved*, That the evils said to result from the drain of the precious metals from the country by the operations of foreign commerce are entirely chimerical, having no existence in reason or in fact. Gold and silver are articles of merchandise equally with cotton and tobacco, and are operated upon by the same commercial principles. We export cotton and gold to Great Britain for precisely the same reason, viz: that they are more valuable there than here; while, on the other hand, we receive bullion from Mexico and South America because it is less valuable there than here. The trade in specie, like all others, flourishes most when free and untrammelled. Indeed, the operations of this commerce form a beautiful and instructive commentary upon the truth of those principles of free trade which it is the wish and design of this meeting to advocate. We export foreign goods and domestic produce to Mexico and South America, and receive in exchange gold and silver; if, then, we had a law to retain this gold and silver within our country, what peculiar advantage would the trade afford us? We should have ship loads of useless metals (useless above the quantity required for manufacturing purposes and a circulating medium) in exchange for ship loads of food and clothing; but if this specie be re-exported and exchanged for foreign fabrics both for our own comfort and convenience, and for re-exportation at a good profit to those very countries from whence we receive this gold and silver, an acceptable service has been performed to the nation, although "our country," to use the manufacturer's phrase, "has been drained of its specie" by foreign commerce.

A reference to facts will confirm the statement that the import and export of specie, like every other kind of merchandise, fluctuates according to the various circumstances of supply and demand. In 1824 we imported about $8,379,000 in gold and silver, and exported about $7,014,000. In 1825 we imported about $6,150,000, and exported about $8,797,000; while in 1826 we imported $6,880,000, and exported only about $4,098,000.

The more free and open the export of specie, the greater will be the import. No species of trade can escape loss and detriment under the restrictive system.

9. *Resolved*, That the often-repeated assertion that there is a balance of trade against the United States in their intercourse with foreign nations is entirely unfounded and unsupported by facts.

If exchange on England, for instance, be at ten per cent. premium, the balance of trade with that country is said to be just ten per cent. against us. Now, the fact is, that the premium paid for exchange between us and England is no more a test to discover the profitableness of our import trade with that country than it is a barometrical test of the respective temperatures of the two countries. The merchants engaged in the East Indian, Russian, and French trades transmit the proceeds of their cargoes to England and draw upon England for them, and the premium (regulated as it must be by the value of specie there and its cost of transportation) might be nominally ten or twenty per cent. against us, and yet we might not owe the British nation one farthing.

Again: we might be indebted to Great Britain a considerable amount, and yet the demand for money, arising out of some temporary causes, might be so great at home that bills would sell at a discount, and *vice versa*.

But it is asserted that we have sent and are sending forth our public stocks and securities, and thus mortgaging the country to pay for importations. One single fact will, in the opinion of this meeting, settle this part of the controversy conclusively. A less amount of United States stock of all descriptions is owned abroad than was in 1803, though we have imported hundreds of millions of dollars worth of goods since that period, and, according to the reasoning of these restrictionists, ought long since to have sunk into hopeless bankruptcy.

But, in the opinion of this meeting, the last of the arguments of the high tariff party connected with the subject of the balance of trade, is the most futile that grave men ever suggested. It is said that the imports of the United States exceed the exports, and that therefore the country is progressing towards ruin. If, then, the nation exports one hundred thousand dollars worth of any article, and receives in return $110,000 worth of other commodities, she has lost $10,000; but if the return for the $100,000 be worth only $90,000 she has gained $10,000; that is to say, nations lose by their profits and gain by their losses; and yet this argument forms one of the corner stones of the American system.

10. *Resolved*, That the doctrine that, by a cessation of our imports of foreign articles, we should promote our national independence, is entirely visionary and absurd. If we have any intercourse whatever with foreign nations, either by the export of raw produce or even of domestic manufactures, we must take some of the productions of those nations with whom we trade in exchange, and of course be dependent upon them for those articles, let them be what they may; for, if there be no reciprocity of interest and intercourse, trade must naturally and inevitably cease.

Trade is dependent upon the supply of mutual wants by a mutual exchange of commodities; nay this very act of interchange constitutes trade and commerce. No man sells or barters with another man unless he receives some article in the exchange which he more greatly desires than that which he already possesses. These elementary principles, simple and self-evident as they are, seem either to have been unknown, forgotten, or disregarded by the self-styled friends of the American system. In fine, it is the settled opinion of this meeting that this notion of false independence would not only destroy foreign commerce, but would tend to interdict all intercourse between the different States, counties, townships, families, and individuals of the nations, to break the bonds of civilized society, to dismember the great human family, and to bring back those days of savage and isolated independence when the unassisted efforts of each individual alone ministered to his wants or provided for his few and precarious comforts.

A memorial to Congress was submitted to the meeting and unanimously agreed to.

On motion, it was

Resolved, That a committee of twelve persons be appointed, with whom the chairman and secretaries be joined, who shall, on behalf of this meeting, sign the memorial which has been adopted, and forward it, with the resolutions, to one of our Representatives in Congress and one of the members of the Senate, with a request that they will lay them before their respective bodies. Also, to correspond with members of Congress, public bodies, and individuals in other places, and do such other matters and things as in their opinion will promote the object for which this meeting is convened.

The following committee was then appointed: Samuel Archer, R. M. Whitney, Edward Bettle, Joseph R. Evans, Richard Price, Lewis Clapier, Ambrose White, John A. Brown, Joshua Haven, Samuel W. Jones, Caleb Cope, John Hemphill.

Resolved, That the proceedings of this meeting, with the resolutions, be published in all the daily newspapers of the city.

THOS. P. COPE, *Chairman*.

JNO. S. HENRY, *Secretary*.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

The memorial and remonstrance of the citizens of Philadelphia opposed to the further increase of duties upon woolen and other imported goods respectfully showeth: That your memorialists have observed with regret the constant efforts of some of those who are engaged in manufactures to obtain such successive increase of duties on foreign goods as may, in their opinion, finally produce a total prohibition of commerce, to the great injury and distress of the farmers, artisans, and merchants of the country, and even to the prejudice of the real interests of the manufacturers themselves. So various and extended are the objections to this course of policy which impress the minds of your memorialists, that they feel embarrassed in attempting to present them to your attention within the narrow limits which custom prescribes to an address of this character. Opposed in principle to any system which would, unnaturally and prematurely, foster one branch of domestic industry by the injury of others, your memorialists are entirely hostile to any increase of the present tariff; but a further advance of duties upon woolens, the prominent object of attention at the present time, appears to them as peculiarly oppressive, impolitic, and unnecessary.

The tariff of 1824 was the result of compromise. It contained a full, ample, and sufficient protection to the manufacturers of the country. It was confessed at the moment, even by themselves, to be adequate and satisfactory; and further increase was deprecated and disavowed. It may, then, be easily imagined that in 1826 your memorialists were astonished to find a demand made for such duties upon one of the most essential articles of consumption in the country, viz: woolen goods, as would produce a total interdiction of foreign importations. This act demonstrates, and, indeed, it has been specifically admitted, that nothing short of a total non-intercourse with manufacturing nations will satisfy the desires of the advocates of the proposed tariff. The question, therefore, is reduced to very narrow limits: Will the Congress of the United States prohibit the importation of all foreign fabrics whenever the manufacturers of particular articles make such a request, regardless of the interests of the farmers, artisans, and merchants concerned in the import, and, of course, in the great and important export trade of our country?

Believing that the life and sinew of the nation exist in its agriculture, and that the interests of this large body of their fellow-citizens have been mistaken or disregarded in identifying them with the high duty system, your memorialists would beg your attention to the operation of the "woolens bill" on that portion of the community. The true interest of the farmer is to be found in a self-evident, though often

ridiculed maxim, to-wit: that he should dispose of his productions to whom and from whence the greatest amount of profit can be derived, and purchase those things he desires where and from whom he can buy them the cheapest. Hence, the greater the competition, and the more open the markets for both buying and selling, the more prosperous will be the interests of the farmer. In addition to the home demand, he ought to have as large and free a foreign market as possible, untrammelled by duties and restrictions. The very design of what is called protection to manufacturers, is to cause all consumers to purchase domestic goods at a dearer rate than foreign articles can be procured at. If this be not the case, and high duties imposed on foreign goods will not produce this effect, then they *cannot* operate protectively, and, of course, are useless. The very design, therefore, of the "woolens bill," which is held up as a matter of great interest and importance to the farmer, is to make him pay more for the articles which he consumes than he would have to do if there was no duty; and the only compensation which he is to receive, to reconcile him to this taxation, is to be found in an increase of duty upon the foreign wool imported for the use of the domestic manufacturers. It will require but few observations to show the delusive nature of this proffered boon, and its utter inadequacy to compensate the farmer for the serious losses to which he will be subjected by the restrictive system. By the tariff of 1824 the increase of duty on imported wool was exceeded eight times by the increase of duty upon the manufactured article; by which operation the farmer was protected by gaining one dollar and losing eight. Forty millions of pounds of wool are represented as the annual consumption of the United States, of which it appears that only about two millions are foreign growth. Hence the farmers have already nearly the whole market in their hands; and, supposing the two millions of pounds of foreign wool excluded by the proposed increase of duty, and the price of the manufactured articles increased, as is demanded by the new tariff, about one hundred per cent., the gain of the farmer would be an increased market for wool worth a few hundred thousand dollars, and a loss, by the enhanced prices of goods, of several millions of dollars. This may be made numerically clearer by a comparison between the increase of duties of 1824 on raw wool and upon goods. The wool-grower received a benefit amounting to about $179,000 on wool, and he and other consumers lost about $3,660,000 by the increased duty on the woolen goods.

Your remonstrants are aware that it has been denied that an increase of duties will produce an increase of price to the consumer. The domestic manufacturers, it is said, will soon supply the article as good and as cheap, or even cheaper, than the foreign fabric. For proof of this, it is contended that the prohibition of coarse cotton goods, by the tariff of 1816, absolutely produced this effect, and has actually lessened the price of the article. Your memorialists would dwell a moment upon these statements, believing them to be totally fallacious, and yet apprehending that they have obscured and led astray more than any others which have been advanced upon the subject.

That an increase of price in any given article is the object and effect of a prohibitory or restrictive duty must be manifest at first glance, because the only manner in which the duty can protect is by an increase of price consequent upon the exclusion of that foreign competition which had before tended to diminish the value of the article. But it is replied that this is merely a temporary result; that when the market is secured the prices will again be reduced. If this has been the effect with cotton, as is affirmed, why not throw off the duty and open the market? But instead of this, and in contradiction of the whole of this theory, *more duties* on cottons are proposed, even on those very articles which we are declared to manufacture not only as cheap as England but even so low as to undersell British goods in foreign markets. Now, your memorialists deny that the tariff prohibiting foreign coarse cottons has lowered the price to the consumer or produced those excellent effects which have been alleged. At the same time that they remark that, if this was a fact, the cases of cotton and woolen fabrics are not analogous. The former being produced, to a very great extent, by machinery, depends, therefore, less for lowness of price on the cheapness of manual labor, which is an object of such importance in a manufacture like that of woolens, where manipulations cannot to a very great extent be supplied by machinery.

To show that the nation is paying, by the high tariff system, an enormous bounty to the manufacturers of cotton goods, we would refer to the fact that the import of cottons, under duties and charges amounting to 65 per cent. and upwards, was about eight millions of dollars in 1824, and had increased to eleven millions in 1825. If, then, so large an amount is yet imported, under a rate of duty in some cases amounting to 90 per cent., it is manifest that British goods, paying freight to our ship-owners, a good profit to our merchants, and giving a revenue of from 60 to 90 per cent. to Government, can yet be sold so as to compete with our own manufacturers; and, therefore, that, so far from the tariff of 1816 reducing the prices of cotton goods, without any tariff, they would have been 60 to 90 per cent. cheaper than they now are. These are not matters of speculation but of grave and certain calculation.

The improvements in machinery, the reduction in the price of labor, and, above all, the great decrease in the value of raw cotton, have lessened the price of goods, and not the tariff of 1816. No better evidence of this can be demanded than the simple fact that foreign fabrics have equally decreased in value with our own, and that so large a duty is yet required to exclude them from our markets.

As regards the exportation of our cottons so as to undersell the British in the South American markets, which is adduced to show the cheapness of our articles and the employment which commerce is to receive in lieu of the loss of our import, and, consequently, in time, of our export trade, we will make a passing observation.

We exported in 1826 produce, &c., to the amount, in round numbers, of seventy-seven millions of dollars. Of this sum were domestic cottons to South America, Mexico, &c., amounting to about eleven hundred thousand dollars. The export of cottons from Great Britain to the same places, in the same time, is estimated at twenty-five millions of dollars. This, then, is the progress we have made in the supplanting the manufactures of Great Britain. To make the matter still more forcible, we actually re-exported of foreign cottons, nearly all being of British make, within one or two hundred thousand dollars as much as our export of domestic cottons. Your memorialists have dwelt longer on the subject of the effects of the tariff of 1816 upon the prices of cotton goods because they conceive the arguments derived from them, futile and fallacious as they are proved to be, are yet amongst the most forcible which the advocates of the prohibitory system can present. Your remonstrants, however, are unwilling to trespass upon your attention by entering into the varied and deeply interesting details of this great question of political economy. They will content themselves with a partial examination of two or three more of the strongest positions assumed by their opponents, referring for a more full exposition of their sentiments to the accompanying resolutions, and more especially to the very able and lucid report of the committee of the citizens of Boston opposed to an increase of duties upon importations, which, in the opinion of your

memorialists, contains a full and clear exhibition of the facts, calculations, and arguments applicable to the entire solution of this great national question.

Passing by, then, the fallacious doctrines of the tariff party about our independence of foreign nations for our supply of goods, the alleged drain of specie from our country for the payment of foreign nations, and the notions about that chimera called the balance of trade, your memorialists will proceed to consider two matters peculiarly affecting that portion of the country in which they reside, previously adverting, however, to a subject immediately connected with the proposed woolens bill. They have already said that the tariff of 1824 was the result of much deliberation, and was acknowledged as the ultimatum of the hopes and wishes of the high tariff party. The country had then a right to expect relief from a perpetually varying and increasing tariff. So general was this feeling that, on the introduction of the bill of last year, it was understood and professed to be only an act to enforce and render availing the duties imposed on woolens by the tariff of 1824, and not to be a new law doubling a duty amounting to 37½ per cent., and, with the addition of the expenses consequent upon importation, giving the domestic manufacturer a protection amounting to near 60 per cent., sufficient to originate and foster any branch of manufacture which can be really beneficial to the country. It has been alleged constantly, and has operated powerfully in favor of the proposed increase of the 37½ per cent. duty, that, owing to certain reductions of duties in England on wool and some articles used in the manufacture of woolen goods, the 37½ per cent. protection had been reduced nearly one-half. This statement your memorialists declare to be fallacious. To go into a detailed examination of the rates of British duty on the various articles referred to would exceed the limits proposed to this memorial; but your remonstrants are prepared to show that the whole reduction, in any way lessening the cost of woolen goods in England, does not amount, at the most liberal calculation, to more than 2½ per cent., which would still leave the enormous protection of 35½ per cent. on all woolen fabrics.

The great increase of employment for labor and capital alleged to be consequent upon an increase of the tariff upon woolens is strongly urged by the restrictionists as a matter of vast interest and concern to the inhabitants of the middle and eastern States. Great distress, occasioned by a want of employment, is gravely insisted upon as existing in those parts of our country by the very men who, to serve another purpose, loudly complain of the high prices of labor and scarcity of operatives as reasons for further protection by duties. The woolen manufacturers seem to have forgotten that the employment of labor and capital is not an attribute peculiar to themselves. The cultivators of wheat, cotton, and tobacco, and the manufacturers of ships, houses, and the various mechanics, certainly employ domestic labor to as great an extent, and are entitled to as much consideration, as themselves; and it is further manifest that the artisans of foreign countries who work for us, unless they give us their wares without money and without equivalents, must employ American capital and industry in providing payments. This is a principle which, properly estimated, would throw much light upon the subject of our trade with other nations, viz: that, unless they are generous enough to supply us gratuitously, in which case we ought not to complain, we *must* repay them by the exportation of articles the produce of our profitable domestic labor.

Taking the statements of the amount of capital and labor employed by the woolen manufacturers to be what they state, and supposing the total prohibition of foreign importation, the increased demand for labor and capital, according to calculations founded upon their own data, would amount to the employment of twenty-five thousand persons and twenty millions of dollars of capital. In a nation with a population of twelve millions of people we do not deny that, in the abstract, the employment even of much less labor and capital than this is an advantage to the country, but we cannot be content to purchase it at so enormous a price as the manufacturers themselves declare to be necessary.

They allege that, at the present rate of duties, when all the consumers are taxed near 60 per cent. for their benefit, to them the business is a ruinous one; from which it appears that, if the consumer lose this amount and the manufacturers lose their capital and labor also, the whole business must be very destructive and injurious to the country; and the employment of manufacturers in effecting the ruin of themselves and their country cannot be considered either as a profitable or rational species of labor. Such are the absurdities to which the friends of the high tariff system are reduced in supporting their cause. But, say the manufacturers, give us double the existing duties and we will employ twenty-five thousand persons and twenty millions of dollars of additional capital, to the great benefit of the agriculture, &c., of the country.

This argument, in its simple form, stands thus: lay a tax upon the consumers of woolens (who amount to ten or twelve millions of persons) to the amount of at least as many millions of dollars, and we shall be enabled to employ twenty-five thousand persons and twenty millions of dollars of capital, after having effected the ruin of the merchants engaged in the foreign woolen trade, and injured the farmers by the stoppage of a large foreign market for their produce.

Your memorialists will not, however, trespass much longer upon your attention, but draw to a conclusion, after adverting to one other subject immediately connected with the interests of that section of the Union in which they reside.

The restrictionists urge, against the importation of European, and especially of British goods, that these nations, from whom we purchase so largely, will not take our productions in return. We totally object to the principle of estimating the profitableness of the whole foreign trade of a country by its intercourse with a particular nation; for your memorialists aver that it might be to the interest of our country, under certain circumstances, to buy all that we import from Great Britain by payments made in specie, and without remitting, directly, any domestic produce whatever.

But the facts, with regard to our import and export trade to Great Britain, show that she and her colonies consume of our raw materials vastly more than the whole amount of manufactured goods which we import from her; that she is, in fact, our largest foreign customer; that the prosperous existence of more than one-half of the States of our Union depends upon the continuance of this export trade. If by the exclusive system, which is so strongly urged, we force Great Britain to seek her supplies of cotton and other southern produce elsewhere, as undoubtedly will be the case, we shall painfully discover, in the ruin that will ensue, that we are, and have been, possessed of articles more than adequate to the payment of all our foreign importations.

But the advocates of restriction, drawing an imaginary line between the interests of our country, affirm that of the produce of States north of the Potomac, "who are the large consumers of foreign manufactures, nothing is received abroad in exchange." A simple statement of facts will refute this ill-advised and rash assertion.

The export of articles manifestly of northern growth and production to Great Britain and her colonies

amounted, in 1826, to near six millions of dollars; and the freight of cotton and other southern articles, transported in northern ships and employing northern labor and capital, amounted, on a fair estimate, to near seven millions of dollars more; so that it is demonstrated that at least thirteen millions of dollars of northern and eastern capital has been employed where the manufacturers assert that not a dollar has been invested or produced; add to all this the grain, flour, and various agricultural productions, and, above all, the large amount of foreign goods re-exported to the southern States from the north, at a good profit, to feed and clothe the producers of cotton, tobacco, &c.—those envied articles of export in which it is said that the northern States do not participate—and compare this with the low prices which the planter receives for his various productions, and your memorialists believe that a very large proportion indeed of the profits of this trade will be found to centre in the north.

Believing, then, as your memorialists do, that the further increase of duties is unnecessary to the protection and advance of domestic manufactures, and would be prejudicial to the interests of all portions of our country, the northern as well as the southern; believing, also, that a shipping interest, amounting to eighty-five millions of dollars, and capital otherwise connected with commerce, amounting to hundreds of millions more, are entitled to some consideration from the Government, your memorialists are constrained earnestly to remonstrate against the passage of a bill increasing the present tariff of duties upon woolens or any species of merchandise.

If the protection system, as it is called, be carried much further, the manufacturers of the middle States will have to ask assistance and aid from Government against the skill and capital of the eastern States, and the southern planters, large bounties upon agriculture, to enable them to sustain the shock consequent upon a decrease of the foreign demand for their articles, which this very restrictive policy must inevitably produce.

Knowing the charm of names, the advocates of prohibitory duties have dignified their scheme with the title of the "American system." This appellation your memorialists conceive to be an unhappy and deceptive misnomer. If the reasonings of your remonstrants have any force or aptitude, the oppression of agriculture, the serious detriment of commerce, and the absolute injury of manufactures, would be the effects of the proposed system. How, then, a scheme totally erroneous in its theory, and excessively injurious in its practice to all the best interests of the United States, can be properly called the "American system," your memorialists are utterly unable to perceive.

They remonstrate earnestly against it, as impolitic, deceptive, and entirely anti-patriotic, and again beg that Congress will make no increase of the present rates of duties.

PHILADELPHIA, *January* 22, 1828.

20TH CONGRESS.] **No. 832.** [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 28, 1828.

To the honorable the Senate and the honorable the House of Representatives of the United States of America in Congress assembled:

The undersigned, merchants and others, residing in Portland, in the State of Maine, respectfully represent: That we cannot view with unconcern the proposition lately submitted to Congress to increase the duties on foreign merchandise, and particularly on iron, hemp, molasses, and woolen goods, not with a view to an increase of revenue, but for the sole purpose and avowed object of discouraging the importation of those articles, and of encouraging the manufacture and use of substitutes in this country. The reasoning relied upon to sustain this proposition is developed in a most ample manner, and by a course of reasoning, it must be admitted, both ingenious and plausible, by the Secretary of the Treasury. It is, nevertheless, we conceive, founded in a false assumption of facts. It is bottomed upon the supposition not only that these articles are of primary necessity, but that the skill, capital, and materials are wanting, and can only be acquired by extraordinary encouragement, and by a sacrifice of temporary interests, and of temporary interests alone. And it is argued that, after skill and capital shall have been acquired, we shall be furnished with many of these articles at a cheaper rate than we can otherwise hope to be able to purchase them. All this we conceive to be erroneous. We would inquire what skill there is in the manufacture of bar or cast iron which we do not possess, and which we have not possessed and had in constant operation for at least half a century? If we had the ore we should find the skill and capital abundant; and we are not yet informed that an increase of duty will supply the want of this indispensable article. If, therefore, a duty is to be laid to promote the production of this article it must be permanent and enduring, without hope of remission; and this must be done to favor some particular portion of the Union, whom fortune has already favored beyond any other portion in having ore suitable for manufacture. Wrought iron is, indeed, an article of primary importance. The poor man needs it in his implements, and it enters into almost every utensil. It is, above all, essential to navigation.

Commerce is at this time in a state of depression, arising, in a great measure, from exorbitant duties

already imposed. It is true that we have been able to import hemp from the Baltic, but this article also it is proposed to encumber with an additional duty to encourage the skill necessary in its production in this country. It seems incredible to us that any individual should pretend that an additional duty on this article is to be otherwise than a perpetual bounty, to be paid by those who have the misfortune to possess lands too sterile to produce this article, to the sole and exclusive benefit of those who are favored with lands of the most fertile and productive quality, which are alone capable of producing it. In relation to the proposed additional duty on molasses, we cannot forbear stating facts evidential of its importance to the commerce of this district. By an examination at the custom-house it appears that during the last year there were 203 clearances from this district for ports in the West Indies, and 158 inward entries from those ports; that there was imported into this district during the same period 3,890,321 gallons of molasses, paying a revenue of $238,843; that 37,843 tons of shipping were employed in this trade, navigated by 1,638 seamen; and that we exported over 26,000,000 feet of boards, scantling, &c. The foregoing statement, we conceive, will require no argument fully to prove the importance of the article to the commerce of this district. Should Congress burden this article with an increase of duty, already amounting to 33⅓ per cent. of its cost, the effect, we humbly conceive, must be to produce an absolute prohibition of its use for what is at present a very considerable portion of its consumption, and, consequently, an almost total annihilation of the commerce and business of this *district*, as well as that of our *State*. Our shipping, being of a peculiar construction, calculated for the exportation of lumber, and bringing the proceeds thereof in the cheapest and least valuable product of the West Indies, would be useless for any other branch of trade.

In relation to woolen goods we would remark that, in our belief, no further encouragement is necessary or reasonable; the manufacturers of them even now, in a good measure, supply the market of our country. The requisite skill has been acquired, and there is no lack of capital. The duty already imposed is about one-third of the cost. If this increase of price to the consumer is not adequate to the protection of the domestic manufacturer we do not believe that it can be expedient to extend it further. Considering the skill already attained, and the vast capital embarked in this species of manufacture, if requiring the people of this country, nevertheless, to pay one-third more for the article than it could otherwise be purchased for be not adequate protection, it seems to us that it would be much wiser to abandon all hope of succeeding in such a scheme, and to restore to the people the privilege of clothing themselves at a cheaper rate. It has been suggested, as an inducement to this species of manufacture, that it will encourage agriculture, and especially the growing of wool; but it cannot be regarded as otherwise than unfortunate for this branch of the argument that the price of wool has seldom been in a greater state of depression than at present, and much lower, in fact, than before the commencement of the manufacturing mania.

Your memorialists might enter into various details upon this interesting subject, but we forbear lest we should occupy ground already sufficiently familiar. We cannot but flatter ourselves that some importance is yet to be attached to commerce; that the branch of business which has already enabled the Government to pay, in a measure, the national debt; which has, in the course of less than forty years, afforded more than five hundred millions of revenue; which has, in the same time, been a source of great individual wealth; and which has diffused prosperity and happiness throughout every part of the community, will not be proscribed for the sake of a visionary and, to say the least of it, an uncertain experiment.

PORTLAND, *January*, 1828.

20TH CONGRESS.] No. 833. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 28, 1828.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS.

IN GENERAL ASSEMBLY, JANUARY SESSION, 1828.

Voted and resolved, That our delegation in Congress be requested to use all proper efforts to procure such increase of duties upon imports as may effectually afford protection both to the production and manufacture of wool, cotton, iron, hemp, and flax.

True copy—witness.

HENRY BOWEN, *Secretary.*

20TH CONGRESS.] No. 834. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 28, 1828.

WESTBOROUGH, *January* 21, 1828.

SIR: The committee of the citizens of Westborough, in imitation of our fellow-citizens of Boston and the vicinity, though personally unknown to you, feel emboldened by a similarity of sentiments entertained

by you and us, to assume the liberty to transmit to you our protest against the addition of further *restrictive* and *prohibitory* measures on *imports*, and particularly that of *woolen goods*. Knowing your correct, extensive, and exalted views on this subject, and your ability and felicity in displaying them, we are happy to avail ourselves of your generous and powerful aid, and submit, with full confidence, our memorial to your consideration and discretionary disposal, cherishing the fond hope that the united exertions and intercessions of all who are of *one mind* will be prevalent in the prevention of additional encouragement to a class of men already, in our estimation, *too highly favored*.

Till recently the great body of the people of this Commonwealth have been but careless "*lookers on*," while the manufacturers have been *vociferous* and *active*, and, by their loudness and perpetual movements, have made themselves, and perhaps the country at large, believe that a small minority were "*We, the people of the United States*."

On our part, apathy and silence can no longer prevail; and we now, on the brink of imminent danger, begin to speak and to act.

We confide in the wisdom and equal policy of our National Legislature to avert the impending evils, and preserve and perpetuate the rights and immunities of every class of citizens throughout our vast and rising Republic.

With sentiments of high consideration and profound respect, the committee subscribe themselves your friends and very humble servants,

NATHAN FISHER.
LOVETT PETERS.
NAHUM HARRINGTON.
I. LEWIS GREEN.

Hon. Robert Y. Hayne.

To the honorable the Senate and House of Representatives of the United States in Congress assembled:

The undersigned, citizens of Westborough, in the county of Worcester and Commonwealth of Massachusetts, respectfully represent: That they view with deep solicitude, mingled with fear and regret, the importunate efforts of the friends and advocates of additional duties "on imports, and especially on the important and essential article of woolen manufactured goods." As we are almost exclusively farmers and landholders, we might enumerate many sore grievances, peculiarly our own, and pour numerous and endless complaints into the ears of our National Legislature respecting our necessary and useful, but ungainful employment, in cultivating the ground; yet principles of justice and self-respect, the duty of peaceable and quiet citizens, forbid that we should weary our Government with a recital of our ill-requited toils, and the absolute and comparative unproductiveness of our agricultural labors. What we could not expect as a right we will not seek to obtain by unceasing importunity. The times to us have been, and now are, inauspicious for the easy and rapid accumulation of wealth; and though we may suffer more than our proportion, yet, as we are sensible we are suffering in company with most of our fellow-citizens through the United States, we will bear our burden with cheerfulness, and hope for the dawn of a brighter day. We will not ask for favors to be extended to us, and more especially when the bestowment would be a detriment to the interests and occupations of other classes of the community. "We are troubled on every side, yet not distressed; we are perplexed, but not in despair;" and, under all our embarrassments, we conceive our only just and hopeful remedy is retrenchment of superfluous expenses, an increase of industry, frugality, and enterprise, and to let nothing check our perseverance in the prosecution of every laudable pursuit. Soliciting no boon for ourselves, we are unwilling that any should be conferred on others at our charge, who are not more meritorious or indigent than we.

Wishing that the political balance may be held even and impartially, and that all interests advantageous to our Republic may receive due patronage, we can truly avow that we feel friendly to manufacturing establishments. It is not their annihilation or embarrassment we desire, but their existence and prosperity. Not that they should grow up prematurely, or be multiplied indefinitely, but that they should rise naturally, in order that they may rise vigorously; that they may rise like the oak, which, accustomed to frost and tempest as well as sunshine and the gentle gales of summer, increases slowly, indeed, but surely, and unsupported by extrinsic aid; and not like the ivy, to be upheld by the oak, and altogether without a self-sustaining power.

Though your memorialists believe the tariff of May, 1824, is raised to a pitch affecting injuriously agriculture and foreign commerce, we do not ask its repeal. But, at the same time, we have the fullest conviction "that a true national policy does not dictate its augmentation." We do not believe an increase of duties would be beneficial to the manufacturers themselves in general; and there can be no doubt it would be immediately and permanently disadvantageous to agriculturists, mechanics, and those engaged in foreign commerce. As often as the farmer secedes from agriculture and the merchant from commerce, and invest their capital in manufacturing establishments, so often we have evidence that they believe the business of manufactures to be more lucrative than the vocation they have voluntarily abandoned; and instead of soliciting gratuities from their fellow-citizens, we think they ought to be satisfied with the fruits of a calling in which they so willingly engaged. Self-love, self-interest, not love of country, induces men to choose their professions and pursuits. Patriotic motives have very little, and a very remote influence in the election. It is love of self that leads us. We do not pretend to be adepts in political economy; but experience, a very useful instructor and sure guide, informs us that the "home market" created by the erection of factories is, and we believe ever will be, quite inadequate to meet the exigencies of our country. Though manufacturers virtually say of themselves, "we are the number born to eat up the fruits of the earth," still, to all except those in the immediate vicinity of factories, no perceptible difference has yet been realized in the consumption of the surplus products of the husbandman by the population of these numerous establishments. Other and better markets must be had, or the agricultural interest, the basis and aliment of all others, will continue depressed and languishing.

What Alexander Hamilton wrote forty years ago is applicable to our time. "There are persons," says this profound statesman, "who imagine that the duties on imports can hardly be carried to an injurious excess, since the higher they are, the more, it is alleged, they will tend to discourage an extravagant consumption, to produce a favorable balance of trade, and to promote domestic manufactures. But all extremes are pernicious, in various ways. Exorbitant duties on imported articles are sure to beget a general spirit of smuggling, which is always prejudicial to the fair trader, and eventually to the revenue

itself. They tend to render other classes of the community tributary in an improper degree to the manufacturing classes, to whom they give a premature monopoly of the markets. They sometimes force industry out of its most natural channels into others in which it flows with less advantage. And in the last place, they oppress the merchant, who is often obliged to pay the duties himself without any retribution from the consumer." So far as our intelligence extends, "the restrictive policy and prohibitory system" make few proselytes in this region, except those who have invested their property in cotton or woolen factories, or are connected with them by some kind of entangling alliance.

We believe that the sentiments of a great majority of the citizens of Massachusetts and through New England have been, and still are, strongly opposed to an imposition of further duties on imported woolen goods. It does not become us to enlarge further on this fruitful and interesting topic, but to conclude by saying we have attentively perused the excellent memorial from the citizens of Boston and vicinity which has been already transmitted to Congress, and most cordially approve of the sentiments therein so ably expressed, and humbly and respectfully entreat that our opinions and wishes may not be disregarded on account of the triteness of our observations, the feebleness of our manner of utterance, the obscurity of our residence, or the paucity of our numbers; but that our note of remonstrance may be heard for the sake of the magnitude of the cause, and the paramount interests of our common and beloved country.

NATHAN FISHER,
LOVETT PETERS,
NAHUM HARRINGTON,
I. LEWIS GREEN,
For ourselves and sixty-seven others, inhabitants of Westborough.

20TH CONGRESS.] No. 835. [1ST SESSION.

AGAINST INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 29, 1828.

At a numerous and respectable meeting of the citizens of Chester district, assembled at Chester Court-House, by previous notice, for the purpose of taking into consideration the proposed tariff on woolens, on Monday, the 3d September, 1827, Dr. John Dunovant was called to the chair, and James Chestney, jr., appointed secretary.

The committee appointed at a former meeting, consisting of N. R. Eaves, Esq., Clough S. Sims, Esq., John I. Potts, Esq., Mathew Williams, Esq., and John McKee, Esq., by Major Eaves, their chairman, reported the resolutions and memorial subjoined:

1st. *Resolved*, That it is not only the right but the duty of the citizens of this country, when aggrieved by unequal legislation, to remonstrate with firmness and decision, and to oppose with unremitting perseverance, every effort of Government to impose upon them taxes at variance with the Constitution, which proposes to guarantee to our citizens equal privileges and immunities.

2d. *Resolved*, That it is inconsistent with the principles of a free Government that the interest of the majority of its citizens should be sacrificed to those of the minority, and contrary to the spirit of sound legislation that the property of one part of the community should be appropriated, without an equivalent, to the exclusive right of the other.

3d. *Resolved*, That the present system of restriction and prohibition upon trade, by tariff duties, denominated the American system, is unequal in its provisions, unjust in its operation, and will, if suffered to progress, prove destructive to the peace and happiness of our country.

4th. *Resolved*, That the attempt, during the last session of Congress, to impose on the citizens of this country an additional tariff, by the provisions of the woolens bill, was unexpected at that time, and calculated to prostrate the agricultural and commercial interests to the mercy of the manufacturers; that, operating as a heavy tax upon the poor and laborious part of the community, it is altogether inexpedient, and will, in a high degree, prove prejudicial to the southern States, who depend upon foreign importation for cloths for themselves and their slaves.

5th. *Resolved*, That the citizens here assembled consider the proceedings of the late Harrisburg convention as a singular instance of the disposition of the manufacturers to be constantly desirous of increasing the already enormous tariff; and that they strongly suspect it to be an attempt, by combination and intrigue, to buy the interests of the manufacturers, at the expense of the remaining part of the citizens, in favor of the present administration.

6th. *Resolved*, That the proceedings of this meeting be signed by the chairman and secretary, and published, and that copies be forwarded to the Representatives of this election district, and the Senators of this State, to be presented to Congress.

Memorial to the honorable the Senate and House of Representatives of the United States in Congress assembled:

The memorial of the citizens of Chester district, South Carolina, respectfully showeth: That they approach your honorable body under the sanction of that right which secures to them the privilege of petitioning Congress for a redress of their grievances; that, exercising that right in the present instance, they do it under the firm conviction that they advocate the interest of the majority of their fellow-citizens in the United States, and are neither influenced by party feelings nor actuated by motives of sectional aggrandizement. Your memorialists view, with apprehension and regret, the extension of that principle

of legislation which, if suffered to progress, will render one class of citizens tributary to the wealth and advancement of the other. The present system of prohibition and restriction upon trade is a system of taxation upon the consumer for the benefit of the manufacturer—a principle, it is humbly conceived, recognized neither in the letter nor in the spirit of the Constitution. They consider the manufacturer as entitled to no exclusive privileges above the rest of our community. In a Government of equality, the talents, the information, and the enterprise of its citizens, are the only sources to which they should look for success in any business in which they may choose to embark. If this principle be correct, that of affording governmental encouragement to the manufacturers must be a policy founded in an ignorance of human nature.

The manufacturers, accustomed to look to this source for the reward of their labor, will regard their own efforts as a secondary means of success, and, as competition increases, will make new requisitions upon the funds of Government, or, we might rather say, upon the pockets of their neighbors through the instrumentality of Government. Your memorialists are aware that they are opposing a principle adopted by the former members of your honorable body, from the year 1816 to 1824; but they are confident that the wisdom and integrity which should ever influence the councils of a legislative body will lead you to reject error whenever discovered, although recommended by the highest authority, and especially when proved so, not only by its effects upon other countries, but by our own uniform experience.

While the exigencies of Government require that those duties should be imposed for the purpose of revenue, your memorialists are satisfied they will be disposed to acquiesce in silence, although they might even then regard it as a tax of unequal operation. But when this object is deserted for the purpose of rendering them tributary to the manufacturing monopolists, they are compelled, by a sense of their violated rights, to enter a solemn protest against it. They are firmly convinced that this species of tax is at variance with the Constitution, and that, if that instrument be suffered to receive this unlimited construction, it will open a field for every species of imposition, and, instead of being the charter of our rights and privileges, will become the means of enslaving us.

Your memorialists would, in a particular manner, call your attention to the woolens bill, happily rejected by your honorable body during its last session, and which will no doubt be brought up for your consideration at its next, aided by all the talent and influence of those interested in its passage. In addition to the reasons which may be urged against the system of taxation, denominated by its advocates the American system, the provisions of this bill are so manifestly selfish, and so much at variance with the true interest of our country, as to render it the just object of suspicion to every enlightened and impartial statesman. It is unnecessary to point out to your honorable body what would be its unjust operation upon the majority of the citizens of the United States, and would be no compliment to your good sense to endeavor to show what would be its ruinous effects upon the citizens of this State. Its tendency to impose a grievous tax upon us, by increasing the price of clothing for our slaves and by diminishing the price of our cotton, is obvious to every thinking member of the community. Your memorialists are fully impressed with the belief that the measures above adverted to are calculated to alienate the affections of a large class of citizens, and of introducing that spirit of jealousy and opposition to the operation of the General Government which will prove destructive to the peace and happiness of our country. To avoid consequences that are deprecated by every lover of his country, we solicit your serious opposition, not only to the woolens bill, but to that principle of odious taxation so fondly cherished by the advocates of the American system.

JOHN DUNOVANT, *Chairman.*

JAMES CHESTNEY, Jr., *Secretary.*

20TH CONGRESS.] **No. 836.** [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 29, 1828.

To the honorable the Senate and House of Representatives of the United States:

The petition of the undersigned, residents of the county of Northumberland, in Pennsylvania, respectfully represents:

That deeply sensible of the great importance to the true interests of the United States of further support to the agriculture and manufactures of the country, they solicit, with much deference, an early, earnest, and effective attention to these great objects from your honorable bodies.

Your petitioners beg leave to state that the prosperity of this community is much retarded at this time for want of a home market to the farmer. While the ports of Great Britain are closed against him, the annual importations of twenty millions of dollars from that nation, in manufactures, depress and ruin domestic industry, and disable the mechanic and manufacturer of our country from growing up, alongside of the farmer, to consume his products.

The decisive success of the manufacture of cottons, under a generous and enlightened protection, demonstrate, we respectfully conceive, that nothing is required to establish immovably our manufactures of iron, wool, flax, hemp, and printed cottons, and to insure a reduction of prices for them, and appreciated rates for the agriculturist, but a liberal support by augmented duties upon foreign manufactures of these descriptions.

Without tediously enlarging upon subjects which cannot be considered otherwise than of the deepest concern and the greatest moment to the Union, we respectfully represent that we cordially concur in the sentiments and recommendations of the Harrisburg convention, held in July last, to whose memorial we pray a serious and earnest attention from the National Legislature.

20TH CONGRESS.] No. 837. [1ST SESSION.

IN FAVOR OF INCREASE OF DUTIES ON IMPORTS.

COMMUNICATED TO THE SENATE JANUARY 29, 1828.

COMMONWEALTH OF PENNSYLVANIA, *Harrisburg, January* 22, 1828.

SIR: I have the honor to transmit to you the following resolutions for affording additional protection to domestic manufactures and encouraging agricultural interests, to which your attention is respectfully requested.

I am, respectfully, sir, your obedient servant,

J. AND'W SHULZE.

ISAAC D. BARNARD, Esq., *a Senator of this State in the Senate of the United States, at the city of Washington.*

A RESOLUTION for affording additional protection to domestic manufactures and encouraging agricultural interests.

Experience having proved that the present tariff of the Government of the United States, whilst it has been productive of great and extensive benefits to the country, has yet been insufficient to render that protection to our domestic manufactures and agricultural interests to which they are fairly entitled. These important branches of internal industry, so closely connected that, it may now be said, the prosperity of the one depends on the success of the other, are equally entitled to aid and encouragement. The best interests of our country demand that every possible exertion should be made to procure the passage of an act of Congress imposing such duties as will enable our manufacturers to enter into fair competition with foreign manufacturers, and protect the farmer, the growers of hemp and wool, and the distiller of spirits from domestic materials, against foreign competition. The people of Pennsylvania do not ask for such a tariff as would secure to any one class, or to any section of the country, a monopoly. They want a system of protection which will extend its blessings, as well as its burdens, as equally as possible over every part of the Union; to be uniform in its operation upon the rich as well as the poor. Therefore—

Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met, That the Senators of this State in the Senate of the United States be and they are hereby instructed, and the Representatives of this State in Congress be and they are hereby requested, to procure, if practicable, the establishment of such a tariff as will afford additional protection to our domestic manufactures, especially of woolen and fine cotton goods, glass, and such other articles as, in their opinion, require the attention of Congress, so as to enable our citizens fairly to compete with foreign enterprise, capital and experience, and give encouragement to the citizens of the grain-growing States, by laying an additional duty upon the importation of foreign spirits, flax, chinaware, hemp, wool, and bar iron.

And be it further resolved, That the Governor be and he is hereby requested to transmit a copy of the foregoing preamble and resolution to each of our Senators and Representatives in Congress.

NER MIDDLESWARTH,
Speaker of the House of Representatives.
DAN'L STURGEON,
Speaker of the Senate.

Approved the eleventh day of January, A. D. one thousand eight hundred and twenty-eight.

J. AND'W SHULZE.

PENNSYLVANIA, *ss.*

Office of the Secretary of the Commonwealth:

I certify, to all whom it may concern, that the foregoing is a true copy of the original resolutions now filed and of record in the said office.

In testimony whereof, I have hereunto set my hand and seal, at Harrisburg, the twenty-second day of [L. S.] January, in the year of our Lord one thousand eight hundred and twenty-eight, and of the Commonwealth the fifty-second.

JAMES TRIMBLE, *Deputy Secretary.*

20TH CONGRESS.] No. 838. [1ST SESSION.

CREDIT SYSTEM FOR DUTIES.

COMMUNICATED TO THE SENATE JANUARY 29, 1828.

Mr. SMITH, of Maryland, from the Committee on Finance, to whom was referred so much of a memorial from Pittsburg as relates to the credits given for duties at the custom-houses, reported:

That, having had the same under consideration, they directed that a letter be addressed to the Secretary of the Treasury on the subject. His answer the committee ask leave to submit as part of their

report; and also to submit, as their opinion, "that it is inexpedient to make any alteration in the credit system for duties on goods, &c., &c., imported into the United States."

TREASURY DEPARTMENT, *January* 23, 1828.

SIR: I had the honor to receive your letter of the 10th instant, stating that there had been referred to the Committee on Finance so much of a memorial from Pittsburg as relates to a reduction of credit on duty bonds, and that the committee wish to be informed whether the present terms of credit on such bonds are in any way injurious or dangerous to the revenue, and whether losses have arisen in consequence of such long credits that would not have happened if the terms of credit had not been extended. Your letter further requests that I will state what are the present terms of credit, what were the terms prior to the extension, and what terms would be safe for the revenue and not inconvenient to the commerce of the nation.

The enclosed letter from the Comptroller exhibits so much of the information desired by the committee as relates to the present terms of credit on duty bonds, and to the terms prior to the extension, commencing with the act of July 31, 1789, which was the first, and ending with that of April 20, 1818, which is the last upon this subject. The enclosure, marked A, exhibits the whole subject under a different form of statement, and may be a form convenient for the inspection of the committee.

It appears that, by the existing laws, the duties on the bulk of importations are payable in eight, ten, and twelve months. There are credits as short as six months, and others that extend to eighteen months, according to the countries whence the articles come. But the revenue of the United States from importations is derived, in a proportion scarcely less than that of four parts in five, on credits of from eight to twelve months inclusive.

The other inquiries of your letter, to be fully or satisfactorily answered, necessarily involve the broad question of how far the present credit system is wise or expedient in its various bearings upon the revenue and foreign commerce of the nation? I should have been happy to investigate this question under further lights than I find on the records of this Department at present in immediate relation to it, or than I could hope to command without the lapse of a longer interval than would be compatible with the duty of affording a timely reply to your letter. Like most questions of policy embracing interests that are large and complicated, it is open to different views, as to which safe conclusions can only be arrived at by carefully comparing all the evidence attainable, and allowing to each course of reasoning its due relative weight. It may be said, however, that as the present credit system, or one that in the main has resembled it, has been a system under which the foreign commerce of the United States has, upon the whole, greatly flourished during a period of nearly thirty years, the evidence of its being erroneous ought to be very cogent and unequivocal to authorize the recommendation of a change. If, indeed, as has been said, it does, under any view, operate as an annual loan to the merchants by the Government, no objection is perceived to it on this score; on the contrary, since Government is in the performance of its best functions whilst aiding the industry of any great class of the community, provided this can be done without unduly trenching upon the interests of other classes, each class owing something to the claims of the other in the task of reconciling and adjusting the interests of the whole.

With these general remarks I proceed to reply, under the best lights now before me, to your questions specifically. They are as follows:

1. Is the present credit system in any way injurious or dangerous to the revenue?

2. Have losses arisen under it that would not have happened if the terms of credit had not been extended?

3. What terms would be safe for the revenue and not inconvenient to the commerce of the nation?

1. Replying to the first question, not in a confined and technical sense, but in one more enlarged, which I understand as the true sense in which the question is propounded, I have to say that the present system is not believed to be injurious or dangerous to the revenue. The system must be looked at as a whole, or the question cannot be fitly answered. It must be looked at, not solely in connexion with losses that may occur to the revenue under it, but also with the benefit which the revenue probably derives from it by the greater extension which it gives to our foreign commerce. Serving as capital to persons often otherwise unable to engage in trade, the ultimate augmentation to the revenue from this effect of the system stands as a counterbalance to the occasional losses that happen under it. It may be added, apart from this twofold view of the system, that the positive losses under it have been found to amount to a sum which it is thought may safely be pronounced very small. The whole amount of duties secured to the Government by bond from the 3d of March, 1789, to the 31st December, 1823, was $527,480,239. Of this sum $1,575,626 had been lost at the date last mentioned, and $758,191 were in suit, or otherwise doubtful. Assuming the whole of the latter sum to have been lost, which, however, has not been the case, the entire loss upon the aggregate sum first stated is less than 45 cents in each one hundred dollars.

2. Have losses arisen under the system that would not have happened if the terms of credit had not been extended? The answer to this question has, in effect, been anticipated by what has been said. It may, doubtless, be considered that some losses have happened that would have been less likely to happen under credits less extended; but it is deemed altogether probable that the importation would have been less.

3. An answer to the third question is embraced in the preceding answers; for not being prepared, at present, with any such objections to the existing credit system as would go to its abolition, I have no substitute to propose, so far as concerns the revenue and foreign commerce of the nation.

The views thus communicated to the committee in reply to your letter I feel the more confidence in at this juncture, from their being substantially the same with those expressed by my predecessor in this Department in his communication to the House of Representatives under date of December 14, 1824.

I have the honor to remain your most obedient servant,

RICHARD RUSH.

Hon. SAMUEL SMITH, *Chairman of Committee on Finance, Senate.*

TREASURY DEPARTMENT, *Comptroller's Office, January* 18, 1828.

SIR: In compliance with your request that I should communicate to you the terms of credit allowed under the former and existing laws for the payment of the duties on goods exported, I have the honor to state—

1. That the 19th section of the act to regulate the collection of duties imposed by law on the tonnage of ships or vessels, and on goods, wares, and merchandise imported into the United States, passed July 31, 1789, contains the following regulation on the subject: "For the duties upon all articles of West India produce, within four months; for the duties upon all Madeira wines, within twelve months; and for the duties upon all other goods, within six months."

2. That the terms of credit allowed by the 62d section of the collection law of March 2, 1799, are as follows: "On articles the produce of the West Indies, (salt excepted,) the one-half in three, and the other half in six calendar months; on salt, in nine calendar months; on Madeira and all other wines, in twelve calendar months; on all goods, wares, or merchandise, (other than wines, salt, or teas,) imported from Europe, one-third in eight, one-third in ten, and one-third in twelve calendar months; on all goods, wares, and merchandise, other than wines, salt, and teas, imported from any other place than the West Indies and Europe, one-half in six months, one-quarter in nine months, and the other quarter in twelve months, from the date of each respective importation." But, in relation to teas imported from China or Europe, it is left optional with the importers to secure the duties in one of two ways specified in that section.

3. That the first section of an act entitled "An act laying a duty on imported salt, granting a bounty on pickled fish exported, and allowances to certain vessels employed in the fisheries," allows of a credit of nine months for the payment of the duties on all *salt* imported from any foreign port or place into the United States.

4. That the 6th section of the act entitled "An act providing for the deposit of wines and distilled spirits in public warehouses, and for other purposes," passed the 20th of April, 1818, directs that the bonds for duties on articles imported by sea, the produce of foreign places, or islands situated on the eastern shores of America, north of the equator, or in its adjacent seas, bays and gulfs, *(salt excepted,)* shall be payable, one-half in six, and one-half in nine calendar months; and the bonds for duties on goods, wares, and merchandise, (other than wine, salt, and teas,) imported from any other place than Europe and the West Indies, shall be payable, one-third in eight, one-third in ten, and one-third in eighteen calendar months.

With considerations of high respect, I have the honor to be your obedient servant,

JOS. ANDERSON, *Comptroller.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

Terms of credit, according to the 62d section of the collection law of March 2, 1799.

Importations from the West Indies, (salt excepted,) one-half in three, and the other half in six calendar months; on salt, in nine calendar months; on Madeira and all other wines, in twelve calendar months; on all goods, wares, and merchandise, (other than wines, salt, and teas,) imported from Europe, one-third in eight, one-third in ten, and one-third in twelve calendar months; on all goods, wares, and merchandise, (other than wines, salt, and teas,) imported from any other place than Europe and the West Indies, one-half in six months, one-quarter in nine months, and the other quarter in twelve months from the date of each respective importation, leaving it optional with the importers of teas from *China* or *Europe* to secure the duties in one of two ways specified in that section. 19th section act July 31, 1789: On all articles of West India produce, within four months; on all Madeira wines, within twelve months; on all other goods, within six months.

According to the 1st section of the act of July 29, 1813, vol. 4, p. 582, the credit for the duty on salt *imported from any foreign* port or place was to be nine months.

According to the 6th section of the act of April 20, 1818, vol. 6, p. 355, the bonds for duties on articles imported by sea, the produce of foreign places, islands situated on the eastern shores of America, north of the equator, or in its adjacent seas, bays and gulfs, salt excepted, shall be payable, one-half in six, and one-half in nine calendar months; and the bonds for duties on goods, wares, and merchandise, (other than wines, salt, and teas,) imported from any other place than Europe and the West Indies, shall be payable, one-third in eight, one-third in ten, and one-third in eighteen calendar months.

It is to be remarked that the last mentioned act makes no provision for the terms of credit to be allowed on importations from Europe. The regulations in the 62d section of the act of March 2, 1799, in relation to the terms of credit to be allowed on goods thus imported, are therefore still to govern, as well as with respect to the terms of credit to be allowed on wines and teas imported from *any other place* than foreign places, or islands situated on the eastern shores of America, north of the equator, &c., &c.

The act of April 20, 1818, is the last which makes any regulations as to the terms of credit to be allowed in the payment of the duties on goods imported.

20TH CONGRESS.] No. 839. [1ST SESSION.

AMOUNT OF CONTINENTAL MONEY ISSUED DURING THE REVOLUTIONARY WAR, AND DEPRECIATION OF THE SAME.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 30, 1828.

TREASURY DEPARTMENT, *January* 24, 1828.

SIR: In obedience to a resolution of the House of Representatives of the 16th instant, directing the Secretary of the Treasury to "communicate to the House a statement showing the number and amount

of the issues of continental money made during the revolutionary war, designating each issue of such money, and the amount thereof; also, any information which may be in his Department relative to the depreciation thereof, and the rates at which, from time to time, it was made receivable by creditors of the United States or persons engaged in their service in payment of debts or wages due them," I have the honor to transmit a letter from the Register of the Treasury, which, together with the three statements accompanying, furnishes the information called for by the resolution.

I have the honor to remain, very respectfully, your obedient servant,

RICHARD RUSH.

Hon. the SPEAKER *of the House of Representatives of the United States.*

TREASURY DEPARTMENT, *Register's Office, January* 24, 1828.

SIR: In compliance with your reference to this office of the resolution of the House of Representatives of the 16th instant, I have the honor to transmit a statement of the issues of continental money required by the first clause of that resolution.

With respect to the latter part of the resolution, having for its object the mode by which depreciated paper money was liquidated at the Treasury, the records exhibit two, to wit: 1st. As applicable to the payment of the principal and interest of loans predicated upon a table compiled agreeably to the resolution of Congress of the 28th of June, 1780. 2d. As applicable to the settlement of individuals in several of the States. Copies of the table and of the scales used for these purposes I have the honor also to enclose, and to be, sir, with great respect, your obedient servant,

JOSEPH NOURSE, *Register.*

Hon. RICHARD RUSH, *Secretary of the Treasury.*

JOSEPH NOURSE, *Register.*

TREASURY DEPARTMENT, *Register's Office, January* 22, 1828.

Table for the payment of principal and interest of loans, agreeable to the resolution of Congress of the 28th day of June, 1780.

IN CONGRESS, JUNE 28, 1780.

Whereas Congress, on the 18th day of April last, resolved in the words following, viz: That Congress will, as soon as may be, make such provision for discharging or continuing the loans that have been made to these United States, on Loan Office certificates, as that the holders of them shall sustain no loss thereon by any depreciation of the bills loaned subsequent to the respective dates of the said certificates: Therefore,

Resolved, That the principal of all loans that have been made to these United States shall finally be discharged by paying the full current value of the bills when loaned; which payment shall be made in Spanish milled dollars, or the current exchange thereof in other money, at the time of payment.

That the value of the bills, when loaned, shall be ascertained for the purposes above mentioned, by computing thereon a progressive rate of depreciation, commencing with the 1st day of September, 1777, and continuing to the 18th day of March, 1780, in geometrical progression and proportion to the time, from period to period, as hereafter stated, assuming the depreciation at the several periods to be as follows:

On the 1st day of March, 1778, one dollar and three-quarters of a dollar of the said bills for one Spanish milled dollar; on the 1st of September, 1778, as four of the former for one of the latter; on the 1st of March, 1779, as eighteen of the former for one of the latter; and on the 18th day of March, 1780, as forty of the former for one of the latter.

That the principal of all certificates that have been taken out since the 18th day of March last shall be discharged at the rate of one Spanish milled dollar, or the current exchange thereof in other money, at the time of payment, for forty dollars of the said bills of credit received on loan.

That the principal of all certificates that shall hereafter be taken out, until the further order of Congress, be discharged at the same rate and in the same manner as those that have been taken out since the 18th day of March last.

That the interest on Loan Office certificates, at the rate of six per cent. per annum, computed on the principal, ascertained as aforesaid, shall be discharged annually, in like manner as the principal, until the principal shall be paid: *Provided, nevertheless*, That the same interest and mode of payments on certificates taken out before the 1st day of March, 1778, shall be continued as at present, until the principal, ascertained as aforesaid, shall be ready to be discharged.

Ordered, That the Board of Treasury prepare the proper tables for direction of the Commissioners of the Continental Loan Offices in the several States in paying off the principal and interest of loans agreeable to the foregoing resolutions.

Extract from the minutes.

GEO. BOND, *Deputy Secretary.*

TREASURY OFFICE, *July* 29, 1780.

In pursuance of the foregoing act, and on the principle therein laid down, the following table, for direction of Commissioners of the Continental Load Offices in the several States in paying off the principal and interest of loans, is prepared, showing the value of one hundred dollars of the currency of the United States loaned at any time before the 1st day of September, 1777, and the 18th day of March, 1780, in specie, with its interest for a year.

It is to be observed that the specie value of one hundred dollars, found on any day within the table, is to be multiplied by the number of hundreds expressed in the certificate of the same date, whose value in specie is required, and, in like manner, the interest arising thereon, and the answer will be obtained. See example.

EXAMPLE.

	Dolls.	90ths.	8ths.
The specie value of a certificate of five hundred dollars, and its interest, loaned the 1st day of May, 1779, as required on that day: By the table, the specie value of one hundred current dollars is eight dollars twenty-ninetieths of a dollar and five-eighth parts of a ninetieth, which, multiplied by five, gives forty-one dollars thirteen-ninetieths and one-eighth for the principal.	8	20	5
			5
	41	13	1
The interest thereon, forty-four-ninetieths and three-eighths, multiplied by five, the number of hundreds in the certificate, gives two dollars forty-one ninetieths and seven-eighths of a ninetieth for its interest in specie.	0	44	3

20TH CONGRESS.] No. 840. [1ST SESSION.

REMISSION OF FORFEITURE FOR VIOLATION OF REVENUE LAWS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 30, 1828.

MR. GORHAM, from the Committee on Commerce, to whom was referred the memorial of Peters and Pond, respectfully reported:

That the petitioners, citizens of Boston and joint owners of the brig Anna, despatched her for Lisbon in the spring of 1813, under the command of Reuben Newcombe. She sailed under Swedish colors, a practice at that time frequently adopted by American ship-owners to avoid the British cruisers and ships-of-war; but the brig was, in fact, originally American, and always owned by American citizens. She arrived in Lisbon, and there the captain placed her under the Portuguese flag, took a cargo on board, cleared, and sailed for Amelia island, but by stress of weather was compelled to put into Savannah, in Georgia. The day after her arrival the captain attempted to smuggle part of the cargo on shore. The custom-house officers being apprised of the violation of the law, the vessel and cargo were seized, libelled, condemned, and sold, and the proceeds distributed according to law—one moiety to the informers, &c., the other moiety to the United States. The net amount of the whole vessel and cargo exceeded thirty thousand dollars.

Your committee, upon examination of the facts and evidence, have agreed to report a bill for the relief of the petitioners, so far as regards the moiety paid into the Treasury of the United States. By documents from the Treasury, it appears that Newcombe received part of the proceeds as informer; it also appears that he has never since returned to Boston, but has absconded; from which it may be inferred that he acted not only in violation of the laws of the United States, but with treachery to his employers. The committee have been struck, too, with the extraordinary haste and precipitancy of the admiralty proceeding. The vessel arrived at Savannah on the 18th February, 1814, attempted to smuggle on the 19th, was seized on the 20th, the vessel and cargo condemned, and on the 24th and 28th of the same February were sold, in pursuance of the decree of condemnation, and the proceeds distributed as before stated. The petitioners lived and were then residing in Boston, twelve hundred miles distant, and could not, therefore, have been seasonably apprised of the proceedings to enable them to take the usual measures in such cases for a remission of the forfeiture. The petitioners are known to be merchants of character and reputation in Boston, and no evidence appears to show that they were in any respect privy or consenting to the illegal acts of their captain. The Secretary of the Treasury has by law the power to remit penalties and forfeitures when, in his opinion, they have been incurred without wilful negligence or any intention of fraud on the part of those who shall incur them; but his authority ceases where the penalty or forfeiture has been recovered or enforced; and the party suffering can then be relieved only by Congress, who, the committee presume, will think it just to act upon the same principle, after the payment

or enforcement of a penalty, as by law is made the guide of the Secretary before such payment or enforcement. A report favorable to the petitioners was formerly made at the first session of the 19th Congress, being Rep. No. 179, in which the facts and evidence are more particularly detailed, and to which your committee beg leave to refer. A bill for the relief of the petitioners accompanies this report as a part thereof.

20TH CONGRESS.] No. 841. [1ST SESSION.

IN FAVOR OF REDUCTION OF DUTIES ON WINES.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 30, 1828.

Mr. CAMBRELENG, from the Committee on Commerce, to whom was referred a resolution of the 27th of December, instructing them to inquire into the expediency of revising the duties on wines "so as to equalize the same in reference to the first cost of the several kinds and qualities," submitted the following report:

No part of our tariff requires more prompt attention from Congress than that now under consideration. The existing inequality of duties seems designed to encourage the violation of our revenue laws, and to destroy some branches of our wine trade which were once useful and profitable. We have now the following rates per gallon:

Madeira, Burgundy, Champagne, Rhenish, and Tokay	100	cents.
Sherry and St. Lucar	60	"
Lisbon, Oporto, other wines of Portugal, and wines of Sicily	50	"
Teneriffe, Fayal, and other wines of the Western Islands	40	"
Wines not enumerated, when in bottles or cases	30	"
All other wines, when otherwise than in bottles or cases	15	"

These rates are adjusted with very little regard to the relative value or actual cost of wines. Wines of equal quality, and sometimes of neighboring provinces, are, if they happen to be enumerated, charged with 100 cents per gallon; and if not specified they are admitted at 15 cents. Rhenish wines are all rated at 100 cents, without reference to quality, while those cultivated on the Mayn, equal to any in Germany, are charged with only 15 and 30 cents. Burgundy and Champagne pay 100 cents, while the wines of every other province in France, and particularly the celebrated wines of Bordelais, are admitted at 15 and 30 cents. Sherry actually costs more than Madeira, yet the latter is charged with 40 cents higher duty than the former. Most of the wines imported at 15 and 30 cents are equal in quality to those on which 40 and 50 cents are charged. These various and unequal rates naturally induce those engaged in this commerce to introduce wines into the United States through indirect channels, and to injure their quality, by preparing abroad imitations of Madeira, Sherry, Port, Lisbon, Sicily, &c., &c., to avoid the high duties.

The worst feature in our present tariff is that provision which admits all wines not enumerated at the lowest duty of 15 cents per gallon. It substantially proposes to the navigation and commerce of other nations premiums varying from 15 to 85 cents on every gallon of wine carried from the country or province whose wine may be charged with a high duty, to some other place from whence it may be imported into the United States as a non-enumerated wine. Thus our direct importations of Madeira, Sherry, Port, Lisbon, Sicily, and Teneriffe wines are gradually declining, while there has been an astonishing increase of wines not described, from Marseilles, Malaga, Gibraltar, and other ports. Sicily wine, direct, would pay 50 cents; but it comes through Naples as a Calabrian wine, and through Marseilles and Gibraltar as a white wine, at 15 cents, giving an encouragement to the Mediterranean trader of 35 cents a gallon. Sherry wine direct from Cadiz would pay 60 cents; from Gibraltar or Malaga, as a dry Malaga, it would be admitted at 15 cents, making a difference of 45 cents a gallon in favor of the internal and coasting trade of Spain. The Portuguese traders are, in the same manner, encouraged to carry their wines to other ports at a premium of 35 cents a gallon. Wine directly from Teneriffe would pay 40 cents, but by the way of Palma or Grand Canary (two of the same group of islands) it is admitted at 15. For a short time Madeira wine was imported through a little appendage of that island called Porto Santo at 15 instead of 100 cents duty. The Treasury soon put a stop to such importations; but no doubt it is occasionally imported as a Fayal or Pico-Madeira wine, at a saving in the duty of 60 cents a gallon. Our law also encourages the internal trade of France by forcing their wines from Burgundy and Champagne into the more southern provinces, from whence they may be imported into the United States at a difference of 70 and 85 cents per gallon in the duty. Such are some of the effects of our existing tariff.

It is not at all surprising that regulations so well calculated to employ the navigation and trade of other countries should have produced very extraordinary effects on the revenue and commerce of our own. By contrasting the present with the former condition of our wine trade, we shall better understand the importance of these changes. The two terms when no change was made in the duty, and when no extraordinary event caused any violent and irregular fluctuations of trade, were the seven years from 1801 to 1807, and from 1819 to 1825. During the former term the duties on wines ranged from 23 to 58 cents; in the latter, 15 to 100 cents, as they are at present. The following table contrasts, in a condensed form, the important changes which have occurred in the principal branches of our wine trade.

Average quantity of wine imported annually.

FROM 1801 TO 1807.		FROM 1819 TO 1825.	
	Gallons.		Gallons.
Madeira, at 50 and 58 cents, average of seven years	278,772	Same at 100 cents average	119,716
Sherry, at 40 cents	355,837	Same at 60 cents average	16,483
Lisbon and Oporto, at 30 cents	352,006	Same at 50 cents average	228,340
Teneriffe and Fayal, at 28 cents	439,679	Same at 40 cents average	254,115
	1,426,294		618,554
Non-enumerated, in casks, at 23 cents	594,144	Non-enumerated, at 15 cents	1,423,992
Average in seven years	2,017,438		2,042,546

Thus it appears that our importations of Madeira wine have declined nearly two-thirds; of Lisbon, Port, Teneriffe, and Fayal, near one-half; and that our importations of Sherry have almost disappeared. More than twenty years ago we imported annually 355,837 gallons, which quantity is now reduced to 16,483 gallons. The total quantity of wine imported remains almost without variation; but the quantity of wines not enumerated has increased from 591,144 to 1,423,992 gallons; while the quantity of enumerated wines has declined from 1,426,294 to 618,554 gallons. It is impossible to misunderstand the cause of these changes.

But the returns of late years exhibit a still more extraordinary change. The wines not enumerated, imported at a duty of 15 cents, had increased, in 1826, to 2,047,637 gallons, and, in the first three quarters only of 1827, to 1,862,854 gallons. Through what channels these non-enumerated wines came we are informed by the returns for the year ending September 30, 1826, when there were imported—

From the French European port on the Mediterranean	1,167,895
From the Spanish European ports and Gibraltar	805,275
Gallons	1,973,170

This quantity was imported almost entirely from Marseilles, Malaga, and Gibraltar. While this increase in the importation of non-enumerated wines continues, our commerce in other wines is declining. Indeed, if the present tariff should not be revised, we shall gradually exclude from our consumption the produce of the wine countries of the Atlantic, and encourage exclusively the produce of the Mediterranean. If we do not equalize our duties we shall slowly, but effectually, destroy all our commerce with the Western Islands and the Canaries—with Portugal and the Atlantic provinces of Spain. What progress we have already made we may form some opinion of by noticing our commerce with Madeira, with which island we once enjoyed a reciprocal and not an unimportant trade. Our exports were of flour, wheat, Indian corn, peas, beans, rice, bread, beef, pork, fish, lumber, and staves, which we have always been permitted to carry thither free from duty. Our exports have declined in a ratio to our imports. The average value of our exports for seven years, from 1801 to 1807, was annually $576,616; that of seven years, from 1819 to 1825, was only $216,385, and this commerce is still declining.

In 1825 our exports were $178,166; our imports, 161,396 gallons wine. In 1826 our exports were $144,607; our imports, 128,456 gallons wine. In 1827 our exports were $108,018; our imports not much over 100,000 gallons wine.

Such is the present diminished condition of a trade which, twenty years ago, amounted to six and seven hundred thousand dollars annually, and, at one time, to more than a million. The other branches of our Atlantic wine trade are in the same declining condition.

Independent of all commercial considerations, however, it is necessary to revise our tariff, as our revenue is declining, while the whole quantity of wine imported is not diminished. The average quantity imported annually, from 1801 to 1807, viz:

2,085,180 gallons, at duties varying from 23 to 58 cents, produced an average revenue of.	$688,300 89
2,085,750 gallons, the average quantity annually imported from 1819 to 1825, at duties of 15 to 100 cents, produced a revenue of	581,809 29
Average annual deficit	106,491 60

The quantity of wine now imported is greater than either of the averages mentioned; but the same quantity will not now yield an equal amount of revenue. The revenue would undoubtedly be increased, and evasions of it prevented, by a more equal and moderate tariff.

There can be little difference of opinion as to the necessity of some revision of the existing duties. In determining what rates should be recommended, the committee have been governed principally by a desire to frame our laws so that they may be faithfully executed, and to place all wine countries, in their commerce with us, on a more just and equal footing. The committee have been disposed to recommend no changes where they were not urgently required, believing, as they do, that it is not very material what the rates are, provided they are moderate, and that we have not too many of them. One ad valorem rate on all wines would, no doubt, be the most equitable tariff; but it would be impracticable from the difficulty of discriminating, not only between qualities of the same class, but even between different classes. Such a tariff would probably produce more extensive evasions of the revenue than those actually existing.

The principal objections to the present tariff are, that some duties are too high, and that non-enumerated wines are classed among those which pay the lowest rate of duty. After a mature considera-

tion of the evils growing out of our existing duties, the committee recommend the following rates in lieu of those now existing:

On the wines of France, Germany, Spain, and the Mediterranean, when imported in casks, unless specially enumerated, fifteen cents a gallon.

On wines of all countries, when imported in bottles or cases, unless specially enumerated; on wines of Sicily, on Malaga, and on all other wines not enumerated, whether in bottles, cases, or casks, thirty cents a gallon.

On Sherry and Madeira wines, whether in bottles, cases, or casks, fifty cents per gallon.

The wines included under the first rate now pay the same duty, which is full high enough, considering their actual value. The second provision would place the finer wines of Europe, which are usually imported in the bottle, at the same rate of duty. It would embrace the wines of Portugal, the Azores, and Canaries. It proposes to reduce the duty on Lisbon, Port, Teneriffe, Fayal, Pico-Madeira, and Sicily, from 50 and 40 to 30 cents, and to increase the duty on Malaga wine from 15 to 30 cents. The committee have not adopted this increase of duty from choice. It becomes necessary, in consequence of the duty proposed on Sherry. It would be impossible to collect a revenue on Sherry wine while that is charged with fifty and Malaga but fifteen cents. Should it be deemed expedient to continue the duty on the latter at fifteen cents, the committee would suggest the propriety of reducing the duty on Sherry and Madeira wines to thirty cents per gallon. Indeed, they feel persuaded that a tariff proposing but two rates, of 15 and 30 cents, would be most conducive to the public interest. In introducing a third and higher rate the committee have yielded to what they believe to be the impression of the House against so large a reduction of the duty on Sherry and Madeira wine.

The committee, believing that a revision of the tariff on wines would increase the revenue, restore this commerce to its lawful channels, and, in some measure, resuscitate our trade with the Atlantic wine countries, submit, for the consideration of the House, a bill altering the duties on wines imported into the United States.

20TH CONGRESS.] No. 842. [1ST SESSION.

IN FAVOR OF REDUCING AND REGULATING THE DUTIES ON TEAS.

COMMUNICATED TO THE SENATE JANUARY 31, 1828.

To the honorable the Senate and House of Representatives of the United States of America in Congress assembled:

Your memorialists, merchants of the city of Philadelphia, and principally engaged in the China trade, most respectfully represent to your honorable body that they were made acquainted with the report of the Secretary of the Treasury to Congress during their last session, in reference to a reduction from the present high rate of duty on tea. That report was hailed as a happy omen by many of the importers and consumers of this article; but your memorialists beg leave to state that, as the public expectations were not realized as to this point during that session of Congress, serious losses have been experienced by the importers of teas. The Secretary's report on this subject to Congress, though we believe judicious and well intended, has had a most prejudicial effect on this extensive branch of commerce, in consequence of said report being only partially acted upon.

Your memorialists are satisfied to submit the expediency of a reduction of the duty on tea to your honorable body without a remark, but beg leave, most respectfully, to suggest the propriety of an early decision on this very important question.

Your memorialists cannot suffer themselves to doubt but that Congress entertains the sentiment that whatever measure tends to promote so important a branch of commerce as that to China must prove beneficial to the Government.

It is well known to many of your honorable body that the capital and tonnage employed in this extensive trade are very great; and any sudden or unexpected check given to it must prove seriously injurious to those engaged therein.

Your memorialists would, therefore, beg leave respectfully to state, that ever since the reduction of duty on tea has been agitated at Washington the merchants importing this commodity have experienced serious losses, owing to the ruinous state of suspense in which this question has placed them; a large amount of capital is now invested, and lies dormant, in the article of tea, to the great injury of the importers thereof, as it cannot be vended to any extent without a considerable sacrifice. The dealers in tea, looking forward ultimately to a considerable reduction from the present rate of duty, prevents them from relieving the importers of their heavy burdens.

Your memorialists, therefore, most respectfully ask your honorable body to afford them the relief which the necessity of the case seems so imperiously to call for by some speedy and definite enactment on the subject. They would further beg leave to suggest, that if, in the wisdom of Congress, they shall deem it expedient to alter the present rate of duty on tea imported direct from China, the law should take effect from the passing of the same, and placing all teas in charge of the customs not bonded on the same footing as those hereafter to arrive; or if, in the opinion of your honorable body, this be not expedient, then said act should not take effect before the first day of January, 1830, affording time for the present heavy stock of teas to be lessened without the immense loss that would otherwise ensue.

PHILADELPHIA, *January* 25, 1828.

PHILADELPHIA, 1*st month* 28*th*, 1828.

RESPECTED FRIEND: Being one of the Senators from Pennsylvania, I take the liberty of enclosing a short memorial to the Senate and House of Representatives on the subject of a reduction of the duty on tea, which thee will be so obliging as to present.

It simply gives a statement of facts, and have not asked or obtained but one or two signatures, except those engaged in the China trade. In the present unsettled state of this question serious inconvenience is experienced by the merchants, and, as I believe, no possible benefit can result to the Government by a delay; all the importers request of their rulers is merely to come to a decision, which has been for some time under consideration; they do not even ask for a reduction in the duty on tea, although they are led to the opinion it would be a prudent act so to do, as many well-informed persons are of the opinion that the *smuggling of teas* has already commenced from the Canadas into the United States. That such a practice can be accomplished no one can doubt that is acquainted with the large amount of teas that a few years since found their way from the State of New York into that country.

It is well ascertained that not less than 12,000 chests of Hyson Skin tea have passed from this country into the British provinces adjacent to the United States in one year; this clandestine trade now being stopped from the United States by the foresight of the British ministry, in sending teas there direct from Canton, not only sufficient for the supply of said provinces, but greatly *beyond the consumption of the country*, little doubt remains but the balance will go as a *retaliation for the debt incurred*, unless Congress timely applies the only remedy, which we believe to be a reduction from the present high duty.

Until the year 1825 the English had never sent a vessel direct from Canton to Quebec. In that year one ship arrived; in 1826 two ships arrived; and in 1827 four ships arrived. The average of the English India ships will carry about 12,000 to 13,000 chests of tea each; and judging from the consumption of that province, am satisfied the amount is much too great for home demand; and we all know it is easier to put a stop to an evil in its beginning than to do so when it has grown into a regular system.

It is greatly to be desired that Congress will act on this interesting question promptly, as in the course of thirty or forty days from this we may expect some arrivals from Canton, and if the law could take effect before the *first arrival* all importers of tea would be placed on the same footing; but, should Congress determine to reduce the duty, and to take effect at a future day, those engaged in the Canton trade are very desirous that the reduction should not take effect before January, 1830; if short of that period, the injury now complained of will be increased rather than lessened, as the stock of teas will be greatly increased during the present year, and purchasers of this article would not operate further than actual necessity required.

At foot are the principal kinds of teas imported into the United States, with the average cost in China; and the duty at present paid, it will be seen, is more than 100 per cent. on the average of first cost, and some as high as 200 per cent. on the lower teas, which are principally used by the poorer part of the community.

I crave thy indulgence for the trouble here given.

Very respectfully,

SAMUEL ARCHER.

Hon. ISAAC D. BARNARD.

Principal teas imported from China.

	Average cost.	Duty.
Gunpowder, about	53 cents per pound	50 per pound.
Imperial, about	51 ....do	50 do.
Hyson, about	42 ....do	40 do.
Young Hyson, about	36 ....do	40 do.
Hyson Skin, about	20 ....do	28 do.
Souchong, good quality, about	20 ....do	25 do.
Souchong, common, about	14 ....do	25 do.
Souchong, inferior, about	12 ....do	25 do.

20TH CONGRESS.] **No. 843.** [1ST SESSION.

ON THE SUBJECT OF THE TARIFF, OR REGULATING DUTIES ON IMPORTS.

COMMUNICATED TO THE HOUSE OF REPRESENTATIVES JANUARY 31, 1828.

Mr. MALLARY, from the Committee on Manufactures, to whom have been referred the numerous petitions and memorials on the subject of further protecting duties upon imports, reported:

[Accompanied by a bill (No. 132) in alteration of the several acts imposing duties on imports.]

That they commenced their examination of the various subjects referred to them immediately after the appointment of the committee was announced to the House; that they sought in vain, from the documents referred to them, for information sufficiently specific upon the subjects embraced in those documents, to enable them to determine the effect of the existing laws upon the various interests upon which they were intended to operate, or to measure the additional protection which the complaining interests required, or their present condition would warrant the committee in recommending. Under this absence of accu-

rate information, and constantly busied in searching the voluminous Executive Reports from the Treasury Department, and other State papers, from which is to be learned the situation of our foreign trade, and the character and amount of our foreign importations, and in obtaining from that Department the returns of that trade for the last year, the committee waited until the petitions and memorials upon which most dependence seemed to be placed by the friends of the protecting system had reached their hands, through the only authorized channel, to warrant their acting upon them, and until about the 28th of December last past, when, still finding themselves unsupplied with the precise facts upon which alone they were willing to act upon the important and highly responsible subjects committed to their charge, they came to the resolution of submitting their difficulties to the House, and of asking the power to send for persons and papers which would enable them to determine, with precision and certainty, the true condition of those interests, and more especially of those manufacturing interests which had preferred their claims for protection to the National Legislature.

This resolution was presented to the House on the first day of its session, after the committee adopted it, and on its passage no time was lost in learning the names of witnesses for whom it should, in the opinion of the committee, be desirable to send, and despatching summonses by mail to be served.

This labor being performed, the committee at once began their examinations of such witnesses, members of the House, and others, as were within their reach, and believed to be possessed of valuable and practical information upon any of the subjects before them. The examination of these witnesses was not completed, when the arrival of some attending under summonses was announced. An application was then immediately made to the House for leave to sit during the hours of session of the House; and nearly every day since that leave was granted has been entirely occupied, to the almost total neglect of other public and private duties, in the laborious examination of witnesses, pursuant to the resolution under which the committee were acting. It is but justice here to remark, that the original expectation of the committee, under the resolution offered by them to the House, was to have made an expeditious inquiry into the situation of one or two manufacturing interests, rather to enable them to determine what further protection these interests really required than with the expectation, within the limited time which they had allowed to themselves for the purpose, of being able to collect and report to the House a body of evidence upon several important branches of our domestic manufactures so digested and arranged as to be of any essential service to the House or to the public, as a source of correct information upon these complicated subjects. The amendment, however, which was made to the resolution by the House, so as to give to the committee the authority "to send for and examine persons upon oath, in relation to the present condition of our manufactures, and to report the minutes of such examination to this House," it will readily be seen, added greatly to the labor which the committee had proposed for themselves; as, by that amendment, it was made the duty of the committee, should they think proper to examine witnesses, to take their testimony in detail, and in such order as to render it at least passably intelligible to the House. This additional labor was in no other way exceptionable to the committee than as it rendered somewhat doubtful their ability to give their report to the House within the time within which they had signified that it would be received. But, even under this apprehension, so desirous were the committee of a full development of facts that the amended resolution met their approbation, and they entered upon their duties, determined, if possible, to realize the expectations of the House, so far at least as regarded a report within the time they had indicated.

They have examined little short of thirty witnesses, and the testimony of each, hastily written out by way of question and answer, and annexed to this report, will show what facts have been collected by the examination, as well as the extent of the labor which the committee have performed. The testimony of each witness, after it was taken, has been carefully read over with him, and so corrected as to meet the full assent of the witness as to its accuracy.

The leading subjects presented to the committee for additional protection are iron and several manufactures of it, wool and its fabrics, hemp and some of the manufactures from it, flax and its manufactures, domestic distilled spirits from grain, particular descriptions of glass, and fine and printed cottons. Upon all these subjects witnesses have been examined, and their testimony, herewith reported, comprises the evidence upon each subject, which the committee have taken under the resolution of the House, and embodies most of the information upon which they have acted in determining the features of the bill which they have agreed upon.

The examinations of witnesses by the committee were not closed until Saturday night last; and Monday of the present week was entirely occupied in correcting and arranging the testimony taken, and which had not been corrected, thus leaving but two days to them to digest their bill and prepare this hasty report. Under these circumstances, it cannot be expected that a minute examination of the various subjects included in the bill prepared by the committee will be gone into; much less that a discussion of the great question involved in the system of extending protection to the languishing interests of the country, by an increase of duties upon imports, will be attempted. The former would be a task requiring time and care, combined with extensive research; and the latter, even if time were allowed to the committee, is a subject much better suited to a discussion in this House than in the report of one of its committees.

The committee, therefore, do not attempt to go into the reasons which have governed them, but merely to give a concise history of their doings.

After examining all the witnesses who had attended, pursuant to summonses, up to Saturday night last, and also all the manufacturers and others who, up to that time, had, to the knowledge of the committee, arrived in this city for the purpose of giving the committee information upon any of the subjects before them, and after having spent the day, on Monday of the present week, in the correction and very hasty arrangement of the testimony taken, the committee proceeded to consider and arrange the terms and provisions of the bill they should report, and a reference to it is made for the detailed information as to what have been their conclusions.

The first subject which will be found in the bill is that of iron; and considering the importance of the article, as one of both national and individual necessity, the changes in the present rates of duty are comparatively very light. An increase upon "iron in bars, not manufactured, in whole or in part, by rolling," of from ninety cents upon 112 pounds, to one cent per pound; upon "iron in bars, manufactured, in whole or in part, by rolling," of $7 per ton of 2,240 pounds; and upon "pig iron," of 12½ cents per 112 pounds, beyond the present rates of duty, are the most material changes upon this article. Some amendments in the existing law, when evasions of the present duty have been discovered to exist, by defects in the wording of the law, and some additions of duty upon particular descriptions of iron, and upon particular manufactures from it, complete the provisions on this subject.

The next subject in order is that of wool and woolens. To these subjects the greater part of the testimony of the witnesses has been directed, and the committee have used every effort in their power to obtain precise information as to the facts as they do actually exist in relation to the interests both of the wool-grower and the manufacturer of wool. The real importance of these subjects to those sections of the country where wool is grown, and in which the manufactories are located, the feeling which has for some time agitated the public mind throughout the whole country in relation, on the one side, to the necessity of further protection to them, and, on the other side, to the injurious effects which such a measure would have upon the purchasers of woolen fabrics, have all conspired to induce this exertion on the part of the committee. They have therefore made the examinations of the witnesses upon these subjects as minute as possible, and, perhaps, in some instances, they may appear tediously so. Indeed, many of the questions put to the witnesses will afford abundant evidence that the committee had not sufficient practical knowledge upon the subjects before them to enable them to make a series of interrogations the answers to which would place the testimony taken in the clearest light. And when the members of the House shall have examined the evidence relating to the manufacturer of woolen goods, the committee cannot doubt they will be entirely convinced that none but a person intimately acquainted with the various operations could have drawn out a series of questions upon this subject suscepticle of clear and intelligible answers. The time of the committee did not authorize even an attempt to do this, and therefore the examinations, and particularly of some of the witnesses first examined, will appear as they were really taken—the one answer in many, if not in most instances, suggesting the subsequent question. It will also be found, upon an examination of the testimony, that the manufacture of woolens is hardly susceptible of being reduced within the limits of exact mathematical calculation, so as to enable the committee to arrive, with this kind of certainty, at the amount of duty which will furnish full protection, and, at the same time, will not go beyond that point. Certain positions, however, they believe to be proved by the evidence they have taken, which furnish great assistance in approaching to correct conclusions.

In relation to unmanufactured wool of domestic growth, the committee consider it to be fully proved that the present prices in our markets are unusually low, and the sales very dull; and that these effects are produced by the combined influence of the large importations of foreign wool and the excessive importations of foreign woolen goods. Contrary to the opinions of some of the witnesses, the committee are strongly convinced that the provision of the present law permitting the introduction of foreign wool, costing not exceeding ten cents per pound in the foreign market, at the almost nominal duty of 15 per cent. ad valorem, does admit wool paying this duty, and invoiced at and below this price, which, in quality and use, materially conflicts with the common native wool of this country.

This opinion is strongly corroborated by the presentation, by one of the witnesses, to the committee of five different specimens of foreign wool imported into, and during the last fall selling in, the Boston market at from 6 cents to 14 cents per pound. The foreign invoices of all these wools were at a price not exceeding 10 cents per pound, and consequently paid but a duty of 15 per cent. ad valorem. At least two of these specimens of wool, the committee believe, when properly cleansed would clearly appear to be equal in quality to the common native wool of the United States; and the very rapid increase in the importations of these low qualities of wool since the passage of the tariff bill of 1824 furnishes the strongest reason to conclude that they are supplying the demand, and answering the uses which the coarse wools of our country would, in most cases, well supply, and that the foreign article is sought because, by means of the very low duty it now pays, it can be obtained at a less price than the domestic. There are also strong reasons for believing that, by importing several qualities of foreign wools in the grease and dirt, they are invoiced at a price not exceeding 10 cents per pound, when if the same wools were cleansed, as the foreign wools usually are for the market, they would necessarily invoice at a much higher price; and that in this way the spirit of the law of 1824 is to a very considerable extent evaded. The law of 1824 imposed upon wool costing in the foreign market a price exceeding 10 cents per pound a progressive duty, commencing at 20 per cent. ad valorem and ending at 30 per cent. ad valorem. This duty reached its maximum on the 1st day of June, 1826. The question, then, as to the manner in which these low priced wools could be effectually reached, without imposing an exorbitant duty upon the higher and finer qualities, was first to be determined. And the bill herewith reported will show that the conclusion of the committee has been to impose a specific duty of 7 cents per pound upon all foreign wool, without regard to its quality, and to retain, at the same time, the ad valorem duty, with a proposition to increase it from 30 per cent., the present duty, to 40 per cent., and to make it progressive at an increase of 5 per cent. per annum to 50 per cent., and applicable to all kinds of wool; these alterations, if adopted by Congress, will operate, proportionably, more heavily upon the coarse than upon the fine wools. But the committee suffer little apprehension from this fact, because they consider it satisfactorily proved that the capacity of this country to produce wool is only to be limited by the demand for the article; that the manufacturers they have examined are using much the largest share of the finer wools; that the coarse wools of this country are little sought, because foreign wools of a coarser quality, and answering the same uses, are procured at lower prices; and that in the assortment of the wools of this country for the purposes of manufacture, a large share will fall within the low ranges, and will fairly supply the place of the coarse imported wools. And the committee will not disguise the fact that it has been their intention, in the bill they should report, to extend every protection which the nature of the case will admit to the grower of American wool. If they have not done this they have erred in judgment, and have not accomplished their own intentions. If the duties they have proposed upon unmanufactured wool are too high, and shall thus prove injurious to the manufacturer, and not beneficial to the farmer, then they have mistaken the proportions which the relative cost of the wool and the fabric will warrant, and have thus been led into unintentional error.

In relation to the additional protection required by the manufacturers of woolens, the committee have found themselves most in need of specific information. The law of 1824, imposing additional duties upon imports, was, at the time of its passage, no doubt, believed, by those who framed, and by those who supported it, sufficient, both in its provisions and in the amount of its duties, to afford a fair protection to this important national interest. But experience has shown that this belief was fallacious, and that the operation of this law has disappointed both those who passed it and those who sought its passage.

Former laws had also been passed with the same intentions, and had failed to realize the expectations of those who acted under them. The knowledge of these facts it was which induced the committee to propose a mode, heretofore untried in this Government, of obtaining precise information upon which to legislate. They have been indulged by the House in making the experiment, and, although the information collected may not be as precise and detailed as a greater allowance of time and a wider range of

examination might have made it, the committee do believe that certain positions may be assumed from the testimony, as fully proved, which will afford much aid in determining the defects in the existing laws, and in applying the proper remedies to those defects; and they cannot but hope that this information, coming from persons intimately acquainted with the subjects of which they speak, and given under the solemn sanction of an oath, will have greater weight than the ordinary information upon which former laws upon these subjects have been passed.

The following positions, as relating to the manufacture of woolen goods, the committee believe themselves warranted in deducing from the evidence they have taken, and they depend upon the evidence and opinions of the witnesses for the soundness of them:

1st. That the manufacture of woolen goods in this country is, at this time, a business laboring under severe depressions, and attended with loss more severe upon the finer qualities.

2d. That these depressions are owing, in a very great degree, to the excessive and irregular importations of foreign woolen goods into our markets, thus causing a fluctuation in, and an uncertainty of price for those goods more injurious to the American manufacturer than even the depression of price which these importations produce.

3d. That the difference between the prices of wool, of the same quality, in this country and in England is, at the present time, about fifty per cent. in favor of the latter country.

4th. That the cost of the raw wool in this country is about one-half of the cost of the fabric, when prepared for the market, as a general rule, applying to most kinds of cloths.

5th. That, if the cost of the wool and the cost of the foreign materials used for dyeing were the same in both countries, the process of manufacturing the wool into cloth, fitted for the market, can be performed as cheap in this country as it can in England.

6th. That the present duty upon woolen goods does not furnish the desired protection, and that no reasonable duty can be effectual unless it be a specific square yard, instead of an ad valorem duty.

With a general reference to these positions, so far as they could be made applicable to the subject, and with a proper regard to the whole body of the testimony taken, the committee have proceeded to detail their propositions for the alteration and increase of the duties upon woolen goods. The law of 1824, with certain exceptions enumerated in the act, imposed a duty of 25 per centum ad valorem upon all foreign woolen goods imported into this country the actual value of which, at the place whence imported, should not exceed thirty-three and one-third cents per square yard; and a duty, after the 30th day of June, 1825, of 33⅓ per centum ad valorem upon those costing more than 33⅓ cents per square yard. The exceptions from the duty of 33⅓ per cent. were blankets and worsted stuff goods, upon which a duty of 25 per centum ad valorem was imposed; and from the goods paying a duty of 25 per centum ad valorem, as costing less than 33⅓ cents per square yard, were excepted flannels and baizes, which were to pay a duty of 33⅓ per cent.

The committee have proposed to change all these ad valorem duties upon cloths to specific square yard duties, making the same exceptions which are made in the act of 1824. Some of these exceptions the committee have left unaltered, and others they have proposed a small increase of duty upon. The article of blankets now pays a duty of 25 per centum ad valorem, and they propose to increase this duty to 35 per cent.

This they have done, because they think the testimony warrants them in the belief that, if the manufacture of blankets is encouraged in this country, they can be made here as cheap, in reference to the quality of the blanket, as they are now imported, and that in this manufacture a consumption may be found for large quantities of our native wool. The committee also consider blankets an article so essentially necessary for the soldier as to become an object of national policy, and a necessary for which we ought not to be dependent upon any foreign country.

The propositions of the committee as to the alteration and increase of duties upon woolens generally are as follows:

1st. Upon all manufactures of wool, or of which wool shall be a component part, the actual value of which, at the place whence imported, shall not exceed 50 cents per square yard, a specific duty of 16 cents upon every square yard.

2d. Upon all manufactures of wool, or of which wool shall be a component part, the actual value of which, at the place whence imported, shall exceed 50 cents per square yard, and shall not exceed $1 per square yard, a specific duty of 40 cents upon every square yard.

3d. Upon all manufactures of wool, or of which wool shall be a component part, the actual value of which, at the place whence imported, shall exceed $1 per square yard, and shall not exceed $2 50 per square yard, a specific duty of $1 upon every square yard.

4th. Upon all manufactures of wool, or of which wool shall be a component part, the actual value of which, at the place whence imported, shall exceed $2 50 per square yard, and shall not exceed $4 per square yard, shall be deemed to have cost $4 per square yard, and, at such valuation, shall be charged with and pay a duty of 40 per centum ad valorem.

5th. Upon all manufactures of wool, &c., the actual value of which, at the place where imported, shall exceed $4 per square yard, shall be charged with and pay a duty of 45 per centum ad valorem.

It will thus be seen that the propositions made by the committee, if adopted, will give a considerable increase upon the present rates of duty, in any event, and may give a very large increase, if the importations should not be regulated by the rates of the duty. Should they be so regulated, the intermediate spaces would be left entirely to be supplied by the American manufacturer; and this, it is believed, would not only furnish him a market for the great body of his cloths, but would enable him to compete with the foreigner, even at the prices at which the minimum principle does not operate extensively to increase the duty. The committee have not gone to the extent proposed by many of the memorials in the regulation of these duties, but they have gone to the extent to which, from the evidence taken by them, they believe the prosperity of our woolen manufactures requires.

Hemp and flax, and some of the manufactures from them, have next claimed the consideration of the committee. The evidence which they have collected upon these subjects, though by no means voluminous, in their opinion, satisfactorily proves that large sections of the country are capable of producing either kind of the raw material above mentioned, to any extent. So far as the committee have been able to learn, the State of Kentucky seems to have paid the most attention to the culture of hemp, and, at this time, to possess the most extensive manufactories of the article of any State in the Union; while the States of Pennsylvania and New Jersey seem, as yet, to take the lead in the growing and manufacture of flax. Yet there cannot be a doubt but that the soil of either of these States, as well as of many, and perhaps

most of the other States, is well adapted to the growth of either hemp or flax, and that they only need the consumption in duck, cordage, &c., of our extensive commerce, and of our growing Navy, to give to these branches of agriculture an encouragement which would soon make the raw materials articles, not of import, but of export, and would supply the wants of our own country with as cheap and as valuable a fabric as is now obtained from foreign hands.

Indeed, if there are any articles the produce of agricultural and manufacturing labor which, more than others, would seem to claim the fostering care of the Government, not as a matter of policy merely, but as a matter both of interest and independence, hemp and flax would seem peculiarly to belong to them. These are materials the growing of which brings into profitable use, not only the fertile lands of the country, but the active labor of the husbandman, and the manufacturing of which into the fabrics of most extensive utility would seem to be so simple and easy as not to require the aid of foreign skill in its accomplishment; and to our commerce in peace, and to our Navy in war, as well as to the common uses of all classes of society, materials and fabrics of more prime necessity cannot be named.

The committee cannot here refrain from directing the attention of the House to the testimony of a very intelligent manufacturer of flax, which will be found to compose a part of the evidence herewith reported. From the facts stated by him, it would seem that the alleged inferiority of the American hemp and flax, when compared with the foreign, arises not from any inferiority of either of the materials as grown in this country, but from not pulling or harvesting the crops at the proper time, and from giving them a dew instead of a water rot. The committee solicit particular attention to this part of the evidence they have taken, and hope it may attract the particular notice of the farmers of the country generally. The principal additions which the committee have proposed upon these articles are upon the unmanufactured materials and upon sail duck. The increase proposed upon raw hemp is $10 per ton, and that upon raw flax is $9 per ton; and both are made progressive until the duty shall be $60 per ton upon each; it now being $35 upon hemp, and 15 per cent. or about equal to $36 per ton upon flax. The proposition is to change the duty upon sail duck from an ad valorem duty of 15 per cent. to a specific duty of nine cents per square yard, and to regulate the drawback upon the article.

The next subject in order, though not second in importance to the agricultural interests of the country, which has occupied the attention of the committee in the draught of the bill they now submit to the House is that of a further protection to the domestic spirits distilled from grain in the United States. And here the committee feel bound to inform the House that it is not with any view to benefit the manufacturer of this description of ardent spirits that they have at all entertained the subject. It is the interest, and solely the interest, of the farmer who grows the grain from which these spirits are distilled which renders it a subject at all worthy of the consideration of Congress, as connected with the protection of the industry and substantial interests of the country. But if the most extensive farming interests of these United States, the grain-growing interests of almost every section of the country, are subjects of importance, then surely the protection of the domestic spirits distilled from grain cannot be unimportant; for it is a fact too well and too generally known to require a repetition by the committee that this manufacture has for a number of years now last past afforded almost the only market for the coarse grains in the interior of the country. These grains are of so bulky and so heavy a nature compared with their present market values that they will not bear transportation beyond a very limited distance, even when water communication is afforded; and where this means of transportation is not enjoyed, their ability to reach a market is restricted within extremely narrow limits. But did not even this insuperable difficulty exist, it is equally certain that our large market towns do not and have not offered even a tolerable market for these grains in kind for some years last past, nor do the committee see that there is any prospect they will do so while our foreign relations remain as they now are. But convert these grains into spirits, and a partial market is afforded, not profitable, it is true, to the enterprise of the farmer, but better than an entire loss.

The committee refer the House, for evidence to support these positions, to the witnesses who have been examined upon this subject. A perfect remedy to the farmer for these evils they do not believe to be within the reach of Congress. But partial relief would seem to be very plainly presented. Our tables of imports for the last six years show a very regular annual importation of foreign spirits from grain and other materials, varying from 5,000,000 to 6,000,000 gallons, a very small share of which is re-exported, and the residue is consumed in the country, and consequently, to that extent, limits the demand for the domestic spirits. The committee are aware that the time has been when the whiskey of this country would have been a very unacceptable exchange for foreign spirits to the higher classes of consumers But they do not believe that that objection can, at this time, be alleged. Such has been the advance in skill and experience in the art of distilling spirits from grain that the whiskey of this country has become a very palatable and a very fashionable, as it no doubt is the least injurious liquor. The committee therefore cannot suppose that the comforts or even the luxuries of our citizens will be much restricted or materially affected by such an increase of duty upon foreign spirits as will reduce the quantity imported.

But as inseparably connected with the subject of foreign spirits is that of spirits distilled in our own country from foreign materials. Although the committee have no means of ascertaining the quantity of this kind of spirits at present distilled in the United States, yet, from the large importations of the material from which it is made, there is strong reason to conclude that the number of gallons must be somewhat greater than the whole number of gallons of foreign spirits imported. The importations of molasses into this country for the last six years has ranged from 11,000,000 to nearly 14,000,000 of gallons. By an examination of the import tables in the Treasury Office it is ascertained that out of the 13,000,000 imported during the last year more than 11,000,000 were carried into ports east of the port of New York, not including the latter port. It would hardly seem probable that the quantity consumed in the domestic way, in this section of the Union, could so far exceed the consumption of other sections of the country, where sugar and molasses are not manufactured, as this proportion would indicate; and therefore it is presumed that much of the molasses taken into our eastern ports is used for distillation. This conclusion is rendered still more natural when it is known that in that section of the United States are located the most extensive distilleries of rum from molasses. The spirits thus produced interferes equally with foreign spirits, with the demand for the spirits produced from domestic materials; and as the committee have proceeded upon the principle, in relation to iron, wool, hemp, and flax, that the domestic article, where it either exists or can be produced in sufficient quantities, should be preferred to the foreign, even for the use of our own manufactures, so in the case of molasses they propose to apply the same rule. The committee have no means by which they can even calculate the quantity of grain now annually distilled in the United States, or the quantity of spirits produced by such distillation; but they hazard nothing

in the assertion that the coarse grains are now grown in these States in sufficient quantities to furnish to them a full supply of ardent spirits, if the demand was in no other manner supplied; and they refer to the testimony which has been given before them to show both the present depressed prices of these grains and of the spirits produced from them, and also to show that the quantity of these grains can be increased in different sections of the country to answer any demand, if demand could be created.

With these facts before them, the committee have proposed, in the bill they report, to increase the present duty ten cents per gallon upon all foreign spirits imported into the country, and to increase the present duty upon molasses five cents per gallon.

By a reference to the table of domestic exports it will be seen that a part of the spirits distilled from molasses in this country is exported; and the law, as now existing, allows, upon these spirits so exported, a drawback of four cents per gallon. An examination of these tables will show that most of these spirits so exported go to the same markets with our domestic spirits distilled from grain; and with this drawback operating as a bounty upon their exportation, they must, according to the relative values of the two kinds of spirits before exportation, have the advantage in the foreign market to which they both go, over the spirits from grain, of just the amount of this drawback. The committee have therefore proposed a repeal of the provision allowing the drawback.

The subject of glass has also been proposed as a matter of examination before the committee, and two very intelligent witnesses, living in sections of country remote from each other, have been examined in relation to it. A reference to their testimony will show that the present protection to window glass, of smaller size than 10 by 14 inches, is abundant, and that most other descriptions of glass are in the same situation. In this these witnesses both agree, and they are both practically acquainted with the manufacture of various descriptions of the article. But one of the witnesses proves that the denominations of window glass, exceeding 10 by 15 inches, is not sufficiently protected, and the committee have proposed an alteration in the present duties upon these sizes of window glass.

The only other material alteration which the committee have proposed in the existing laws regulating our duties upon imports is an increase of the minimum upon cottons from 30 cents, at which it now stands, to 35 cents. The object of this has been to reach a finer description of cotton cloths; and for the evidence upon which they have recommended this alteration they refer the House to the testimony of the witnesses who have been examined upon the subject of cottons, herewith reported.

Should there be found errors in this report, the committee have to offer for their excuse the very short time allowed to prepare it; and they would gladly have avoided accompanying their bill with any report, but for the fact that their request to be allowed to examine witnesses has excited some feeling in the House, as well as in the country, and they have felt it a duty they owed to themselves to give this detailed history of the manner in which they have discharged the important trust.

Minutes of evidence taken before the Committee on Manufactures, 1st session 20th Congress; ordered to be printed January 31, 1828.

NAMES OF PERSONS INTERROGATED.

Hon. Richard Keese.
John Mitchell.
William Russel.
Charles A. Wickliffe.
Nathaniel Garrow.
Jeromus Johnson.
James Clark.
Mr. Simon N. Dexter.
Benjamin Bakewell.
Hon. Aaron Tufts.
Mr. James Shepherd.
William Phillips.
John Travers.
Joseph Jackson.
Mr. Abraham Marland.
Joseph Marshall.
William W. Young.
William R. Dickinson.
Abraham Schenck.
James Wolcott, jr.
Jonas B. Brown.
Joshua Clapp.
Benjamin Poor.
Theodore Chase.
Eleuterre I. Dupont.
Joshua W. Pierce.
John Siddall.
Andrew Way.—28 persons.

FRIDAY, *December* 28, 1827.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., William Stanberry, and William D. Martin.

On motion,

Ordered, That the chairman of the committee, at the earliest opportunity, offer to the House the following resolution:

"*Resolved*, That the Committee on Manufactures be vested with power to send for persons and papers."

The committee adjourned, to meet to-morrow, in case the House meet; otherwise, to meet on the 31st instant.

MONDAY, *December* 31, 1827.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., William Stanberry, and William D. Martin.

The House not having met on Saturday, and there being no opportunity to present the resolution of the 28th instant,

Ordered, That it be presented this day. And then the committee adjourned until to-morrow morning, 10 o'clock.

TUESDAY, *January* 1, 1828.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., William Stanberry, and William D. Martin.

On motion,

Ordered, That, for the purpose of expediting the obtaining witnesses, each member of the committee be authorized to furnish to the chairman the names of two witnesses, for whom subpœnas shall be forthwith sent.*

And then the committee adjourned, to meet again on Friday next.

FRIDAY, *January* 4, 1828.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., William Stanberry, and William D. Martin.

On motion of Mr. Wright,

Ordered, That a subpœna be issued for Simon N. Dexter, and be addressed to him at Summit Bridge Post Office, Delaware; to be examined in relation to the manufacture of woolen goods.

On motion of Mr. Moore,

Ordered, That a subpœna be issued for the honorable Caleb Stark, and be addressed to him at Pembroke, New Hampshire; to be examined in relation to the manufacture of woolen goods.

On motion of Mr. Stevenson,

Ordered, That a subpœna be issued for Benjamin Bakewell, and be addressed to him at Pittsburg, Pennsylvania; to be examined in relation to the manufacture of glass, and generally as to other manufactures.

On motion of Mr. Martin,

Ordered, That a subpœna be issued for Josiah Pomeroy, and be addressed to him at Pittsfield, Massachusetts; to be examined in relation to the manufacture of woolen goods.

On motion of Mr. Condict,

Ordered, That a subpœna be issued for John Travers, and be addressed to him at Paterson, Essex county, New Jersey; to be examined in relation to the manufacture of canvas.

On motion of Mr. Condict,

Ordered, That a subpœna be issued for Joseph Jackson, and be addressed to him at Rockaway, Morris county, New Jersey; to be examined in relation to the manufacture of iron.

On motion of Mr. Martin,

Ordered, That a subpœna be issued for Abraham Marland, and be addressed to him at Andover, Massachusetts; to be examined in relation to the manufacture of woolen goods.

On motion of Mr. Stanberry,

Ordered, That a subpœna be issued for Joseph Marshall, and be addressed to him at Hudson, New York; to be examined in relation to the manufacture of cotton goods.

And then the committee adjourned until Monday morning, 10 o'clock.

MONDAY, *January* 7, 1828.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., and William Stanberry.

The committee, after some desultory conversation relative to the matters referred for their consideration, adjourned until to-morrow morning, 10 o'clock.

TUESDAY, *January* 8, 1828.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., and William Stanberry.

Ordered, That Thursday next be assigned to take the examination of such witnesses as may then be in attendance.

On motion of Mr. Stevenson,

Ordered, That the chairman request by letter the attendance before the committee, on Thursday next, of the honorable Richard Keese, a member of the House of Representatives from the State of New York, and of the honorable John Mitchell, a member from the State of Pennsylvania, for the purpose of communicating such information as they may possess upon the subjects of the committee's inquiry.

Ordered, That, for the convenience of the committee, the witnesses be introduced and examined separately.

And then the committee adjourned until Thursday morning, 10 o'clock.

THURSDAY, *January* 10, 1828.

Present: The honorables Rollin C. Mallary, chairman; James S. Stevenson, Lewis Condict, Thomas P. Moore, Silas Wright, jr., William Stanberry, and William D. Martin.

Testimony in relation to iron.

Hon. Richard Keese, of Keesville, Clinton county, New York, admitted and sworn:

Mr. Keese, by permission of the committee, presented an estimate which he considers to be a fair

* Under the authority of the above resolution, James S. Stevenson requested a subpœna to be issued for Frederick Rapp, of Beaver county, Pennsylvania; to be examined by the committee in relation to wool and the manufacture of woolen goods; which was forwarded January 2, 1828.

Mr. Wright requested a subpœna to be issued for William Phillips, of the State of New York; to be examined in relation to woolens; which was issued on the 2d January.

Mr. Mallary requested subpœnas to be issued for Aaron Tufts and James Shepherd, of Massachusetts; to be examined in relation to the manufacture of woolen goods.

calculation of the operations of a forge, engaged in the manufacture of bloom iron, situated twelve miles from the one bed, and the same distance from a place of transportation by water, and requests that the same may be received and made part of his evidence in the present examination, viz:

A fair estimate of the average business of the manufacture of bar iron in the counties of Clinton and Essex, in the State of New York, in the shape of an account current. One forge and water privilege, with capacity to make seventy-five tons annually.

DR.

225 tons rock ore, raised from the bed, and lying upon its bank, worth, per ton, $6	$1,350 00
Carting the above ore, say twelve miles, to the forge, worth $2 per ton	450 00
37,500 bushels of coal, delivered at the coal-house in good order, worth 4½ cents per bushel	1,687 50
Bloomers' wages for making 75 tons of iron, and boarding themselves, worth, per ton, $18	1,350 00
The wages of one common laboring man the whole year, to measure coal, wash ore, and make small repairs about the forge, &c., &c., boarding himself, worth, per day, $1, say	300 00
Blacksmith's bill, timber, work of mechanics in making repairs for the year, over and above what the man can do, worth, per ton, $3	225 00
Insurance against fire on buildings and machinery, 1½ per cent. on $2,000, which is their estimated cost	30 00
Carting 75 tons of iron from the forge to the lake, say 12 miles, worth $2 per ton	150 00
Wharfage, storage, and freight, of 75 tons of iron to the city of New York, by water, a distance of about three hundred miles, worth, per ton, $6	460 00
Commissions on sale and all other charges at New York, worth 5 per cent	337 50
	6,330 00

CR.

By 75 tons of iron in the city of New York, worth, per ton, $90	6,750 00
Balance	420 00

In the operation above detailed, the business indispensably requires nearly the whole time of one proprietor in procuring the materials, keeping the works in operation, supplying the workmen, teams, &c., with necessaries, marketing the iron, &c., &c.; in the course of which business considerable personal expenses as well as time are incurred, and this item would be estimated much lower than its value at	$500 00
The capital invested in the water privilege and dam may be fairly estimated at $2,000; the interest upon which, at 7 per cent. per annum, is	140 00
The capital invested in the forge, machinery, coal-houses, and bloomers' houses, may be set down at $2,000; which, considering its perishable nature, ought to pay at least 14 per cent., but I will here carry it out at 7 per cent	140 00
	780 00

The bloomer's house is usually furnished by the proprietor, without rent.

By real loss upon superintendence, and simple interest upon capital	$360 00
By the above balance brought down	420 00
	780 00

This loss is and can only be made up to the proprietor by the fact that he is a farmer or a merchant, and by the sale of his produce or his goods, at an ordinary profit, to pay his hands, and for his stock and team work he may be reimbursed.

Question. How long have you been engaged in the business of making bar or bloom iron, and when did you abandon that business?

Answer. I sold out my interest in the establishment last May. I was engaged in it for about seven years before that time, and since then have ceased to be interested in the iron business.

Question. What description of iron is that of which you speak? Is it bloomery or other?

Answer. It is bloomery. I have never been engaged in the furnace business, or in making refined iron.

Question. What was the worth of bar iron, hammered from blooms, at your factory?

Answer. It was generally worth from $80 to $85 per ton, of 2,240 pounds, cash price, less 25 cents per ton for taking it to the rolling-mill, which may be considered its market. If carried twelve miles, it would cost $2 per ton.

Question. Into what was your bar iron converted at the rolling-mill?

Answer. Most of what I rolled was made into nail plates and other manufactures. Some has been rolled to order. The nails have been most usually sold at the works for country use; say about two hundred tons per year. Some, however, have been sent to New York.

Question. Into what other articles is the iron of your neighborhood generally manufactured?

Answer. Chain links and bolt iron constitute the principal manufacture, and are then sent to New York.

Question. Is the protection on nails sufficient?

Answer. It is quite an ample protection.

Question. How much iron have you usually made in the year?

Answer. I had but one forge, and usually made about seventy-five tons.

Question. Have you bought iron in your neighborhood?

Answer. I have bought for a company in New York, during the last season, about sixty tons of the bloom iron, for which I paid from $80 to $85 per ton

Question. What does it cost a purchaser in New York when he purchases in your neighborhood?

Answer. I purchased last winter the best bloom iron at $85 per ton. My commission was two per cent., and the freight from the mill to New York was $7 25 per ton.

Question. Can you form any estimate as to what quantity of iron is usually manufactured in your section of country?

Answer. About 3,000 tons are manufactured in the neighborhood of Lake Champlain, in the States of New York and Vermont. I speak of bar iron before it is converted into other articles.

Question. Have those manufactures increased or diminished within the last ten or twelve years?

Answer. During the late war there were several very important establishments erected, and they did well. In 1816, and for a few years afterwards, they declined. Within the last two or three years they have revived again very considerably, except two large establishments—one at Vergennes, the other called the Elba works—which have not been revived. Some new works have been erected.

Question. Do the location of the works, in regard to the facilities of procuring the raw material and the means of manufacturing, affect the value of the capital employed?

Answer. They do in proportion to the price of transporting the raw material, fuel, &c.

Question. Are there any furnaces or forges in operation in your section of the country propelled by steam?

Answer. None; they all go by water.

Question. Is it a fair average that three tons of the ore in your section of the country will make one ton of iron?

Answer. It is, if the ore be of the best kind. If it be inferior, it requires more; but that additional quantity does not affect the estimate, because the ore costs less.

Question. Is five hundred bushels of coal the usual quantity necessary for making a ton of iron?

Answer. It is, if the ore be such as is referred to in the first part of my last answer. All our ore is converted directly into bar iron at the forge without the intervention of a furnace.

Question. Is $2,000 a fair estimate for the water privilege, lot, and dam; and are $2,000, in addition, an equivalent for buildings, forges, &c.?

Answer. These are fair estimates. Such an establishment, with two fires and one forge-hammer, will make seventy-five tons of iron annually.

Question. What is the capacity of the country to furnish ore?

Answer. The quantity of ore within forty miles of my residence appears to be wholly inexhaustible, and would seem to be enough to last the United States for centuries. The water-power is very great and much of the country still a wilderness, furnishing materials for great quantities of coal, but that may ultimately fail.

Question. Have the expenses of manufacturing iron increased of late?

Answer. I do not think they have for the last five years. There have been variations in several of the items of expense, but I think the average about the same.

Question. From your knowledge of the manufacture of iron, do you think that hoop iron is sufficiently protected?

Answer. I think that it is sufficiently protected.

Question. Is there sufficient protection to boiler and sheet iron?

Answer. I have been inclined to think it would not be bad policy to afford further protection to thin sheet iron. The boiler iron I do not think requires it. I draw this conclusion from the fact that all, or mostly all, we use is manufactured in the United States.

Question. Do rolled and slit nail and spike rods require further protection?

Answer. I think not. There is a kind of hammered iron, resembling the spike rods, imported from Russia. They interfere with the nail and spike rods, and affect their prices. I consider it an evasion of the revenue laws, because they are entered as hammered bar iron. The duty on this article I think should be increased, or provision made to prevent the evasion of the existing revenue laws by placing them on the footing of nail and spike rods.

Question. Do you know of any establishment for bar iron which was not a losing concern to the owner from the close of the war to the revision of the tariff?

Answer. Answering the question in general terms, I would say I know of none, except it was so situated as to be protected by a home market, which the foreign article could not well reach by reason of the cost of transportation.

Question. Does your experience enable you to form an opinion as to the necessity of an increase of duty on hammered bar iron?

Answer. On this subject I am of opinion that it would be prudent to increase the duty to one cent per pound. More than that I think would be impolitic, both for the country and the manufacturer. I am friendly to manufactures, but I am opposed to any sudden high increase of duties, upon the principle that such a course would be prejudicial to those interested in manufactures and to the community.

Question. Were any manufactories of bar iron, engaged in that solely, conducted profitably between 1818 and 1824?

Answer. I know of none that succeeded well who had to compete with the foreign article.

Question. As a friend to the permanent interests of our manufactures, do you deem it advisable that the manufacturer should be reasonable in his requisitions for protection?

Answer. I do. I think the manufacturers ought to be moderate and reasonable in asking for protection.

Adjourned until to-morrow morning, 10 o'clock.

FRIDAY, *January* 11, 1828.

Hon. Mr. Keese again admitted, and further examined:

Question. When you speak of the price of bar iron at $80 to $85 per ton, do you include small bars?

Answer. I speak of that from two to four inches in breadth and half an inch to an inch in thickness, or of square iron from an inch and a quarter to three inches square.

Question. If you drew small bars, either square or flat, for any particular purpose, did you sell for a higher price?

Answer. We did. Iron bars of an inch square would be $5 per ton higher than coarser iron.

Question. Is there any hammered bar iron made in your section of the country from pigs?

Answer. I know of none.

Question. The estimate you have furnished supposes you to make 75 tons per year. How many men would it take to dig the ore, draw it, cut the wood, prepare the coal and deliver the coal, do the labor of the forge, and such other services as are incident and necessary?

Answer. From the best estimate I have been able to make, I am of opinion it would require seventeen laborers, able-bodied men.

Question. If the forge was at the ore bed, would it not follow, as a consequence, that the second item of your estimate of $450 for carting the ore would be deducted from the cost of making the seventy-five tons?

Answer. It would.

Question. What is coal worth at the coal bed?

Answer. It is worth from three and a half to four cents per bushel. Those who buy in that way generally pay about that price, depending upon its distance from the forge.

Question. In your estimate furnished to us, where you say that iron is worth at the forge from $80 to $85 per ton, are we to understand that this is independent and exclusive of the item of $1 50 for carting it to the lake, of $4 50 for freight, wharfage, &c., and $3 37 for commissions on sales?

Answer. You are so to understand it.

Question. Is the bar iron of your section of country considered as valuable in price and quality as the bar iron made on the Juniata, in Pennsylvania?

Answer. I think that which we call the Peru iron, in point of tenacity, is equal to any in the world; but from the reputation of the refined iron made on the Juniata I am inclined to think *it* more valuable for many uses.

Hon. John Mitchell, of Bellefonte, Centre county, Pennsylvania, admitted and sworn:

Question. Are you now, or have you been, engaged in the manufacture of iron?

Answer. I have been, but am not at this time. I was engaged in it nine or ten years.

Question. When did you cease to have an interest in such works?

Answer. Some time in the year 1815.

Question. Have you an intimate knowledge of the iron business in your section of country?

Answer. I think I have as good as any one can be supposed to have who is not an immediate manager of such an establishment.

Question. In what kind of iron were you engaged in the manufacture?

Answer. Both in pig metal and bar iron.

Question. What quantity of bar iron do you suppose is manufactured in your section of country?

Answer. In the counties of Mifflin, Huntingdon, and Centre, I estimate the quantity of *bar* iron at 4,000 tons (of 2,240 pounds) per annum.

Question. What quantity of other iron do you suppose is manufactured?

Answer. In the counties alluded to I estimate the quantity of pig iron and castings at 8,500 tons, from which the 4,000 tons above mentioned are manufactured. The remainder is sold as pigs and castings. 6,000 tons of pig iron will produce 4,000 tons of bar iron; and it is sometimes a part of the contract with the workmen that they shall make it yield that quantity.

An estimate of the sum total of iron annually manufactured in Pennsylvania: Bar iron, 21,800 tons; cast metal, 47,075 tons, of which 32,700 tons are used in the manufacturing of the bar iron; 14,375 tons are made into castings, a part in air and a part in blast furnaces.

Question. What is the value of the bar iron at the works?

Answer. There is but little sold for cash at the works. It is most usually bartered or exchanged, and the fixed settled price is then $100 per ton. It is sometimes sold for cash at the works, when the necessities of the holder compel him to take less; but this is so seldom done that there is no fixed cash price.

Question. What is the ordinary price of pig metal at the furnace?

Answer. It is $26 67, ordinarily; it is so when the barter price of bar iron is $100 per ton.

Question. Where is the bar iron sent for a market?

Answer. A small part is sent to Baltimore and Philadelphia; a still smaller proportion of the whole quantity is manufactured into rolled sheet iron, nails, and wood screws. The remainder is generally sent westward; and I think the quantity sent to the west constitutes two-thirds of the whole manufacture. The surplus of pig metal comes to the south, principally to Philadelphia, Baltimore, and Washington city.

Question. What is the expense of transportation to Baltimore?

Answer. It is about $10 per ton.

Question. What is the cost to Philadelphia?

Answer. I presume it will cost $12 per ton.

Question. What is the cost to Pittsburg?

Answer. From $25 to $35 per ton. If it is taken partly by water, as it may be done at some seasons of the year, it will cost $25; if carried altogether by land it will cost $35, and this latter price varies in proportion to the price of horse feed.

Question. Where is the western market?

Answer. Pittsburg is the market for all that goes westward, except when some of the iron masters go down the river and establish iron stores, where they sell out in small quantities, by the short ton, and at better prices. Some others seek for a market on the river, without making such establishments.

Question. What is the price in Pittsburg?

Answer. The price in Pittsburg varies from $100 to $115 per ton.

Question. What are the prices in Baltimore and Philadelphia?

Answer. In Baltimore and Philadelphia they vary from $85 to $95 per ton. I think it sold last spring at $95.

Question. What quantity of iron was manufactured in the counties of which you speak from the years 1815 to 1820?

Answer. There were as many forges built in 1820 as there are now, but they were not all in operation. There were 450 tons more manufactured in 1827 than there were in 1820. I speak of bar iron.

Question. From the present state of the business, do you think it likely that the business will increase?

Answer. I think not. The scarcity of timber in the neighborhood of ore beds will prevent any *considerable* increase. There may, perhaps, be an increase of 600 tons per year.

Question. What is the product annually of each finery fire?

Answer. The estimate is generally 100 tons. Some make it, many do not.

Question. What is the expense of making a ton of bar iron from the pigs?

Answer. I have made an estimate including all the expenses, except the household expenses of the proprietor; it amounts to $75, and in this is included the price or value of the pigs, worth $26 67 per ton. All the bar iron made in our section of country is made from pigs.

Question. Which is the most expensive process to make bar iron, from pigs or by bloomery?

Answer. I cannot speak with certainty from my own knowledge or experience, as there are no bloomeries in our section of country, but have always considered that the bloomery was most expensive.

Question. Do you think further protection necessary to sheet iron or boiler iron?

Answer. I know of no reason why a further protection should be afforded to boiler iron. As to sheet iron, I should say it affords a reasonable profit. But if additional protection should be afforded to bar iron, then sheet iron may require it, by reason of the increase of the price of the article from which it is now made. At present they do not require it.

Question. Do you think nails require further protection?

Answer. I think not; but they may, on the contingencies referred to in the last answer.

Question. Has there been any variation in the price of nails since 1820?

Answer. The prices have varied but little for the last six or seven years. The average price is from seven to ten cents per pound, and they are generally sold for home consumption. We consider the price as reasonably low.

Question. Where are the works of which you speak situated?

Answer. They are on the waters of the Susquehanna and Juniata. When the article goes westward, it bears the name of Juniata iron. The quality is the same.

Question. Are there any works going by steam?

Answer. None. They are all propelled by water.

Question. What quantity of iron is manufactured into nails in your section of country?

Answer. I think about 100 tons are converted into nails.

Question. Have the expenses of manufacturing iron increased since 1820?

Answer. I think not. I take it that the expense is about the same.

Question. Have you satisfied yourself whether a further protection is necessary on hammered bar iron?

Answer. I think a small protection, such as would not interfere too much with the agriculturist or farmer, is necessary.

Question. What do you think that protection should be?

Answer. If there was an addition of $5 per ton, it would enable the manufacturer to meet the fluctuations in the prices, without, I think, pressing too heavily on the agriculturist.

Question. As a friend to the permanent interests of our manufactures, do you deem it advisable that the manufacturers should be reasonable in the protection they ask?

Answer. I am friendly to manufactures, but am of opinion the protection should be reasonable; not sudden or extravagant.

Question. When you say that you think it would be well to lay an additional duty of $5 per ton on bar iron, are you to be understood as expressing the opinion that that additional duty is necessary to enable them to carry it on with a reasonable or fair profit?

Answer. I do not think that such additional duty would be giving him an unreasonable profit, considering the capital employed.

Question. Can the manufacturer carry it on at the present rate of duty with a fair or reasonable profit?

Answer. The only profit which the manufacturer receives on what he now manufactures and brings to Baltimore and Philadelphia arises from his exchanging the iron for goods, and retailing them to his workmen and others.

Question. What profit does he make on that which he sends to Pittsburg?

Answer. What he sells at $100 per ton he makes nothing on. His profit on what he sells above that price is in proportion as it exceeds $100 per ton, because it costs him that sum to get it there. This profit arises from sales of merchandise and provisions made to his hands at an advance, and which he supposes to be equal to the expenses of his family; these expenses are not, however, considered in the estimate I have made on the cost of making a ton of iron.

Question. Can you undertake to say to what extent the foreign article interferes with that of the home manufacture at Pittsburg?

Answer. I cannot. I have no knowledge whether any of the foreign article is brought to the Pittsburg market.

Question. How many tons of ore are required to make a ton of pigs?

Answer. That depends very much upon the quality of the ore; or, perhaps, more upon the manner in which it is cleaned. I am of opinion the average is from two and a half to three tons.

Question. How many bushels of coal are consumed in making a ton of pigs?

Answer. There is much difficulty in answering this question, by reason of the uncertainty in the working of a furnace. But the average, I think, may be stated at 220 bushels.

Question. How many bushels of coal are consumed in making a ton of bar iron from pigs?

Answer. One hundred and seventy-five bushels is the computed average for making and drawing a ton of bar iron from pigs. The quantity will sometimes vary by reason of the quality of the coal.

Question. What is the price of furnace coal and forge coal at these factories?

Answer. Forge coal is worth six cents per bushel, when delivered at the forge. The furnace coal is worth five cents.

Question. What is the cost of a ton of ore at the works?

Answer. The price varies very materially, depending upon the facilities of raising it at different banks and the distance from the furnace. I think the average about $5 per ton.

Question. What quantity of pig iron will make a ton of bar iron?

Answer. One and a half ton.

On motion of Mr. Moore,

Ordered, That a subpœna be issued for William W. Young, Wilmington, Delaware, to be examined on the subject of woolen goods.

Adjourned until Monday morning, 10 o'clock.

MONDAY, *January* 14, 1828.

Hon. Mr. Mitchell again admitted, and further examined:

Question. Is the present low price of nails owing to importations, or is it owing to domestic competition?

Answer. I am not aware that those imported reach that section of the country, and conclude that the low prices are occasioned by domestic competition.

Question. Are wood screws manufactured in your section of country, and to what extent?

Answer. There is one manufactory of wood screws in Centre county. At present they make a quantity merely to keep the hands together, and it is a losing concern. The machinery in that establishment is competent to furnish 150 gross in every twenty-four hours. This establishment completes the screw, taking the iron in the pig.

Question. Do you know the price?

Answer. I do not. They are sent to the seaport towns and sold at about the same the foreign article commands. I have no doubt they are there retailed, and again sent back to the same quarter of the country.

TUESDAY, *January* 22.

Joseph Jackson, of Rockaway, Morris county, New Jersey, admitted and sworn:

Question. Are you now, or have you heretofore been, engaged in the manufacture of iron? if yea, how long, and of what kind?

Answer. I am now engaged in the manufacture of bloomery iron, and have been engaged in it nearly all my life, and, since the year 1808, have been carrying on the business on my own account.

Question. What is the worth of bar iron from bloomery at your factory?

Answer. It has been, on the average, at our place, worth $75 per ton for the last year. In 1826 it was worth, on the average, about $80 per ton. In 1825 it was again worth about $75 per ton. Our ton is 2,240 pounds.

Question. Do you manufacture your bar iron into any other articles? and if you do, what are they?

Answer. I have a rolling-mill in which we roll the iron into rods from $\frac{3}{8}$ inch to 3 inches in diameter. The various squares from $\frac{3}{8}$ to 1 inch spike and nail rods, slit band iron, scroll irons, &c., &c. Scroll iron is a small kind of hoop iron of from $\frac{3}{4}$ to $1\frac{1}{4}$ inch wide, and from No. 1 to 14 wire gauge in thickness.

Question. Are there other iron works in your section of country? If there are, what articles do they manufacture, or into what do they convert their bar iron?

Answer. There is one very large establishment in my neighborhood doing the same kind of business with my works, and which is said to roll one thousand tons of iron annually, but I cannot say whether it does so much. Connected with this establishment is a factory of hoop iron for small hoops, and a furnace for smelting and drawing bars of iron from scrap iron. I know of no other rolling-mill in my county except my own. Connected also with this large rolling-mill there is a manufactory of chain cables, which they make from their own iron, and roll at their own works. This company has but one forge and two fires for their rolling-mills. Within a circle of thirty miles diameter, and embracing my works, there are 81 forge fires now in use. Each forge has usually two fires and one hammer. In the same circumference there are about thirty forge fires now abandoned and out of use; all of which went out prior to the year 1818. These works were not abandoned from bad location, nor from their want of ore, coal, or water-power, but from the very low price of iron, which at that time ranged in New York as low as from $60 to $65 per ton.

Question. Do you transport your iron by land or water; and what is the cost of carrying it to market?

Answer. Our nearest water transportation, in carrying our iron to the New York market, is 22 miles from my works. The distance then by water to New York is about 21 miles, and the average cost of land and water transportation of a ton of iron from my works to New York is $3 75.

Question. What quantity of iron will a forge fire make per year?

Answer. The average through the county has been called twenty-five tons made by each forge fire; but some fires have made as much as thirty-five tons in one year.

Question. How many tons of ore is necessary to make a ton of iron; and what is the cost of that ore per ton?

Answer. The average quantity is three tons of ore to one ton of bar iron; the ore is worth, on the average, $4 per ton at my forge.

Question. What quantity of coal does it require to make a ton of iron; and what is that coal worth at the forge?

Answer. The average is about 800 bushels of coal to make one ton of bar iron from the ore, and coal is worth five cents per bushel, delivered at the forge. Our coal is made of nearly all descriptions of timber in the country, such as oak, chestnut, &c.

Question. Have you bought iron in the neighborhood; and if you have, at what price?

Answer. I have bought at my rolling-mill, for the last three years, an average of about two hundred tons of bar iron annually, and have paid from $75 to $80 per ton. This iron, together with what I make in my own forges, I roll in my mills, and sell in the New York market.

Question. What are the prices of bar and rolled iron in New York?

Answer. When iron is worth $75 at my works it will average about $80 in the New York market. Rolled iron, from $\frac{3}{8}$ to $\frac{3}{4}$ inch diameter, would be worth about $110 per ton; $\frac{3}{4}$ inch and upwards would command about $100 per ton; scrolls and small squares, $110 per ton; band and nail rods, $100 per ton.

Question. What do you pay the bloomer for his labor in making a ton of iron?

Answer. We pay the bloomers for making a ton of bar iron $16 50, and they find themselves. The coal costs $42 50, and three tons of ore cost $12.

Question. Has the business of making iron increased or diminished within the last two or three years in your section of country, and to what extent?

Answer. It has increased, and some new works have been erected, though very few of the old which had gone down have been revived; partly because they have fallen into the hands of men who do not yet offer them for sale.

Question. Are there any furnaces in your section of country; and if any, how many?

Answer. There are within the district of country before spoken of two furnaces now in operation, and there are six in ruins, and not now in use. I cannot state the causes which stopped five of these furnaces, but the sixth, called the "Hibernia Furnace," stopped about 1818, and I think from the same causes which destroyed the forges before spoken of. The two furnaces now in use are employed in various castings, but I think make no pig. They have cast some ballast.

Question. What is the capacity of the country to produce iron?

Answer. We consider the ore in that country inexhaustible, and that not more than one-half of the water-power is now advantageously employed. The ore is of the first quality, easily accessible, and generally within from twenty chains to ten miles of all the forges. The streams have fine falls, and are but little impeded by frost or drought. The quantity of wood for coal is now abundant, and a large share of the country is so broken and rocky that much of the land, when the wood is taken off, will be left to grow another crop of timber.

Question. Have the expenses of manufacturing iron increased within three or four years last past?

Answer. No, I cannot say they have; there has been very little alteration.

Question. Is hoop iron sufficiently protected?

Answer. At the present rates of duty hoop iron is sufficiently protected.

Question. Is sheet iron sufficiently protected?

Answer. It is.

Question. Do nail and spike rods require further protection?

Answer. It is requisite to amend the law, by inserting the word "rolled" in describing nail and spike rods in the law, and the protection should be extended to rods of $\frac{3}{4}$ inch diameter, inasmuch as a description of rolled rods are imported which the law does not reach.

Question. Does your experience enable you to form an opinion as to the necessity of increasing the duties on hammered bar iron?

Answer. I am fully persuaded that the duty of 1824 aided in helping us to meet the Russia and Swedes iron in the market, but it is not sufficient. A small addition would enable us to come into the market on equal terms, but we cannot now do it. I think the manufacture of bar iron must decline unless it is further protected. I think it may be wiser not to increase the duty higher than to one cent per pound at this time.

Question. If the business of manufacturing bar iron is as bad as you represent it, and if others in your neighborhood have failed in it, how have you been able to sustain yourself; and why have you continued the business?

Answer. I have been able to sustain myself because I carry on a farm, and the manufacturing establishments furnish a good market for my farming produce. I also keep a store, and pay for a share of the labor of my workmen out of the store and get a profit on my goods. I have also a grist-mill and a saw-mill, which have aided me in my buildings, &c.; but establishments unconnected with these or like advantages have failed. My rolling-mill also enables me to do more business, and upon which I get a little profit, and I have continued to hope for better times. I have also some Government contracts which have assisted me, not so much by an advance of price as by a sure market for a large quantity; which enabled me to proceed with certainty, and without being subjected to the fluctuations of the market for the manufacture.

Question. Do you know that there are other establishments in the State of New Jersey for manufacturing iron in bars, castings, and pigs? If so, where?

Answer. There are other extensive iron establishments in what is called West Jersey, which have not been referred to in my former examination. I think the establishments for castings and cast iron are more extensive in that section of my State than in the section to which I have referred; but the present extent of the bar iron establishments in that section I cannot state. In 1824 their extent in that section of New Jersey, and in the section to which I have referred, differed very little. Since that time I have no means of determining the state of the bar iron establishments in West Jersey.

Question. Are there in that section of New Jersey extensive beds of iron ore? If so, of what quality and extent?

Answer. I have no personal knowledge as to this question; but my information is, that the quantities of ore in West Jersey are very abundant, and that the qualities are good for castings, but not so good for bar iron by bloomery process.

Question. What is the average value or cost of a water privilege, lot, dam, and forge, with two fires, together with the necessary coal-houses and other out-buildings, in your section of country?

Answer. By a list furnished by me in 1817 to the honorable Lewis Condict, and which has not materially varied since, there were then in Morris county fifty-one forges in operation. The capital employed was $470,000. There were manufactured during the year 1816, in bar iron, 1,240 tons, which was supposed could have been extended, with the works then in operation, to 1,847 tons. The average cost of each fire would be $9,215, which includes the lands then attached to the different establishments, used for the purposes of making coal only. The farm lands, meadows, &c., are not estimated in the above.

A water privilege, lot, dam, and forge, with two fires, will vary very much, owing to its location and convenience for building, and distance from the iron mines and New York; my estimate would be $4,000. In 1816 the number of men was 1,855, employed as laborers in the manufacturing of bar iron in Morris county only.

Question. What is the expense of rolling a ton of bar iron into iron of an inch square; and what weight will the ton of iron lose in being converted into such square iron?

Answer. It will cost to roll one ton	$14 87
The loss is, as near as I can estimate it, 3 per cent. on $80	2 40
	17 27

Two tons a day constitute the average work, which yields a profit on rolling of $2 73 per ton, equal to $5 46 per day, on an establishment worth $20,000.

Question. Have you examined the estimates and calculations attached to a petition and memorial of the inhabitants of the counties of Morris, Bergen, and Sussex, in your State, dated 18th January, 1828? If yea, are those estimates and calculations substantially correct?

Answer. I have examined these estimates, and find them in every material particular correct, and I refer to them as a part of this answer.

A STATEMENT OF FACTS AND ESTIMATES SHOWING THE NATURE, EXTENT, AND RESULTS OF THE IRON-MAKING BUSINESS AS CONDUCTED IN THAT SECTION OF THE STATE OF NEW JERSEY REFERRED TO IN THE PRECEDING MEMORIAL.

1*st. The nature of the business.*

The iron-making business in this section of country is principally conducted by persons who have severally commenced their operations by the purchase of a tract of land, embracing the necessary water-power for propelling the works, and affording a sufficient quantity of timber to supply them with coal for a number of years. In the improvement of such tracts, the first step is the erection of a dam, a forge, or iron mill, which usually contains two fires; two pair of bellows; one hammer, anvil, and the harness connected therewith; two water wheels to move the bellows and ore-stampers, and one for the hammer; a coal-house; a smith's shop; and dwellings for the owner and workmen.

The business then proceeds in the employment of the necessary workmen, such as wood-choppers, colliers, teamsters, and forgemen, and the preparation of teams for carting the coal, ore, and iron. It is the practice of the owners, in the prosecution of their business, to furnish to the workmen at the works such supplies of provisions and other necessaries as they may require.

2*d. The extent of the business and facilities for enlarging it.*

1st. The amount of iron actually made per annum, so far as the same can be ascertained by the returns from the different forge owners, is 2,750 tons.

2. The amount of capital invested embraces the following items, viz: Cost of erecting 110 forge fires now in operation, at an average expense, including machinery, dams, and coal-houses, of $1,500 each	$165,000 00
Amount invested in wood land, allowing each fire to require 750 acres for its support in producing its proportion of the 2,750 tons made in all, equal to 82,500 acres, at an average price (the water privileges included) at $10 per acre	825,000 00
The expense of teams, tools, &c., for each fire, is $500	55,000 00
Cost of houses for the accommodation of workmen, allowing to each fire five houses, at $200 each, $1,000	110,000 00
Amount of floating capital necessary to conduct the business, $500 for each fire	55,000 00
	1,210,000 00

3. The number of workmen employed in the business, allowing each fire to require two forgemen, two colliers, two cartmen, one coal-stocker, five wood-choppers, and a carpenter and blacksmith, equal to one hand, are thirteen to each fire, numbering in all 1,430 workmen, who, with their families of four persons each, make the number of souls dependent upon the business 5,720.

4. The facilities for extending the business are ample. There are now in operation, as appears by this statement, 110 forge fires, producing, on an average, about 25 tons each per annum. Were sufficient encouragement afforded, it is presumed that these fires would be made to produce 35 tons each per annum, instead of the present quantity, and that a number more of equal ability would soon be put in operation, all of which could be fully supported with charcoal and ore, the materials now used in the manufacture.

3*d. The results of the business and details of the manufacture.*

To make one ton of bar iron it requires—	
Three tons of ore, at an average cost of $5 per ton	$15 00
Ten loads of coal, at $4 per load	40 00
The additional expenses are—	
Stocking ten loads of coal, at 1*s*	1 25
Small repairs of forge, per ton	1 50
Wages of workmen for making, per ton	16 50
Average expense of cartage and freight to New York, per ton	5 00
	79 25

The average price of American bar iron in New York for most of the time during the last eleven years has not been greater than it now is, viz: $70 to $80 per ton.

In the above estimate of cost in making one ton of iron, it is assumed that the coal and ore are purchased by the manufacturer at the current prices. If, however, the coal is made upon his own premises, and the ore raised from his own mine, the following estimate will show the result:

Cost of cutting 20 cords of wood for one ton of iron, at 3*s*. per cord	$7 50
Cooling 10 loads of coal, at 12*s*. per load	15 00
Carting 10 loads of coal, at 8*s*. per load	10 00
Stocking 10 loads of coal, at 1*s*. per load	1 25
Raising 3 tons of ore, at 12*s*. per ton	4 50
Carting 3 tons of ore, at 8*s*. per ton	3 00
Wages for making 1 ton of iron	16 50
Small repairs of forge per ton	1 50
Cartage and freight to New York, per ton	5 00
	64 25

Should an allowance be made in the last estimate for the value of the standing wood used in making the coal, and of the ore in the bed, the following sum should be added to the amount of this estimate, viz:

Twenty cords of standing wood, at 4*s.* per cord	$10 00
Three tons of ore in the bed, at 12*s.* per ton	4 50
	14 50
Amount of last estimate added	64 25
	78 75
